The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems notices also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tape, disc, drum and punched cards and computer printouts. Manual records are stored in paper file folders.

RETRIEVABILITY:

Information is retrieved by Social Security Number or other similar substitute if there is no Social Security Number, position number, name, or by specific employee characteristics such as date of birth, grade, occupation, employing organization, tickler dates, academic specialty level.

SAFEGUARDS:

The computer facility and terminal are accessible only to authorized persons that have been properly screened, cleared and trained. Manual and automated records and computer printouts are available only to authorized personnel having a need-to-know.

RETENTION AND DISPOSAL:

Input documents are destroyed after data are converted to magnetic medium. Information is stored in magnetic medium within the ADP system. Information recorded via magnetic medium will be retained permanently. For TIMS and the apprentice programs the computer magnetic tapes are permanent. Manual records are maintained on a fiscal year basis and are retained for varying periods from one to five years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203-1998 and the commanding officers at the employee's activity.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203-1998 or to the civilian personnel officer under his/her congnizance. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

The request should contain the individual's full name, Social Security Number and name of employing activity. Requesters may visit the civilian personnel office at the naval activity covered by the system to obtain information. In such case, proof of identity will consist of full name, Social Security Number and a third positive identification such as a driver's license, Navy building pass or identification badge, birth certificate, Medicare card, etc.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203-1998 or to the civilian personnel officer under his/her cognizance. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

The request should contain the individual's full name, Social Security Number and name of employing activity. Requesters may visit the civilian personnel office at the naval activity covered by the system to obtain information. In such case, proof of identity will consist of full name, Social Security Number and a third positive identification such as a driver's license, Navy building pass or identification badge, birth certificate, Medicare card, etc.

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Categories of sources of records in this system are: the civilian personnel office of the employing activity; the payroll office; OCPM headquarters; the security office of the employing activity; line managers, other designated officials and supervisors; the employee and persons named by the employee as references.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

(CFDA NO: 84.103)

Training Program for Special Programs Staff and Leadership Personnel; Inviting Applications for Fiscal Year 1991

Purpose: Provides funding through a cooperative agreement to an institution of higher education, or other public or private nonprofit institution or organization for the conduct of a workshop for the Special Programs for Students from Disadvantaged Backgrounds (Student Support Services, Upward Bound, Talent Search, Educational Opportunity Centers, Ronald E. McNair Post-Baccalaureate Achievement, and the Training Program for Special Programs Staff and Leadership Personnel programs) that reviews and reinforces administrative and management practices essential to effective program operations.

Deadline for Transmittal of Applications: July 30, 1991.

Application Availability: June 18, 1991.

Available Funds: $400,000.

Estimated Range of Award: $400,000.

Estimated Average Size of Award: $400,000.

Estimated Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: 15 months.

Applicable Regulations: (a) The Training Program for Special Programs Staff and Leadership Personnel Regulations, 34 CFR part 642, and (b) the Education Department General Administrative Regulations, 34 CFR parts 74, 75, 77, 79, 82, 85, and 86.

Funding Priorities: Under 34 CFR 75.105(c)(3) of the Education Department General Administrative Regulations (EDGAR) and 34 CFR 642.34 of the program regulations, the Secretary proposes to give an absolute preference to applications that meet the following priorities. The Secretary proposes to fund under this competition only applications that meet these absolute priorities:

(1) Strategies for preparing students for doctoral studies; and

(2) Reporting student and project performance.

For Applications of Information Contact: May J. Weaver, U.S. Department of Education, 400 Maryland Avenue, SW., room 3060, ROB #3, Washington, DC 20202-5249. Telephone: (202) 708-4804. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1070d, 1070d-1d.

Dated: June 7, 1991.

Michael Farrell,

Acting Assistance Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Floodplain Notification for Proposed Removal Action at the Feed Materials Production Center, Fernald, OH

AGENCY: Department of Energy.

ACTION: Notice of Floodplain involvement and opportunity to comment.

SUMMARY: The U.S. Department of Energy (DOE) proposes a removal action to manage the radioactively contaminated groundwater in an area south of the Feed Materials Production Center (FMPC) located near Fernald, Ohio. The removal action is required under a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) sections 120 and 106(a) Consent Agreement between DOE and the U.S. Environmental Protection Agency (EPA). The fundamental objective of the removal action is to protect public health by limiting access to and use of groundwater with uranium concentrations exceeding the DOE-derived concentration limit for uranium in drinking water. The proposed action would involve the installation of groundwater pumping wells and a transfer pump station, at grade, in the 100-year floodplain. In addition, an underground discharge line would be installed, leading north from the pump station to the FMPC, and from there eastward to an outfall in the Great Miami River. The line running north

VOL 56 ISS 115 JE 14 1991 UMI

would be about 9,000 feet long, of which 730 feet would be in the 100-year floodplain. The outfall line would be approximately 4,400 feet long, most of which would be in the 100-year floodplain. Also, an underground pipeline would be installed to two industries located in the 100-year floodplain. Approximately 3,300 feet of this pipeline would be in the 100-year floodplain. The proposed action would be carried out with the concurrence of the U.S. EPA and the Ohio EPA. The action would be performed in such a manner as to avoid or minimize impacts to the 100-year floodplain. Preliminary calculations indicate that only about 8 acres out of a total of 1,600 acres in the 100-year floodplain from Mile 19 to Mile 24 of the Great Miami River would be affected. As a result, there would be a minimal change in the downstream elevation. In accordance with DOE regulations 10 CFR part 1022, DOE would prepare a floodplain assessment to be included in the Engineering Evaluation/Cost Analysis-Environmental Assessment, which would be available for public inspection in the Administrative Record and will be distributed in accordance with 40 CFR 1506.6(b). Maps and further information are available from DOE at the address shown below.

DATES: Comments must be received by DOE at the following address July 1, 1991.

ADDRESSES:

Mail comments to: Mr. Jack C. Craig, DOE, Fernald Site Office, FMPC Remedial Action Project Director, P.O. Box 398705, Cincinnati, Ohio 45239-8705.

Fax comments to: (513) 738-6650.

Issued in Washington, DC, this 7th day of June, 1991.

Leo P. Duffy,

Director, Office of Environmental Restoration and Waste Management.

BILLING CODE 6450-01-M

Office of Fossil Energy

[Docket No. FE C&E 91-14; Certification Notice—82]

Filing Certification of Compliance: Coal Capability of New Electric Powerplant Pursuant to Provisions of the Powerplant and Industrial Fuel Use Act, as Amended

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (FUA section 201(a), 42 U.S.C. 8311(a), Supp. V. 1987). In order to meet the requirement of coal capability, the owner or operator of any new electric powerplant to be operated as a baseload powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to FUA section 201(d), to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the Federal Register a notice reciting that the certification has been filed. One owner and operator of proposed new electric base load powerplant has a filed self-certification in accordance with section 201(d).

Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following company has a filed self-certification:

Name	Date received	Type of facility	Megawatt capacity	Location
Cabot Power Corporation, Boston, MA	05-30-91	Combine Cycle	235	Everett, MA.

Amendments to the FUA on May 21, 1987 (Public Law 100-42), altered the general prohibitions to include only new electric base load powerplants and to provide for the self-certification procedure.

Copies of this self-certification may be reviewed in the Office of Fuels Programs, Fossil Energy, room 3F-056, FE-52, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, or for further information call Myra Couch at (202) 586-6769.

Issued in Washington, DC on June 10, 1991.

Anthony J. Como,

Director, Office of Coal & Electricity, Office of Fuels Programs, Fossil Energy.

[FR Doc. 91-14324 Filed 6-13-91; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed; Week of May 3 Through May 10, 1991

During the Week of May 3 through May 10, 1991, the appeals and applications for exception of other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: June 10, 1991.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

(Week of May 3 through May 10, 1991)

Date	Name and location of applicant	Case No.	Type of submission
May 7, 1991	ERA/Dana Energy, Houston, TX	LRZ-0015	Interlocutory order. If granted: The Proposed Remedial Order issued to Dana Energy would be modified regarding interest on overcharges.
Do	Gulf/D.J. Adams, Washington, DC	RR300-37	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 10, 1988 Decision and Order (Case No. RF300-7164) issued to D.J. Adams would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Beaver Fuel Oil & Heating, Washington, DC	RR300-47	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 15, 1989 Decision and Order (Case No. RF300-455) issued to Beaver Fuel Oil & Heating would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Bookens Fuel Service, Inc., Washington, DC	RR300-31	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 9, 1989 Decision and Order (Case No. RF300-458) issued to Bookens Fuel Service, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Budney Fuel Oil Company, Washington, DC	RR300-38	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 15, 1989 Decision and Order (Case No. RF300-456) issued to Budney Fuel Oil Co. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Carpenter & Smith, Inc., Washington, DC	RR300-40	Request for modification/rescission in the Gulf refund proceeding. If granted: The January 17, 1989 Decision and Order (Case No. RF300-885) issued to Carpenter & Smith Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/De Sonss Oil & Service Corporation, Washington, DC.	RR300-48	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-4168) issued to De Sonss Oil & Service Corporation would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Dowling Fuel Company, Washington, DC	RR300-32	Request for modification/rescission in the Gulf refund proceeding. If granted: The May 5, 1989 Decision and Order (Case No. RF300-8024) issued to Dowling Fuel Co. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Dunkirk Aviation Sales & Service, Inc., Washington, DC.	RR300-45	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-640) issued to Dunkirk Aviation Sales & Service, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Fingles Fuel Corporation, Washington, DC	RR300-29	Request for modification/rescission in the Gulf refund proceeding. If granted: The December 6, 1988 Decision and Order (Case No. RF300-3350) issued to Fingles Fuel Corporation would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Fitch Oil Company, Inc., Washington, DC	RR300-26	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 15, 1989 Decision and Order (Case No. RF300-4981) issued to Fitch Oil Co., Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Benjamin A. Franklin Gulf, Washington, DC	RR300-49	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-639) issued to Benjamin A. Franklin Gulf would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/A Giordano & Sons, Inc., Washington, DC	RR300-33	Request for modification/rescission in the Gulf refund proceeding. If granted: The December 12, 1988 Decision and Order (Case No. RF300-2677) issued to A. Giordano & Sons Inc. Corporation would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Harvey Russell & Sons, Inc., Washington, DC	RR300-43	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-4168) issued to Harvey Russell & Sons, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Joy Oil Company, Washington, DC	RR300-27	Request for modification/rescission in the Gulf refund proceeding. If granted: The January 17, 1989 Decision and Order (Case No. RF300-890) issued to Joy Oil Company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Liberty Fuel Oil Company, Washington, DC	RR300-28	Request for modification/rescission in the Gulf refund proceeding. If granted: The January 31, 1989 Decision and Order (Case No. RF300-7167) issued to Liberty Fuel Oil Co. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.

VOL 56 ISS 115 JE 14 1991 UMI

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of May 3 through May 10, 1991]

Date	Name and location of applicant	Case No.	Type of submission
Do	Gulf/Joe. A. Majka & Sons, Inc., Washington, DC	RR300-23	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 7, 1988 Decision and Order (Case No. RF300-5010) issued to Joe. A. Majka & Sons would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Miller & Shenk, Inc., Washington, DC	RR300-46	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-4167) issued to Miller & Shenk, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Charles F. Ober & Sons, Inc., Washington, DC	RR300-35	Request for modification/rescission in the Gulf refund proceeding. If granted: The October 30, 1989 Decision and Order (Case No. RF300-6350) issued to Charles F. Ober & Sons, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Obergfell Fuel, Inc., Washington, DC	RR300-36	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 15, 1991 Decision and Order (Case No. RF300-458) issued to Obergfell Fuel, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Reid's Heating Service, Washington, DC	RR300-42	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-4165) issued to Reid's Heating Service would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Stem Brothers, Inc., Washington, DC	RR300-39	Request for modification/rescission in the Gulf refund proceeding. If granted: The May 10, 1989 Decision and Order (Case No. RF300-3739) issued to Stem Brothers, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Van Varick & Sons, Inc., Washington, DC	RR300-30	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 4, 1988 Decision and Order (Case No. RF300-6908) issued to Van Varick & Sons, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Walter E. Schwab Company, Washington, DC	RR300-50	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-638) issued to Walter E. Schwab Company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Warren Handley, Washington, DC	RR300-24	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 9, 1988 Decision and Order (Case No. RF300-5185) issued to Warren Handley would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Woolley Fuel Company, Washington, DC	RR300-25	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 21, 1989 Decision and Order (Case No. RF300-4162) issued to Woolley Fuel Company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Fred D. Wilkoff Company, Washington, DC	RR300-34	Request for modification/rescission in the Gulf refund proceeding. If granted: The January 17, 1989 Decision and Order (Case No. RF300-689) issued to Fred D. Wilkoff Company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Williams Oil Company, Inc., Washington, DC	RR300-44	Request for modification/rescission in the Gulf refund proceeding. If granted: The May 5, 1989 Decision and Order (Case No. RF300-8021) issued to Williams Oil Company, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
May 8, 1991	Gulf/Northern Illinois Gas Company, Washington, DC	RR272-72	Request for modification/rescission in the Crude oil refund proceeding. If granted: The April 8, 1989 Decision and Order (Case No. RF272-19930) issued to Northern Illinois Gas Company would be modified regarding the firm's application for refund submitted in the Crude Oil refund proceeding.
May 9, 1991	Kirkpatrick & Lockhart, Washington, DC	LFA-0118	Appeal of an information request denial. If granted: Kirkpatrick & Lockhart would receive access to copies of records pertaining to license agreements & royalties, fees, payments, and the criteria for setting the royalties, fees or payments in connection with a specified patent.
Apr. 10, 1991	Gulf/Stephen H. Sack, Washington, DC	RR300-22	Request for modification/rescission in the Gulf refund proceeding. If granted: The April 17, 1991 Decision and Order (Case No. RF300-6092) issued to Stephen H. Sack would be modified regarding his application for refund submitted in the Gulf refund proceeding.

BILLING CODE 6450-01-M

Cases Filed; Week of May 10 Through May 17, 1991

During the Week of May 10 through May 17, 1991, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 110 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: June 10, 1991.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of May 10 through May 17, 1991]

Date	Name and location of applicant	Case no.	Type of submission
May 13, 1991	Linda Loiacano, Metairie, LA	LFA-0121	Appeal of an information request denial. If granted: The April 24, 1991 Freedom of Information Request Denial issued by the Oak Ridge Operations Office would be rescinded and Linda Loiacano would receive access to DOE information.
Do	Texaco/Turbyfill Texaco, Hardin, KY	RR321-63	Request for modification/rescission in the Texaco refund proceeding. If granted: The August 23, 1990 Decision and Order (Case Nos. RF321-1863, RF321-3208 and RF321-5773) issued to Turbyfill Texaco would be modified regarding the firm's Application for Refund submitted in the Texaco refund proceeding.
Do	James L. Schwab, Spokane, WA	LFA-0120	Appeal of an information request denial. If granted: The May 2, 1991 Freedom of Information Request Denial issued by the Nevada Operations Office would be rescinded, and James L. Schwab would receive access to DOE information.
Do	James L. Schwab, Spokane, WA	LFA-0119	Appeal of an information request denial. If granted: The May 1, 1991 Freedom of Information Request Denial issued by the Albuquerque Operations Office would be rescinded, and James L. Schwab would receive access to all information pertaining to an investigation which was not previously made available to him.
May 14, 1991	East River Corporation, Milford Mgt. Corp., Parkchester Mgt. Corp., Woods Mgt. Co., Washington, DC.	RR272-73, RR272-74, RR272-75, RR272-76	Request for modification/rescission in the Crude Oil refund proceeding. If granted: The February 27, March 27, April 10, and March 7, 1991 Decisions and Orders (Case Nos. RF272-45581, RF272-8337, RF272-64604 and RF272-10184) issued to East River Corporation, Milford Mgt. Corp., Parkchester Mgt. Corp., and Woods Mgt. Co. would be modified regarding the firms' Applications for Refund submitted in the Crude Oil refund proceeding.
May 15, 1991	Energy Research Corporation, Danbury, CT	LFA-0122	Appeal of an information request denial. If granted: The April 8, 1991 Freedom of Information Request Denial issued by the Chicago Operations Office would be rescinded, and Energy Research Corporation would receive access to DOE information.
Do	Gulf/Buddy's Fuel Oil Service, Washington, DC	RR300-65	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 10, 1988 Decision and Order (Case No. RF300-2671) issued to Buddy's Fuel Oil Service would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Burch Oil Company; Inc., Washington, DC	RR300-51	Request for modification/rescission in the Gulf refund proceeding. If granted: The June 23, 1989 Decision and Order (Case No. RF300-5415) issued to Burch Oil Company, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.

VOL 56 ISS 115 JE 14 1991 UMI

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of May 10 through May 17, 1991]

Date	Name and location of applicant	Case no.	Type of submission
Do	Gulf/C.R. Queenberry, Inc., Washington, DC	RR300-56	Request for modification/rescission in the Gulf refund proceeding. If granted: The April 27, 1991 Decision and Order (Case No. RF300-5216) issued to C.R. Queenberry, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Carolina Fuel Oil Company, Washington, DC	RR300-59	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 9, 1988 Decision and Order (Case No. RF300-5193) issued to Carolina Fuel Oil Company would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Charlottesville Oil Company, Inc., Washington, DC.	RR300-54	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 28, 1990 Decision and Order (Case No. RF300-9366) issued to Charlottesville Oil Company, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Davidson Ice & Fuel Company, Inc., Washington, DC.	RR300-60	Request for modification/rescission in the Gulf refund proceeding. If granted: The January 6, 1989 Decision and Order (Case No. RF300-3571) issued to Davidson Ice & Fuel Company, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Franco Distributors, Inc., Washington, DC	RR300-63	Request for modification/rescission in the Gulf refund proceeding. If granted: The May 12, 1989 Decision and Order (Case No. RF300-827) issued to Franco Distributors, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/J. Ray Hunter, Inc., Washington, DC	RR300-58	Request for modification/rescission in the Gulf refund proceeding. If granted: The December 28, 1989 Decision and Order (Case No. RF300-7877) issued to J. Ray Hunter, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Kelleher Corporation, Washington, DC	RR300-55	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 9, 1988 Decision and Order (Case No. RF300-5192) issued to Kelleher Corporation would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/S.H. Tevis & Son, Inc., Washington, DC	RR300-52	Request for modification/rescission in the Gulf refund proceeding. If granted: The October 18, 1989 Decision and Order (Case No. RR300-5254) issued to S.H. Tevis & Son, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Sherrill Ice & Fuel Company, Washington, DC	RR300-62	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 7, 1988 Decision and Order (Case No. RF300-4987) issued to Sherrill Ice & Fuel Company would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Rainbow Oil Company, Inc., Washington, DC	RR300-66	Request for modification/rescission in the Gulf refund proceeding. If granted: The December 26, 1989 Decision and Order (Case No. RF300-5221) issued to Rainbow Oil Company, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Steffey & Findlay, Inc., Washington, DC	RR300-53	Request for modification/rescission in the Gulf refund proceeding. If granted: The February 15, 1989 Decision and Order (Case No. RF300-452) issued to Steffey & Findlay, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Thomlinson & McWhite, Inc., Washington, DC	RR300-64	Request for modification/rescission in the Gulf refund proceeding. If granted: The November 7, 1988 Decision and Order (Case No. RF300-5014) issued to Thomlinson & McWhite, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Vails & Way Company, Gulf/Don Gantt Oil Company, Gulf/Etheridge Oil Company, Gulf/Walker Oil Company, Gulf/Coy Jackson, Jr., Inc., Washington, DC.	RR300-67, RR300-68, RR300-69, RR300-70, RR300-71	Request for modification/rescission in the Gulf refund proceeding. If granted: The March 7, 1990 Decision and Order (Case Nos. RF300-9373, RF300-9374, RF300-9375, RF300-9376, RF300-9378) issued to Vails & Way Company, Don Gantt Oil Co., Etheridge Oil Co., Walker Oil Co., and Coy Jackson, Jr., Inc. would be modified regarding the firms' Applications for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Wellman Oil Company, Inc., Washington, DC	RR300-61	Request for modification/rescission in the Gulf refund proceeding. If granted: The April 13, 1989 Decision and Order (Case No. RF300-5220) issued to Wellman Oil Company, Inc. would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Do	Gulf/Woodford Oil Company, Washington, DC	RR300-57	Request for modification/rescission in the Gulf refund proceeding. If granted: The August 11, 1989 Decision and Order (Case No. RF300-5481) issued to Woodford Oil Company would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.

REFUND APPLICATIONS RECEIVED

[Week of May 10 to May 17, 1991]

Date received	Name of firm	Case No.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of April 1 Through April 5, 1991

During the week of April 1 through April 5, 1991, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Firearms Training Systems, Inc., 4/2/91, LFA-0105

Firearms Training Systems, Inc., filed an Appeal from a denial by the Inspector General of a Freedom of Information Request. The appellant sought records of a pending investigation into a complaint that had been made by the appellant alleging improper use of its proprietary information. In his determination, the Inspector General found that the requested information fell within the scope of Exemption 7(a), which exempts from mandatory disclosure documents whose release could interfere with enforcement proceedings. The DOE rejected the appellant's contention that because it wants the investigation to proceed, release of the documents to it would not compromise the investigation. The DOE noted that the identity of a requester is irrelevant to whether documents must be released pursuant to the FOIA, and consequently, if the Inspector General released the requested documents to the appellant, it would then have to release the same material to any other requester. The DOE also noted that release of investigatory files to a complainant could, under some circumstances, allow the complainant to interfere with the investigation in a manner that would favor its position. However, the DOE found that the Inspector General's determination was deficient, because it did not give either a specific list or a general description of the withheld documents. Accordingly, the Appeal was granted in part and the matter was remanded to the Inspector General for a new determination that adequately describes the withheld documents and gives specific reasons why their release could interfere with the investigation.

Remedial Order

Mutual Petroleum Marketing Co., et al., 4/4/91, KRO-0340

Mutual Petroleum Marketing Co., Inc. (MPM), Mutual Petroleum Marketing Co. of California, Inc. (MPM-California), Mutual Petroleum Marketing Co. of Texas, Inc. (MPM-Texas), and Louisiana Bayou Oil Corporation (Bayou) filed Statements of Objections to a Proposed Remedial Order (PRO) which the Economic Regulatory Administration (ERA) issued to them on September 8, 1986. In the PRO, the ERA alleged that during the period July 1974 through December 1980 these firms committed separate violations of one or more of the following regulations: 10 CFR 212.93 (the Subpart F Permissible Average Markup or PAM regulation); 10 CFR 212.183 (the Subpart L PAM regulation); 10 CFR 212.186 (the layering regulation); and 10 CFR 210.62(c) and 205.202 (the normal business practices rule and anti-circumvention regulation). As an initial matter, the DOE accepted the ERA's requests to amend the PRO to eliminate the Subpart L PAM violations with respect to MPM and to substantially reduce MPM's alleged Subpart F PAM violation. The DOE next determined that the ERA had misapplied 10 CFR 212.111 in determining MPM's lawful selling price. Accordingly, the DOE dismissed the findings of price violations with respect to MPM. In considering the other respondents' objections, the DOE rejected several challenges to the procedural and substantive validity of the Subpart L PAM and layering regulations on the grounds that no new arguments had been presented that would cause it to reconsider determinations in previous cases. The DOE found that the ERA had not erred in treating MPM, MPM-California, and Bayou as separate firms for purposes of applying the price rule; that the ERA is not estopped from asserting a Class C resellers violation against MPM-California and Bayou, and that MPM-California had failed to establish any factual errors in the PRO's calculations. Accordingly, the DOE found that the PAM violations against MPM-California and Bayou should be upheld. The DOE also rejected MPM-Texas' argument that its crude oil trading activities did not constitute purchases and sales of crude oil for purposes of the DOE reseller regulations. In addition, the DOE found that PRO's interpretation of the layering rule was correct and that MPM-Texas, the respondents, had presented no evidence to refute the ERA's prima facie showing that it had provided no traditional and historical reseller services to its customers. The DOE concluded that the PRO's findings of layering with respect to MPM-Texas should be upheld and, therefore, it would not be efficient to determine the applicability of the normal business practices and anti-circumvention rules to the firm. Finally, the DOE modified the PRO to ensure that any monies collected would be distributed under the procedures of 10 CFR part 205, subpart V. The amount of the overcharges sustained in the Decision and Order totals $30,772,845.27.

Refund Applications

Anheuser-Busch Companies, Inc., 4/4/91, RF272-592, RD272-592

The DOE issued a Decision and Order concerning an Application for Refund submitted by Anheuser-Busch Companies, Inc. (Anheuser-Busch). The firm requested a refund based on its purchases of refined petroleum products during the period August 19, 1973, through January 27, 1981, pursuant to the provisions of 10 CFR part 205, subpart V (subpart V). A consortium of 28 states and two territories filed a "Statement of Objections" and "Motion for Discovery" with respect to the applicant's claim. The DOE determined that Anheuser-Busch's rights to a subpart V crude oil refund had been waived because two of its affiliates had executed a waiver and release and had received refunds from either the Rail and Water Transporters Escrow or the Surface Transporters Escrow. Thus, the affiliates and Anheuser-Busch are precluded from

VOL 56 ISS 115 JE 14 1991 UMI

seeking a subpart V crude oil refund. Therefore, the Application for Refund was denied and the States' Objections and Motion for Discovery were dismissed.

Dobbs Houses, Inc., 4/5/91, RF272–77497

The Department of Energy issued a Decision and Order granting a refund from the crude oil overcharge funds to Dobbs Houses, Inc., (Dobbs) based upon its purchases of refined petroleum products during the period August 19, 1973, through January 27, 1981. Dobbs was acquired by The Greyhound Corporation (Greyhound), a bus company that executed the Surface Transporters Escrow Settlement Claim Form and Waiver, in November 1987. Because Dobbs was acquired after August 7, 1986 (the Surface Transporters Escrow Account Payment Date), the DOE determined that Dobbs' right to a crude oil refund had not been waived and that the firm was eligible to receive a refund of $1,745.

Exxon Corporation/Karas Speedy Car Wash, Inc., 4/2/91, RF307–10178

The DOE issued a Decision and Order rescinding two refunds that were granted to Donald Kuhn *sub nom.* Karas Speedy Car Wash, (Case No. RF307–514) and Karas Car Wash, Inc. (Case No. RF307–515). After the two refunds were granted, the DOE discovered that Mr. Kuhn did not own the retail outlet in question during the period of time for which he sought a refund. For this reason and because Mr. Kuhn was unable to show that he was otherwise entitled to a refund for a period of time during which he did not own the outlet, the refunds previously granted to him were rescinded.

Henry G. Meigs, Inc., 4/5/91, RF272–70440

The DOE issued a Decision and Order granting a refund from crude oil overcharge funds to Henry G. Meigs, Inc., (Meigs) for a portion of its purchases of liquid asphalt, No. 6 fuel oil, and No. 2 fuel oil during the crude oil price control period. The DOE held that the portion of Meigs' purchases that were resold were ineligible as a basis for a refund, because Meigs had not submitted a detailed showing of injury for these purchases. However, the refined petroleum products that Meigs used in a non-petroleum-related business distinct from its reseller operations (cement production) were considered eligible for a refund under the end-use presumption of injury. Accordingly, Meigs received a refund of $63,312.

Jack B. Kelley, Inc., 4/5/91, RF272–75162

The DOE issued a Decision and Order denying an Application for Refund filed by Jack B. Kelley, Inc. (Kelley), in the Subpart V crude oil special refund proceeding. The DOE's denial was based on the fact that Kelley had applied for and had been granted a refund from the Surface Transporters Escrow and had, thereby, waived its right to a refund in the crude oil proceeding.

State of South Dakota, 4/1/91, RF272–19457

The DOE issued a Decision and Order concerning an Application for Refund that the State of South Dakota (South Dakota) filed in the crude oil fund being disbursed by the DOE under 10 CFR part 205, subpart V. The DOE determined that the refund claim was meritorious and granted a refund of $141,104. Philip P. Kalodner (Kalodner), counsel for Utilities, Transporters, and Manufacturers, filed Comments and Conditional Objections to South Dakota's Application for Refund. The DOE determined that Kalodner's Comments and Objection was insufficient to rebut the presumption of end-user injury. South Dakota will be eligible for additional refunds as additional crude oil overcharge funds become available.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

BILLING CODE 6450–01–M

Issuance of Proposed Decision and Order; Week of May 20 through May 24, 1991

During the week of May 20 through May 24, 1991, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR part 205, subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full test of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1 p.m. and 5 p.m., except federal holidays.

Dated: June 10, 1991.

George B. Breznay,

Director, Office of Hearings and Appeals

Ray Marchand Oil Co., Inc., Lowell, MA, LEE–0024, Reporting Requirements

Ray Marchand Oil Co., Inc. (Marchand), filed an Application for Exception from the requirement to prepare and file DOE Form EIA–782B. The exception request, if granted, would relieve Marchand of that obligation. On May 21, 1991, the Department of Energy issued a Proposed Decision and Order which tentatively concluded that the exception request be denied.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–3965–3]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared May 27, 1991 Through May 31, 1991 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 5, 1991 (56 FR 14096).

Draft EISs

ERP No. D–AFS–J02021–ND Rating EC2, Northern Little Missouri National Grassland Oil and Gas Leasing, Custer National Forest, Dunn, McKenzie, Golden Valley, and Billings Counties, MT.

Summary: EPA recommends the inclusion of a detailed discussion of the site-specific drilling program, offset well production, aquifers, and water resources habitat aquatic life in the final EIS. The draft EIS lacks the baseline data necessary to conduct a thorough analysis of proposed oil and gas leasing. EPA supports the Forest Service approach to protect and use designations for sensitive resources and encourages expanding such designations to include areas where water and air quality may be adversely impacted by oil and gas leasing.

ERP No. D–AFS–J61083–CO Rating EC2, Conundrum Marble Quarry Reopening, Implementation, Maroon Bells-Snowmass Wilderness Area, Section 404 Permit, Pitkin County, CO.

Summary: EPA is concerned about potential project impacts to wetlands, air and water quality. The final EIS should provide information regarding impacts to wetlands to permit a determination of project compliance with the Clean Water Act Section 404(b)(1) guidelines. EPA suggests that the final EIS should also discuss the purpose and need for the project as well as reasonable alternatives.

ERP No. D–AFS–J65178–MT Rating LO, St. Joseph Timber Sale and Road Management, Implementation, Bitterroot National Forest, Stevensville Ranger District, Ravalli and Missoula Counties, MT.

Summary: EPA has no objection to the Bitterroot National Forest's preferred alternative, Alternative C.

ERP No. D–AFS–J67011–CO Rating EC2, Divide Creek Unit Coal-Bed Methane Project, Continued Development, Leasing, Section 404 Permit, White River National Forest, Garfield and Mesa Counties, CO.

Summary: EPA is concerned about the project's potential to impact wetlands and water quality. The final EIS should consider alternative facility siting, design, and construction to minimize potential impacts.

ERP No. D–USN–L11013–00 Rating EO2, US West Coast Homeporting Program for Fast Combat Support Ships (AOE–6 Class), Implementation, Long Beach Naval Station, North Island Naval Air Station and San Diego Naval Station, CA and Puget Sound Naval Shipyard, Bremerton, WA.

Summary: EPA has reviewed this document and is concerned about infiltration, Tributylin contamination, in-water construction of a new mooring buoy and the rebuilding of existing platform "G". EPA has rated the alternative for homeporting at the Naval Shipyard Puget Sound, Bremerton, Washington as Category EC–2, Environmental Concerns—Insufficient Information. EPA has also rated the alternatives for homeporting at the California sites as Category EO–2, Environmental Objections—Insufficient Information.

Final EISs

ERP No. F–AFS–J82012–MT, Lolo National Forest, Noxious Weed Management Plan, Implementation, Missoula, Mineral, Sanders, Granite, Powell, Lewis and Clark, Flathead, Ravalli and Lake Counties, MT.

Summary: EPA has no objections to the Lolo National Forest's preferred alternative, Alternative C.

VOL 56 ISS 115 JE 14 1991 UMI

ERP No. F-AFS-L65140-ID, Horizon Forest Resource Area, Timber Sale and Road Construction, Implementation, Idaho Panhandle National Forests, Fernan Ranger District, Kootenai County, ID.

Summary: Review of the final EIS has been completed and the project found to be satisfactory. No formal letter was sent to the agency.

Dated: June 11, 1991.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

[FRL-3965-1]

Proposed Administrative Settlement Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as Amended by the Superfund Amendments and Reauthorization Act

AGENCY: Environmental Protection Agency.

ACTION: Notice; request for public comment.

SUMMARY: In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act, as the amended by Superfund Amendments and Reauthorization Act (CERCLA), notice is hereby given that a proposed administrative cost recovery settlement concerning the Roe Lane Tank site in Kansas City, Kansas was issued by the Agency on May 22, 1991. The settlement resolves an EPA claim under section 107 of CERCLA against the City of Kansas City, Kansas. The settlement requires the settling party to pay $36,454.41 to the Hazardous Substances Superfund.

For thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the settlement. The Agency's response to any comments received will be available for public inspection at the Superfund Records Center and the Regional Hearing Clerk's Office, both at 726 Minnesota Avenue, Kansas City, Kansas 66101.

DATES: Comments must be submitted on or before 30 days from the date of publication of this Notice.

ADDRESSES: The proposed settlement and additional background information relating to the settlement are available for public inspection at the Superfund Records Center, 726 Minnesota Avenue, Kansas City, Kansas 66101, telephone (913) 551-4038. A copy of the proposed settlement may be obtained from Venessa Cobbs, Regional Hearing Clerk, 726 Minnesota Avenue, Kansas City, Kansas 66101, telephone (913)-551-7630. Comments should reference the Roe Lane Tank site, Kansas City, Kansas and EPA Docket No. VII-91-F-0014 and should be forwarded to Venessa Cobbs at the above-referenced address.

FOR FURTHER INFORMATION CONTACT: Joseph E. Sheehy, 726 Minnesota Avenue, Kansas City, Kansas 66101, telephone (913) 551-7643.

Dated: May 23, 1991.

David A. Wagoner,

Director, Waste Management Division.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

June 7, 1991.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW, Washington, DC 20036, (202) 452-1422. For further information on this submission contact Kathy Conley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0458.

Title: Policies and Rules Concerning Operator Service Providers (CC Docket No. 90-313)—Phase II.

Action: Revision.

Respondents: Businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting and other: Reports are to be filed 6, 9, 15 and 21 months after 12/21/90.

Estimated Annual Burden: 1,200 responses, 10 hours average burden per respondent, 12,000 hours total annual burden.

Needs and Uses: Operator service providers are required to file reports to the FCC on rates, complaints and cost information. The information will be used by the Commission for monitoring purposes and to prepare reports to Congress as required by the Telephone Operator Consumer Services Improvement Act of 1990 (TOCSIA).

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC of Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements of comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203-009857-004.

Title: Florida-Caribbean Cruise Association.

Parties:

Carnival Curise Line
Chandris, Inc.
Commodore Cruise Line
Costa Crusie Lines, N.V.
Cunard/NAC
Dolphin Cruise Line
Kloster Cruise limited
Premier Cruise Line
Princess Cruises
Royal Caribbean Cruises, Ltd.

Synopsis: The proposed amendement would expand the geographic scope to include all North American ports and ports in Central America and South America. It would also make other nonsubstantive changes.

Agreement No.: 203-011838-010.

Title: Southeastern Caribbean Discussion Agreement.

Parties:

United States Atlantic and Gulf/Southeastern Caribbean Conference
"Independent Carrier Parties"
Seaboard Marine, Ltd.
Tecmarine Line, Inc.
Berauth Lines
North American Caribbean Line Ltd.
Blue Caribe Line.

Synopsis: The proposed amendment would add West Indies Shipping Corporation as an Independent Carrier Party to the Agreement. The parties have requested a shortened review period.

Agreement No.: 232-011335.

Title: TMM/ACS Space Charter and Sailing Agreement.

Parties:

Transportation Maritima Mexicana S.A. de C.V.
Star Shipping A/S.

Synopsis: The proposed Agreement would permit the parties to charter space on each other's vessels, coordinate sailings, utilize common terminals, jointly negotiate terminal and stevedoring arrangements and interchange equipment in the trade between U.S. Atlantic and Gulf ports and U.S. points via such ports and Northern European ports and points via such ports. The aprties have requested a shortened review period.

Dated: June 10, 1991.

By Order of the Federal Maritime Commission

Joseph C. Polking,

Secretary

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

[Announcement Number 123]

National Institute for Occupational Safety and Health; Grants for Education Programs in Occupational Safety and Health

Introduction

The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control (CDC), announces the availability of funds in Fiscal Year 1992 for training grants in occupational safety and health. The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Occupational Safety and Health. (For ordering a copy of Healthy People 2000, see the Section Where to obtain additional information.)

Authority

This program is authorized under section 21(a)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 670(a)(1)). Regulations applicable to this program are in 42 CFR part 86, "Grants

VOL 56 ISS 115 JE 14 1991 UMI

for Education Programs in Occupational Safety and Health."

Eligible Applicants

Any public or private educational or training agency or institution that has demonstrated competency in the occupational safety and health field and is located in a State, the District of Columbia, or U.S. Territory is eligible to apply for a training grant.

Availability of Funds and Recipient Activities

Funds in the total amount of $11,072,000 will be available in Fiscal Year 1992.

Approximately $10,225,000 of the total funds available will be utilized as follows:

1. To award approximately 5 non-competing continuation and 9 competing Educational Resource Center (ERC) training grants totaling approximately $8,200,000 and ranging from approximately $400,000 to $800,000 with the average award being approximately $600,000 (for specific activities refer to **Federal Register** Announcement, 51 FR 32963, September 17, 1986).

2. To award approximately 24 non-competing continuation and 6 competing long-term training project grants totaling $2,000,000 and ranging from approximately $10,000 to $500,000, with the average award being $50,000, to support academic programs in the fields of industrial hygiene, occupational health nursing, occupational/industrial medicine, and occupational safety (for specific activities refer to **Federal Register** Announcement, 52 FR 3172, February 2, 1987); and

3. To conduct the peer review and evaluations of all new, competing continuation, and supplemental applications received.

Awards will be made for a 1- to 5-year project period with an annual budget period. Funding estimates may vary and are subject to change. Non-competing continuation awards within the approved project periods will be made on the basis of satisfactory progress and the availability of funds.

In addition, approximately $600,000 of the total funds available will be awarded to ERCs to support the development and presentation of continuing education and short courses for professionals engaged in the management of hazardous substances. These funds were provided to NIOSH through an Interagency Agreement with the National Institute for Environmental Health Sciences as authorized by section 209(b) of the Superfund Amendments and Reauthorization Act (SARA) of 1986 (100 Stat. 1706–1710). The hazardous substance training funds are being used to supplement previous hazardous substance continuing education grant support provided to the ERC's in FY 1984 and 1985 under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 for the ERC continuing education program (for specific activities refer to the **Federal Register** Announcement, 51 FR 32963, September 17, 1986). Program support is available for faculty and staff salaries, and other costs to provide occupational safety and health training to practicing professionals in State and local health and environmental agencies and other professional personnel engaged in the evaluation, management, and handling of hazardous substances. The policies regarding project periods also apply to these activities.

Approximately $247,000 of the total funds available will be awarded to ERCs to support the development of specialized educational programs in agricultural safety and health within the existing core disciplines of industrial hygiene, occupational medicine, occupational health nursing, and occupational safety (for specific activities refer to **Federal Register** Announcement, 51 FR 32963, September 17, 1986). Program support is available for faculty and staff salaries, trainee costs, and other costs to educate professionals in agricultural safety and health.

Purpose

The objective of this grant program is to award funds to eligible institutions or agencies to assist in providing an adequate supply of qualified professional and para-professional occupational safety and health personnel to carry out the purposes of the Act.

Review and Evaluation Criteria

In reviewing ERC grant applications, consideration will be given to:

1. Needs assessment directed to the overall contribution of the training program toward meeting the job market, especially within the applicant's region, for qualified personnel to carry out the purposes of the Occupational Safety and Health Act of 1970. The needs assessment should consider the regional requirements for outreach, continuing education, information dissemination, and special industrial or community training needs that may be peculiar to the region.

2. Plan to satisfy the regional needs for training in the areas outlined by the application, including projected enrollment, recruitment and current workforce populations. The need for supporting students in allied disciplines must be specifically justified in terms of user community requirements.

3. The extent to which arrangements for day-to-day management, allocation of funds and cooperative arrangements are designed to effectively achieve Characteristics of an Educational Resource Center (**Federal Register** Announcement, 51 FR 32963, September 17, 1986).

4. The extent to which curriculum content and design includes formalized training objectives, minimal course content to achieve certificate or degree, course descriptions, course sequence, additional related courses open to occupational safety and health students, time devoted to lecture, laboratory and field experience, and the nature of specific field and clinical experiences including their relationships with didactic programs in the educationa' process.

5. Academic training including the number of full-time and part-time students and graduates for each core program, the placement of graduates, employment history, and their current location by type of institution (academic, industry, labor, etc.). Previous continuing education training in each discipline and outreach activity and assistance to groups within the ERC region.

6. Methods in use or proposed methods for evaluating the effectiveness of training and services including the use of placement services and feedback mechanisms from graduates as well as employers, critiques from continuing education courses, and reports from consultations and cooperative activities with other universities, professional associations, and other outside agencies.

7. The competence, experience and training of the Center Director, the Deputy Center Director, the Program Directors and other professional staff in relation to the type and scope of training and education involved.

8. Institutional commitment to Center goals.

9. Academic and physical environment in which the training will be conducted, including access to appropriate occupational settings.

10. Appropriateness of the budget required to support each academic component of the ERC program, including a separate budget for the academic staff's time and effort in continuing education and outreach.

11. Evidence of a plan describing the research and research training the Center proposes. This shall include goals, elements of the program, research faculty and amount of effort, support faculty, facilities and equipment available and needed, and methods for implementing and evaluating the program.

12. Evidence of success in attaining outside support to supplement the ERC grant funds including other federal grants, support from states and other public agencies, and support from the private sector including grants from foundations and corporate endowments, chairs, and gifts.

In reviewing long-term training project grant applications, consideration will be given to:

1. The need for training in the program area outlined by the application. This should include documentation of ability and a plan for student recruitment, projected enrollment, job opportunities, regional/national need both in quality and quantity, and similar programs, if any within the geographic area.

2. The potential contribution of the project toward meeting the needs for graduate or specialized training in occupational safety and health.

3. Curriculum content and design which should include formalized program objectives, minimal course content to achieve certificate or degree, course sequence, related courses open to students, time devoted to lecture, laboratory and field experience, nature and the interrelationship of these educational approaches.

4. Previous records of training in this or related areas, including placement of graduates.

5. Methods proposed to evaluate effectiveness of the training.

6. Degree of institutional commitment: Is grant support necessary for program initiation or continuation? Will support gradually be assumed? Is there related instruction that will go on with or without the grant?

7. Adequacy of facilities (classrooms, laboratories, library services, books, and journal holdings relevant to the program, and access to appropriate occupational settings).

8. The competence, experience, training, time commitment to the program and availability of faculty to advise students, faculty/student ratio, and teaching loads of the program director and teaching faculty in relation to the type and scope of training involved.

9. Admission Requirements: Student selection standards and procedures, student performance standards and student counseling services.

10. Advisory Committee (if established): Membership, industries and labor groups represented; how often they meet; who they advise, role in designing curriculum and establishing program need.

Funding Allocation Criteria

For Educational Resource Center grants, the following criteria will be considered in determining funding allocations.

1. Academic core programs

a. Budget to support programs primarily for personnel and other personnel-related costs. Advanced (doctoral and post-doctoral) and specialty (master's) programs will be considered.

b. Budget to support programs based on program quality and need. Factors considered include faculty commitment/breadth, faculty reputation/strength, national/regional manpower needs, unique program contribution, interdisciplinary interaction, and technical merit.

c. Budget to support students based on the program level and the number of students supported.

2. Center administration

Budget to support Center administration to assure coordination and promotion of academic programs.

3. Continuing education/outreach program

Budget to support outreach and continuing education activities to prepare, distribute, and conduct short courses, seminars, and workshops.

4. Research training programs

Budget to support research training programs to establish a research base within the core disciplines and for the training of researchers in occupational safety and health.

5. Hazardous substance training programs

Budget to support the development and presentation of continuing education courses for professionals engaged in the management of hazardous substances.

6. Agricultural safety and health academic programs

Budget to support the development and presentation of specialized academic programs and continuing education courses in agricultural safety and health.

For Long-Term Training Project grants, the following factors will be considered in determining funding allocations.

1. Academic core programs

a. Budget to support programs primarily for personnel and other personnel-related costs. Advanced (doctoral and post-doctoral), specialty (master's), and baccalaureate/associate programs will be considered.

b. Budget to support programs based on program quality and need. Factors considered include faculty commitment/breadth, faculty reputation/strength, national/regional manpower needs, unique program contribution, interdisciplinary interaction, and technical merit.

c. Budget to support students based on the program level and the number of students supported.

Catalog of Federal Domestic Assistance Number (CFDA)

This program is described in the Catalog of Federal Domestic Assistance Program No. 93.263, Occupational Safety and Health Training Grants.

Executive Order 12372 Review

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Application Submission and Deadline

Applications should be clearly identified as an application for an Occupational Safety and Health Long-Term Training Project Grant or ERC Training Grant. The submission schedule is as follows:

New, Competing Continuation and Supplemental Receipt Date: July 1, 1991.

An original and two copies of new, competing continuation and supplemental applications (Form CDC 2.145A ERC or TPC) should be submitted to: Henry S. Cassell, III, Grants Management Officer, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, room 300, Atlanta, GA 30305.

1. Deadline: Applications shall be considered as meeting the deadline if they are either:

a. Received on/or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. Late Applications: Applications which do not meet the criteria in 1.a. or b. above are considered late

VOL
56
ISS
115
JE
14
1991
UMI

applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Non-Competing Continuation Receipt Date: November 15, 1991 An original and two copies of non-competing continuation applications (Form CDC 2.145B ERC or TPG) should be submitted to: Henry S. Cassell, III, Grants Management Officer, Procurement and Grants Office, Centers for Disease Control, Procurement and Grants Office, 255 East Paces Ferry Road, NE, room 300, Atlanta, GA 30305.

Where to Obtain Additional Information

To receive additional written information call (404) 332-4561. You will be asked to leave your name, address and phone number, and will need to refer to Announcement Number 123. You will receive a complete program description, information on application procedures, and an application package containing address and phone numbers for the contact personnel. Lisa Tamaroff will provide the business management technical assistance.

Programmatic technical assistance may be obtained from John T. Talty, Chief, Educational Resource Development Branch, Division of Training and Manpower Development, National Institute for Occupational Safety and Health, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report, Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Dated: June 10, 1991.

Larry W. Sparks,

Acting Director, National Institute for Occupational Safety and Health.

Family Support Administration

Forms Submitted to the Office of Management and Budget for Clearance

The Administration for Children and Families will publish on Fridays information collection packages submitted to the Office of Management and Budget (OMB) for clearance, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). Following is the package submitted to OMB since the last publication.

(For a copy of the package, call the FSA, Report Clearance Officer 202-401-5604.)

Quarterly Report of Expenditures and Estimates—OCSE-131—0970-0014—This information and data is needed to compute quarterly grant awards to estimate incentive payments to States, for required recordkeeping, prepare appropriation requests and to prepare an annual report to Congress. *Respondents:* State and local governments; *Number of Respondents:* 54; *Frequency of Response:* Quarterly; *Estimated Average Burden per Response:* 3.5; *Estimated Annual Burden:* 1,134 hours. *OMB Desk Officer:* Laura Oliven.

Written comments and recommendations for the proposed information collection should be sent directly to the OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3201, 725 17th Street, NW., Washington, DC 20503.

Dated: June 10, 1991.

Naomi B. Marr,

Associate Administrator, Office of Management and Information Systems

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 91C-0189]

Sola/Barnes-Hind; Filing of Color Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Sola/Barnes-Hind, has filed a petition proposing that the color additive regulations be amended to provide for the safe use of 1,4-bis(2-methacryloxyethylamino)-9,10-anthraquinone to color contact lenses prepared with glyceryl methacrylate/methyl methacrylate/ethylene glycol dimethacrylate copolymer and N,N-dimethyl acrylamide/methyl methacrylate/ethylene glycol dimethacrylate copolymer.

FOR FURTHER INFORMATION CONTACT: Sandra L. Varner, Center for Food and Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetc Act (sec. 706(d)(1) (21 U.S.C. 376(d)(1))), notice is given that a petition (CAP 0C0226), has been filed by Sola/Barnes-Hind, 810 Kifer Rd., Sunnyvale, CA 94086-5200, proposing that 21 CFR part 73 of the color additive regulations be amended to provide for the safe use of 1,4-bis(2-methacryloxyethylamino)-9,10-anthraquinone to color contact lenses prepared with glyceryl methacrylate/methyl methacrylate/ethylene glycol dimethacrylate copolymer and N,N-dimethyl acrylamide/methyl methacrylate/ethylene glycol dimethacrylate copolymer

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: June 7, 1991.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

Advisory Committees; Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meetings: The following advisory committee meetings are announced:

Oncologic Drugs Advisory Committee

Date, time, and place. July 1 and 2, 1991, 9 a.m., Conference Rms. D and E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open committee discussion, July 1, 1991, 9 a.m. to 4:30 p.m.; open public hearing, 4:30 p.m. to 5:30 p.m., unless public participation does not last that long; open committee discussion, July 2, 1991, 8:30 a.m. to 5 p.m.; Adele S. Seifried, Center for Drug Evaluation and Research (HFD-9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4695.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the treatment of cancer.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before June 21, 1991, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On July 1, 1991, the committee will discuss: (1) New drug application (NDA) NDA 20-119, VeeM-26 (tenoposide, Bristol-Myers Squibb), for multiple indications for childhood acute lymphocytic leukemia; (2) supplemental NDA 19-880, Paraplatin (carboplatin, Bristol-Myers Squibb), for first line combination chemotherapy stages III and IV ovarian cancer; and (3) NDA 20-141, Isovorin (l-leucovorin, Lederle Labs), for rescue after high dose methotrexate for osteosarcoma, patients with impaired methotrexate elimination, and inadvertent methotrexate overdose. On July 2, 1991, the committee will discuss: (1) NDA 20-122, Oncopent (pentostatin, Parke-Davis), for alpha interferon refractory hairy cell leukemia; and (2) the NSABP tamoxifen breast cancer prevention protocol.

Endocrinologic and Metabolic Drugs Advisory Committee

Date, time, and place. July 24 and 25, 1991, 9 a.m., Holiday Inn Crowne Plaza, Regency Rm., 1750 Rockville Pike, Rockville, MD.

Type of meeting and contact person. Open public hearing, July 24, 1991, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open public hearing, July 25, 1991, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; John L. Gueriguian, Center for Drug Evaluation and Research (HFD-510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3490, fax 301-443-9282.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in endocrine and metabolic disorders.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before June 28, 1991, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On July 24, 1991, the committee will discuss the osteoporosis indication of injectable salmon calcitonin (Calcimar, Rhone-Poulenc Rorer) in light of recently acquired efficacy data. On July 25, 1991, the committee will discuss safety and efficacy for NDA 20-060, acarbose (Glucobay), submitted by Miles, Inc.

Gastrointestinal Drugs Advisory Committee

Date, time, and place. July 25 and 26, 1991, 9 a.m., Conference Rms. D and E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, July 25, 1991, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open committee discussion, July 26, 1991, 9 a.m. to 5 p.m.; Joan C. Standaert, Center for Drug Evaluation and Research (HFD-180), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 419-259-6211, or the Advisors and Consultants Staff, 301-443-4695.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in gastrointestinal diseases.

Agenda—Open public hearing. Interested persons may present data, inforamtion, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before July 10, 1991, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requried to make their comments.

Open committee discussion. On July 25, 1991, the committee will discuss NDA 17-939, Tagamet (cimetidine), continuous intravenous injection for prevention of stress ulcer and a draft guidelines for the study of Crohn's disease. On July 26, 1991, the committee will discuss the use of bismuth subsalicylate (Pepto-Bismol) as a Category I over-the-counter (OTC) antidiarrheal.

The committee discussion and conclusions regarding the use of bismuth subsalicylate may be considered by the agency in its preparation of a final monograph for OTC antidiarrheal drug products. This monograph is being developed as part of the OTC drug review. The advance notice of proposed rulemaking for OTC antidiarrheal drug products was published in the **Federal Register** of April 30, 1986 (51 FR 16138). Bismuth subsalicylate has not been proposed as an active ingredient for inclusion in this monograph.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the commitee's work.

Public hearings are subject to FDA's guidelines (Subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either

VOL

ISS
115
JE
14
1991
UMI

orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI-35), Food and Drug Administration, rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 91-14371 Filed 6-12-91; 2:18 p.m.]

BILLING CODE 4160-01-M

Health Resources and Services Administration

Infant Mortality Advisory Council; Establishment

Pursuant to the Federal Advisory Committee Act, Public Law 92-463 (5 U.S.C. appendix 2), the Secretary, Department of Health and Human Services announces the establishment of the following advisory committee.

Designation: Advisory Committee on Infant Mortality

Purpose: Advises the Secretary on Department programs related to infant mortality, including implementation of the Healthy Start Initiative and other recommendations of the Domestic Policy Council, and infant mortality objectives from Healthy People: 2000: National Health Promotion and Disease Prevention Objectives.

Structure: The Committee consists of the Assistant Secretary for Health, the Assistant Secretary for Children and Families, the Administrator, Health Care Financing Administration and the Assistant Secretary for Food and Consumer Services, USDA, as ex-officio members, and 21 members, including the chair, selected by the Secretary. Members shall be representatives of both the public and private sectors. Members from the private sector will represent corporations and foundations, the media, the clergy, health and other professional organizations. Members from the public sector will include elected officials, and health and human services administrators from State and local levels including representatives of minority, rural and urban interests.

Authority for this Committee will terminate in two years unless the Secretary, HHS, formally determines that continuance is in the public interest.

Dated: June 11, 1991.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the Federal Register on May 17, 1991.

(Call Reports Clearance Officer on (301) 965-4149 for copies of package.)

1. Compliance With Pass-Along—0960-0240—The authority granted by the final rule F-20-416.2099 allows the Social Security Administration (SSA) to request cost-of-living adjustment pass-along information from those States which administer their own supplementary payments programs. Without this authority, SSA would be unable to determine that those States have complied with the requirement to meet certain supplementary expenditures. Compliance failure could result in a state losing Federal financial participation in the title XIX, Medicaid program. The affected public consists of States which administer their own supplementary payments program.

Number of Respondents: 26
Frequency of Response: 15(4) [2]/11(1) [1]
Average Burden Per Response: 1 hour
Estimated Annual Burden: 71 hours

2. Employment Relationship Questionnaire—0960-0040—The information collected on the form SSA-7160 is used by the Social Security Administration to determine the status of certain employees in various occupational fields. The affected public is comprised of employers of individuals applying for Social Security benefits whose employee status is in doubt.

Number of Respondents: 47,500
Frequency of Response: 1
Average Burden Per Response: 25 minutes
Estimated Annual Burden: 19,792 hours

3. Statement Regarding Contributions—0960-0020—The information collected on the form SSA-783 is used by the Social Security Administration to make determination of one-half support which is an eligibility factor for certain claimants. The affected public is comprised of claimants who need to prove one-half support by the wage earner or other persons having knowledge of the situation.

Number of Respondents: 30,000
Frequency of Response: 1
Average Burden Per Response: 15 minutes
Estimated Annual Burden: 7,500 hours

OMB Desk Officer: Laura Oliven.

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: June 10, 1991.

Ron Compston,

Social Security Administration, Reports Clearance Officer.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-91-1917; FR-2934-N-30]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

EFFECTIVE DATE: June 14, 1991.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this notice. Included in the request for review should be the property address (including zip code), the date of publication in the Federal Register, the landholding agency, and the property number.

For more information regarding particular properties identified in this notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: Corps of Engineers: Bob Swieconek, Army Corps of Engineers, Civilian Facilities, rm. 5138, 20 Massachusetts Ave. NW., Washington, DC 20314-1000; (202) 272-1750; Corps of Engineers: Gary B. Paterson, Chief, Base Realignment and Closure Office, Directorate of Real Estate, 20 Massachusetts Ave. NW., rm. 4133, Washington, DC 20314-1000; (202) 272-0520; GSA: Ronald Rice, Federal Property Resources Services, GSA, 18th and F Streets NW., Washington, DC 20405; (202) 501-0067; U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332-2300; (202) 325-0474. (These are not toll-free numbers).

Dated: June 7, 1991.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

Advisory Council Tour and Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice, Burns Advisory Council Meeting and Tour.

SUMMARY: Notice is hereby given in accordance with section 309 of the Federal Land Policy and Management Act of 1976, that a tour and meeting of the Burns District Advisory Council will be held on July 11 and 12, at the Burns District Office located on Highway 20, three miles south of Hines, Oregon. The tour will begin at 8 a.m. on Thursday, July 11; the meeting will begin at 9 a.m. on Friday, July, 12.

The tour will include stops at various locations in the District that relate to the general topic of interrelationships between management of public and private lands in the Harney County area.

The agenda for the meeting will include: Updates on the Three Rivers Resource Management Plan, a status

VOL 56 ISS 115 JE 14 1991 UMI

report on the District's Fiscal Year 91 planned work, a briefing on drought conditions and a discussion of the interrelationships between management of public and private lands with emphasis on the findings of the previous day's field tour.

DATES: The tour will begin at 8 a.m. and adjourn by approximately 6 p.m. Pacific Standard Time on Thursday, July 11 and the meeting will begin at 9 a.m and conclude by 4 p.m. on July 12.

FOR FURTHER INFORMATION CONTACT: Michael T. Green, District Manager, Bureau of Land Management, HC 74–12533 Highway 20 West, Hines, OR 97738, (Telephone 503 573–5241).

SUPPLEMENTARY INFORMATION: The tour will be open to the general public. However, interested persons will need to provide their own transportation and meals. Road conditions will require vehicles with high clearance. Individuals wishing to attend should contact the District Manager at the above address.

The meeting will also be open to the public. Interested persons may make oral statements to the Council at the end of the meeting or file written statements for the Council's consideration. Anyone desiring to make an oral statement must notify the District Manager, Bureau of Land Management at the listed address by July 8, 1991.

Dated: June 3, 1991.

Michael T. Green,

District Manager.

Medford District Advisory Council; Meeting Notice

Notice is hereby given in accordance with Public law 99–463 that a field trip of the Bureau of Land Management's Medford District Advisory Council will be held July 11, 1991.

The field trip will depart at 8 a.m. from the Bureau of Land Management office at 3040 Biddle Road, Medford, Oregon. Purpose of the field trip is to enable the Advisory Council to become more familiar with the District's Resource Management Plan efforts, in order to assist in preparing a preferred alternative.

Persons interested in joining the Council on its field trip may do so, but must provide their own transportation.

FOR FURTHER INFORMATION CONTACT: Kurt Austermann, Medford District Office, 3040 Biddle Road, Medford, Oregon 97504; Telephone 503–770–2424.

Summary minutes of any action taken by the Council will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: June 5, 1991.

David A. Jones,

District Manager.

[WO–150–00–4830–11]

National Public Lands Advisory Council—Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of meeting of the National Public Lands Advisory Council.

SUMMARY: Notice is hereby given that the National Public Lands Advisory Council will meet Friday, July 19, 1991, at the The Red Lion Hotel, 255 South West Temple, Salt Lake City, Utah 84101. Phone #801–328–2000. Meeting hours will be 8 a.m. to 5 p.m. on Friday, July 19th.

The proposed agenda for the meeting is: Opening remarks by National Public Lands Advisory Council Chairman Dr. James E. Bowns; Dean Stepanek, Deputy Director, BLM; and BLM Utah State Director, Jim Parker.

The Council presently has four (4) ongoing task force groups. These groups advise and counsel the BLM regarding the agency's programs on: Hazardous materials management; recreation; mining; and, the proposal for the BLM to have a "foundation" similar to the Fish & Wildlife Service and Forest Service's foundations. The Council will summarize the status of each of the task force groups.

The BLM will provide briefings to the Council on its wilderness recommendations and wilderness water rights. There will also be a briefing on the future direction of BLM's hazardous materials program. On Thursday, July 18, 1991, the Council will take a field trip outside the Salt Lake City area touring various hazardous waste management sites.

All meetings of the Council are open to the public. Opportunity will be given for members of the public to make oral statements to the Council beginning at 2 p.m. on Friday, July 19th. Speakers should address specific national public lands issues and are encouraged to submit a copy of their written statements prior to oral delivery. Please send written comments by July 12th to the BLM's Salt Lake City office at the address listed below. Depending on the number of people who wish to address the Council it may be necessary to limit the length of oral presentations.

DATES: Friday, July 19, 1991—The National Public Lands Advisory Council Meeting.

ADDRESSES: Copies of Public Statements should be mailed by July 12 to: Mr. Jerry Meredith, Bureau of Land Management, P. O. Box 45155, Salt Lake City, Utah 84145–0155.

FOR FURTHER INFORMATION CONTACT: Nan Morrison, Washington, DC Office, BLM, telephone (202) 208–5101.

SUPPLEMENTARY INFORMATION: The Council advises the Secretary of the Interior through the Director, BLM,

regarding policies and programs of a national scope related to public lands and resources under the jurisdiction of BLM.

Date Signed: June 10, 1991.

Cy Jamison,

Director.

BILLING CODE 4310–84–M

[G–040–G1–0483–4213–14; OK MM 82796]

Tulsa District Office; Proposed Direct Sale

AGENCY: Department of the Interior, Bureau of Land Management.

ACTION: Notice of Realty Action.

SUMMARY: The following described public land has been examined and determined to be suitable for transfer out of Federal ownership by direct sale under the authority of section 203 of the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at not less than the appraised fair market value:

Indian Meridian, Oklahoma

T. 14 N., R. 1 E.,
Sec. 28, lots 20, 21, and 22.
Containing a total of 2.37 acres in Oklahoma County.

The land will not be offered for sale until at least 60 days after publication of this notice in the Federal Register. The fair market value of the parcels has been determined to be $300.00 ($100.00 per lot).

Publication of this notice will segregate the above-described land from all appropriation, under the public land laws including the mining laws, but not from sale under the above-cited statute, for 270 days from the date of publication of this notice, or until title transfer is completed or the segregation is terminated by publication in the Federal Register, whichever occurs first.

The subject lands are part of the remaining public land holdings in Oklahoma scattered throughout the state. The lands are being offered for sale since the Bureau of Land Management (BLM) can not economically or feasibly manage the subject lands. No other federal agency or department was interested in managing these lands. The sale is consistent with the Bureau planning for the lands involved and has been discussed with governmental units and local officials. Direct sale procedures are appropriate because of the parcels' small size and the best use is to merge them with an adjoining ownership of an existing business. Use of direct sale procedures will avoid an inappropriate land ownership pattern. The sale is consistent with the Planning Analysis and Decision Document for Central Oklahoma Land Disposal and the public interest would be served by offering these lands for sale.

The parcels are being offered to the Town of Luther, Oklahoma, using the direct sale procedures authorized under title 43 CFR 2711.3–3.

The terms, conditions, and reservations applicable to the sale are as follows:

1. The grantees will be required to submit a deposit of either cash, certified check, cashier's check, bank draft, money order, or any combination thereof for not less than 20 percent of the appraised value. The remainder of the full appraised price must be submitted prior to the expiration of 180 days from the date of the sale. Failure to submit the remainder of the full appraised price shall result in the cancellation of the sale and the forfeiture of the deposit.

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals. A more detailed description of this reservation which will be incorporated in the patent document, is available for review at this BLM office.

3. Title will be issued by a patent subject to all prior valid existing rights and reservations of record.

4. Title will be issued by a patent with restrictions under Executive Order 11988 (42 CFR 26951 May 25, 1977), for the protection and management of, floodplain on the above-described lands.

DATES: On or before July 29, 1991, interested parties may submit comments to the District Manager, BLM, Tulsa District Office, 9522N E. 47th Place, Tulsa, Oklahoma 74145. Any adverse comments will be reviewed by the District Manager, who may sustain, vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Jacqueline Gratton, (405) 794–9634.

Dated: June 7, 1991.

Joe Incardine,

Acting District Manager.

Intrastate Rail Rate Authority—Washington

AGENCY: Interstate Commerce Commission.

ACTION: The Commission assumes jurisdiction over intrastate rail rates, classifications, rules, and practices.

SUMMARY: By letters filed May 14 and 22, 1991, the State of Washington, through its Utilities and Transportation Commission, notified this Commission that it would not seek recertification to regulate rail rates, classifications, rules, and practices pursuant to 49 U.S.C. 11501(b), and asked the Commission to assume jurisdiction over these intrastate matters. The Commission grants the request and assumes jurisdiction over rail rates, classifications, rules, and practices in the State of Washington.

EFFECTIVE DATE: Effective June 14, 1991.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245. [TDD for hearing impaired: (202) 275-1721].

[Finance Docket No. 31886]

Georgia Great Southern Division of the South Carolina Central Railroad Company, Inc., Central of Georgia Railway Company, and Georgia Northern Railway Company—Joint Relocation Project and Trackage Rights Exemptions

On May 29, 1991, Georgia Great Southern Division of the South Carolina Central Railroad Company, Inc. (GGS), and Central of Georgia Railway Company and Georgia Northern Railway Company, affiliates of Norfolk Southern Railway Company (jointly referred to as NS), filed a notice of exemption under 49 CFR 1180.2(d) (5) and (7). The notice involves two transactions: (1) A joint project for the relocation of a GGS line of railroad, consisting of (a) GGS's acquisition of overhead (bridge) trackage rights on a 3,585-foot NS line (between valuation stations 1814+59 and 1850+44) at Albany, GA, (b) GGS's abandonment of (i) a 3,585-foot section of line paralleling the NS line between valuation stations 1814+59 and 1850.44, and (ii) a nearby 520-foot section of line, (c) GGS's construction of a new connector track between the GGS and NS lines in the Albany rail yard; and (2) a separate, additional grant of trackage rights that is not part of the joint project, but that will allow GGS to use other NS tracks in the Albany rail yard to interchange traffic and to move between the joint trackage and GGS's mainline at the relocated connection. Together, the joint project and trackage rights will enable GGS to improve its operations in the Albany rail yard, eliminate three rail crossings, and replace double-track street crossings with single-track crossings.

The joint relocation project falls under the class exemption at 49 CFR 1180.2(d)(5). The Commission will assume jurisdiction over the abandonment and construction components of a relocation project only where the proposal involves a change in service to shippers, expansion into new territory, or a change in existing competitive situations. See, generally, *Denver & R.G.W.R. Co.—Jt. Proj.—Relocation over BN*, 4 I.C.C.2d 95 (1987). The separate trackage rights transaction falls under the class exemption at 49 CFR 1180.2(d)(7).

As a condition to the use of this exemption, any employees affected by the separate grant of trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.— Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry. Inc.—Lease and *Operate*, 360 I.C.C. 653 (1980).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on James M. McLaren, Georgia Great Southern Division of the South Carolina Central Railroad, Inc., P.O. Box 62, Dawson, GA 31742-0062, and F. Blair Wimbush, Central of Georgia Railway Company and Georgia Northern Railway Company, Three Commercial Place, Norfolk, VA 23510-2191.

Dated: June 10, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,
Secretary.

KCT Railway Corporation—Abandonment Exemption—Between Lamar and Wiley, CO

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the prior approval requirements of 49 U.S.C. 10903-10904 the abandonment by KCT Railway Corporation of a 10.36-mile line of railroad between Lamar and Wiley, Colorado, subject to environmental and standard employee protective conditions.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on July 14, 1991. Formal expressions of intent to file an offer [1] of financial assistance under 49 CFR 1152.27(c) (2) must be filed by June 24, 1991, petitions to stay must be filed by July 1, 1991, and petitions for reconsideration must be filed by July 9, 1991. Requests for a public use condition must be filed by June 24, 1991.

ADDRESSES: Send pleadings referring to Docket No. AB-335 (Sub-No. 5X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

and

(2) Petitioner's representative: Stephen W. McVearry, 1350 New York Avenue, NW, suite 800, Washington, DC 20005-4797.

DEPARTMENT OF JUSTICE

Notice of Lodging of Settlement Agreements

In accordance with the policy of the Department of Justice, 28 CFR 50.7, and pursuant to section 122(d)(2) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. 9622(d)(2), notice is hereby given that a Consent Decree was lodged with the United States District Court for the Eastern District of Tennessee on May 24, 1991. This action was brought pursuant to sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607.

The parties to this Consent Decree are Southern Foundry Supply, Inc., SMC Corporation, and the City of Chattanooga. These parties agree to design and implement a remedy selected by the Environmental Protection Agency for cleanup of the Amnicola Dump Site in Chattanooga, Tennessee. These parties have also agreed to reimburse the United States for costs it incurs in overseeing the implementation of the remedy, as well as costs it incurs in performing activities relating to remedial design/remedial action and community relations.

The Department of Justice will receive comments relating to the proposed Settlement Agreement for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, 10th and Pennsylvania Avenue, NW., Washington, DC 20530. All comments should refer to *United States* v. *Southern Foundry Supply, Inc., et al.*, D.J. Ref. 90-11-3-864.

The proposed Settlement Agreements may be examined at the office of hte United States Attorney, 9th and Georiga Avenue, 359 Federal Building, Chattanooga, Tennessee 37402. A copy of the proposed Settlement Agreements may also be examined at the Environmental Enforcement Section, Document Center, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004 (202-347-2072). A copy of the proposed Settlement Agreements may be obtained in person or by mail from the Environmental Enforcement Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. Any request for a copy of the proposed Settlement Agreements should be accompanied by a check in the account of $92.50 for copying costs ($0.25 per page) payable to "Aspen Systems Corporation."

Richard B. Stewart,
Assistant Attorney General, Environmental and Natural Resources Division.

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984—Automotive Emissions Cooperative Research Venture

Notice is hereby given that, on May 17, 1991, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the Automotive Emissions Cooperative Research Venture (known as the Auto/Oil Air Quality Improvement Research Program) filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in the membership of the Auto/Oil Air Quality Improvement Research Program. The written notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, the notification stated that the following additional parties have become associate members of the Auto/Oil Air Quality Improvement Research Program: Ethyl Corporation, of 330 South Fourth Street, P.O. Box 2189, Richmond, Virginia 23217 and Elf France, Tour Elf, 36 Etage, DRDI, Cedex 45-92078 Paris LaDefense, France.

No other changes have been made in either the membership or planned activities of the Auto/Oil Air Quality Improvement Research Program.

On October 19, 1989, the Auto/Oil Air Quality Improvement Research Program filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on November 29, 1989, 54 FR 49122. A notice of additional members to the Auto/Oil Air Quality Improvement Research Program was published on August 8, 1990, 55 FR 32321.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research Act of 1984—Cable Television Laboratories, Inc./PCN America, Inc.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Cable Television Laboratories, Inc. ("CableLabs") and PCN America, Inc. ("PCN America") on March 25, 1991, filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to this agreement and (2) the nature and objectives of this agreement. The notification was filed for the purpose of invoking the protections of section 4 of the Act, which limit the recovery of antitrust plaintiffs to actual damages under sspecified circumstances.

Pursuant to section 6(b) of the Act, the identities of the parties to this agreement and the general areas of planned activity are given below.

The current parties are the following:

Cable Television Laboratories, Inc., 1050 Walnut Street, suite 500, Boulder, Colorado 80302.

PCN America, Inc., 153 East 53rd Street, suite 2500, New York, NY 10022.

The area of planned activity is cooperation in the development of interface concepts between personal communications networks and cable system networks, including the exchange of information relating to the functions and architecture of personal communications networks, and cooperation in the conduct of radio frequency tests in connection with

BILLING CODE 4410-01-M

Drug Enforcement Administration

Controlled Substances; Proposed Revised 1991 Aggregate Production Quotas

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Notice of proposed revised 1991 aggregate production quotas.

SUMMARY: This notice proposes revised 1991 aggregate production quotas for controlled substances in Schedule II of the Controlled Substances Act. Since the establishment of the 1991 aggregate production quotas on January 31, 1991 (56 FR 3842), DEA has reviewed data submitted by the registered manufacturers concerning 1990 dispositions and year-end inventories and has determined that revisions of some of the previously established quotas are necessary.

DATES: Comments or objections should be received on or before 30 days from date of publication.

ADDRESSES: Send comments or objections to the Administrator, Drug Enforcement Administration, Washington, DC 20537, Attn: DEA Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug & Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307-7183.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances act (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the DEA pursuant to § 0.100 of title 28 of the Code of Federal Regulations. On January 31, 1991, a notice of the 1991 established aggregate production quotas was published in the **Federal Register** (56 FR 3842). The notice stipulated that the Administrator of the DEA would adjust the quotas in early 1991 as provided for in title 21, Code of Federal Regulations, 1303.13(c). These aggregate production quotas represent those amounts of controlled substances that may be produced in the United States in 1991 and do not include amounts which may be imported for use in industrial processes.

Based on a review of 1990 year-end inventories, 1990 disposition data submitted by quota applicants, estimates of the medical needs of the United States submitted to the DEA by the Food and Drug Administraiton, and the other information available to DEA, the Administrator of the DEA, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of title 28 of the Code of Federal Regulations, hereby proposes the following changes in the 1991 aggregate production quotas for the listed controlled substances, expressed in grams of anhydrous acid or base.

Schedule II	Previously established 1991 aggregate production quota	Proposed revised 1991 aggregate production quota
Alfentanil	5,300	7,300
Amobarbital	395,000	158,000
Amphetamine	98,000	168,000
Cocaine	863,000	857,000
Codeine (for sale)	56,907,000	52,800,000
Codeine (for conversion)	6,055,000	7,313,000
Desoxyephedrine	1,280,000	1,184,000
Levodesoxyephedrine	1,284,000	1,184,000
Methamphetamine	5,000	0
Dextropropoxyphene	85,267,000	93,675,000
Dihydrocodeine	241,000	484,000
Diphenoxylate	707,008	728,000
Hydrocodone	3,671,000	4,562,000
Hydromorphone	223,000	234,000
Levorphanol	10,300	6,700
Meperidine	10,452,000	8,930,000
Methadone	1,875,000	2,672,000
Methadone Intermediate (4-cyano-2-dimethylamino-4,4-diphenylbutane)		
Methylphenidate	1,979,000	2,055,000
Mixed Alkaloids of Opium	5,000	0
Morphine (for sale)	4,008,000	7,872,000
Morphine (for conversion)	67,228,000	64,367,000
Opium (tincture, extracts, etc. expressed in terms of USP powdered opium)		
Oxycodone (for sale)	2,854,000	3,102,000
Oxycodone (for conversion)	6,300	7,200
Oxymorphone	2,500	2,900
Pentobarbital	13,432,000	16,424,000
Secobarbital	782,000	858,000

In determining the proposed revised 1991 aggregate production quota for morphine (for sale), the major portion of this increase is due to export requirements. This increased need was not anticipated when establishing the previously finalized aggregate production quota for morphine (for sale).

All interested persons are invited to submit their comments and objections in writing regarding this proposal. A person may object to or comment on the proposal relating to any of the above mentioned substances without filing comments or objections regarding the others. If a person believes that one or more of these issues warrant a hearing, the individual should so state and summarize the reasons for this belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds warrant a hearing, the Administrator shall order a public hearing by notice in the **Federal Register**, summarizing the issues to be heard and setting the time for the hearing.

Pursuant to section 3(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 and it has been determined that this matter does not have sufficient federalism implications to warrant the preparations of a Federalism Assessment.

The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. The establishment of annual aggregate production quotas for Schedule I and II controlled substances is mandated by law and by the international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Dated: May 6, 1991.

Robert C. Bonner,

Administrator, Drug Enforcement Administration.

[FR Doc. 91-14137 Filed 6-13-91; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 90-2]

Robert Krebsbach, M.D., Denial of Applications

On December 1, 1989, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued to Robert Krebsbach, M.D. (Respondent), P.O. Box 2717, 5507 E. 32nd Place, Tulsa, Oklahoma 74135, an Order to Show Cause proposing to deny his applications for DEA Certificates of Registration, executed on January 27, 1989, for registration in the State of Kansas and on October 10, 1989, for registration in the State of Oklahoma, as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause alleged that Dr. Krebsbach's proposed registration is inconsistent with the public interest as that term is used in 21 U.S.C. 823(f).

Respondent, acting *pro se*, submitted a written request for a hearing on the issues raised by the Order to Show Cause, and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Subsequently, Government counsel filed a motion for summary disposition on November 9, 1990, based on Respondent's lack of state authority to handle controlled substances in the State of Oklahoma as well as the suspension of his medical license in that state. On November 26, 1990, counsel for Respondent filed a response to the Government's motion, acknowledging Respondent's lack of authorization to handle controlled substances and to practice medicine in the State of Oklahoma. Judge Bittner considered the motion for summary disposition, and on December 3, 1990, issued her opinion and recommended ruling in this matter. No hearing was held, since no factual issues were involved. Neither side filed exceptions to the recommended ruling of the administrative law judge. On January 9, 1991, Judge Bittner transmitted the record to the Administrator.

Thereafter, on February 15, 1991, counsel for the Government filed a second motion for summary disposition based on Respondent's lack of authorization to practice medicine or handle controlled substances in the State of Kansas. In support of that motion, counsel for the Government filed a copy of a letter from the Executive Director of the State of Kansas Board of Healing Arts, advising that Respondent's license was in "cancelled status" effective August 1, 1990. On February 9, 1991, the administrative law judge requested that the Administrator withhold issuance of a final order regarding the Oklahoma application, pending completion of the proceedings before her on the Kansas application, and also issued an order providing Respondent until March 12, 1991, to file a response to the Government's second motion for summary disposition. No such response has been submitted. On March 29, 1991, the administrative law judge issued a supplemental opinion and recommended decision. No exceptions were filed and the matter was transmitted to the Administrator on May 6, 1991.

The Administrator has considered this record in its entirety and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter, based on the following findings of fact and conclusions of law.

The administrative law judge found that, by order dated November 1, 1990, the Oklahoma State Board of Medical Licensure and Supervision suspended Respondent's license to practice medicine. Therefore, Respondent is without authority to practice medicine or handle controlled substances in Oklahoma. Further, since August 1, 1990, Respondent has not been authorized to practice medicine or handle controlled substances in the State of Kansas.

State authorization to handle controlled substances is a prerequisite to registration of a practitioner under the Federal Controlled Substances Act. 21 U.S.C. 823(f). DEA has consistently held that when an applicant is without authority to handle controlled substances under the laws of the State in which he practices, or proposes to practice, DEA is without authority to issue a Federal registration. See, Emerson Emory, M.D., Docket No. 85-46, 51 FR 9543 (1986); Michael Alva Marshall, M.D., Docket No. 85-16, 51 FR 8046 (1986); Dennis Howard Harris, M.D., Docket No. 84-19, 49 FR 30930 (1984).

In such cases, a motion for summary disposition is properly entertained and must be granted. It is settled law that when no fact question is involved, or when the facts are agreed, a plenary adversary administrative proceeding is not obligatory, even though a pertinent statute prescribes a hearing. In such situations, the rationale is that Congress does not intend administrative agencies to perform a meaningless task. *United States* v. *Consolidated Mines and Smelting Co., Ltd.*, 455 F.2d 432, 453 (9th Cir. 1971).

The administrative law judge concluded that there is no lawful basis for DEA to grant a registration to Respondent since he has no state license to dispense controlled substances or to practice medicine. Therefore, the administrative law judge recommended that the applications for registration executed by Respondent should be denied.

The Administrator has examined the entire record and adopts the recommended findings and conclusions of the administrative law judge. Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 28 CFR 0.100(b), hereby orders that the applications for registration as a practitioner submitted by Robert Leo Krebsbach, M.D., be, and they hereby are, denied. This order is effective June 14, 1991.

Dated: June 6, 1991.

Robert C. Bonner,

Administrator of Drug Enforcement.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply For Worker Adjustment Assistance

Petitions hake been filed with the Secretary of Labor under Section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade adjustment Assistance, at the address show below, not later than June 24, 1991.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 24, 1991.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 3rd day of June 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-25,421]

Fisher-Price, Inc.; Brownsville, TX; Negative Determination Regarding Application for Reconsideration

By an application dated May 16, 1991, one of the petitioners requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on April 23, 1991 and published in the **Federal Register** on May 10, 1991 (56 FR 21690).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The workers provide services related to the production of toys manufactured by a foreign facility of its parent company. The reconsideration, however, was requested for workers in the Cutting Department whose production was transferred to Mexico. Workers in the Cutting Department cut material parts for soft toys being manufactured in Mexico which were subsequently imported as finished products.

The materials cut by the Cutting Department are components to soft toys which are produced in Mexico and later imported. The issue of components (cut material parts) was addressed early in the administration of the worker adjustment assistance program. In *United Shoe Workers of America, AFL-CIO* v. *Bedell*, 506 F2d (DC circ. 1974) the court held that imported finished women's shoes were not like or directly competitive with shoe components—shoe counters. Accordingly, increased imports of soft toys cannot be considered in determining import injury to workers producing cut material parts for soft toys. Therefore, in determining import injury to the Brownsville workers, the Department must consider imports of cut material parts.

The Department's denial for workers providing services related to the production of toys was addressed in the Department's initial denial notice. That notice stated that the Brownsville workers were laid off because of a corporate reorganization. The reorganization terminated Brownsville's previous administrative and support functions for the Matamoros plant to the warehousing of supplies and the receiving of finished articles from its Matamoros plant. This would not provide a basis for a worker group certification.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 5th day of June 1991.

Robert O. Deslongchamps,

Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

[FR Doc. 91-14196 Filed 6-13-91; 8:45 am]

BILLING CODE 4510-30-M

The Lee Company, Kansas City, MS; The Lee Company, Kansas City, KS; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at The Lee Company, Kansas City, Missouri and Kansas City, Kansas. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-25,555; The Lee Company, Kansas City, Missouri (June 5, 1991)

TA-W-25,555 A-B; The Lee Company, Kansas City, Kansas (June 5, 1991)

Signed at Washington, DC this 7th day of June, 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-25,554]

Affirmative Determination Regarding Application for Reconsideration; Irvin Automotive/Takata, Incorp. Dandridge, TN

By a letter dated May 24, 1991, the Amalgamated Clothing Workers Union requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Negative Determination was issued on May 13, 1991 and will soon be published in the **Federal Register.**

The union claims that the subject firm transferred production in 1990 to its plant in Mexico. Also, the remaining production at Dandridge is scheduled to be transferred to Mexico by July 1991.

Conclusion

After careful review of the application, I conclude that the claims are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 5th day of June 1991.

Robert O. Deslongchamps,

Director, Office of Legislation and Actuarial Services, Unemployment Insurance Service.

[TA-W-25,363, TA-W-25,364]

Gloray Knitting Mills, Inc., Gloray Knitting Mills Retail Outlet, Robesonia, PA, Affirmative Determination Regarding Application for Reconsideration

By a letter dated May 7, 1991, a company official requested administrative reconsideration of the Department of Labor's Notices of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for former workers of Gloray Knitting Mills, Inc., Robesonia, Pennsylvania and the Gloray Knitting Mills Retail Outlet, Robesonia, Pennsylvania. The Negative Determinations were issued on April 9, 1991 and were published in the **Federal Register** on May 21, 1991 (56 FR 23302).

The company official claims that the Department's survey was inadequate since its major customer, which recently obtained a worker group certification, was not included in the survey.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 7th day of June 1991.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

Pension and Welfare Benefits Administration

[Application Number D-8361]

Proposed Revocation of Prohibited Transaction Exemption (PTE) 81-82 Involving Guaranteed Contract Separate Accounts

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Notice of proposed revocation of existing class exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of the proposed revocation of PTE 81-82. PTE 81-82 contains a final exemption for certain transactions involving separate accounts maintained by life insurance companies in connection with contracts under which the life insurance company either: (1) Guarantees repayment of amounts deposited with it by an employee pension benefit plan, together with accrued interest, on a fixed date, or (2) guarantees payment of a fixed annuity.

DATES: Written comments must be received by the Department on or before July 15, 1991.

EFFECTIVE DATE: It is proposed to make the revocation effective 30 days after publication of the final notice revoking PTE 81-82.

ADDRESSES: All written comments (preferably at least three copies) should be sent to the Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: D-8361. The comments received will be available for public inspection in the Public Documents Room of the Pension and Welfare Benefits Administration, U.S. Department of Labor, room N-5507, 200

FOR FURTHER INFORMATION CONTACT: Kay Madsen of the Office of Exemptions Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, [202] 523-8971 (this is not a toll-free number) or Diane Pedulla of the Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, [202] 523-9597 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of the proposed revocation of PTE 81-82.[1] On September 18, 1991, the Department published PTE 81-82 [46 FR 46443], a class exemption from the prohibited transaction restrictions of sections 406(a) and 407(a) of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code [the Code], by reason of section 4975(c)(1) (A) through (D) of the Code.[2] The exemption provides relief for transactions between a party in interest and a separate account maintained by life insurance companies in connection with contracts under which the life insurance company either: (1) Guarantees repayment of amounts deposited with it by an employee benefit pension plan, together with accrued interest, on a fixed date, or (2) guarantees payment of a fixed annuity. For a more complete discussion of the relief provided by PTE 81-82, interested persons are referred to the exemption itself as published in the **Federal Register** and cited above.[3]

Background

The relief provided by PTE 81-82 was requested in an application filed by Aetna Life Insurance Company, the Equitable Life Assurance Society of the United States and The Prudential Insurance Company of America. The applicants for the exemption, together with two other insurance companies and the American Council of Life Insurance (collectively, the Companies) urged the Department prior to the granting of PTE 81-82 to issue an opinion that assets held in a "guaranteed investment contract separate account" of the kind described in the proposed exemption [4] are not plan assets because such separate accounts differ in many respects from conventional separate accounts. According to the Companies, the guaranteed investment contracts that were described in the application have three essential characteristics: (1) The insurance company guarantees that on the date or dates set forth in the contract, the company will repay to the contract-holder the amount deposited under the contract plus accrued interest; (2) interest is accrued and credited under the contract at a fixed rate set forth in the contract; and (3) the guarantee of repayment of principal and the stated interest are fixed, and do not vary with the investment performance of any assets held by the insurance company.

In the preamble to PTE 81-82, the Department concluded that it would be more appropriate to resolve the question of whether assets held by an insurance company in a guaranteed investment contract separate account are "plan assets" in the context of the Department's then-pending proposed regulation dealing with the definition of that term.[5] Accordingly, the Department declined at that time to issue the opinion requested by the Companies.

On November 13, 1986, the Department published a final regulation, section 29 CFR 2510.3-101, clarifying the definition of "plan assets" for the purpose of title I of ERISA. Regulation section 29 CFR 2510.3-101(h) provides, in part, that when a plan acquires or holds an interest in a separate account of an insurance company, its assets include its investment and an undivided interest in each of the underlying assets of the separate account, unless the separate account is maintained solely in connection with fixed contractual obligations of the insurance company under which the amounts payable, or credited, to the plan and to any participant or beneficiary of the plan (including an annuitant) are not affected in any manner by the investment performance of the separate account.

In view of the exception set forth in the final "plan assets" regulation for insurance company separate accounts that are maintained solely in connection with certain guaranteed obligations of an insurance company, the Department has made a tentative determination to prospectively revoke PTE 81-82.

In accordance with the Department's exemption procedures, the applicants were given advance notice of the proposed revocation and the reasons therefor, and were provided the opportunity to comment on the revocation. No comments were received from the applicants regarding the proposed revocation.

Written Comments

All persons are invited to submit written comments on the proposed revocation of PTE 81-82 to the address and within the time period set forth above. All comments will be made a part of the record. Comments should state the reasons for the writer's interest in the matter. Comments received will be available for public inspection at the address set forth above.

Proposed Revocation of Existing Exemption

On the basis of the material referred to in this document, the Department is considering revoking PTE 81-82, effective 30 days after final notice of the revocation is published in the **Federal Register**.

Signed at Washington, DC, this 7th day of June, 1991.

Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefits Administration, Department of Labor.

[FR Doc. 91-14223 Filed 6-13-91; 8:45 am]

BILLING CODE 4510-29-M

---

[1] ERISA Procedure 75-1 [40 FR 18471, April 28, 1975] provides that the Department may at any time revoke or limit any exemption. In addition, regulation section 29 CFR 2570.50 [55 FR 32836, August 10, 1990] provides that the Department may take steps to revoke or modify an exemption if, after the exemption takes effect, changes in circumstances, including changes in law or policy, occur which call into question the Department's original conclusions concerning the exemption.

[2] Section 102 of Reorganization Plan No. 4 of 1978 [43 FR 47713, October 17, 1978], generally transferred the Secretary of the Treasury's exemptive authority under section 4975(c)(2) of the Code to the Secretary of Labor.

In the discussion of the proposed revocation, references to specific sections of the Act also should be read to refer to the corresponding provisions of section 4975 of the Code.

[3] The Department notes that, if a final determination is made to revoke PTE 81-82, it also intends to withdraw from consideraton the Proposed Class Exemption for Guaranteed Contract Separate Accounts; Fiduciary Transactions [D-2874, 48 FR 46448] that was published simultaneously with PTE 81-82. The proposed class exemption supplements PTE 81-82 by providing relief from the prohibitions of section 406(6) of ERISA for transactions involving the assets of guaranteed contract separate accounts.

NATIONAL COMMISSION ON ACQUIRED IMMUNE DEFICIENCY SYNDROME

National Commission on Acquired Immune Deficiency Syndrome; Meeting

AGENCY: National Commission on Acquired Immune Deficiency Syndrome.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463 as amended, the National Commission on Acquired Immune Deficiency Syndrome announces a forthcoming meeting of the Working Group on Religious Communities.

DATE AND TIME: Thursday, July 18, 1991, 9 a.m. to 5 p.m.

PLACE: Omni Shoreham Hotel 2500, Calvert Street, NW., Washington, DC.

TYPE OF MEETING: Open.

FOR FURTHER INFORMATION CONTACT: Maureen Byrnes, Executive Director, The National Commission on Acquired Immune Deficiency Syndrome, 1730 K Street, NW., Suite 815, Washington, DC 20006 (202) 254-5125. Records shall be kept of all Commission proceedings and shall be available for public inspection at this address.

AGENDA: A Working Group of the Commission will hold a meeting to identify the current issues and concerns of religious communities responding to the HIV/AIDS epidemic, and to discuss the interface between the religious communities' response and the federal government's response to the HIV/AIDS epidemic.

Interpreting services are available for deaf people. Please call our TDD number (202) 254-3816 to request services no later than July 11, 1991.

Dated: June 10, 1991.

Maureen Byrnes,

Executive Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted on or before July 15, 1991.

ADDRESSES: Send comments to Ms. Susan Daisey, Assistant Director, Grants Office, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., room 310, Washington, DC 20506 (202-786-0494) and Mr. Daniel Chenok, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503 (202-395-7316).

FOR FURTHER INFORMATION CONTACT: Ms. Susan Daisey, Assistant Director, Grants Office, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., room 310, Washington, DC 20506 (202) 786-0494 from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, extensions, or reinstatements. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what the form will be used for; (6) an estimate of the number of responses; (7) the frequency of response; (8) an estimate of the total number of hours needed to fill out the form; (9) an estimate of the total annual reporting and recordkeeping burden. None of these entries are subject to 44 U.S.C. 3504(h).

Category: Extension.

Title: NEH Performance Reporting Requirements.

Form Number: Not applicable.

Frequency of Collection: Either quarterly, semi-annually, or annually, and within 90 days of the grant ending date.

Respondents: All NEH grantees.

Use: Program evaluation.

Estimated Number of Respondents: 1,250.

Frequency of Response: Twice.

Estimated Hours for Respondents to Provide Information: 2 hours per respondent.

Estimated Total Annual Reporting and Recordkeeping Burden: 6,250 hours.

Thomas S. Kingston,

Assistant Chairman for Operations.

BILLING CODE 7536-01-M

Music Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Challenge III Section) to the National Council on the Arts will be held on July 2, 1991 from 9:30 a.m.-4 p.m. in room 714 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman of June 5, 1991, this session will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

For further information with reference to this meeting can be obtained from Ms. Robbie McEwen, Acting Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Dated: June 10, 1991.

Robbie McEwen,

Acting Advisory Committee Management Officer Council and Panel Operations, National Endowment for the Arts.

VOL 56 ISS 115 JE 14 1991 UMI

Visual Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act. (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Visual Arts Advisory Panel (Special Projects/ Challenge III Section) to the National Council on the Arts will be held on July 1, 1991 from 9 a.m.–6:45 p.m. and July 2 from 9 a.m.–4 p.m. in room 730 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on July 2 from 2 p.m.–4 p.m. The topics will be policy and guidelines recommendations.

The remaining portions of this meeting on July 1 from 9 a.m.–6:45 p.m. and July 2 from 9 a.m.–2 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants.

In accordance with the determination of the Chairman of June 5, 1991, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

Any interested persons may attend, as observers, meetings, or portions thereof, of advisory panels which are open to the public.

Members of the public attending an open session of a meeting will be permitted to participate in the panel's discussions at the discretion of the chairman of the panel if the chairman is a full-time Federal employee. If the chairman is not a full-time Federal employee, then public participation will be permitted at the chairman's discretion with the approval of the full-time Federal employee in attendance at the meeting, in compliance with this guidance.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Robbie McEwen, Acting Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: June 10, 1991.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Material Research; Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Public Law 92–463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review and evaluate proposals and provide advice and recommendations as part of the selection process for awards. Because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with proposals, the meetings are closed to the public. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Name: Special Emphasis Panel in Material Research.

Dates/Times/Locations: July 1, 1991 7pm–9pm / July 2, 1991 8am–5pm, University of Maryland, Dept. of Physics & Astronomy, College Park, MD 20742.

July 8, 1991 7pm–9pm / July 9, 1991 8am–5pm, Pennsylvania State University, Department of Physics, University Park, PA 16802.

July 10, 1991 7pm–9pm / July 11, 1991 8am–5pm, Case Western Reserve University, Dept. of Material Science & Engineering, Cleveland, Ohio 44106.

July 15, 1991 7pm–9pm / July 16, 1991 8am–5pm, California Institute of Technology, Dept. of Engineering & Applied Science, Pasadena, CA 91125

July 16, 1991 7pm–9pm / July 17, 1991 8am–5pm, California Institute of Technology, Dept. of Engineering & Applied Science, Pasadena, CA 91125.

July 22, 1991 7pm–9pm / July 23, 1991 8am–5pm, Lehigh University, Dept. of Mechanical Engineering, Bethlehem, PA 18015.

Type of Meeting: Closed.

Agenda: To provide advice and recommendations concerning support for Materials Research Groups.

Contact Person: Dr. John C. Hurt, Program Director, Materials Research Groups, Division of Materials Research, room 408, National Science Foundation, Washington, DC 20550. Telephone (202) 357–9791.

Dated: June 10, 1991.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

Division of Ocean Sciences; Meeting

The National Science Foundation announces the following meeting:

Name: Ocean Science Review Panel.

Date and Time: July 1–2, 1991.

Place: State Plaza Hotel, 2117 E. Street NW., Washington, DC 20037, Ambassador Room.

Type of Meeting: Closed.

Contact Person: Dr. David Epp, Assoc. Program Director, Marine Geology & Geophysics, room 609, National Science Foundation, Washington, DC 20550, Telephone (202) 357–7837.

Purpose of Meeting: To provide advice and recommendations concerning support for research in oceanography.

Agenda: Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of U.S.C. 552b(c), Government in the Sunshine Act.

Dated: June 10, 1991.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. Title of the information collection: 10 CFR 21, "Reporting of Defects and Noncompliance," and 10 CFR 50.55(e), "Reporting of Defects in Design and Construction."

3. The form number if applicable: Not applicable.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: NRC licensees and directors or responsible officers of non-licensees that supply components to licensed facilities or activities.

6. An extimate of the number of responses: Part 21—Reduction of 100 reports annually; § 50.55(e)—Reduction of 50 reports annually.

7. An estimate of the total number of hours needed to complete the requirements or request: Part 21—Reduction of 7393 hours per year; § 50.55(e)—Reduction of 1103 hours per year.

8. The average burden per response is: Part 21—95 hours; § 50.55(e)—95 hours.

9. An indication of whether section 3504(h), Public Law 96–511 applies: Applicable.

10. Abstract: Proposed amendments to 10 CFR part 21 and § 50.55(e) rules will clarify the criteria and procedures for reporting of safety defects by licensees and nonlicensees. The proposed revised criteria and procedures to the existing rules would (1) reduce duplicate evaluation and reporting, (2) establish uniform time limits for evaluation, transfer of information, and reporting, (3) more clearly and uniformly define the defects to be reported, (4) establish a uniform content for reporting; and (5) clarify records retention requirements.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW Lower Level, Washington, DC 20555.

Comments and questions can be directed by mail to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs, (3150–0011 and 3150–0035), NEOB–3019, Office of Management and Budget, Washingotn, DC 20503.

Comments can also be submitted by telephone at (202) 395–3084. The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 5th day of June, 1991.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior, Official for Information Resources Management.

[FR Doc. 91–14220 Filed 6–13–91; 8:45 am]

BILLING CODE 7590–01–M

Washington Public Power Supply System Nuclear Project No. 1; Environmental Assessment and Finding of no Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an extension to the latest construction completion date specified in Constructon Permit No. CPPR–134 issued to Washington Public Power Supply System (applicant or WPPSS) for Nuclear Project No. 1 (WNP–1). The facility is located on the applicant's site on the Department of Energy's Hanford Reservation in Benton County, Washington, approximately eight miles north of Richland, Washington.

Environmental Assessment

Identification of Proposed Action

The proposed action would extend the latest construction completion date of Construction Permit No. CPPR–134 to June 1, 2001. The proposed action is in response to the applicant's request of April 18, 1991 as supplemented on May 22, 1991.

The Need for the Proposed Action

The proposed action is needed because the construction of the facility is not yet fully completed and the licensee wants to maintain the facility as a potential electrical power resource.

Environmental Impact of the Proposed Action

Since the proposed action involves extending the construction permit, there is no radiological impacts associated with this action. The impacts that are involved are all non-radiological and are associated with continued construction. The impact of construction was evaluated in the Final Environmental Statement for WNP–1 and 4 (NUREG–75/012, dated March 1975).

Based on the foregoing, the NRC staff concludes that the proposed extension of the construction permit would have no significant environmental impact.

Alternatives Considered

A possible alternative to the proposed action would be to deny the request. Under this alternative, the applicant would not be able to complete construction of the facility. This would result in denial of the potential benefit of power production. This option would not eliminate the environmental impacts of construction already incurred. If construction were halted and not completed, site redress activities would restore some small areas to their natural state. This would be a slight environmental benefit, but much outweighed by the economic losses from denial of the use of a facility that is nearly completed. Therefore, this alternative is rejected.

Another alternative is to take no action on the request for extension. The construction permit would not be deemed to have expired until the application has been finally processed (10 CFR 2.109). In effect the construction permit could be in effect as long as no action was taken on a timely application for an extension. To take no action on the applicant's request would not be responsive; therefore, this alternative is rejected.

Alternative Use of Resources

This action does not involve the use of resources other than those evaluated in the FES prepared as part of the NRC staff's review of the construction permit application, NUREG–75/012, March 1975.

Agencies and Persons Consulted

The NRC staff reviewed the applicant's request and applicable documents referenced therein that support this extension. The NRC did not consult other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for this action. Based upon the environmental assessment, we conclude that this action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the request for extension of April 18, 1991 as supplemented on May 22, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local Public Document Room, Richland Public Library, 955 Northgate Street, Richland, Washington, 99352.

Dated at Rockville, Maryland, this 6th day of June 1991.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors, Decommissioning and Environmental Project Directorate, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

VOL 56 ISS 115 JE 14 1991 UMI

[Docket No. 30-12319-CivP, E.A. 88-222; ASLBP No. 90-613-03-CivP]

Atomic Safety and Licensing Board; Tulsa Gamma Ray, Inc., (Material License No. 35-17178-01)

June 10, 1991.

Memorandum and Order (Prehearing Conference and Evidentiary Hearing)

Before Administrative Judges: Charles Bechhoefer, Chairman, Dr. A. Dixon Callihan, Dr. Jerry R. Kline.

1. For purposes of expediting the hearing, the Licensing Board, immediately prior to the evidentiary hearing on June 25, 1991, will conduct a prehearing conference to review the procedures to be followed during the hearing. At such conference, the Board will consider, *inter alia*, such matters as (1) further simplification, clarification and specification of issues (as appropriate), (2) the obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof, (3) determination of the schedule to be followed during the evidentiary hearing, including the order of witnesses, and (4) such other matters as may aid in the orderly disposition of the proceeding. See 10 CFR 2.752.

The prehearing conference will commence at 9:30 a.m. on June 25, 1991, in room 411 (Grand Jury Room), U.S. Courthouse , 333 West 4th Street, Tulsa, Oklahoma 74103. The evidentiary hearing will commence immediately following the prehearing conference, at the same location.

2. Parties are reminded that, if they wish to rely on documentary evidence (exhibits), they bring sufficient copies of each exhibit to present to each of the Board members, representative(s) of the opposing party, and three copies for the court reporter.

It is so ordered.

Bethesda, Maryland, June 10, 1991.

For the Atomic Safety and Licencing Board.

Charles Bechhoefer,

Chairman, Administrative Judge.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-29284]

Administrative Dispute Resolution Act and Negotiated Rulemaking Act; Statement of Compliance

June 10, 1991.

James R. Doty, the Commission's General Counsel, has released the following statement concerning the Commission's compliance with the Administrative Dispute Resolution Act and the Negotiated Rulemaking Act:

On November 15, 1990, President Bush signed Public Law 101-552, the Administrative Dispute Resolution ("ADR") Act. Companion legislation, Public Law 101-648, the Negotiated Rulemaking ("Reg-Neg") Act, was signed by the President on November 29, 1990. The two Acts authorize the use of arbitration, mediation, and other consensual methods of dispute resolution by federal agencies, while not actually mandating the employment of either ADR [1] or reg-neg.[2] The Acts do mandate, however, an evaluation by all federal agencies of potential areas for ADR leading to the adoption of an appropriate agency policy, and compliance with certain rules if ADR or reg-neg is used by the agency.

The ADR Act requires federal agencies to: (1) Designate an ADR Specialist; (2) review agency activities and adopt policies regarding the potential use of ADR techniques; (3) provide ADR training for employees involved in developing and implementing the ADR policies; and (4) review agency contracts, grants, and other assistance programs to determine whether they should authorize and encourage ADR. The Reg-Neg Act authorizes agencies to use reg-neg procedures if the head of the agency determines that the use of such procedures is in the public interest. Although, unlike the ADR Act, the Reg-Neg Act does not require the adoption of a policy, the Reg-Neg Act contemplates an evaluation by agencies of the utility of such procedures.

On behalf of the Commission, I am authorized to issue a statement regarding the Commission's compliance with these Acts. Although the ADR Act prescribes no deadline for the adoption of an ADR policy and the Reg-Neg Act does not require the adoption of a policy, the Commission considers the adoption of appropriate ADR and reg-neg policies to be a priority item. Therefore, the Commission has moved forward with a program for evaluating its activities and developing appropriate policies.

On March 18, 1991, Chairman Breeden designated the General Counsel as the Commission's "ADR Specialist." In addition, the Commission has authorized me to head the evaluation of reg-neg. Accordingly, I have created an internal ADR & Reg-Neg Task Force with representatives from the various offices within the Commission to examine all aspects of Commission activities in order to determine where ADR or reg-neg procedures may be appropriate. The staff has been receiving assistance from the Administrative Conference of the United States in constructing a program for developing the Commission's ADR policy and in receiving appropriate training. It is contemplated that the Commission will publish a release in the near future soliciting comments regarding the utility of ADR and reg-neg techniques in Commission activities. Until the Commission adopts appropriate policies, it does not intend to consider employing ADR or reg-neg on a case-by-case basis.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-14130 Filed 6-13-91; 8:45 am]

BILLING CODE 8010-01-M

[File No. 1-8386]

Issuer Delisting; Application To Withdraw From Listing and Registration (NYCOR, Inc., Common Stock, $1.00 Par Value)

June 10, 1991.

NYCOR, Inc. ("Company") has filed an application with the securities and exchange Commission ("Commission") pursuant to section 12(d) of the Securities Exchange Act of 1934 and rule 12d2-2(d) promulgated thereunder to withdraw its Common Stock from listing and registration on the Philadelphia Stock Exchange, Inc. ("Phlx").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Company currently has authorized and outstanding four classes of capital stock, the Common Stock; Class A Stock, Par Value $1.00 per share; Class B Stock, Par Value $1.00 per share; and $1.70 Convertible Exchangeable Preferred Stock, Par Value $1.00 per share ("Preferred Stock").

The Common Stock is listed on the Exchange and also trades in the National Association of Securities Dealers Automated Quotations/ National Market System ("NASDAQ/NMS"). The Class A Stock and the Preferred Stock trade in the NASDAQ-NMS. There is no established public trading market for the Class B Stock, as there are restrictions on its transfer.

The Class A Stock was created and issued effective January 2, 1991. The Company has been advised by the Exchange that the Class A Stock is not eligible for listing because it does not have voting rights. The Class A Stock is currently the Company's largest class of stock and it is presently anticipated by the Company that future issuance of common equity would be in shares of Class A Stock.

Since the Common STock, Class A Stock and Preferred Stock all trade in the NASDAQ/NMS and the Class A Stock may not be admitted to listing on the Exchange, the Company believes that its stockholders will best be served if the Company withdraws the Common Stock from listing on the Exchange in order that all of the Company's publicly-traded shares are traded principally in one market, the NASDAQ/NMS.

Any interested person may, on or before July 1, 1991, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Phlx and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 91-14202 Filed 6-13-91; 8:45 am]

BILLING CODE 8010-01-M

[1] Alternative means of dispute resolution are procedures, often involving a neutral third party, that are used in lieu of adjudication to resolve issues in controversy, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, arbitration, or any combination of these.

[2] Negotiated rulemaking, or "reg-neg," is a procedure by which an agency invites the parties that will be affected by a rule to join the agency in forming an ad hoc committee to develop a consensus draft of the rule.

Federal Aviation Administration

Proposed Advisory Circular 25.963-1; Fuel Tank Access Covers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular 25.963-1 and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) pertaining to fuel tank access covers. Guidance information is provided in that AC for showing compliance with the impact and fire resistance requirements of § 25.963(e). This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATES: Comments must be received on or before October 14, 1991.

ADDRESSES: Send all comments on the proposed AC to: Federal Aviation Administration, Attention: Transport Standards Staff, ANM-110, Northwest Mountain Region, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at the above address between 7:30 a.m. and 4 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jan Thor, Transport Standards Staff, at the address above, telephone (206) 227-2127.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the draft AC may be obtained by contacting the person named above under **"FOR FURTHER INFORMATION CONTACT."** Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they desire. Commenters should identify AC 25.963-1 and submit comments, in duplicate, to the address specified above. All communications received on or before the closing date for comments will be considered by the Transport Standards Staff before issuing the final AC.

Background

Fuel tank access covers have failed in service due to impact with high speed objects such as failed tire tread material and engine debris following engine failures. Failure of an access cover on a wing fuel tank may result in the loss of hazardous quantities of fuel which could subsequently ignite. Section 25.963(e) of the Federal Aviation Regulations (FAR) was, therefore, adopted (Amendment 25-69; 54 FR 40352; September 28, 1989) to require new standards for such covers. Section 121.316 was also adopted concurrently to require each turbine-powered transport category airplane operated in air carrier or commercial operations after October 30, 1991, to meet the new standards of § 25.963(e).

The contents of proposed AC 25.963-1 are considered by the FAA in determining compliance of the fuel tank access covers with § 25.963(e) of the FAR.

Issued in Renton, Washington, on May 31, 1991.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM-100.

BILLING CODE 4910-13-M

Federal Highway Administration

Uniform Relocation and Real Property Acquisition for Federal and Federally-Assisted Programs; Fixed Payment for Moving Expenses; Residential Moves

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice.

SUMMARY: The purpose of this notice is to publish the changes in the alternative moving expense and dislocation allowance schedule for persons displaced from dwellings in the States of California, Delaware, Florida, Georgia, Maine, Maryland, Michigan, Nevada, Oklahoma, and Rhode Island as provided for by section 202(b) of the Uniform Relocation Assistance and Real Property Acquisition Policies Act (Uniform Act), 42 U.S.C. 4601-4655, implemented at 49 CFR 24.302. The Uniform Act applies to all programs or projects that are undertaken by Federal agencies or with Federal financial assistance and which cause the displacement of any person.

EFFECTIVE DATE: The provisions of this notice are effective July 15, 1991, or on such earlier date as an agency elects to begin operating under this schedule.

FOR FURTHER INFORMATION CONTACT: Barbara J. Satorius, Policy Development Branch, Office of Right-of-Way (202) 366-2043; or Reid Alsop, Office of the Chief Counsel (202) 366-1371, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: The Uniform Act established a program to assist persons forced to move as a result of Federal or federally assisted projects. The FHWA is the lead agency for implementing the provisions of the Uniform Act, and, pursuant to the Uniform Act has issued governmentwide implementing regulations at 49 CFR part 24.

The following 17 Federal departments and agencies have, by cross reference adopted the governmentwide regulations. (The governmentwide regulations also apply to other agencies

VOL 56 ISS 115 JE 14 1991 UMI

within DOT that are covered by the Uniform Act.)

Department of Agriculture
Department of Commerce
Department of Defense
Department of Education
Department of Energy
Environmental Protection Agency
Federal Emergency Management Agency
General Services Administration
Department of Health and Human Services
Department of Housing and Urban Development
Department of the Interior
Department of Justice
Department of Labor
Department of Veterans Affairs
National Aeronautics and Space Administration
Pennsylvania Avenue Development Corporation
Tennessee Valley Authority

Section 202(b) of the Uniform Act provides that a displaced individual or family may elect to be paid for moving expenses on the basis of a single moving expense and dislocation allowance schedule established by the head of the lead agency, as an alternative to being paid for moving and related expenses that are actually incurred. The governmentwide regulations at 49 CFR 24.302 provide that the FHWA will develop, approve, maintain and update this schedule as appropriate.

The purpose of this notice is to update the current schedule which was published as notice on March 2, 1989 (54 FR 8951), by the FHWA for use in payment determinations by all Federal, State, and local governments, and persons affected by the Uniform Act. Persons that move as result of programs or projects undetaken or funded by those departments or agencies listed above are covered by the schedule.

This update increases the schedule amounts in the States of California, Delaware, Florida, Georgia, Maine, Maryland, Michigan Nevada, Oklahoma, and Rhode Island. The schedule is developed from data provided by State highway agencies, and combines the moving expense and the dislocation allowance within the schedule's payment amounts. The following exceptions and limitations contained in the March 2, 1989, notice continue to apply to this schdule:

1. The expense and dislocation allowance to a person whose residential move is performed by an agency at no cost to the person shall be limited to $50.00.

2. An occupant will be paid on an actual cost basis for moving his or her mobile home from the displacement site. In addition, a reasonable payment to the occupant for packing and securing personal property for the move may be paid at the agency's discretion.

3. The expense and dislocation allowance to a person with minimal personal possessions who is in occupancy of a dormitory style room shared by two or more other unrelated persons shall be limited to $50.00.

4. An occupant who moves from a mobile home may be paid for the removal of personal property from the mobile home in accordance with the moving and dislocation allowance payment schedule.

The schedule continues to be based on the "number of rooms of furniture" owned by a displaced individual or family. In the interest of fairness and accuracy, and to encourage the use of the schedule (and thereby simplify the computation and payment of moving expenses) an agency should increase the room count for purposes of applying the schedule if the amount of possessions in a single room or space actually constitute more than the normal contents of one room of furniture or other personal property. For example, a basement may count as two rooms if there is the equivalent of two rooms worth of possessions located in the basement. In addition, an agency may elect to pay for items stored outside of the dwelling unit by adding the appropriate number of rooms.

Authority: 42 U.S.C. 4622(b) and 4633(b); 49 CFR 1.48 and 24.302.

Issued on: June 6, 1991.

T.D. Larson,
Administrator.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: June 10, 1991.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for reveiw and clearance under the Paperwork Reduction Act of 1980 Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0892.

Form Number: 8300.

Type of Review: Revision.

Title: Report of Cash Payments Over $10,000 Received in a Trade or Business.

Description: Anyone in a trade or business who, in the course of such trade or business, receives more than $10,000 in cash or foreign currency in one or related transactions must report it to the IRS and provide a statement to the payor. Any transaction which must be reported under title 31 on Form 4789 is exempted from reporting the same transaction on Form 8300.

Respondents: Farms, Businesses or other-profit, Federal agencies or employees, Small businesses or organizations.

Estimated Number of Respondents: 8,300.

Estimated Burden Hours Per Response/Recordkeeping: 19 minutes.

Frequency of Response: On occasion.

Estimated Total Recordkeeping/ Reporting Burden: 9,483 hours.

Clearance Officer: Garrick Shear (202) 535-4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,
Department Reports Management Officer.

UNITED STATES INFORMATION AGENCY

Congress-Bundestag Youth Exchange Program

AGENCY: United States Information Agency.

ACTION: Notice.

SUMMARY: The Bureau of Educational and Cultural Affairs, U.S. Information Agency, announces a competition for exchange organizations to administer the Congress-Bundestag Youth Exchange Program (CBYX). Organizations that are successful in this competition will be awarded grants in FY 1993 to administer the exchange for

1991
UMI

academic year 1993–94 and will also be eligible for grants in FY 1994, 1995 and 1996. Approximately 9 grants will be awarded for all components of the program. Final determination of grant amounts is subject to the availability of funding and will be based on final budget submissions to be negotiated following preliminary selection decisions.

DATES: Deadline for proposals: Must be received at the U.S. Information Agency by 5 p.m. EDT on August 16, 1991. Proposals received by the Agency after this deadline will not be eligible for consideration. Faxed documents will not be accepted, nor will documents postmarked prior to August 16, 1991 but received at a later date. It is the responsibility of each grant applicant to ensure that their proposal is received by the above deadline. Selection decisions will be made by December 31, and will be coordinated with the Government of Germany, which is simultaneously selecting the German counterpart organizations that will administer the program in Germany. Final budgets, based on guidance to be provided by the Agency, will be required from the selected organizations by July 31, 1992. Duration: The duration of the initial grants will be from November 1, 1992 to July 31, 1994. No grant funds may be expended until the grant agreement is signed.

ADDRESSES: The original and twelve copies of the completed application should be submitted to the following office: U.S. Information Agency, Office of the Executive Director, Bureau of Educational and Cultural Affairs (E/X), Room 336, 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested U.S. organizations should write or call Mr. Robert Persiko, Youth Programs Division (E/VY), room 357, 301 4th Street SW., Washington, DC 20547; telephone 202–619–6299 for detailed application guidance.

SUPPLEMENTARY INFORMATION: The Congress-Bundestag Youth Exchange Program (CBYX), known in Germany as the Parlamentarisches Patenschafts-Programm (PPP), is an official exchange program of the governments of the United States and the Federal Republic of Germany. It provides a full scholarship for an academic year experience of living and studying in the host country. Part of the exchange involves students aged 16–18 preparing for university, vocational or professional careers, who live with host families, attend high school ("Gymnasium" in Germany), and participate in community life. Another component is dedicated to young professionals aged 18–22 who study at community colleges or universities and receive training. Additional components involve young farmers and vocational school graduates (described in more detail below). Each government provides funding through grant awards for the costs of recruiting, selecting, orienting, and debriefing of its nationals and their international airfare; and most hosting costs (specified below) for the duration of the foreign nationals' stay. Participants themselves pay domestic travel to the port of departure and provide their own funds for their daily needs. Grant proposals may include a provision for partially or fully covering this cost for financially needy participants. The USIA health and accident insurance plan is used exclusively for all German participants, and its cost is covered by USIA; the German Government provides insurance for Americans while in Germany. American organizations that deem it necessary to carry liability insurance on the German participants are responsible for providing for this coverage at their own expense.

The actual number of participants selected each year is dependent on the amount of funding made available by the U.S. Congress and the German Bundestag. A final determination of exchange numbers for each academic year is made in the preceding December when representatives of both governments hold annual bilateral discussions. Participants are chosen according to procedures and criteria established by each government. In Germany, a student applies to the organization assigned to his/her Bundestag district; final selection is made by the Bundestag member. In the U.S. students for the high school program are selected in a national competition, which will be administered by one organization working on behalf of and in cooperation with the others (see Category B below). Each U.S. organization in categories C, D and E (below) of the program recruits and selects its participants. Placements are made and supervision is handled by the affiliated organizations in Germany, operating under grants from the German Government.

Grant awards will be made in the following categories:

A. High school component—Approximately 300 U.S. and 300 German students will participate annually. The American organization is responsible for: Final processing of the students, pre-departure orientation, travel arrangements, debriefing and follow-up for the U.S. students; arrival orientation for the German students, their placement in schools, selection and orientation of host families, domestic U.S. travel arrangements, supervision and counseling, arrangements for a 3-day visit to Washington, DC, and re-entry training. The Washington program, which is designed to introduce the participants to the federal government, may be subcontracted by the grantee. Grantees handle all administrative and logistical matters, including in-country travel, and coordinate with USIA on the administration of its health and accident insurance plan. Any language training for Americans will be the responsibility of the German partner organization and covered by German Government funds. German students are expected to have sufficient English so as to make language instruction unnecessary. Organizations may include other program elements in their proposals, but should bear in mind that funding is limited.

Organizations may bid on one or more lots of 30 US/30 German students. A maximum of 5 U.S. organizations will be selected for grants in this category.

B. Administration of the recruitment and selection process for the high school component—One organization will be selected to administer a grant to coordinate this process on behalf of and in cooperation with the other grantee organizations. It will be responsible for preparing and distributing informational material, student selection criteria and applications to a wide audience including all public and private secondary schools, the media, and key networks such as the American Association of Teachers of German (the annual total is estimated at 40,000 pieces of mail).

Innovative methods for publicizing the program are welcome, within funding limitations. The organization will screen all written applications and identify a group of semifinalists that reflects population distribution by state. It will assemble and coordinate state selection committees to interview semifinalists in cooperation with the other organizations selected to participate in the program in order to generate a roster of finalists. It will handle the notification of these finalists and work with the other organizations in processing them. The grantee will also set up and maintain a master list of all high school student participants and prepare a list of the Congressmen from whose districts the students are selected. The grantee will also prepare a similar list of German participants and the Congressional districts in which they are hosted. Finally, it will work with the other grantees in the preparation of general briefing materials for use by all CBYX participants, which are updated biannually. The grant will not exceed $180,000.

C. Young professionals component—One organization will be awarded a grant to administer this component. The U.S. organization will be responsible for: The recruitment and selection of approximately 50 young U.S. men and women aged 18–24, who will study and participate in an internship in a field related to their career interest during the exchange year; their pre-departure orientation (approximately 3 days); international travel arrangements; and close coordination with its German partner to monitor the progress of the U.S. participants and resolve problems. The grantee will also be responsible for arranging and monitoring all activities relating to approximately 75 German young professionals aged 18–22 during their stay in the U.S. It will: Conduct a 3-day arrival orientation; arrange their placement in colleges and practicums (internships); recruit, screen, and orient host families; make arrangements for the group's visit to Washington for a 3-day cultural and educational program; provide supervision and counseling of the participants as needed; handle all administrative and logistical matters including in-country travel; and coordinate with USIA the administration of its health and accident insurance plan. Any language training for Americans will be the responsibility of the German partner organization. Organizations may include other program elements in their proposals, bearing in mind that funding is limited.

Each German participant will be placed in a two or four-year college for a full-time study, a minimum of 12 credit hours, for one semester. The grantee may need to arrange for English classes for those participants whose English is inadequate. To save costs, the organization is encouraged to seek tuition waivers and cost-sharing with cooperating colleges. Each participant will have a full-time practicum or internship in his/her professional field for the second half of the program year. Each practicum should be based on a prospectus of the specific skills and functions that will be mastered, and it should include a structured learning component that enables the participant to gain a perspective on the overall operation of the firm.

In the past, a subsidy has been paid to host families, but in the interest of reducing costs the organization may consider recruiting host families who will provide lodging and food gratis. A stipend for some meals, incidentals and reasonable local transportation expenses may be included in the budget, but the stipend should be substantially reduced or eliminated during the second half of the program when the firms or agencies hosting the practicums provide an allowance for living expenses. The current stipend is $225 per month.

D. Vocational School Graduates Component—One grant will be awarded to an organization to administer the program component designed for 20 U.S. vocational school graduates. The organization is responsible for recruiting and selecting 20 men and women aged 18–20 who will complete vocational school studies prior to departure for Germany. The grantee is encouraged to work with vocational educational offices at the state level in addition to administrators of secondary schools with vocational educational divisions in the selection process. The grantee also conducts a pre-departure orientation and, at the conclusion of the program, a debriefing. The grantee will work with its partner in Germany, which is responsible for the following (funded by the German Government): Arrival orientation, up to 2 months of language training, family and school placement, arrangements for a practicum in the participants' fields, counseling and support, excursions, and administration, including insurance.

E. Agricultural Component—One grant will be awarded to an organization to administer a small component for agricultural youth. The grantee will work in Germany with its partner. 12–14 Germans and 12–14 Americans will be chosen annually for a program that combines academic study and practical experience on a farm. At least half of the Germans will be aged 18–22 and will spend one semester full-time at a community college; the second semester is for training. Host farms should design a structured plan to enable the participant to learn about and practice a wide range of skills and tasks on the operation and function of the farm. The other half will attend high school for a full year. The organization: Identifies appropriate community colleges and arranges for the German participants' admission, preferably securing tuition waivers or breaks; recruits, screens, selects and orients host families; conducts an orientation for the participants upon arrival; arranges a mid-year cultural activity appropriate to the group's interests; handles all in-country (U.S.) travel and logistical arrangements; and provides supervision and counseling services. The outbound Americans will be high school upperclassmen or graduates, who will receive some schooling in Germany and receive training on their host family farms. The grantee organization: Participates in the recruitment and selection of American students in conjunction with the organization chosen to coordinate the high school selection process; screens and provides pre-departure orientation to these participants; arranges their international travel; monitors their progress in conjunction with its German partner and engages in program evaluation upon their return to the U.S. and follow-up activities.

Application Procedures

Interested organizations should write or call the Youth Programs Division (address provided above) to request detailed application packets, which include award criteria, all necessary forms, and guidelines for preparing proposals and the preliminary budget, including specific information on the contents of a complete application. To be eligible for consideration in this competition, an organization must:

1. Be legally incorporated and have a legally incorporated affiliate in Germany;

2. Have a not-for-profit status, as determined by the Internal Revenue Service; the German affiliate must also be not-for-profit ("gemeinnutzige");

3. Be financially solvent, have a demonstrated tract record of responsible fiscal management and be able to meet the accounting and reporting requirements for Agency grants;

4. Have four years' experience in conducting long-term exchange programs (of at least 9 months duration) between the United States and Germany; and

5. Have well-established national volunteer and host family networks to carry out various aspects of the program; regional representatives must be situated in such a way to handle expeditiously any problems that arise regarding host family accommodations, schooling and language problems, or difficulties concerning internships.

Any organization competing for Category A (the high school portion of the program) must be designated by USIA as a Teenager Exchange Visitor Program Sponsor.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Eligible proposals will be forwarded to panels of USIA officers for advisory review in conformity with the criteria set forth

VOL 56 ISS 115 JE 14 1991 UMI

herein and in the guidelines for preparing proposals prior to funding decisions be delegated officials. All proposals will also be reviewed by the Agency's Office of the general Counsel as well as other Agency offices. The Associate Director for Educational and Cultural Affairs identifies and approves potential grant recipients. Final technical authority for grant awards resides with the Agency Contracting Officer.

Completed applications will be reviewed according to the following criteria:

a. Quality of the program plan and adherence of the proposed activity to the goals and objectives described above;

b. Feasibility of the program plan and institutional capacity of the organization to conduct the program and to manage an increase in its exchange activities in such a way that existing programs are not jeopardized;

c. Track record—the Agency will consider in its review all records on the past performance of organizations;

d. Potential—for organizations that have not received Agency grants for this program, the potential to achieve program goals as demonstrated in the proposal, will be considered;

e. Multiplier effect/impact—the impact of the grant-funded activity on the wider community and on the development of continuing institutional ties;

f. Value to U.S.—German relations—the assessment of USIA offices and USIS Germany of the potential impact and significance of the applicant's involvement in the CBYX; and

g. Cost effectiveness—greatest return on each grant dollar and degree of cost-sharing exhibited.

Notification

All applicants will be notified of the results of the review process on or about December 31, 1991. Funded proposals will be subject to periodic reporting and evaluation requirements.

Dated: May 31, 1991.

Warren J. Obluck,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 91-14229 Filed 6-13-91; 8:45 am]

BILLING CODE 8230-01-M

Rights of People With Disabilities

AGENCY: United States Information Agency.

ACTION: Notice.

SUMMARY: Contingent on availability of funds, The Bureau of Educational and Cultural Affairs, U.S. Information Agency, announces its intention to award one grant not to exceed $130,000 to a private not-for-profit organization to conduct a program for 15 young foreign leaders and professionals aged 20–35 from government agencies and private organizations dedicated to assisting people with disabilities. The project is being sponsored in conjunction with the celebration of the 200th anniversary of the Bill of Rights and focuses on the impact of the Americans with Disabilities Act of 1990. The participants will be nominated by USIS missions worldwide and selected by USIA.

DATES: Deadline for proposals: Must be received at the U.S. Information Agency by 5 p.m. EDT on July 15, 1991. Proposals received by the Agency after this deadline will not be eligible for consideration. Faxed documents will not be accepted, nor will documents postmarked prior to July 15, 1991 but received at a later date. It is the responsibility of each grant applicant to ensure that their proposal is received by the above deadline. Duration: The duration of the grant will be six months. The earliest date on which grant-funded activities may begin is September 1. No funds may be expended until the grant agreement is signed.

ADDRESSES: The original and twelve copies of the completed application should be submitted to the following office: U.S. Information Agency, Mr. Thomas Leydon, Office of the Executive Director (E/X), room 336, 301 4th Street SW., Washington, DC 20547. (Attn: Rights of People with Disabilities.)

FOR FURTHER INFORMATION CONTACT: Interested U.S. organizations should write or call Ms. Bettye Stennis at the Youth Programs Division (E/VY), Office of International Visitors, room 357, 301 4th Street SW., Washington, DC 20547; telephone 202–619–6299.

SUPPLEMENTARY INFORMATION: Programs are authorized under Public Law 87–256, the Mutual Educational and Cultural Exchange Act of 1961, whose purpose is "to increase mutual understanding between the people of the United States and the people of other countries." Programs under the authority of the Bureau must be balanced and representative of the diversity of American political, social, and cultural life. Projects must conform to all Agency requirements and guidelines and are subject to final review by the USIA contracting officer.

The project is designed to generate a dialogue between foreign and American young leaders and professionals who are involved with public policy promoting and defending the rights of people with disabilities. Some of the participants selected may themselves have a disability.

The project should serve to demonstrate the vibrancy of the Bill of Rights 200 years after its enactment. The program should run for 28 days and should begin in Washington with an orientation, an overview of the issues and an examination of the federal government approach to these issues. Special emphasis will be accorded to the impact of the Americans with Disabilities Act, designed to provide equal opportunities for people with disabilities. A national itinerary should include visits to a state capital and to two to three communities for a look at state and local regulation, citizen advocacy, and private and public efforts in such areas as providing access for individuals with disabilities to services and resources. Other possible program activities include: state and national parks where nature trails have been made accessible to people using wheel-chairs and those who are visually impaired municipalities where public transportation has been made accessible; training and employement programs. Videos, books and other resource materials may be provided to the participants to take back to their countries for educational purposes. The program should also provide opportunities for the participants to experience the diversity of American society and culture. Homestays and home hospitality are encouraged where possible.

The grantee organization will be responsible for: development of a detailed itinerary and program, including an orientation; travel arrangements; disbursement of per diem and allowances for the participants and escort/interpreters; and final evaluation. It is expected that the USIA grant will cover most of the costs of the project, but cost-sharing by the grantee is encouraged.

The English-speaking ability of the participants should be sufficient to make interpretation unnecessary. USIA will assign two contract escorts to work with the grantee organization and accompany the group throughout the project.

Budget

The budget should be submitted in a 3 column format showing how the costs will be distributed for each line item; i.e.,

Category	USIA	Grantee (incl. in-kind)	Total

USIA will cover international airfare for the participants separately.

Therefore, organizations need not include international travel in their budgets. Assume arrival at and departure from Dulles International Airport, Washington, DC.

Per diem—the allowance for lodging, meals and incidentals—is limited to $120 a day. Less than this amount should be budgeted in those cases where homestays are provided.

The proposal budget should also include:

—Education and cultural allowance at a maximum of $150 per participant.
—Book allowance at a maximum of $50 per participant.
—Return travel allowance of $70 each.
—Domestic travel—USIA estimates the following: Air transportation @ $1,200 per participant and Ground transportation @ $300 per participant

The budget should include per diem @ $120/day and domestic travel for two escorts for 30 days, including one day before the participants arrive and one day after their departure. Salary for the escorts will be provided separately by USIA.

Application Procedures

To be eligible for consideration organizations must be incorporated in the U.S., have not-for-profit status as determined by the IRS, and be able to demonstrate expertise in a field relevant to the theme of the project.

Organizations with four years or less experience in international exchange will not be eligible to compete for this grant. Experience in programming exchange visitors is desirable.

Interested organizations should write or call the Youth Programs Division (address provided above) to request application packets, which include award criteria, all necessary forms, and guidelines for preparing proposals, including specific information on the contents of a complete application.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Incomplete proposals may be judged ineligible. Eligible proposals will be forwarded to a panel of USIA officers for advisory review in conformity with the criteria set forth herein and in the guidelines for preparing proposals prior to funding decisions by delegated officials. Proposals recommended for funding will also be reviewed by the Agency's Office of General Counsel and Contracts office as well as other Agency offices. Final technical authority for grant awards resides with the Agency Contracting Officer.

Completed applications will be reviewed according to the following criteria:

a. Quality of the program plan and adherence of the proposed activity to the objectives set forth in this RFP;

b. Feasibility of the program plan and institutional capacity of the organization to conduct the program;

c. Track record—the past performance of prior grantees;

d. Potential—for organizations that have not received Agency grants, the potential to achieve program goals, as demonstrated in the proposal.

e. Multiplier effect/impact—the impact of the exchange activity as an educational and cultural experience for these young leaders/professionals in assisting people with disabilities in their own countries.

f. Cost effectiveness—greatest return on each grant dollar and degree of cost-sharing exhibited.

g. Bilateral/multilateral value—the assessment of USIA's geographic area desk of the potential impact and significance of the proposed program on international relations.

Notification

All applicants will be notified of the results of the review process on or about August 31. Funded proposals will be subject to periodic reporting and evaluation requirements.

Warren J. Obluck,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

Sunshine Act Meetings

Federal Register
Vol. 56, No. 115
Friday, June 14, 1991

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

U.S. COMMISSION ON CIVIL RIGHTS
June 12, 1991.

PLACE: Radisson Hotel, 1550 Court Place, Denver, Colorado.
TIME AND DATE: 9:00 a.m.–1:00 p.m., Friday, June 21, 1991.
STATUS: Open to the public.
MATTER TO BE CONSIDERED:

Agenda

I. Approval of the Agenda
II. Approval of Minutes of May Meeting
III. Announcements
IV. SAC Appointment for Nebraska and Interim Appointments for Kansas and Massachusetts.
V. Staff Director's Report
VI. Future Agenda Items

CONTACT PERSON FOR MORE INFORMATION: Barbara Brooks, Press and Communications Division, (202) 376–8312.

Emma Monroig,
Solicitor, (202) 376–8375.

BILLING CODE 6335–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION
Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:03 p.m. on Tuesday, June 11, 1991, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Matters relating to the probable failure certain insured banks.

Recommendations regarding the liquidation of depository institutions' assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 47,700
First American Bank for Savings Boston, Massachusetts
Case No. 47,706
First Texas Savings Association Dallas, Texas

Administrative enforcement proceedings.

Memorandum and resolution regarding the organization of bridge banks.

Matters relating to the Corporation's corporate activities.

Matter relating to a certain financial institution.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), Vice Chairman Andrew C. Hove, Jr., and Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: June 12, 1991.
Federal Deposit Insurance Corporation.
Robert E. Feldman,
Deputy Executive Secretary.

DEPARTMENT OF JUSTICE
UNITED STATES PAROLE COMMISSION
Record of Vote of Meeting Closure
(Public Law 94–409)
(5 U.S.C. Sec. 552b)

I, Carol Pavilack Getty, Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at nine o'clock a.m. on Friday May 31, 1991 at the Commission's Central Office, 5550 Friendship Boulevard, Chevy Chase, Maryland, 20815. The meeting ended at or about 10:30 a.m. The purpose of the meeting was to decide approximately 12 appeals from National Commissioners' decisions pursuant to 28 C.F.R. Sec. 2.27. Four Commissioners were present, constituting a quorum when the vote to close the meeting was submitted.

Public announcements further describing the subject matter of the meeting of certifications of General Counsel that this meeting may be closed by vote of the Commissioners present were submitted to the Commissioners prior to the conduct of any other business. Upon motion duly made, seconded, and carried, the following Commissioners voted that the meeting be closed: Carol Pavilack Getty, Jasper Clay, Jr., Vincent Fechtel, Jr., and Victor M.F. Reyes.

IN WITNESS WHEREOF, I make this official record of the vote taken to close this meeting and authorize this record to be made available to the public.

Dated: June 11, 1991.
Carol Pavilack Getty,
Chairman, U.S. Parole Commission.

Amendments to Rule and Form Requirements Which Govern Age of Financial Statements of Foreign Private Issuers

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Securities and Exchange Commission ("Commission") is publishing for comment proposed amendments to Regulation S-X Rule 3-19, Securities Exchange Act Rule 15d-2 and Forms F-2 and F-3 which relate to the age of financial statements of foreign private issuers that register securities for sale under the Securities Act of 1933. The proposed amendments would generally revise the requirements which govern the age of financial statements in registration statements to conform such ctions of a substantial majority of foreign issuers. Such conformity is intended to reduce the impediments to foreign issuers making securities offerings in the United States.

DATES: Comments should be received on or before July 15, 1991.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7-16-91. All comment letters will be available for public inspection and copying in the Commission's Public Reference Room at the same address.

FOR FURTHER INFORMATION CONTACT: Teresa Iannaconi, Office of the Chief Accountant, Division of Corporation Finance at (202) 272-2553; Richard M. Kosnik, Office of International Corporation Finance, Division of Corporation Finance at (202) 272-3246; George H. Diacont, Office of the Chief Accountant at (202) 272-2130.

SUPPLEMENTARY INFORMATION: The Commission is proposing for comment amendments to Rules 3-19(b) [1], 3-19(c) [2] and 3-19(f) [3] of Regulation S-X [4], Rule 15d-2 [5] under the Securities Exchange Act of 1934 ("Exchange Act") [6] and Forms F-2 [7] and F-3 [8] under the Securities Act of 1933 ("Securities Act").[9]

I. Proposed Amendments of Rules Applicable to Age of Financial Statements and Updating Requirements

The Commission is proposing rule amendments to facilitate registration of securities by foreign private issuers. The proposed rule amendments relate to the age of financial statements included in registration statements filed with the Commission and to financial statement updating requirements.

Registration statements that are filed with the Commission by foreign private issuers are subject to requirements in Regulation S-X that govern the form and content of the financial statements. Rule 3-19 of Regulation S-X sets forth the requirements with respect to the age of financial statements of foreign private issuers included in filings. Rules 3-19 (b) and (c) taken together currently require that on the effective date of a Securities Act registration statement—

(1) Financial statements in the filing must be as of a date within six months of the effective date, and

(2) The audited year end financial statements are required to be included in the filing if the effective date falls more than five months after the registrant's fiscal year end.

Although the Commission's rules do not impose any interim periodic reporting requirement on foreign issuers, the effect of these provisions is that foreign private issuers must provide interim financial information more frequently than semi-annually to conduct continuous offerings without interruption and to avoid delays in commencing a registered offering in some circumstances.

The periodic reporting requirements of many foreign jurisdictions do not require quarterly reporting. In recognition of foreign reporting requirements, the Commission's interim reporting requirements for foreign private issuers under the Exchange Act are limited to requiring information on Form 6-K only to the extent it is otherwise provided to shareholders, exchanges or others. Even where annual and interim reporting is required, the time period beyond which updating is required is longer than that allowed in the U.S. in many cases. For example, United Kingdom companies are required to publish audited year end financial statements within 6 months following year end and unaudited semi-annual financial statements within 4 months following the end of the semi-annual period. Based on its home country requirements, a U.K. company with a calendar year end would not have financial statements meeting the requirements of Rule 3-19 from January 1 to October 31 each year. Thus, the period in which an offering could not go effective or during which continuous offerings would be suspended, the so-called "black-out" period, may encompass ten months of the year. The alternative for a foreign issuer is to prepare reports more frequently than required in the issuer's home jurisdiction.

To enable foreign issuers to make offerings in the U.S. and to facilitate their continuous offerings without imposing the U.S. quarterly reporting scheme upon such issuers, it is proposed to amend Rules 3-19 (b) and (c) to establish a scheme in which there will be no "black out periods" as long as the foreign issuer can provide audited fiscal year financial statements within six months following the end of the fiscal year and unaudited interim financial statements within four months following the end of the semi-annual interim period. Under this scheme a registration statement of a calendar year company could go effective as late as June 29, xxx1 with reconciled unaudited financial statements only as recent as June 30, xxx0.

The proposed amendments would extend the Securities Act and Exchange Act registration statement updating requirement for annual audited financial statements of foreign private issuers by one month and would extend the updating requirement for interim unaudited financial statements by four months. In addition, the maximum age of financial statements permitted to be used in a Securities Act filing would be extended from six months to one year. The semi-annual updating proposal corresponds to the interim reporting requirement in EEC Directive 82/121/EEC. It also corresponds to or extends beyond the interim reporting due date of all major countries which have an interim reporting requirement. The annual updating proposal corresponds to or extends beyond the annual reporting deadline of a substantial majority of the major industrial countries, with the exception of Germany which permits annual audited financial statements to be filed up to nine months following the end of the fiscal year. Other countries have flexible

[1] 17 CFR 210.3-19(b).
[2] 17 CFR 210.3-19(c)
[3] 17 CFR 210.3-19(f).
[4] 17 CFR 210.
[5] 17 CFR 240.15d-2.
[6] 15 U.S.C. 78a *et seq.*

[8] 17 CFR 239.33.
[9] 15 U.S.C. 77a *et seq.*

filing requirements which are linked to delivery of information prior to the annual shareholders' meeting which may be more than six months following the end of the fiscal year.

The Commission requests commenters to address whether the proposed one month and four month extensions of the present annual and semi-annual updating requirements for foreign private issuers should be longer or shorter in view of the diversity of updating requirements in foreign countries and the EEC directive. Commenters should address the impact on issuers whose home country requirements do not correspond to the proposed reporting scheme. Commenters are requested to provide information concerning the extent to which the proposal or any alternative addresses both formal requirements and practice with respect to typical updating in foreign countries and by foreign issuers. Commenters are also requested to address whether the proposed updating scheme would provide financial information on a sufficiently current basis to adequately serve investors' decision making needs.

II. Proposed Amendment to Requirement To Reconcile Financial Information Otherwise Provided

Rule 3-19(f) requires interim financial information that is made available to shareholders, exchanges or others on a more frequent basis than that required by Rules 3-19 (b) and (c) to be included in any registration statement filed with the Commission. The rule requires this additional information to be reconciled to U.S. generally accepted accounting principles (GAAP). The proposed amendments would provide that such additional information need not be reconciled to U.S. GAAP if adequate narrative disclosures are provided. Specifically, if a registration statement includes interim financial information which is more current than the latest reconciled annual or semi-annual financial statements, the later financial information need not be reconciled to U.S. GAAP provided that any material variation in accounting which was not previously disclosed and quantified in the reconciliation for an annual or semi-annual period is described and the quantified effects of the material variation are disclosed. This should overcome one disincentive to more frequent reporting of interim financial information.

For example, a foreign private issuer's previously reconciled accounting differences may include amortization of goodwill, pension benefit accruals or revenue recognition timing differences. Interim information filed pursuant to this rule may report an unusual event such as a material transaction which has been accounted for as a sale under the issuer's home country accounting principles but would be accounted for as a financing under U.S. GAAP. Since the annual and semi-annual financial statements disclose the quantified reconciliation of all other items, a report for a later interim period in which the unusual transaction is reported would disclose the fact and quantified effects of the difference between the foreign and U.S. accounting principles applied to this transaction only.

It is requested that commenters address whether the proposed disclosure in place of the current quantified reconciliation is adequate to inform investors of significant differences between U.S. and the issuer's home country accounting principles. Commenters should also indicate whether the proposed modification would encourage foreign issuers to provide more current periodic financial information.

III. Other Proposals Relating to Financial Statement Updating

Other amendments are proposed to:

(1) Clarify language in Forms F-2 and F-3 to indicate that it is permissible to incorporate interim financial statements which may be filed on Form 6-K (which is not deemed filed otherwise); and

(2) Amend Rule 15d-2 to require foreign private issuers to file special year end financial statement reports (subsequent to the effectiveness of a registration statement that did not contain the audited financial statements for the most recent year end) by the later of 90 days following the effective date or six months following the registrant's fiscal year end. This would amend the current rule to recognize that foreign issuers are allowed up to six months following the end of the fiscal year within which to file their annual report including audited year end financial statements.

IV. Cost-Benefit Analysis

The Commission is not aware of any costs that will result from the proposed amendments to rules and forms relating to the age of financial statements of foreign private issuers, but as foreign issuers will be able to avoid expenses associated with more frequent financial statement updating and reconciliation, benefits are expected to result for such issuers. U.S. issuers are unaffected by these proposed amendments.

V. Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S. C. 605(b)), the Chairman of the Commission has certified that the proposed amendments, if adopted, will not have a significant impact on a substantial number of small entities. Members of the public who wish to obtain a copy of the Regulatory Flexibility Certification should contact Teresa Iannaconi, (202) 272-2553, Office of the Chief Accountant, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

VI. Text of Rule and Form Proposals

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. The authority citation for Part 210 is revised to read as follows:

Authority: 15 U.S. C. 77f, 77g, 77h, 77j, 77s, 77aa(25), 77aa(26), 78l, 78m, 78n, 78o, 78w(a), 79e(a), 79e(b), 80a-8, 80a-20, 80a-29, 80a-30, 80a-37, unless otherwise noted.

2. The authority citation following § 210.3-19 is removed.

3. By amending § 210.3-19 by revising paragraphs (b), (c) and (f) to read as follows:

§ 210.3-19 Special provisions as to financial statements for foreign private issuers.

* * * * *

(b) If the filing, other than an annual report on Form 20-F, is made within six full months after the end of the registrant's fiscal year and if the audited balance sheet for the most recent fiscal year is not available, the audited balance sheets in the filing may be as of the end of the two preceding fiscal years; *Provided,* That on the effective date the filing shall include a balance sheet, which may be unaudited, as of an interim date at least as current as the end of the registrant's most recently

VOL 56 ISS 115 JE 14 1991 UMI

completed semi-annual period (except as permitted in paragraph (e) of this section); *And provided further,* That if the effective date falls six months or more subsequent to the end of the most recent fiscal year, the filing shall include an audited balance sheet for the most recent fiscal year.

(c) If the filing is made later than ten full months after the end of the most recent fiscal year, the filing shall also include a balance sheet, which may be unaudited, as of an interim date at least as current as the end of the registrant's most recently completed semi-annual interim period (except as permitted in paragraph (e) of this section) preceding the effective date.

* * * * *

(f) Notwithstanding the above provisions of this rule, if a foreign private issuer prepares and discloses to its shareholders or otherwise makes public, pursuant to applicable foreign laws or regulations or stock exchange requirements or otherwise, interim financial information relating to revenues and income that is more current than the financial statements required by this rule, such information shall be included in the filing and shall be accompanied by:

(1) A description of material variations in the accounting principles, practices and methods used in preparing the financial statements from the principles, practices and methods accepted in the United States; and

(2) Quantification of any material variations that are not quantified with respect to their occurrence in the annual or semi-annual financial statements included in the filing.

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

4. The authority citation for part 239 continues to read, in part, as follows:

Authority: The Securities Act of 1933, 15 U.S.C. 77a, *et seq.*, unless otherwise noted.

5. By amending Form F–2 (§ 239. 32) by revising paragraph (b)(2) of Item 11 to read as follows:

§ 239.32 Form F–2, for registration under the Securities Act of 1933 for securities of certain foreign private issuers.

Note: The text of Form F–2 is not and the amendment will not be included in the Code of Federal Regulations.

Form F–2.—Registration Statement Under the Securities Act of 1933

* * * * *

Item 11. Material Changes

* * * * *

(b) * * *

(2) If the financial statements incorporated by reference from the registrant's latest Form 20–F in accordance with Item 12 are not sufficiently current to comply with the requirements of Rule 3–19 of Regulation S–X (§ 210.3–19 of this chapter), interim financial statements necessary to comply with that rule shall be presented either in the prospectus, an amended Form 20–F or in a Form 6–K which has been incorporated by reference into the prospectus.

* * * * *

6. By amending Form F–3 (§ 239.33) by revising paragraph (b)(2) of Item 11 to read as follows:

§ 239.33 Form F–3, for registration under the Securities Act of 1933 for securities of certain foreign private issuers offered pursuant to certain types of transactions.

Note: The text of Form F–3 is not and the amendment will not be included in the Code of Federal Regulations.

Form F–3.—Registration Statement Under the Securities Act of 1933

* * * * *

Item 11. Material Changes

* * * * *

(b) * * *

(2) If the financial statements incorporated by reference from the registrant's latest Form 20–F in accordance with Item 12 are not sufficiently current to comply with the requirements of Rule 3–19 of Regulation S–X (§ 210.3–19 of this chapter), interim financial statements necessary to comply with that rule shall be presented either in the prospectus, an amended Form 20–F or incorporated by reference into the prospectus from a Form 6–K in which case the prospectus shall disclose that the Form 20–F has been so amended or that the interim information has been provided in a Form 6–K which has been incorporated by reference.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

7. The authority citation for part 240 continues to read, in part, as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a–29, 80a–37, unless otherwise noted.

8. By amending § 240.15d–2 to add the following language at the end of paragraph (a) to read as follows:

§ 240.15d–2. Special financial report.

(a) * * * If the registrant is a foreign private issuer as defined in Rule 405 (17 CFR 230.405 of this Chapter), then the special financial report shall be filed on the appropriate form for annual reports of the registrant and shall be filed by the later of 90 days after the date on which the registration statement became effective, or within six months following the end of the registrant's latest full fiscal year.

* * * * *

Dated: June 5, 1991.

By the Commission.

RIN 3235–AD44

Cross-Border Rights Offers; Amendments to Form F–3

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules and forms.

SUMMARY: The Securities and Exchange Commission (the "Commission") is publishing for comment a new rule and registration form under the Securities Act of 1933 (the "Securities Act") to facilitate rights offerings by foreign private issuers to their existing U.S. shareholders, many of whom currently are excluded from or cashed out of these offerings. A small issue exemptive rule is being proposed under section 3(b) of the Securities Act covering up to $5 million of equity securities offered or sold in the United States in an eligible rights offering. The new registration form would permit registration of rights offerings of any size under the Securities Act on the basis of home country disclosure and procedures. The proposed rule and form would not be available to investment companies registered, or required to be registered, under the Investment Company Act of 1940.

Also being proposed today are amendments to Securities Act registration Form F–3 to permit foreign private issuers that file periodic reports under the Securities Exchange Act of 1934 (the "Exchange Act") to register rights offerings and offerings in connection with dividend or interest reinvestment plans, conversion of convertible securities or exercise of warrants on that Form, even if these issuers do not have a three-year reporting history under the Exchange Act or have a minimum public float of $300 million. Finally, the Commission is proposing for comment exemptions from

the operation of Rules 10b–6, 10b–7 and 10b–8 under the Exchange Act pursuant to exemptive powers under Rule 10b–6 to facilitate rights offerings made in reliance on the proposed rule or registered on the proposed registration form.

DATES: Comments should be received on or before September 9, 1991.

ADDRESSES: Comment letters should reference File No. S7–17–91. They should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. The Commission will make all comments available for public inspection and copying at its Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Victoria C. Choy or C. David Messman, Office of International Corporate Finance, Division of Corporation Finance, at (202) 272–3246; Nancy J. Sanow or Elliot R. Levine, Office of Trading Practices, Division of Market Regulation, at (202) 272–2848, with respect to issues regarding Rules 10b–6, 10b–7 and 10b–8 under the Exchange Act; and Angela C. Goelzer, Division of Investment Management, at (202) 272–2751, regarding Investment Company Act issues; Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is proposing for comment Rule 801 and Form F–11 under the Securities Act.[1] Also being proposed are amendments to Rules 174,[2] 464 [3] and 473 [4] and Forms F–2 [5] and F–3 under the Securities Act.[6] In addition, the Commission is proposing new Rules 441 and 466 under the Securities Act and new Rule 12h–5 under the Exchange Act. Finally, the Commission is proposing exemptions from the operation of Rules 10b–6,[7] 10b–7 [8] and 10b–8 [9] under the Exchange Act [10] pursuant to exemptive powers under Rule 10b–6, in connection with rights offerings made in reliance on proposed Rule 801 or registered on proposed Form F–11.

I. Executive Summary

Over the last decade, U.S. investors have significantly increased their investments in the securities of foreign issuers through registered public offerings and private placements in the United States, as well as through purchases in overseas markets. During the last five years, U.S. investors bought on a gross basis approximately $500 billion of foreign equity securities and approximately $1.2 trillion of foreign debt securities.[11] In 1990, U.S. persons invested, net of sales during that period, $30.8 billion in foreign securities, up from $19.1 billion in 1989.[12] Currently, approximately 425 foreign issuers, representing 30 countries, have their securities traded on the New York Stock Exchange ("NYSE"), the American Stock Exchange ("AMEX"), or the National Association of Securities Dealers Automated Quotation ("NASDAQ") System. In addition to these foreign issuers, substantially all of which are reporting companies under the Exchange Act, approximately 1,100 additional foreign private issuers with securities trading in the over-the-counter market, representing some 25 different countries, rely on the information supplying exemption from Exchange Act reporting provided by Rule 12g3–2(b) under the Exchange Act.[13]

Unlike their U.S. counterparts, foreign issuers frequently engage in rights offerings, in large part due to legally mandated preemptive rights. U.S. investors, particularly those holding over-the-counter securities, are often excluded from or cashed out of [14] these rights offerings because of foreign issuers' reluctance to comply with the disclosure requirements and accounting rules applicable to Securities Act registration statements, or to incur the obligation to file periodic reports under the Exchange Act required of those who conduct public offerings in the United States. There have even been instances where foreign issuers which are already reporting companies under the Exchange Act have excluded their U.S. shareholders from rights offerings, purportedly because of concerns with U.S. processing time at both the federal and state levels.

The exclusion or cashing out of U.S. investors not only denies these investors a potentially valuable investment opportunity, but may also subject them to substantial dilution. Depositary banks for American Depositary Receipts ("ADRs") estimate that in 1990 alone, U.S. investors that own foreign securities in the form of ADRs were excluded from more than 25 rights offerings and cashed out of approximately 60 such transactions.

To facilitate the extension of rights offerings to U.S. investors and to encourage foreign authorities to prohibit discriminatory treatment of U.S. investors, the Commission is proposing a small issue exemption under section 3(b) of the Securities Act [15] for specified equity rights offerings not exceeding $5 million in the United States, and a new registration form that would allow the use of home country disclosure documents in the case of larger equity rights offerings.

In addition, the Commission is proposing to amend Form F–3 to extend the availability of that Form for registration of rights offerings and other specified transactions to all reporting foreign private issuers, even those that do not meet the current registrant requirements under Form F–3 of a minimum three-year reporting history

[13] 17 CFR 240.12g3–2(b). For the most recent list of foreign private issuers supplying current information to the Commission pursuant to Rule 12g3–2(b), see Exchange Act Release No. 28980 (Feb. 15, 1991) (56 FR 7424).

[14] Where there is a trading market for the rights in the issuer's home country, the issuer may cash out its U.S. shareholders by causing the rights that would otherwise be distributed to them to be sold in the open market on their behalf. U.S. investors that are cashed out generally do not receive the full benefit of the offering, however, as they are usually responsible for selling expenses and other transaction costs, including underwriters' commissions. Exchange rate fluctuations may also affect net proceeds.

under the Exchange Act and a minimum $300 million public float.

The proposals made today are based on the fundamental premise that the interests of those U.S. investors that have already made an investment in a foreign issuer, frequently on the bases solely of disclosure required by foreign law, would be better served by facilitating the extension of rights offerings of additional securities to them than by insisting on U.S. disclosure. The Commission requests comment on whether the benefits to U.S. investors that derive from participating in offerings otherwise closed to them would outweigh the risks that may result from having to make investment decisions on the basis of disclosure documents and procedures used in foreign jurisdictions. The Commission also solicits comment on whether it would be preferable to continue to provide case-by-case relief based on specific assessments of the need to accommodate foreign laws and procedures in specific situations. Commenters are requested to provide the Commission with empirical data regarding the exclusion or cashing out of U.S. shareholders in foreign issuer rights offers.

II. Background

A. Rights Offers by Foreign Private Issuers

Although not common in the United States,[16] rights offerings are frequently used by issuers in many foreign jurisdictions [17] to raise working capital or to finance extraordinary corporate transactions, including acquisitions.[18]

The United Kingdom [19] and many European countries, including France,[20] Germany,[21] Italy,[22] and the Netherlands,[23] have preemptive rights statutes. In addition, the European Economic Community ("EEC") has promulgated a Directive requiring public companies issuing shares for cash, subject to certain limited exceptions, to offer the shares on a preemptive basis to existing shareholders on a pro rata basis.[24]

In jurisdictions with preemptive rights statutes, a rights offer may be the only means of issuing additional equity securities of a class that is outstanding. To protect existing securityholders against dilution, these statutes generally prohibit issuers from issuing additional securities unless existing holders of securities of that class have been given a pro rata preemptive or preferential right to subscribe for them. Moreover, even though some statutes permit securityholders to waive their preemptive rights by vote, thereby allowing the issuer to offer securities directly to the public,[25] waiver of preemptive rights in jurisdictions where rights offers are customary is usually limited.[26]

In addition to a purely statutory basis for preemptive rights, listing requirements of certain foreign stock exchanges located in jurisdictions with preemptive rights statutes also mandate that issuers grant such rights to securityholders under certain circumstances.[27] Even where there is no preemptive rights statute, some foreign stock exchanges require preemptive rights clauses in listing agreements.[28]

Finally, although transactions may be structured around the application of statutory or exchange-required preemptive rights, market practice and business custom sometimes force issuers to issue securities by means of rights offers.[29] Moreover, as rights offers can be beneficial to existing securityholders,[30] some issuers may grant such rights voluntarily in order to promote good relations with existing securityholders.[31]

---

[16] In recent years, relatively few U.S. companies have registered securities for rights offerings. See J. Nagdeman, "Vanishing Rights—Offerings to Shareholders Grow Few and Far Between," Barron's, May 2, 1977, at 11. Although there is a common law basis for preemptive rights in the United States (see, e.g., *Stokes* v. *Continental Trust Co.*, 186 N.Y. 285, 78 N.E. 1090 (1906)), all states and the District of Columbia have now adopted statutes that limit or authorize corporations to deny or limit common law preemptive rights. Thirty states and the District of Columbia have enacted statutes which either expressly grant or implicitly recognize preemptive rights but allow corporations to deny or limit such rights in their articles of incorporation. The other twenty states have enacted statutes which deny preemptive rights except to the extent, if any, that such rights are provided in the articles of incorporation. Model Business Corporation Act Annotated, § 6.30 (3d Edition, 1990 Supplement).

[17] Rights offers are particularly common in the United Kingdom and in Europe, where many countries have some form of preemptive right statutes. The notable exception is Switzerland. Rights offers are also common in British Commonwealth countries such as Australia and South Africa.

[18] For instance, WPP Group P.L.C. a U.K. corporation, financed its 1989 acquisition of The Ogilvy Group, Inc. through a rights offering of convertible preferred shares to the holders of its ordinary shares, in addition to a public offering of warrants to purchase ordinary shares, and bank loans. WPP's prior acquisition of J. Walter Thompson was also financed through a rights offering. For a description of the use of rights offerings by British companies to raise capital to finance acquisitions of companies, see David W. Helentok and George Spera, "Role of British Purchasers in Corporate Acquisitions," New York Law Journal, Oct. 7, 1987, at 31.

[19] The Companies Act 1985 ("Companies Act 1985"), sections 89(1), 90(b).

[20] Law No. 73-1196 of 27 December 1973, section 178.

[21] Aktiengesetz (Stock Corporation Act), section 221(4).

[22] Italian Civil Code, Article 2441(1).

[23] Civil Code of the Netherlands, Book 2, Article 96a. Statutory preemptive rights in the Netherlands are operative only where the articles of association of the issuer are silent on the question of shareholder preemptive rights.

[24] Second Company Law Directive of 1976, Article 29 (published January 31, 1977). The EEC Directive also sets forth certain procedures regarding notifying shareholders of a rights offer, exercise periods for rights offers and disapplication of preemptive rights. EEC member countries are required to enact legislation and/or regulations in order to give effect to EEC Directives.

[25] See, e.g., The Companies Act 1985, section 95 (United Kingdom); Aktiengesetz, sections 56, 71 (Germany); Law No. 85-1321 of 14 December 1985, section 186 (France).

[26] Section 95 of the Companies Act 1985 permits limited disapplication upon approval by at least 75 percent of the shareholders. Waivers of preemptive rights by U.K. shareholders are generally subject to various limitations.

[27] The rules of the International Stock Exchange of the United Kingdom and the Republic of Ireland Limited (the "ISE") and of U.K. securities self-regulatory organizations require that securities to be sold to the public must first be offered to a company's existing shareholders in satisfaction of their statutory preemptive rights. See Admission of Securities to Listing, section 1, Ch. 1, ¶ 15.

[28] The listing requirements of the Australian Stock Exchange, for example, require that an issuer not make an offering of its securities that would increase the amount of outstanding securities by more than 10% unless such offering is either (1) limited to existing securityholders, or (2) made to the public after being approved by a majority of existing securityholders. See Australian Stock Exchange Listing Requirements § 3E.

[29] In 1987, for example, several large U.K. issuers made offerings to the public by either securing the waiver of preemptive rights by shareholders or by avoiding application of preemptive rights by offering debt with conversion rights. These attempts have mobilized institutional holders to take action to protect preemptive rights. The investment committees of the Association of British Insurers and the National Association of Pension Funds, two associations which represent most of the U.K.'s institutional shareholders, for instance, have issued guidelines favoring rights offers as a method of raising equity capital. Publicly traded U.K. companies, therefore, may have difficulties obtaining shareholder approval of proposals not in compliance with such guidelines. See Wall Street Journal, Apr. 17, 1987, at 20.

[30] At the very least, participating securityholders have the opportunity to protect themselves against ownership dilution when the issuer proposes to issue additional securities of the same class as that held by them. When the issuer offers a new class of securities for sale, a rights offer affords participating securityholders the opportunity to increase their investment in the issuer, often at a price that represents a discount from the anticipated market value. See n. 34 *infra* and accompanying text.

[31] Unlisted Australian companies, for instance, often engage in rights offerings although they are not required to do so. See n. 28 *supra*.

B. Structure of Rights Offers

In a rights offer, an issuer offers to sell securities to its existing securityholders for cash through the exercise of subscription or preferential rights granted to them, usually in proportion to the amount of the issuer's securities of the class being offered held by them on the record date for the offering. Upon the expiration of a specified exercise period,[32] the unexercised rights lapse and the unsubscribed for securities are either taken up by underwriters and offered to the public, if the issue is being underwritten, or, in the case of a clawback issue,[33] sold to institutional or other investors with whom the issuer has initially placed the securities.

As an inducement to the offerees, the exercise price of the distributed rights typically is set at a discount from the current market price for the securities or, where there is no public market at the time of the rights offer, at the estimated price at which the underlying securities are expected to trade.[34] Traditionally, rights offers have been limited to the offer and sale of securities of the same class as that held by the recipients of the rights being distributed.[35] Some recent offers, however, have involved newly created classes of securities.[36]

Conventional rights offers often are underwritten on a standby basis,[37] with the underwriters agreeing to take up the securities in the event the rights are not fully subscribed. Under these arrangements, the issuer typically distributes provisional allotment letters or similar instruments evidencing the issuance of the underlying securities in "nil-paid" form to existing securityholders. When the issuer receives the full subscription price accompanied by executed allotment letters, the securities become fully paid and nonassessable. Unlike a conventional rights offering, in a rights offering structured as "clawback" issue, the issuer places the securities it proposes to offer with underwriters or institutional investors on a firm commitment basis, subject to the prior right of existing securityholders to apply for them on a pro rata basis. Since the clawback arrangement does not require mailing provisional allotment letters or other evidence of issuance of rights to securityholders, it is particularly suited to markets where bearer securities are common and where it is customary for issuers to communicate with securityholders via notices published in newspapers.[38]

When the rights distributed are by their terms transferable, a trading market for the rights generally develops during the exercise or subscription period, and securityholders who do not wish to exercise their rights may sell them to third parties.[39] The issuer may also cause rights to be sold on behalf of security holders who are not permitted to participate, thereby cashing out such holders. Proceeds from the sale of rights may represent a profit, if the discount at which the rights had been issued is sufficient to offset brokers' fees and other selling expenses.[40] However, where rights are issued in "nonrenounceable" or nontransferable form, or if the offering is structured as a clawback issue, which does not involve the distribution of securities in nil-paid form, the non-subscribing securityholders will realize no economic benefit from the offering, since the rights distributed to them cannot be traded or sold.

III. The Proposed Exemption and Securities Act Registration Form

A. Common Eligibility Requirements

1. General

As described in greater detail below, the proposed small issue exemption, new Rule 801, and the proposed registration form, Form F-11, would be made available to the same class of foreign private issuers and the same class of offerings, with one exception. Because of the statutory limitation on the Commission's authority under Section 3(b) of the Securities Act, the amount of equity securities that may be offered or sold in the United States in any offering made in reliance on proposed Rule 801 may not exceed $5 million in the aggregate.

2. Eligibility of Issuers

Proposed Rule 801 and Form F-11 would be available only for primary offers and sales of securities of eligible foreign issuers made pursuant to specified rights offerings, and not for the resale of such securities. Any foreign private issuer [41] filing reports with the Commission pursuant to sections 13(a) or 15(d) of the Exchange Act [42] which is current with respect to such filing obligations at the time of the offering would be eligible to rely on the

---

[32] In the United Kingdom, for instance, the Companies Act 1985 requires that the subscription period be not less than 21 days. See Companies Act 1985, section 90(6). Under German law, rights offers must be kept open for at least two weeks (see Aktiengesetz, section 186), although it is common for the subscription period to run for at least fifteen calendar days, and sometimes for as long as four to six weeks. The Civil Code of the Netherlands requires that rights offers be kept open for a minimum of 14 days after public announcement of the offering. In practice, however, rights offers are usually kept open for a minimum of two to three weeks after public announcement. See also n. 39, *infra*.

[33] See n. 38 and accompanying text, *infra*.

[34] In the United Kingdom, the exercise prices of subscription rights frequently represent a twelve to fifteen percent discount from market prices of the underlying securities, but the discount may be substantially higher in large offerings. In Japan, where rights issues have not been common but appear to have regained some popularity recently, rights have been offered to existing securityholders at deep discounts to the market price of the underlying securities.

[35] Statutory preemptive rights typically are granted to holders of equity securities only, including preferred shares in some cases. For instance, under section 89(1) of the Companies Act 1985 (United Kingdom), preemptive rights apply to all "relevant shares", defined in section 94(5) of that statute to include not only ordinary shares but all shares that carry an unlimited right to participate in income or capital of the issuer, such as preference shares. However, issuers have often extended rights offerings to holders of securities that are exercisable or convertible into, or exchangeable for, equity securities. In the United Kingdom, for example, even though warrants and interests in convertible loan stock are not relevant shares for purposes of the Companies Act 1985, holders of these securities frequently have extracted a contractual obligation from the issuer to include them in rights offers. By contrast, in the Netherlands, statutory preemptive rights apply to issuances of equity securities as well as equity-related securities, including options, warrants and convertible debt.

[36] See n. 18 *supra*.

[37] Rights offers issued at a deep discount often are not underwritten since the deep discount tends to ensure that the rights will be taken up by existing securityholders.

[38] The clawback arrangement is favored in Germany but it is not common in the United Kingdom.

[39] In conventional rights offers in the United Kingdom, subscription rights represented by provisional allotment letters distributed to shareholders are usually transferable during the subscription period, which typically ends two business days prior to the closing and settlement date for the rights exercise. In the Netherlands, rights issued by companies listed on the Amsterdam Stock Exchange usually are traded on that Exchange during the subscription period, with closing and settlement of the rights exercise occurring ten days after the subscription period has expired. In Germany, where the securities to be sold pursuant to rights offers typically are initially placed with banks (which act as underwriters for the issue), subject to the clawback rights of existing shareholders, the shareholders may be granted an additional four to six week grace period, after the official subscription period has expired, to subscribe for the securities. During the period from the expiration of the subscription period to closing, rights that are not taken up by shareholders may be sold by underwriters or other intermediaries, and the net proceeds will be remitted to the shareholders to whom the sold rights were allocated.

[40] Selling expenses, including commissions to underwriters, brokers' fees and stamps or transfer taxes, are generally borne by the securityholders and will be deducted from the proceeds to be paid to them.

[41] "Foreign private issuer" is defined in Rule 3b-4 under the Exchange Act (17 CFR 240.3b-4) and Rule 405 under the Securities Act (17 CFR 230.405).

[42] 15 U.S.C. 78m, 78o(d).

UMI

proposed Rule or register securities on the proposed Form. A foreign private issuer exempt from the requirements of section 12(g) under the Exchange Act pursuant to Rule 12g3–2(b) would also be eligible to rely on the proposed exemption or use the proposed Form if it has a class of equity securities listed or quoted on at least one designated offshore securities market,[43] is in compliance with the listing requirements applicable to such securities and, in addition, either (a) has maintained such listing or quotation continuously for 36 months immediately prior to the commencement date of the offering, or (b) has a public float in the listed securities of not less than $75 million.[44] As described below, issuers registered, or required to be registered, under the Investment Company Act of 1940 ("Investment Company Act")[45] may not participate in the proposed system.

Issuer eligibility would be determined as of the commencement date of the offering. In this regard, a rights offer made in reliance on proposed Rule 801 would be deemed to have commenced upon the date the securities are first offered to securityholders that are U.S. holders and, in the case of registration on proposed Form F–11, upon filing of the registration statement with the Commission. For purposes of satisfying the proposed eligibility criteria, a nonreporting foreign issuer may establish an exemption under Rule 12g3–2(b) at the same time as it commences the offering in the United States or, in the case of registration on proposed Form F–11, as it files the registration statement with the Commission.

Proposed Rule 801 and Form F–11 incorporate the definition of "designated offshore securities market" from Regulation S. Nineteen offshore exchanges and non-exchange securities markets are currently designated as such markets under Regulation S, which also provides that the Commission may designate additional markets that have some or all of the attributes listed in Regulation S. Factors to be considered include, among other things, the market's operating history, whether it is subject to oversight by a foreign government or self-regulatory body, whether oversight standards are set by law and whether there are price quotation and clearing systems.[46] Comment is sought regarding whether it is appropriate that issuer eligibility of the proposed system be based on listing on a Regulation S designated offshore securities market. For instance, should issuers whose equity securities trade in non-exchange securities markets be excluded? Should access to the proposed system be confined to issuers whose securities are traded on exchanges located in countries that have written memoranda of understanding or other agreements ("MOUs") with the Commission that provide the Commission with mechanisms for obtaining information regarding such offerings from appropriate authorities in those countries?[47]

Requiring that the issuer be either reporting under the Exchange Act or exempt pursuant to Rule 12g3–2(b) at the time the offering commences in the United States assures that information about the issuer would be publicly available to investors in this country, including at a minimum information the issuer makes public or otherwise makes available to its shareholders in its home country. The additional three-year listing history or $75 million public float eligibility requirement in the case of issuers relying on the exemption under Rule 12g3–2(b) are intended to protect against use of the proposed system by start-up companies or insubstantial issuers to raise large amounts of capital in the United States without complying with the normal registration requirements of the Securities Act.

The Commission previously has proposed a similar three-year listing history eligibility requirement for Canadian issuers who wish to participate in rights offerings under the multijurisdictional disclosure system with Canada (the "Canadian MJDS").[48] Canadian MJDS was approved by the Commission on May 30, 1991. The three-year listing requirement for use of Form F–7 as approved would be changed from the reproposal to a combined one-year listing with a designated Canadian exchange and three-year reporting history with Canadian securities regulators requirement.[49] Recognizing that many substantial issuers may not have the requisite listing or operating history to qualify, however, a public float test is being proposed today as an alternative. Comment is requested regarding whether it is appropriate to provide for a size-of-issuer test as an alternative to requiring a three-year listing history on a designated market for determining the eligibility of nonreporting issuers. Should the alternative test be based on the issuer's public float as proposed, or on its net assets or net worth? What would be the appropriate level of the requirement? Should the proposed minimum of $75 million be reduced, for instance, to $10 million, or be raised to as much as $100 million?

Proposed Rule 801 and Form F–11 would permit any foreign private issuer formed as a result of a merger, a spinoff, an arrangement or other reorganization requiring the approval of shareholders to tack on the listing history of its predecessors for purpose of satisfying the three-year listing history requirement, if it is unable to satisfy the listing history requirement on its own. Comment is requested regarding whether it is appropriate to permit the inclusion of the listing histories of predecessors in determining the eligibility of nonreporting issuers, and whether a three-year reporting requirement, as opposed to a listing requirement, would be more appropriate, given the regulatory purpose of the system being proposed today.

[43] As defined in Rule 902 of Regulation S under the Securities Act [17 CFR 230.902(a)]. Although the Johannesburg Stock Exchange is a designated offshore securities market, new investments in securities of certain South African issuers may be prohibited by the Comprehensive Anti-Apartheid Act of 1986 (Pub. L. 99–440) (October 2, 1986) (22 U.S.C. 5001).

[44] See proposed Rule 801(c)(7) and General Instruction B.(2) to proposed Form F–11.

[45] 15 U.S.C. 80a *et seq.*

[46] 17 CFR 230.902(a). The Commission has delegated the authority to designate additional markets as designated offshore securities markets to the Director of the Division of Corporation Finance. Since the adoption of Regulation S, the Director has designated the Helsinki Stock Exchange (*see* Letter re Shearson Lehman Hutton Inc. (July 7, 1989)) and the Mexican Stock Exchange (see Letter re Comision Nacional de Valores (Feb. 15, 1991)) as additional designated offshore securities markets for purposes of Regulation S. The staff of the Commission has also issued an interpretive letter clarifying that trades executed on the Stock Exchange Automated Quotation (SEAQ) international system, a part of the ISE, a designated offshore securities market, would be deemed trades executed on a designated offshore securities market. (See Letter re First Boston Corporation (June 14, 1990).)

[47] The Commission has entered into MOUs with foreign governments or securities authorities in Brazil, Canada, France, Japan, Mexico, the Netherlands and the United Kingdom. The Commission has entered into more limited statements of intent of mutual cooperation with Hungary and Italy. Approximately one-half of the current designated offshore securities markets are located in countries the authorities of which have signed comprehensive MOUs with the Commission. The designated offshore securities markets located in countries without such agreements are the Australian Stock Exchange Limited, the Bourse de Bruxelles, the Eurobond market, the Frankfurt Stock Exchange, the Stock Exchange of Hong Kong Limited, the Johannesburg Stock Exchange, the Bourse de Luxembourg, the Stockholm Stock Exchange, the Zurich Stock Exchange and the Helsinki Stock Exchange.

[48] See Securities Act Release No. 6879 (Nov. 3, 1990) (55 FR 46288) ("Canadian MJDS Reproposing Release"), at 46295.

[49] The Commission authorized the publication of the adopting release of Canadian MJDS on May 30, 1990.

3. Eligibility of Securities Being Offered

Only equity securities of the same class as that held by the offerees in the United States may be offered or sold in reliance on the proposed Rule or pursuant to registration on the proposed Form.[50] The Commission requests comment on whether the proposed system should be made available to offerings of securities of any class of an eligible issuer, including, for instance, debt securities, convertible securities or new classes of equity securities. If so, should the proposed system nevertheless be limited to offerings of securities that are, when sold, listed or quoted on a designated offshore securities market upon completion of the offering?

As proposed, Rule 801 and Form F–11 would not be available for securities issued by an investment company that is registered, or required to be registered, under the Investment Company Act.[51] A foreign issuer that is able to make a public offering of its securities in the United States in reliance on Rule 6c–9 under the Investment Company Act or pursuant to an individual exemptive order under that Act would not be disqualified from using proposed Rule 801 or proposed Form F–11 to make a rights offering in the United States.[52] These issuers are authorized to publicly offer their own securities in the United States without registering under the Investment Company Act, and a rights offering in reliance on proposed Rule 801 or registered on proposed Form F–11 would not present any Investment Company Act concerns. Comment is requested as to whether this approach regarding investment companies is appropriate.

4. Eligibility of Transaction

The system being proposed today is available to rights offerings of equity securities[53] made on a pro rata basis[54] to existing U.S. holders of securities of the same class, including holders of ADRs evidencing such securities.[55] The Commission requests comment as to whether the scope of proposed Rule 801 and Form F–11 should be extended to cover securities offerings in connection with dividend or interest reinvestment plans or offerings of script dividends.[56]

Proposed Rule 801 and Form F–11 would require that the terms and conditions of the offer extended to securityholders that are U.S. holders be not less favorable than the terms and conditions of the offer extended to any other offeree. U.S. holders, for purposes of the proposed system, are persons for whom U.S. addresses appear on the records of the issuer or its agents, including depositaries for sponsored and unsponsored ADR facilities and transfer agents.[57] The Commission recognizes that offering procedures may have to differ from jurisdiction to jurisdiction to accommodate local customs or regulations. Procedural variations in foreign jurisdictions would not render an offering ineligible so long as such practice would not result in material adverse treatment of U.S. holders.

Proposed Rule 801 and Form F–11 would be available only for all cash transactions and would additionally require that the rights granted to U.S. holders not be transferable except in accordance with Regulation S.[58] The system being proposed today is intended to encourage foreign issuers to extend the opportunity to purchase additional securities to be issued in rights offerings to those U.S. persons who already have made the decision to invest in the company based on information available to them. It is not intended to permit foreign issuers to extend such offerings to new investors in the United States. Accordingly, neither the proposed exemption nor the new registration form would be available to transactions that permit the transfer of rights distributed to U.S. holders, other than pursuant to Regulation S. Transfer of the rights outside the United States in accordance with Regulation S would not disqualify the offering, however, nor is it necessary to impose restrictions on transferability of the equity securities that may be purchased upon exercise of rights. Comment is requested regarding whether the securities purchasable upon exercise of rights granted to U.S. holders should be restricted securities for purposes of Rule 144 under the Securities Act.[59]

B. The Proposed Exemption

The exemption contemplated under proposed Rule 801 is non-exclusive.[60] An issuer making an offering in reliance on the proposed rule may also claim any other available exemption under the Securities Act.

Proposed Rule 801 relates only to the application of section 5 of the Securities Act and has no effect on the anti-fraud, civil liability or other provisions of the federal securities laws or provisions of state law relating to the offer and sale of securities.[61] The exemption is not available to any transaction or chain of transactions that, although in technical compliance with the proposed rule, is part of a plan or scheme to evade the registration obligations of the Securities Act.[62] In such cases, registration under the Securities Act would be required.

Proposed Rule 801 is available for the offer and sale in the United States of foreign equity securities in rights offerings so long as the aggregate offering price of such securities does not exceed $5 million. The proposed Rule

[50] Proposed Rule 801(a) and General Instruction A to proposed Form F–11.

[51] Section 7(d) of the Investment Company Act prohibits a foreign issuer that is an investment company as defined in the Investment Company Act from using jurisdictional means to publicly offer its securities for sale in the United States unless the company receives an exemptive order permitting it to register under the Investment Company Act. A rights offering by a foreign investment company to U.S. investors may constitute a public offering within the meaning of section 7(d).

[52] Rule 6c–9, adopted by the Commission in 1987 (see Investment Company Act Release No. 16093), permits foreign banks and their finance subsidiaries to publicly offer and sell their debt securities and non-voting preferred stock in the United States without registering under the Investment Company Act or obtaining an individual exemptive order. The Commission also has issued a number of individual exemptive orders allowing public offerings in the United States of securities not covered by Rule 6c–9, e.g., equity securities issued by foreign banks and their finance subsidiaries, offerings by foreign insurance companies and their finance subsidiaries, and offerings by foreign bank and insurance holding companies, among others. In August 1990, the Commission proposed amendments to Rule 6c–9 that would expand the rule to include: (1) Equity securities of foreign banks and their finance subsidiaries, (2) all securities of foreign insurance companies and their finance subsidiaries, (3) all securities of foreign bank and insurance holding companies, and (4) all securities of Canadian trust and loan companies. See Investment Company Act Release No. 17682 (Aug. 17, 1990) (55 FR 34569).

[53] See Proposed Rule 801(c)(4) and General Instruction A to proposed Form F–11.

[54] The proposal requires that the rights extended to U.S. holders, as compared with rights extended to other holders of securities of the class being offered, be in proportion to the amount of such securities held by each of them on the record date set for the rights offer (assuming in the case of ADR holders that such holders held the underlying securities directly).

[55] Proposed Rule 801(a) and General Instruction A to proposed Form F–11.

[56] See Rule 405 (17 CFR 230.405) for a definition of a dividend or interest reinvestment plan for purposes of Regulation C under the Securities Act (17 CFR 230.400–494). Offerings of script dividends, common in certain jurisdictions such as the United Kingdom, involve offering shareholders the opportunity to receive additional shares or other securities of the issuer in lieu of receiving cash in connection with a declared dividend payment.

[57] Proposed Rule 801(c)(9) and General Instruction D to proposed Form F–11.

[58] 17 CFR 230.901–904.

[59] 17 CFR 230.144.

[60] See Preliminary Note 5 to proposed Rule 801.

[61] See Preliminary Notes 1, 3 and 4 to proposed Rule 801.

[62] See Preliminary Note 2 to proposed Rule 801.

VOL 56 ISS 115 JE 14 1991 UMI

defines "aggregate offering price" of securities to mean the total gross sales price to be received by the issuer for issuance of the securities upon exercise of the related rights, assuming that all such rights were exercised. For purposes of calculating the $5 million, only the securities issuable upon exercise of rights granted to U.S. holders in a specific rights offering being made in reliance on proposed Rule 801 would be considered. Separate rights offerings by the same issuer would be subject to separate $5 million ceilings.

Proposed Rule 801 would not mandate that specific information, including offering circulars, if any, be sent to U.S. holders, except that where any document, notice or other information had been provided to offerees residing in the issuer's home jurisdiction (defined as the issuer's country of incorporation or organization or, if different, the jurisdiction of the primary market for the issuer's equity securities that are listed on a designated offshore securities market), copies of such document, notice or other information must be provided to offerees that are U.S. holders at the same time as, or as soon as practicable after, such document, notice or other information is provided to home jurisdiction offerees. If in lieu of delivering documents to offerees in the home jurisdiction, information regarding the offering is being published or advertised in a home jurisdiction publication, then the issuer may satisfy this information dissemination requirement by publishing an advertisement of the offering in an English language publication of general circulation in the United States,[65] or by delivering written copies of the publication or advertisement to offerees that are U.S. holders. In addition, if any such document, notice or other information delivered or disseminated to home jurisdiction offerees, including any offering circular or advertisement, is not in English, then a translation or a summary in English shall be provided to U.S. holders. Comment is sought regarding the appropriateness of permitting issuers to satisfy the information dissemination requirement by publication in U.S. newspapers.

C. Registration on Proposed Form F–11

Form F–11, like Form F–7 under the Canadian MJDS, would permit an eligible foreign private issuer to register equity securities being offered or sold in the United States in connection with specified rights offerings, using documents prepared according to the disclosure requirements of the issuer's home jurisdiction regulatory scheme.[66]

Proposed Form F–11 is essentially a "wrap-around" form to be used for the registration in the United States of securities to be issued in rights offerings. The proposed Form itself provides for, among other things, disclosure of the issuer's name and address and that of its agent for service in the United States, and includes the foreign circular and a list of the exhibits filed with the Commission, including documents that have been incorporated by reference into the prospectus or offering circular. The proposed Form also requires that the issuer add to the prospectus or offering circular distributed to U.S. holders, to the extent applicable, certain legends advising them that the investment may have tax consequences in the foreign jurisdiction, that U.S. holders may have to pursue legal remedies in a foreign jurisdiction, and that financial statements included in the U.S. registration statement have been prepared in accordance with foreign generally accepted accounting principles, were audited in accordance with foreign auditing standards and that auditor independence was governed by foreign requirements.

The proposal distinguishes between the documents required to be delivered or disseminated to U.S. holders and the documents required to be included in the proposed Form F–11 being filed with the Commission to register the securities. The issuer would provide U.S. holders with the same information (appropriately legended as specified) as that delivered or disseminated abroad in the issuer's home jurisdiction, except that if the materials delivered or disseminated to home jurisdiction offerees are not in English, then U.S. holders must be provided with English translations or summaries of such information.

In accordance with section 5(b) of the Securities Act, the foreign issuer is required to deliver a prospectus to U.S. holders.[68] For purposes of section 5(b), the prospectus for a rights offering registered on proposed Form F–11 would consist of the entire disclosure document or documents used to offer the rights and underlying securities to offerees in the home jurisdiction, including stock exchanges, require the issuer to deliver to offerees in its home jurisdiction. The Commission understands that every securities market currently named as a designated offshore securities market under Regulation S and/or the jurisdiction in which each such market is located imposes a prospectus delivery requirement for equity offerings. Comment is requested regarding whether this is the case and whether market practice in any such jurisdiction or market would make satisfaction of the U.S. prospectus delivery requirement difficult or impractical.

Information that is permitted in the issuer's home jurisdiction to be incorporated by reference in the prospectus would not be required to be distributed to U.S. holders, unless delivery is otherwise required by the issuer's home jurisdiction, but information so incorporated into the prospectus that forms part of the U.S. registration statement must be filed as exhibits to the registration statement on proposed Form F–11. Any document already filed with the Commission under the Exchange Act, or furnished to the Commission pursuant to Rule 12g3–2(b), may be incorporated by reference into proposed Form F–11 and, accordingly, need not be physically filed as separate exhibits to the Form.[69] Incorporated information would become part of the registration statement and would be deemed filed for liability purposes.[67]

In the United States, if any portion of a report or an opinion of an expert, including any auditor or engineer, or counsel is quoted or summarized in a registration statement filed under the Securities Act, or if an expert is named in the registration statement as having prepared or certified a report or a valuation, the written consent of the expert or counsel, expressly consenting to such quotation or summarization or to being so named, must be filed as an exhibit to the registration statement. Form F–11, as proposed today, would not require the filing of such consents of experts or counsel, except in the rare

[65] Proposed Rule 801 would adopt the definition of the phrase "publication with a general circulation in the United States" contained in Rule 902(k) of Regulation S. See Rule 801(c)(8).

[66] Like Form F–7 as approved by the Commission, securities that could have been purchased by U.S. holders pursuant to rights granted to them but were not purchased by these holders are deemed not to be registered on proposed Form F–11. The rights themselves generally are not required to be registered under the Securities Act. *Cf.* Securities Act Release No. 629 (July 28, 1936) (11 FR 10957), but they may be concurrently registered on proposed Form F–11 by the issuer.

[68] 15 U.S.C. 77e(b).

[69] Rule 24 of the Commission's Rules of Practice (17 CFR 201.24) is being amended in connection with the Canadian MJDS to permit the incorporation by reference of materials submitted to the Commission, including materials submitted under Rule 12g3–2(b), in addition to materials previously filed with the Commission.

[67] See n. 72, *infra*.

instance where the expert's or counsel's materials were prepared or certified solely for use in the registration statement on proposed Form F–11 or the prospectus being delivered to the U.S. holders.[66] The Commission requests comment on whether it is appropriate to excuse experts and counsel from having to consent to the use of their names or to the quotation or summary of their reports or opinions in registration statements filed under cover of proposed Form F–11. Comment is also requested on whether requiring the filing of a consent by experts in connection with proposed Form F–11 registration would be impracticable or involve undue hardship on the person filing the registration statement within the meaning of section 7 of the Securities Act. In this regard, commenters should focus on whether the consent requirement is common practice among foreign registration and listing schemes such that a consent would be obtainable in connection with a Form F–11 filing.

Under the proposal, the properly completed registration statement on proposed Form F–11 would become effective upon filing and would not be subject to prior review by the Commission's staff.[69] Automatic effectiveness of the registration statement is intended to give the issuer maximum flexibility to coordinate the timing of the U.S. portion of the offering with the time schedule of the offshore portion of the offering.

All documents filed with the Commission would be subject to the civil liability and general antifraud provisions of the U.S. securities laws applicable to a registration statement filed under the Securities Act. [70] In addition, such documents would be in the Commission's public files and, therefore, would be subject to public inspection.

As proposed, Form F–11 incorporates in its entirety the disclosure requirements under applicable laws of the issuer's home jurisdiction, as construed under the laws of that jurisdiction. Other than requiring the inclusion of specified legends, the provision of English translations or summaries and the filing of certain exhibits, no disclosure requirements would be defined by U.S. rules and regulations. Like Form F–7 approved under Canadian MJDS, proposed Form F–11 provides that the provisions of Regulation C shall not apply to rights offers registered on the proposed Form, unless specifically referred to in the proposed Form. Proposed Form F–11 would specifically preserve the application of Rules 408 and 415, and address incorporation by reference, English language requirements, and other matters covered by Regulation C.[71] In addition, Regulation C is itself being amended to address effective date, delaying amendments and consent requirements with respect to Form F–11 filings. Comment is requested whether, unlike Canadian MJDS which relied upon Canadian registration procedures and concepts, additional provisions of Regulation C should apply to rights offers registered on Form F–11, which is not based upon specific foreign regulatory schemes. Accordingly, financial statements may be prepared in accordance with foreign generally accepted accounting principles and be audited under the auditing standards of the foreign jurisdiction, by auditors subject to foreign auditor independence requirements.

Commenters to Canadian MJDS and several recent Commission releases have expressed the concern that registration statements based on foreign disclosure requirements may expose registrants to liabilities even if foreign disclosure requirements and standards have been adhered to, simply because certain types of information typically included in U.S. disclosure documents are permitted by foreign rules and regulations to be omitted from foreign disclosure documents. The Commission stated in the Canadian MJDS Reproposing Release that in adopting Canadian MJDS, the Commission would be adopting as its own requirements the disclosure requirements of the applicable Canadian regulatory scheme with respect to the registration statements filed on Canadian MJDS forms. [72] The same principles would apply to the rules and forms proposed today regarding offering materials disseminated to U.S. holders or filed with the Commission on proposed Form F–11. Accordingly, good faith compliance with the disclosure requirements of the applicable foreign jurisdiction, as construed by the foreign authorities, would constitute compliance with the applicable U.S. federal securities disclosure requirements, even if such compliance were to result in the omission of information which might otherwise have been required as a line item to be included in registration statements filed by U.S. issuers on the Commission's other registration forms.

The Commission requests comment on the appropriateness of this total incorporation of and reliance on foreign disclosure requirements and standards, and solicits comment as to whether the Commission should impose any minimum disclosure standards.

D. Exchange Act Reporting

As a result of new Rule 12h–5 being proposed under the Exchange Act today,[73] foreign issuers who do not otherwise have a reporting obligation under the Exchange Act will not, solely as a result of having filed a registration statement on proposed Form F–11 that has been declared effective, acquire such a reporting obligation. These issuers, accordingly, would be able to retain their exempted status under Rule 12g3–2(b) following a filing on proposed Form F–11.[74] Proposed Rule 12h–5 is based on the premise that incurring a continuous reporting obligation under the Exchange Act operates as a disincentive to foreign issuers not otherwise subject to such reporting obligations, discouraging them from extending rights offers to U.S. investors.

Comment is requested regarding the advisability of exempting such issuers from Exchange Act reporting obligations that arise under section 15(d) of the Exchange Act.

[66] See section 7 of the Securities Act (15 U.S.C. 77g) and proposed Rule 441 under the Securities Act. In most cases the report, certification or opinion of an expert or counsel that is named, quoted or summarized in the U.S. registration statement would have been prepared in connection with the offshore portion of the offering, or incorporated from reports or opinions that have been prepared in the ordinary course of business or for foreign periodic reports or prior foreign registration statements. In such cases, filing of consents of experts or counsel would not be required.

[69] See proposed Rule 456 and proposed amendments to Rule 484 under the Securities Act (17 CFR 230.456 and 230.484).

[70] For instance, sections 11 and 12(2) of the Securities Act (15 U.S.C. 77k and 77l(2)); sections 10(b) and 18(c)(1) of the Exchange Act (15 U.S.C. 78j(b) and 78o(c)(1) and Rules 10b–5 and 15c1–2 (17 CFR 240.10b–5 and 240.15c1–2).

[71] See Rule 400 under Regulation C (17 CFR 230.400), providing that the provisions of that regulation shall not control where the provisions of a form address the same subject matter.

[72] See Canadian MJDS Reproposing Release, *supra* at 46801.

[73] Proposed Rule 12h–5 (17 CFR 240.12h–5) would exempt issuers from the duty under section 15(d) of the Exchange Act (15 U.S.C. § 78o(d)) to file periodic reports under the Exchange Act with respect to securities being registered on proposed Form F–11.

[74] Although Rule 12g3–2(d)(1) (17 CFR 249.12g3–2(d)(1)) precludes an issuer which has or has had, during the previous 18 months, a section 15(d) reporting obligation from relying on the exemption under Rule 12g3–2(b), issuers that file registration statements on proposed Form F–11 would not, by operation of proposed Rule 12h–5, incur any section 15(d) reporting obligation solely as a result of having filed a registration statement on proposed Form F–11 that has been declared effective.

VOL 56 ISS 115 JE 14 1991 UMI

E. State Securities Regulations

Issuers selling securities in the United States must comply with the securities (or "blue sky") laws of the states, which generally require registration with state authorities of offerings made to state residents. The securities laws of many states, however, contain a provision, patterned after Section 402(b)(11) of the Uniform Securities Act, [75] exempting from registration security offerings to existing securityholders of the issuer if no commission or other remuneration, other than a standby commission (*i.e.*, a payment to an underwriter for its commitment to purchase securities not purchased by the security holders) is paid or given directly or indirectly for soliciting any security holder in the state. [76] Some states permit the payment of commissions other than standby commissions on the condition that state securities regulators receive advance notification of the offering, specifying the terms of the offer. [77] Compensation paid in the offshore portion of a rights offering would not necessarily disqualify the offer from reliance on the exemption, however. Thus, there are likely to be rights offerings registered on proposed Form F-11 that would be exempt in these states.

There may be additional exemptions available to a particular rights offer. For example, in many states, offerings of securities listed on the NYSE or AMEX or traded on the NASDAQ National Market System are exempt from registration.

Many states have adopted uniform practice guidelines and procedures proposed by the North American Securities Administrators Association ("NASAA"). [78] In April 1989, NASAA adopted a statement on Internationalization of the Securities Markets, urging its members to "encourage legitimate capital raising activities across national borders," subject to "minimum rules to ensure investor protection." NASAA has been reviewing the proposed exemption and registration form to determine what actions, if any, are necessary and appropriate for the states to adopt and implement to accommodate these offerings.

IV. Amendments to Form F-3; Relationship of Proposed Form F-11 and Other Registration Forms

A. Amendments to Form F-3

Securities Act registration Form F-3, which permits full incorporation by reference to Exchange Act reports, is available for registration of securities offered in connection with certain rights offerings, dividend or interest reinvestment plans, conversion of convertible securities and exercise of warrants. To be eligible to use Form F-3, a foreign private issuer, among other things, must have been subject to the requirements of Section 12 or 15(d) of the Exchange Act and have filed all information required to be filed under that Act for at least 36 months immediately prior to filing on Form F-3. [79] In addition, such issuer must also meet a $300 million public float test, unless the securities being registered are non-convertible investment grade securities. [80]

The Commission is proposing today to amend Form F-3 to eliminate the 36-month reporting history requirement and the $300 million public float requirement for transactions described in paragraph b.4. of Transaction Requirements under General Instruction I.B. to Form F-3. [81]

In addition, General Instructions III to Form F-3 is proposed to be amended to provide for immediate effectiveness of registration statements filed on Form F-3 relating to these transactions. [82]

Concurrently with proposing amendments to Form F-3, the Commission is proposing technical amendments to Form F-2 to delete paragraph E of General Instruction I to Form F-2, [83] which exempts registrants seeking to register securities being offered in connection with rights offerings, dividend or interest reinvestment plans, conversions of convertible securities and exercise of warrants, from the 36-month Exchange Act reporting history requirement usually applicable to Form F-2 registrants.

B. Relationship With Other Registration Forms

Proposed Form F-11 is based on Form F-7, the registration form for rights offerings under the Canadian MJDS. Like Form F-7, proposed Form F-11 may only be used for registering securities offered or sold in all-cash rights offers that prohibit the transfer of the rights in the United States. While Form F-7, unlike proposed Form F-11, may be used to register offerings of securities of any class and the two Forms impose different issuer eligibility conditions, [84]

[75] Section 402(b)(11) of the Uniform Securities Act provides an exemption from registration and sales and advertising literature filing requirements for "any transaction pursuant to an offer to existing security holders of the issuer, including persons who at the time of the transaction are holders of convertible securities, non-transferable warrants, or transferable warrants exercisable within not more than ninety days of their issuance, if (A) no commission or other remuneration (other than a standby commission) is paid or given directly or indirectly for soliciting any security holder in this state, or (B) the issuer first files a notice specifying the terms of the offer and the [Administrator] does not by order disallow the exemption within the next five full business days."

[76] Forty-three states have some type of exemption for offers and sales to existing securityholders. The District of Columbia has no securities registration requirements.

[77] The exact form of exemptions for offers and sales to existing securityholders differ considerably among the states. One state permits the payment of other than standby commissions to broker-dealers which are registered or exempt from registration under that state's laws. Twenty-five states permit the payment of other than standby commissions if a notice is filed and the exemption is not disallowed. One state permits the payment of other than standby commissions if affirmatively approved by the state. Ten states prohibit completely the payment of other than standby commissions but do not require a notice filing. Six states prohibit completely the payment of other than standby commissions and require the filing of a notice.

[78] NASAA is an association comprised of all state and provincial securities regulators in the United States and Canada.

[79] See General Instruction I.A.2. to Form F-3.

[80] See General Instruction I.A.4. to Form F-3. To meet the requisite public float test, the aggregate market value worldwide of the voting stock of the issuer held by non-affiliates must be the equivalent of $300 million or more. See also Instructions to General Instruction I.A.4. to Form F-3.

[81] Transactions described in paragraph 4 of the Transaction Requirements to Form F-3 include transactions in which the only securities to be registered are those being offered (a) upon the exercise of outstanding rights granted on a pro rata basis to all existing security holders of the class of securities to which the rights attach; (b) pursuant to a dividend or interest reinvestment plan; or (c) upon the conversion of outstanding convertible securities or upon the exercise of outstanding transferable warrants issued by the issuer of the securities to be offered, or by an affiliate of such issuer. The registration of securities to be offered or sold in a standby underwriting in the United States or similar arrangement is not permitted pursuant to paragraph 4 of the Transaction Requirements of Form F-3, however. See General Instruction I.B.4. to Form F-3.

[82] See General Instruction III to Form F-3. In addition to the changes being proposed today, the Commission is proposing today in a companion release published elsewhere in this issue to amend Rule 3-19 under Regulation S-X relating to the maximum age of financial statements to be included in registration statements filed on Form F-3. As a result of the amendments to Rule 3-19, if such amendments are adopted, foreign issuers that do not prepare interim financial statements on a quarterly basis would no longer be precluded from filing registration statements on Form F-3 during certain "black out" periods.

[83] See General Instruction I.E. to Form F-2.

[84] For instance, Form F-7 requires issuers to have maintained a three-year reporting history with Canadian securities regulators as well as a one-year listing history with The Montreal Stock Exchange, The Toronto Stock Exchange or the Senior Board of The Vancouver Stock Exchange, all of which are designated offshore securities markets under Regulation S. By contrast, proposed Form F-11 would allow all foreign private issuers that are Exchange Act reporting issuers at the time of filing to register equity securities on that form regardless of their foreign reporting and listing histories. In addition, with respect to nonreporting issuers, proposed Form F-11 would permit those that have either a three-year listing history with a designated offshore securities market or, if they do not have three-year listing history, a $75 million minimum public float to qualify.

Canadian issuers that meet the eligibility requirements and other conditions for both forms will have the option of registering rights offerings of equity securities on either form. It is anticipated that upon adoption of proposed Form F-11, it may be merged and consolidated with Form F-7 as approved under the Canadian MJDS.

In addition, foreign issuers, including Canadian issuers, that are reporting issuers under the Exchange Act may be eligible to register securities to be issued in connection with rights offers on Form F-3, as proposed to be amended hereby. [85] Foreign issuers that meet the eligibility conditions for registration on both Form F-11 and the amended Form F-3, therefore, would have the option of registering on either form.

V. Exemptions Under Rules 10b-6, 10b-7, and 10b-8 Under the Exchange Act

Rule 10b-6 under the Exchange Act generally prohibits persons participating in a distribution of securities ("distribution participants") and their "affiliated purchasers" [86] from, directly or indirectly, bidding for or purchasing the security being distributed, any security of the same class and series, or any right to purchase such security ("related securities") during the distribution. [87] Rule 10b-7 regulates stabilization transactions in connection with an offering of securities. Rule 10b-8 governs distributions that are made through rights offerings.

These anti-manipulation rules have played an important role in protecting U.S. markets from potentially manipulative conduct during a distribution. Specifically, Rule 10b-6 is designed to protect the market for the security in distribution as an independent pricing mechanism, free from any influence on the security's price that may result from bids or purchases of the distribution security or related securities by distribution participants or other persons having a financial or other stake in the success of the distribution. Rule 10b-6 is designed to facilitate distributions through rights by permitting distribution participants to bid for and purchase the rights, but limits the prices at which bids and purchases of rights, and offers and sales of the underlying security, may be made.

Foreign practices and methods of distributing securities, including distributions through rights offerings, often differ from those utilized in the United States. The growing internationalization of the securities markets has highlighted differences between U.S. and foreign provisions governing market activity during offerings of securities. The Commission has taken a number of steps to permit non-U.S. distribution participants to continue certain customary market activities in foreign jurisdictions, subject to conditions designed to protect against manipulative effects in the U.S. market. [88]

Flexible application of the above anti-manipulation rules appears to be necessary and appropriate to encourage foreign issuers to permit U.S. shareholders to participate fully in rights offerings made pursuant to proposed Rule 801 or Form F-11. At the same time, the importance of maintaining the integrity of the U.S. markets requires that any exemptions should be limited to circumstances where the characteristics of the offering indicate that the manipulation concerns expressed in Rules 10b-6, 10b-7, and 10b-8 are sufficiently attenuated. The proposed exemptions described below would have no effect on the continued application of the general antifraud and anti-manipulation provisions of the securities laws. [89]

It is likely that many of the rights offerings using proposed Rule 801 or Form F-11 will not be "distributions" as defined in Rule 10b-6, [90] and the persons participating in such offerings will not be affected by the rule or the need to consider whether the proposed exemptions are available. Nevertheless, the Commission believes that it is appropriate to exercise its exemptive authority under Rules 10b-6(h), 10b-7(e), and 10b-8(f) to propose a complete exemption for rights offerings pursuant to proposed Rule 801 on the presumption that such offerings of foreign securities are unlikely to raise significant manipulative concerns.

In the context of distributions through rights pursuant to proposed Form F-11, the Commission is proposing to issue an order that would exempt distribution participants from Rules 10b-6, 10b-7, and 10b-8, subject to the following conditions: (1) The issuer of the foreign securities in distribution has voting stock with an aggregate market value of at least $150 million held worldwide by persons that are not affiliates of the issuer; (2) in required proposed Form F-11 legends, [91] the registrant discloses, where such is the case, the possibility of, or the intent to make, bids or purchases outside the United States as permitted by the applicable laws and regulations of the governing foreign jurisdictions; (3) the registrant discloses in the United States information regarding such purchases to the extent such disclosure is made in a foreign jurisdiction; (4) any bids or purchases of the security by distribution participants are made on a "designated offshore securities market," as defined in Rule 902 under the Securities Act; [92] (5) no bids or purchases of the rights or the underlying securities are effected in the United States; and (6) at the time that the rights offering commences, the exercise price of the rights represents a discount of at least ten percent from the then current market price of the securities underlying the rights. A distribution participant would also be permitted to purchase rights to offset a short position in the security established in connection with the distribution. [93]

The Commission seeks commenters' views on the proposed exemptions. Specifically, should the issuer qualification of $150 million in voting securities be changed to equity with a "public float" [94] of $150 million; $75 million? With regard to the qualifying markets for bids and purchases, would it be more appropriate to limit the availability of the exemptions to purchases on "specified foreign securities markets," as defined in proposed Rule 3b-10 under the Exchange Act, [95] or markets located in countries with which the Commission has an MOU or other comparable information sharing agreement? [96]

[85] See Section IV.A., *supra*.

[86] The term "affiliated purchaser" is defined in Rule 10b-6(c)(6).

[87] The term "distribution" is defined in Rule 10b-6(c)(3) as an offering of securities, whether or not subject to registration under the Securities Act, that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods. This definition is designed to apply the prohibitions of the rule to those situations where there would be an incentive to manipulate the security's price in order to facilitate the distribution. See n. 89, *infra*.

[88] See, e.g., Letter re The International Stock Exchange of the United Kingdom and the Republic of Ireland Limited (Sept. 29, 1987); and Securities Act Release No. 6840 (July 24, 1989) [54 FR 32230], proposing Canadian MJDS.

[89] See n. 61 *supra*, and accompanying text.

[90] See n. 87, *supra*. In determining whether a distribution is present, only the portion of the securities offered in the U.S. would be considered. However, for purposes of Rule 10b-6, the offeror would have to take into account all securities concurrently offered by the offeror in the United States, including securities offered pursuant to exemptions from Securities Act registration.

[91] See part I, item 2 of Form F-11.

[92] See 17 CFR 230.902(a).

[93] See, *e.g.*, Rule 10b-8(d), which permits purchases of rights, subject to certain conditions, to cover sales of the underlying security by the distributor. Moreover, the Commission would consider requests for exemptive relief on a case-by-case basis for transactions that do not satisfy the criteria of the proposed exemptions.

[94] See Instruction 4 to proposed Form F-11.

[95] See Exchange Act Release No. 28733 (January 3, 1991) [56 FR 820].

[96] See n. 47 *supra* and accompanying text.

VOL
56
ISS
115
JE

1991
UMI

Should this alternative limitation depend on the percentage of the offeror's securities held in the U.S.? The Commission believes that where the exercise price of the rights has been set at a significant bona fide discount from the market price for the underlying shares, distribution participants are less likely to have an incentive to effect transactions that could artificially raise the price of the underlying shares and thereby facilitate the distribution through securityholders' exercise of the rights.[97] The Commission requests comment on this view, and whether the ten percent discount level is appropriate in light of current rights offering practices. Should the discount level be higher or lower (*e.g.*, five percent, eight percent, 15 percent)? Should the level of any required discount be tied to the characteristics of the primary market for the offeror's securities or the percentage of the issuer's securities held in the U.S. (*e.g.*, 10 percent, 25 percent)? Finally, comment is requested concerning the role played by issuers and their affiliated purchasers in foreign rights offerings and whether it is appropriate to extend the proposed exemptions to them.[98]

VI. Request for Comments

Any interested person wishing to submit written comments on proposed Rule 801 and Form F–11, the proposed amendments to Form F–3, exemptive relief from Rules 10b–6, 10b–7 or 10b–8 or the treatment of rights offers by foreign private issuers in general, is requested to do so. Comment is also solicited regarding whether the proposals, if adopted, would have an adverse effect on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comment on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.

VII. Cost-Benefit Analysis

To evaluate fully the benefits and costs associated with proposed Rule 801 and Form F–11, and with the proposed amendments to Form F–3, the Commission requests commenters to provide views and data as to the costs and benefits associated with cross-border rights offers by foreign private issuers under current law as compared to such costs and benefits under the proposed Rule and Form, and proposed amendments to Form F–3. The Commission is not aware of any additional costs that would result from adoption of the proposed Rule and Form, as any eligible foreign private issuer would be able to avoid entirely expenses associated with the preparation and filing of a registration statement with the Commission in cases where the U.S. portion of the offering meets the requirements of Rule 801 and, in other cases, avoid some of the expenses resulting from having to prepare and file substantially different disclosure documents in the United States and in the issuer's home jurisdiction. Proposed amendments to Form F–3 would make that Form available for registration of rights offerings and other specified transactions to a broader class of foreign issuers. It is expected that foreign private issuers would thus be more willing to include the U.S. holders of their securities in rights offers and that U.S. investors in foreign securities will, as a group, benefit from the adoption of the proposed rule and Form, and proposed amendments to Form F–3. U.S. issuers would be unaffected by such changes.

VIII. Regulatory Flexibility Act Certification

Pursuant to Section 605(b) of the Regulatory Flexibility Act,[99] the Chairman of the Commission has certified that adoption of the proposed rules and Forms, and proposed revisions to existing Rules and Forms, will not have a significant impact on a substantial number of small entities. That certification, including the reasons therefor, is attached to this release as appendix B.

IX. Statutory Basis and Text of Proposed Rule and Form

The new rules and Forms and revisions to existing rules and Forms are being proposed pursuant to sections 3, 7, 8, 10 and 19 of the Securities Act,[100] and sections 12 and 23 of the Exchange Act.[101]

List of Subjects in 17 CFR Parts 230, 239 and 240

Reporting and recordkeeping requirements, securities.

X. Text of Proposals

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78*l*, 78m, 78n, 78o, 78w, 79t, and 80a–37, as amended, unless otherwise noted.

2. By revising paragraph (a) of § 230.174 to read as follows:

§ 230.174 Delivery of prospectus by dealers; exemptions under section 4(3) of the Act.

* * * * *

(a) No prospectus need be delivered if the registration statement is on Forms F–6 or F–11 (§ § 239.36 or 42 of this chapter).

* * * * *

3. By adding § 230.441 to read as follows:

§ 230.441 Exemption from the requirement to provide consents for registration statements on Form F–11.

The written consent of an expert pursuant to section 7 of the Act shall not be required with respect to a registration statement on Form F–11 (17 CFR 239.43 of this chapter), except with respect to a certification, report or valuation prepared solely in connection with such registration statement.

4. By revising § 230.464 to read as follows:

§ 230.464 Effective date of post-effective amendments to registration statements filed on Form S–8 and Form F–11, and on certain Forms S–3, S–4, F–3, and F–4.

Provided. That, at the time of filing of each post-effective amendment with the Commission, the issuer continues to meet the requirements of filing on Form S–8 (§ 239.16b of this chapter) or Form F–11 (§ 239.43 of this chapter); or on Form S–3 (§ 239.13 of this chapter) for a registration statement relating to a dividend or interest reinvestment plan; or on Form F–3 (§ 239.33 of this chapter) for a registration statement relating to a transaction meeting the requirements specified in paragraph 4 of General Instruction I.B. of that Form; or in the case of a registration statement on Form S–4 (§ 239.25 of this chapter) that there is continued compliance with General Instruction G of that Form or on Form F–4 (§ 239.34 of this chapter) that there is continued compliance with General Instruction F of that Form:

(a) The post-effective amendment shall become effective upon filing with the Commission; and

(b) With respect to securities sold on or after the filing date pursuant to a prospectus which forms a part of a Form S–8 or Form F–11 registration statement; or a Form S–3 registration statement relating to a dividend or interest reinvestment plan; or a Form F–3 registration statement relating to a transaction meeting the requirements specified in paragraph 4 of General Instruction I.B. of that Form; or a Form S–4 registration statement complying with General Instruction G of that Form or a Form F–4 registration statement complying with General Instruction F of that Form and which has been amended to include or incorporate new full year financial statements or to comply with the provisions of section 10(a)(3) of the Act, the effective date of the registration statement shall be deemed to be the filing date of the post-effective amendment.

5. By adding new § 230.468 to read as follows:

§ 230.468 Effectiveness of registration statements made on Form F–11 and on certain Forms F–3.

A registration statement on Form F–11 (§ 239.43 of this chapter) or on Form F–3 (§ 239.33 of this chapter) relating to offerings described in paragraph 4 of General Instruction I.B. of that Form shall become effective upon filing with the Commission.

6. By revising paragraph (d) of § 230.473 to read as follows:

§ 230.473 Delaying amendments.

* * * * *

(d) No amendments pursuant to paragraph (a) of this section may be filed with a registration statement on Form F–11 or Form S–8 (§ 239.16b or § 239.43 of this chapter); on Form S–3 (§ 239.13 of this chapter) relating to a dividend or interest reinvestment plan; on Form F–3 (§ 239.33 of this chapter) relating to a transaction meeting the requirements specified in paragraph 4 of General Instruction I.B. of that Form; or on Form S–4 (§ 239.25 of this chapter) complying with General Instruction G of that Form or on Form F–4 (§ 239.34 of this chapter) complying with General Instruction F of that Form.

7. By adding new § 230.801 to read as follows:

§ 230.801 Exemption for limited offers and sales of securities by a foreign private issuer to its security holders.

Preliminary Notes

1. Section 230.801 relates solely to the application of section 5 of the Securities Act of 1933 (the "Act") (15 U.S.C. 77e) and not to the applicability of the antifraud, civil liability or other provisions of the federal securities laws.

2. In view of the objectives of § 230.801 and the policies underlying the Act, § 230.801 is not available with respect to any transaction or series of transactions that, although in technical compliance with this rule, is part of a plan or scheme to evade the registration provisions of the Act. In such cases, registration under the Act is required.

3. Nothing in this § 230.801 obviates the need for any issuer or any other person to comply with the securities registration or broker-dealer registration requirements of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78 *et seq.*) or other provisions of the federal securities laws whenever such requirements are applicable.

4. Nothing in this § 230.801 obviates the need to comply with any applicable state law relating to the offer and sale of securities.

5. Attempted compliance with § 230.801 does not act as an exclusive election; a person making an offer or sale of securities in reliance on § 230.801 may also claim the availability of any other applicable exemption from the registration requirements of the Act.

6. Section 230.801 provides an exemption only for the transactions in which the securities are offered or sold by the issuer, not for the securities themselves. Securities of foreign private issuers, whether or not acquired in a transaction made in reliance on § 230.801, may be resold in the United States only if they are registered under the Act or an exemption from registration is available.

7. The provisions of this § 230.801 shall not apply to offers and sales of securities issued by investment companies registered or required to be registered under the Investment Company Act of 1940 (the "Investment Company Act") (15 U.S.C. 80a–1 *et seq.*).

8. Offers and sales made outside the United States will not affect, or be affected by, contemporaneous rights offer made in compliance with § 230.801 and will not be included in calculating the aggregate offering price of securities offered and sold in compliance with this § 230.801. A transaction made in compliance with this § 230.801 will not be integrated with registered domestic offerings or domestic offerings that satisfy the requirements for an exemption from registration under the Act, including an exemption under other rules adopted pursuant to section 3(b) of the Act, even if undertaken contemporaneously. No adjustment to the aggregate offering price shall be made for other offerings by an issuer made in reliance upon an exemption under other rules adopted pursuant to section 3(b) of the Act.

(a) *Exemption.* Offers and sales of equity securities issuable upon the exercise of rights to purchase or subscribe for such securities granted by the issuer to the existing holders of securities of such class (including depositary receipts that evidence such securities) in proportion to the number of such securities held by them as of the record date for the rights offer (assuming, in the case of securities that evidence such securities, that such holders owned the underlying securities directly) shall be exempt from the provisions of section 5 of the Act by virtue of section 3(b) of the Act, provided that the conditions specified in paragraph (b) of this section are satisfied.

(b) *Conditions to be met*— (1) *Eligibility of issuer.* (i) As of the commencement date of the subject offering, the issuer:

(A) Shall be a foreign private issuer; and

(B) Shall either:

(*1*) Be a Reporting Issuer; or

(*2*) Be exempt from the requirements of section 12(g) of the Exchange Act pursuant to Rule 12g3–2(b) thereunder, have at least one class of its equity securities listed or quoted on one or more designated offshore securities markets and be currently in compliance with the obligations arising from such listing or quotation, and either:

(*i*) Have maintained such listing or quotation for the consecutive 36-month period immediately preceding the commencement date of the offering to be made in reliance on this § 230.801; or

(*ii*) Have a public float of not less than $75 million.

(ii) If the issuer is a successor issuer existing after a merger, a spinoff, an arrangement or other reorganization requiring the vote of shareholders of the participating companies (a "business combination"), the issuer shall be deemed to meet the 36-month listing requirement of paragraph (b)(1)(i)(C)(*2*)(*i*) of this section if:

(A) The time the successor issuer has been listed or quoted on one of such designated offshore securities markets, when added separately to the time each predecessor had been so listed or quoted at the time of the business combination, in each case equals at least 36 calendar months, *Provided, however,* That any predecessor need not be considered for the purposes of the listing history calculation if the listing

---

[97] See Letter re Attwoods PLC (June 26, 1990) ("Attwoods Letter") (exemptions from Rules 10b–6, 10b–7 and 10b–8 to permit an underwriter that was a market maker on the ISE to engage in market making during a cross-border rights offering of Attwoods ordinary shares. The rights exercise price was set at a discount of 18 percent from the market price of the ordinary shares as of commencement of the rights offering. Other important considerations in the Attwoods Letter were: the existence of a comprehensive monitoring and surveillance program at the ISE, and U.K. provisions that prohibit fraudulent and manipulative activity; and the Memorandum of Understanding ("MOU") between the Commission and the U.K. Department of Trade and Industry). See also Letter re Securities Industry Association (Apr. 23, 1991) ("SIA Letter") (application of Rules 10b–6, 10b–7, and 10b–8 to Rights Offerings and Rule 144A Transactions Involving Foreign Securities).

[98] Limiting the exemptions to persons other than the issuer and its affiliates would be consistent with prior Commission actions. See *e.g.*, SIA Letter.

histories of predecessors whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the successor issuer as measured based on pro forma combination of such participating companies' most recently completed fiscal years immediately prior to the business combination, when combined with the listing history of the successor issuer in each case satisfies such 36-month listing requirement; and

(B) The successor issuer has had a class of its equity securities listed or quoted on at least one of such designated offshore securities markets since the business combination and currently is in compliance with the obligations arising from such listing.

(2) *Eligibility of securities.* The securities to be offered or sold in reliance on this § 230.801 shall be equity securities of the same class as that held by U.S. holders.

(3) *Manner of Rights Offering.* (i) Any offer or sale of securities in reliance on this § 230.801 shall be:

(A) For cash only;

(B) Offered and sold upon the exercise of rights granted to offerees that are U.S. holders upon terms and conditions that are not less favorable than those extended to any other holder of securities of the class being offered; and

(C) Made pursuant to the exercise of rights to purchase or subscribe for such securities that:

(*1*) Were granted by the issuer to the existing holders of securities of the same class (including depositary receipts that evidence such securities) in proportion to the number of such securities held by them as of the record date for the rights offer (assuming, in the case of holders of securities that evidence such securities, that such holders owned the underlying securities directly); and

(*2*) When issued to offerees that are U.S. holders, are by their terms not transferable except in accordance with Regulation S (§§ 230.901–904 of this chapter).

(ii) All offerees that are U.S. holders shall be provided with the same notices, documents or other information as that provided to the offerees in the home jurisdiction of the issuer at the same time that, or as soon as practicable after, such notices, documents or other information are made available to the home jurisdiction offerees. If in lieu of delivering notices, documents, or other information to offerees in the home jurisdiction, information regarding the offering is being published or advertised in a home jurisdiction publication, then the issuer may at its option publish substantially equivalent information in the English language in a publication of general circulation in the United States or deliver a written copy of the home jurisdiction publication or advertisement to each offeree that is a U.S. holder at the same time that, or as soon as practicable after, the information becomes publicly available in the home jurisdiction of the issuer. If such notice, document or other information is furnished to the home jurisdiction offerees in a language other than English, then an English translation or summary of such notice, document, or other information shall be furnished to offerees that are U.S. holders.

(4) *Aggregate offering price.* The aggregate offering price of securities subject to outstanding offers made to offerees that are U.S. holders in connection with each rights offering made in reliance on this § 230.801 shall not exceed $5,000,000.

(c) *Definitions.* As used in this § 230.801, the following terms shall have the meaning indicated:

(1) *Aggregate offering price* means the total gross sales price to be received by the issuer for issuance of its securities upon exercise of the related rights. Any portion of the aggregate offering price attributable to cash received in a foreign currency shall be translated into United States currency at the currency exchange rate in effect at a reasonable time prior to or on the commencement date of the offering.

(2) The *commencement date* of a rights offer made in reliance on this § 230.801 is the date the securities are first offered to offerees that are U.S. holders.

(3) *Designated offshore securities market* has the meaning specified in Rule 902(a) of Regulation S under the Act (§ 230.902(a) of this chapter).

(4) *Equity security* has the meaning specified in Rule 405 of Regulation D (§ 230.405 of this chapter) but does not include:

(i) Any security convertible, with or without consideration, into an equity security, or carrying any warrant or right to subscribe to or purchase an equity security;

(ii) Any such warrant or right; or

(iii) Any put, call, straddle, or other option or privilege of buying such a security from or selling such a security to another without being bound to do so.

(5) *Foreign private issuer* has the meaning specified in Rule 405 of Regulation C (§ 230.405 of this chapter).

(6) *Home jurisdiction.* With respect to any offer or sale of securities made in reliance on this § 230.801, the "home jurisdiction" means the country of the issuer's organization or incorporation, unless the primary market for the issuer's equity securities is in some other country, in which case such country of the primary market for the listed securities shall be deemed the "home jurisdiction." The "primary market" of a class of securities is the single securities market with the largest aggregate trading volume for that class of securities in the shorter of the issuer's prior fiscal year or the period since the issuer's incorporation or organization.

(7) *Public float* means the market value of the issuer's equity securities listed or quoted on a designated offshore securities market and held by nonaffiliates of the issuer. *Market value* shall be computed by use of the price at which such shares were last sold, or the average of the bid and asked prices of such shares, in the primary market for such shares as of a date within 60 days prior to the commencement. If there is no market for such shares the book value of such shares computed as of the latest practicable date prior to the commencement date shall be used for purposes of calculating the market value, unless the issuer of such securities is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such shares shall be used. An "affiliate" of an issuer shall mean any person who beneficially owns, directly or indirectly, or exercises control or direction over, more than 10 percent of the outstanding equity shares of the issuer. The determination of affiliates shall be made as of the end of the issuer's most recently completed fiscal year.

(8) *Publication with a general circulation in the United States.* (i) "Publication with a general circulation in the United States" means any publication that:

(A) Is printed primarily for distribution in the United States; or

(B) Has had, during the preceding twelve months, an average circulation in the United States of 15,000 or more copies per issue.

(ii) Notwithstanding paragraph (c)(8)(i) of this section, only the U.S. edition of any publication printing a separate U.S. edition will be deemed a publication with a general circulation in the United States if:

(A) Such publication, without consideration of its U.S. edition, would not meet the requirements of paragraph (c)(8)(i) (A) or (B) of this section; and

(B) The U.S. edition itself meets the requirements of paragraph (c)(8)(i) of this section.

(9) *Reporting Issuer* means an issuer other than an investment company

registered or required to be registered under the Investment Company Act that:

(i) Has a class of securities registered pursuant to section 12(b) or 12(g) of the Exchange Act (15 U.S.C. 78*l*(b) or 78*l*(g)) or is required to file reports pursuant to section 15(d) of the Exchange Act (15 U.S.C. 78*o*(d)); and

(ii) Has filed all the materials required to be filed pursuant to section 13(a) or 15(d) of the Exchange Act (15 U.S.C. 78m(a) or 78*o*(d)) for a period of at least 12 months immediately preceding the commencement date of the offering being made in reliance upon this § 230.801 (or for such shorter period that the issuer was required to file such material).

(10) *U.S. holder.* With respect to any offer or sale of securities made in reliance on this § 230.801, a "U.S. holder" means any person whose address appears on the records of the issuer or any voting trustee, depositary, share transfer agent or any person acting on behalf of the issuer for such securities, as being located in the United States.

(11) *United States* means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

8. The authority citation for part 239 continues to read, in part, as follows:

Authority: The Securities Act of 1933, 15 U.S.C. 77a, *et seq.*, unless otherwise noted.

§ 239.32 [Amended]

9. By amending § 239.32 by removing paragraph (e) and redesignating paragraphs (f) and (g) as paragraphs (e) and (f).

10. By amending Form F–2 (17 CFR 239.32) by removing paragraph E. of General Instructions I and redesignating paragraphs F. and G. as paragraphs E. and F.

Note: Form F–2 is not codified in the Code of Federal Regulations.

11. By amending § 239.33 by revising paragraphs (a)(2) and (a)(4) to read as follows:

§ 239.33 Form F–3, for registration under the Securities Act of 1933 of securities of certain foreign private issuers offered pursuant to certain types of transactions.

* * * * *

(a) * * *

(2) The registrant:

(i) Has been subject to the requirements of section 12 or 15(d) of the Exchange Act and has filed all the material required to be filed pursuant to sections 13, 14, or 15(d) for a period of at least thirty-six calendar months immediately preceding the filing of the registration statement on this Form; and

(ii) Has filed in a timely manner all reports required to be filed during the twelve calendar months and any portion of a month immediately preceding the filing of the registration statement and, if the registrant has used (during the twelve calendar months and any portion of a month immediately preceding the filing of the registration statement) Rule 12b–25(b) (§ 240.12b–25(b)) under the Exchange Act with respect to a report or a portion of a report, that report or portion thereof has actually been filed within the time period prescribed by the Rule, except that the provisions of this paragraph do not apply if the only securities being registered are to be offered in a transaction of the type described in (b)(4) of the Transaction Requirements.

* * * * *

(4) The aggregate market value worldwide of the voting stock held by non-affiliates of the registrant is the equivalent of $300 million or more, except that the provisions of this paragraph do not apply if the only securities being registered are to be offered in a transaction of the type described in (b)(2) or (b)(4) of the Transaction Requirements.

* * * * *

§ 239.33 [Amended]

12. By amending Form F–3 (17 CFR 239.33) by revising General Instructions I.A.2. and I.A.4. to read as follows:

Note: The Forms do not appear in the Code of Federal Regulations.

Form F–3

* * * * *

General Instructions

I. * * *

A. * * *

2. The registrant:

(a) Has been subject to the requirements of section 12 or 15(d) of the Exchange Act and has filed all the material required to be filed pursuant to sections 13, 14, or 15(d) for a period of at least thirty-six calendar months immediately preceding the filing of the registration statement on this Form; and

(b) Has filed in a timely manner all reports required to be filed during the twelve calendar months and any portion of a month immediately preceding the filing of the registration statement and, if the registrant has used (during the twelve calendar months and any portion of a month immediately preceding the filing of the registration statement) Rule 12b–25(b) (§ 240.12b–25(b) of this chapter) under the Exchange Act with respect to a report or a portion of a report, that report or portion thereof has actually been filed within the time period prescribed by the Rule, except that the provisions of this paragraph do not apply if the only securities being registered are to be offered in a transaction of the type described in B.4. of the Transaction Requirements.

* * * * *

4. The aggregate market value worldwide of the voting stock held by non-affiliates of the registrant is the equivalent of $300 million or more, except that the provisions of this paragraph do not apply if the only securities being registered are to be offered in a transaction of the type described in B.2. or B.4. of the Transaction Requirements.

* * * * *

§ 239.33 [Amended]

13. By amending Form F–3 (17 CFR 239.33) by revising the heading and the first three sentences of General Instruction III to read as follows:

Form F–3

* * * * *

General Instructions

* * * * *

III. Rights Offerings, Dividend or Interest Reinvestment Plans, and Conversions of Warrants: Filing and Effectiveness of Registration Statement; Requests for Confidential Treatment

Original registration statements on this Form F–3 solely with respect to securities offered pursuant to transactions of the type described in B.4. of the Transaction Requirements shall become effective automatically upon filing (Rule 456, § 230.456 of this chapter) pursuant to the provisions of section 8(a) of the Act.* * *

* * * * *

14. By adding § 239.43 (Form F–11) to read as follows:

§ 239.43 Form F–11, registration of securities offered by certain foreign private issuers to existing security holders pursuant to rights offerings.

(a) Form F–11 may be used for the registration under the Securities Act of 1933 (the "Securities Act") of equity securities offered or sold for cash upon the exercise of rights to purchase or subscribe for such securities granted by the Registrant to the existing holders of securities of such class (including depositary receipts that evidence such securities) in proportion to the number of such securities held by them as of the record date for the rights offer (assuming, in the case of securities that evidence such securities, that such holders owned the underlying securities directly).

Instruction

For purposes of this Form, the term *equity security* has the meaning specified in Rule 405 of Regulation C (§ 230.405 of this chapter) but does not include: (1) Any security convertible, with or without consideration, into an equity security, or carrying any

VOL 56 ISS 115 JE 14 1991 UMI

warrant or right to subscribe to or purchase an equity security; (2) any such warrant or right; or (3) any put, call, straddle, or other option or privilege of buying such a security from or selling such a security to another without being bound to do so.

(b) Form F–11 is available to any Registrant that is a foreign private issuer and that either:

(1) Is a Reporting Issuer, or

(2) Is exempt from the requirements of section 12(g) of the Securities Exchange Act of 1934 (the "Exchange Act") pursuant to Rule 12g3–2(b) thereunder, has a class of its equity securities listed or quoted on a designated offshore securities market and currently is in compliance with the obligations arising from such listing or quotation and either:

(i) Has maintained such listing or quotation for the consecutive 36-month period immediately preceding the commencement date of the offering being registered on this Form; or

(ii) Has a public float of not less than $75 million.

Instructions

1. For purposes of this Form, *foreign private issuer* shall be construed in accordance with Rule 405 of Regulation C (§ 230.405 of this chapter).

2. For purposes of this Form, *Reporting Issuer* means an issuer other than an investment company registered or required to be registered under the Investment Company Act of 1940 (the "Investment Company Act") that: (i) Has a class of securities registered pursuant to section 12(b) or 12(g) of the Exchange Act (15 U.S.C. 78*l*(b) or 78*l*(g)) or is required to file reports pursuant to section 15(d) of the Exchange Act (15 U.S.C. 78*o*(d)); and (ii) has filed all the materials required to be filed pursuant to section 13(a) or 15(d) of the Exchange Act (15 U.S.C. 78m(a) or 78*o*(d)) for a period of at least 12 months immediately preceding the commencement date of the offering being registered on this Form (or for such shorter period that the issuer was required to file such material).

3. For purposes of this Form, the term *designated offshore securities market* shall be construed in accordance with Rule 902(a) of Regulation S under the Securities Act.

4. For purposes of this Form, *public float* shall be the market value of the registrant's equity securities listed or quoted on a designated offshore securities market and held by nonaffiliates of the issuer. "Market value" shall be computed by use of the price at which such shares were last sold, or the average of the bid and asked prices of such shares, in the principal market for such shares as of a date within 60 days prior to the date of filing. If there is no market for such shares, the book value of such shares computed as of the latest practicable date prior to the filing of this Form shall be used for purposes of calculating the market value, unless the issuer of such shares is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such shares shall be used. An *affiliate* of an issuer shall mean any person who beneficially owns, directly or indirectly, or exercises control or direction over, more than 10 percent of the outstanding equity shares of the issuer. The determination of affiliates shall be made as of the end of the issuer's most recently completed fiscal year.

5. For purposes of this Form, the *commencement date* of a rights offer is the date the registration statement is filed with the Commission.

(c) If the Registrant is a successor Registrant existing after a merger, a spinoff, an arrangement or other reorganization requiring the vote of shareholders of the participating companies (a "business combination"), the registrant shall be deemed to meet the 36-month listing requirement of paragraph (b)(2)(i) of this § 239.43 if:

(1) The time the successor Registrant has been listed or quoted on one of such designated offshore securities markets, when added separately to the time each predecessor had been so listed or quoted at the time of the business combination, in each case equals at least 36 calendar months, *Provided, however,* That any predecessor need not be considered for purposes of the listing history calculation if the listing histories of predecessors whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the successor Registrant, as measured based on pro forma combination of such participating companies' most recently completed fiscal years immediately prior to the business combination, when combined with the listing history of the successor Registrant in each case satisfies such 36-month listing requirement; and

(2) The successor Registrant has had a class of its equity securities listed or quoted on at least one of such designated offshore securities markets since the business combination and currently is in compliance with the obligations arising from such listing.

(d) The rights in connection with the transaction granted to offerees that are U.S. holders shall be granted upon terms and conditions not less favorable than those extended to any other holder of the same class of securities. That the securities offered or sold upon exercise of rights to securityholders that are U.S. holders may not be registered on this Form if such rights are transferable other than in accordance with Regulation S under the Securities Act.

Instruction

For purposes of this Form, the term *U.S. holder* shall mean any person whose address appears on the records of the registrant or any voting trustee, any depositary, any share transfer agent or any person acting on behalf of the Registrant for such securities, as being located in the United States. *United States* means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

(e) This Form may not be used if the Registrant is an investment company registered or required to be registered under the Investment Company Act of 1940.

(f) The Commission has granted exemptions from Rules 10b–6, 10b–7, and 10b–8 for certain rights offerings made in reliance on Form F–11 that constitute distributions in the United States. See Exchange Act Release No.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

15. The authority citation for part 240 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 78q, 79t, 80a–29, 80a–37, unless otherwise noted.

16. By adding § 240.12h–5 to read as follows:

§ 240.12h–5 Exemption from duty to file reports under section 15(d).

An issuer shall be exempt from the duty under section 15(d) of the Act to file reports required by section 13(a) of the Act with respect to securities registered under the Securities Act of 1933 on Form F–11 (17 CFR 230.43).

Dated: June 5, 1991.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Form F–11

Registration Statement Under the Securities Act of 1933

(Exact name of Registrant as specified in its charter)

(Translation of Registrant's name into English (if applicable))

(Jurisdiction of incorporation or organization of Registrant)

(Jurisdiction of primary market of securities being registered)

(Primary Standard Industrial Classification Code Number (if applicable))

(I.R.S. Employer Identification Number (if applicable))

(Address and telephone number of Registrant's principal executive offices)

(Name, address (including zip code) and telephone number (including area code) of agent for service in the United States)

Approximate date of commencement of proposed sale of the securities to the public

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box. [ ]

Calculation of Registration Fee*

Title of each class of securities to be registered	Amount to be to be registered	Proposed maximum offering price per unit	Proposed maximum aggregate offering price	Amount of registration fee

* See General Instruction II.F. for rules as to calculation of the registration fee.

If, as a result of stock splits, stock dividends or similar transactions, the number of securities purported to be registered on this registration statement changes, the provisions of Rule 416 shall apply to this registration statement.

General Instructions

I. Eligibility Requirements for Use of Form F–11

A. Form F–11 may be used for the registration under the Securities Act of 1933 (the "Securities Act") of equity securities offered or sold for cash upon the exercise of rights to purchase or subscribe for such securities granted by the Registrant to the existing holders of securities of such class (including depositary receipts that evidence such securities) in proportion to the number of such securities held by them as of the record date for the rights offer (assuming, in the case of securities that evidence such securities, that such holders owned the underlying securities directly).

Instruction

For purposes of this Form, the term "equity security" has the meaning specified in Rule 405 of Regulation C (§ 230.405 of this chapter) but does not include: (1) any security convertible, with or without consideration, into an equity security, or carrying any warrant or right to subscribe to or purchase an equity security; (2) any such warrant or right; or (3) any put, call, straddle, or other option or privilege of buying such a security from or selling such a security to another without being bound to do so.

B. Form F–11 is available to any Registrant that is a foreign private issuer and that either:

(1) is a Reporting Issuer, or

(2) is exempt from the requirements of Section 12(g) of the Securities Exchange Act of 1934 (the "Exchange Act") pursuant to Rule 12g3–2(b) thereunder, has a class of its equity securities listed or quoted on a designated offshore securities market and currently is in compliance with the obligations arising from such listing or quotation and either: (i) has maintained such listing or quotation for the consecutive 36-month period immediately preceding the commencement date of the offering being registered on this Form; or (ii) has a public float of not less than $75 million.

Instructions

1. For purposes of this Form, "foreign private issuer" shall be construed in accordance with Rule 405 of Regulation C (§ 230.405 of this chapter).

2. For purposes of this Form, "Reporting Issuer" means an issuer other than an investment company registered or required to be registered under the Investment Company Act of 1940 (the "Investment Company Act") that: (i) has a class of securities registered pursuant to Section 12(b) or 12(g) of the Exchange Act [15 U.S.C. § 78*l*(b) or § 78*l*(g)] or is required to file reports pursuant to Section 15(d) of the Exchange Act [15 U.S.C. § 78*o*(d)]; and (ii) has filed all the materials required to be filed pursuant to Section 13(a) or 15(d) of the Exchange Act [15 U.S.C. § 78m(a) or § 78*o*(d)] for a period of at least 12 months immediately preceding the commencement date of the offering being registered on this Form (or for such shorter period that the issuer was required to file such material).

3. For purposes of this Form, the term "designated offshore securities market" shall be construed in accordance with Rule 902(a) of Regulation S under the Securities Act.

4. For purposes of this Form, "public float" shall be the market value of the Registrant's equity securities listed or quoted on a designated offshore securities market and held by nonaffiliates of the issuer. "Market value" shall be computed by use of the price at which such shares were last sold, or the average of the bid and asked prices of such shares, in the principal market for such shares as of a date within 60 days prior to the date of filing. If there is no market for such shares, the book value of such shares computed as of the latest practicable date prior to the filing of this Form shall be used for purposes of calculating the market value, unless the issuer of such shares is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such shares shall be used. An "affiliate" of an issuer shall mean any person who beneficially owns, directly or indirectly, or exercises control or direction over, more than 10 percent of the outstanding equity shares of the issuer. The determination of affiliates shall be made as of the end of the issuer's most recently completed fiscal year.

5. For purposes of this Form, the "commencement date" of a rights offer is the date the registration statement is filed with the Commission.

C. If the Registrant is a successor Registrant existing after a merger, a spinoff, an arrangement or other reorganization requiring the vote of shareholders of the participating companies (a "business combination"), the Registrant shall be deemed to meet the 36-month listing requirement of I.B.(2)(i) above if: (1) the time the successor Registrant has been listed or quoted on one of such designated offshore securities markets, when added separately to the time each predecessor had been so listed or quoted at the time of the business combination, in each case equals at least 36 calendar months, *provided, however,* that any predecessor need not be considered for purposes of the listing history calculation if the listing histories of the predecessors whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the successor Registrant, as measured based on pro forma combination of such participating companies' most recently completed fiscal years immediately prior to the business combination, when combined with the listing history of the successor Registrant in each case satisfies such 36-month listing requirement; and (2) the successor Registrant has had a class of its equity securities listed or quoted on at least one of such designated offshore securities markets since the business combination and is currently in compliance with the obligations arising from such listing.

D. The rights in connection with the transaction granted to offerees that are U.S. holders shall be granted upon terms and conditions not less favorable than those extended to any other holder of the same class of securities. The securities offered or sold upon exercise of rights granted to offerees that are U.S. holders may not be registered on this Form if such rights are transferable other than in accordance with Regulation S under the Securities Act.

Instruction

For purposes of this Form, the term "U.S. holder" shall mean any person whose address appears on the records of the

VOL 56 ISS 115 JE 14 1991 UMI

Registrant, any voting trustee, any depositary share transfer agent or any person acting on behalf of the Registrant for such securities as being located in the United States. "United States" means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

E. This Form may not be used if the Registrant is an investment company registered or required to be registered under the Investment Company Act.

II. Application of General Rules and Regulations

A. The Rules comprising Regulation C under the Securities Act shall not apply to filings on this Form unless specifically referred to in this Form or unless any such Rule refers specifically to this Form. Instead, the rules and regulations applicable in the home jurisdiction regarding form and method of preparation of disclosure documents shall apply to filings on this Form. Securities Act rules and regulations other than Regulation C apply to filings on this Form unless specifically excluded in this Form.

Instruction

For purposes of this Form, the term "home jurisdiction" shall mean the jurisdiction of the issuer's organization or incorporation, unless the primary market for the securities being registered is some other country, in which case such country where the primary market for the securities being registered is located shall be deemed to be the "home jurisdiction." The "primary market" is the single securities market with the largest aggregate trading volume for the class of the issuer's securities with regard to which the rights are being offered in the shorter of the issuer's prior fiscal year or the period since the issuer's incorporation.

B. Rule 408 under the Securities Act, which provides that in addition to the information expressly required to be included in the registration statement, there shall be added such further material information, if any, as may be necessary to make the required statements, in light of the circumstances under which they are made, not misleading, shall apply to filings on this Form.

C. Rule 415 under the Securities Act, which permits the registration of certain securities to be offered on a delayed or continuous basis, shall apply to filings on this Form. Attention is directed to Section 10(a)(3) of the Securities Act which provides that when a prospectus is used more than nine months after the effective date of the registration statement, the information contained therein shall be as of a date not more than sixteen months prior to such use so far as such information is known to the user of such prospectus or can be furnished by such user without unreasonable effort or expense. With regard to any such prospectus used more than nine months after the effective date of the registration statement, Rule 427 under the Securities Act, which permits the omission from the prospectus of information previously required to be contained in the prospectus insofar as later information covering the same subjects is contained therein, shall apply to filings on this Form.

D. Five copies of the complete registration statement and any amendments thereto, including exhibits and all other papers and documents filed as a part of the registration statement or amendment thereto, shall be filed with the Commission at its principal office. Each copy shall be bound, stapled or otherwise compiled in one or more parts, without stiff covers. The binding shall be made on the side or stitching margin in such manner as to leave the reading matter legible. Three additional copies of the registration statement and any amendments thereto, similarly bound, also shall be filed. No exhibits are required to accompany such additional copies.

E. At least one copy of every registration statement and any amendment thereto shall be signed manually by the persons specified herein. Unsigned copies shall be conformed.

F. At the time of filing this registration statement, the Registrant shall pay to the Commission, in accordance with Rule 111 under the Securities Act, a fee in U.S. dollars in the amount prescribed by Section 6 of the Securities Act. The amount of securities to be registered on this Form need not exceed the amount to be offered in the United States as part of the offering.

The registration fee is to be calculated at the price at which the rights may be exercised if known at the time of filing the registration statement, or, if not known, at the market value of outstanding securities of the same class included in the registration statement. If the fee is to be calculated upon the basis of the price at which the rights may be exercised and they are exercisable over a period of time at progressively higher prices, the fee shall be calculated on the basis of the highest price at which they may be exercised.

Instruction

The market value of the Registrant's outstanding securities shall be the average of the high and low prices reported or the average of the bid and asked price of such securities, in the principal market for such securities as of a date within 30 days prior to the date of filing.

G. If any part of the prospectus is in a language other than English, it shall be accompanied by a translation in the English language. If any other part of the registration statement or any amendment thereto, or any exhibit or other paper or document filed as part of the registration statement or amendment, is in a language other than English, it shall be accompanied by a substantive summary, version or translation in the English language.

H. One manually signed original of the registration statement or any amendment thereto shall be numbered sequentially (in addition to any internal numbering which otherwise may be present) by handwritten, typed, printed or other legible form of notation from the first page of such document through the last page of such document, including any exhibits or attachments thereto. Further, the total number of pages contained in such numbered original shall be set forth on the first page of the document.

I. A registration statement on this Form and any amendments thereto shall become effective upon filing in accordance with Rule 466. As provided in Rule 473(d), delaying amendments are not permitted in connection with any registration statement on this Form, and any attempt to interpose a delaying amendment of any kind will be ineffective.

J. Any amendment to a registration statement on this Form shall be filed under cover of an appropriate facing sheet, shall be numbered consecutively in the order in which filed, and shall indicate on the facing sheet the applicable registration form on which the amendment is prepared and the file number of the registration statement.

If, however, an amendment to the home jurisdiction document(s) is filed after effectiveness of this registration statement that increases the number of securities that may be sold, in lieu of filing a post-effective amendment hereto, a new registration statement shall be filed on this Form. As provided in Rule 429, the prospectus included in the new registration statement shall be deemed to include a prospectus covering unsold securities registered previously. If this is the case, the following legend shall appear at the bottom of the facing page of the registration statement: "Pursuant to Rule 429 under the Securities Act, the prospectus contained in this registration statement relates to registration statement[s] 33-[insert file numbers of previous registration statements]."

K. Any change to the name or address of a Registrant's agent for service shall be communicated promptly in writing to the Commission, referencing the file number of the relevant registration statement.

III. Compliance With Exchange Act and Auditor Independence & Reporting Requirements

A. Pursuant to Rule 12h–5 under the Exchange Act, a Registrant shall be exempt from reporting obligations under Section 15(d) of the Exchange Act if such reporting obligations would have arisen solely from registration of securities on this Form. The Registrant's attention is directed, however, towards other provisions of the Exchange Act that may be applicable, and specifically to the provisions of Sections 12(b) and 12(g) of the Exchange Act and Rules 10b–8, 10b–7 and 10b–6 under the Exchange Act. *See* Exchange Act Release No.

B. The Commission's rules on auditor independence, as codified in Section 600 of the Codification of Financial Reporting Policies, shall not apply to auditor reports on all financial statements that are included in this registration statement under the Securities Act filed by the issuer on Form F–12.

PART I—INFORMATION REQUIRED TO BE SENT TO SHAREHOLDERS

Item 1. Home Jurisdiction Document

The prospectus shall consist of the entire disclosure document or documents used to offer the rights and underlying securities to offerees in the home jurisdiction of the Registrant including, where applicable, the rules of any stock exchange in such jurisdiction upon which the Registrant has any class of securities listed or has applied for such listing. Such disclosure document(s)

shall include all information used to make such offers, without regard to whether such information has previously been provided to shareholders. Except as noted hereinafter, such offering circular or prospectus shall be prepared in accordance with the disclosure requirements of such jurisdiction as interpreted and applied by the securities commission or other securities regulatory authority in such jurisdiction.

The prospectus used in the United States shall contain additional information and legends required by this Form. It need not include any documents incorporated by reference into home jurisdiction disclosure documents and not required to be delivered to securityholders pursuant to the laws of such jurisdiction.

Notwithstanding the foregoing, the prospectus used in the United States need not contain any disclosure applicable solely to offerees or purchasers outside the United States that would not be material to offerees or purchasers in the United States, including, without limitation, (i) any non-U.S. legends; (ii) any discussion of tax considerations other than those material to U.S. offerees or purchasers; (iii) the names of any underwriters not acting as underwriters in the United States or a description of the non-U.S. plan of distribution (except to the extent necessary to describe the material facts of the U.S. plan of distribution); (iv) any description of offerees' or purchasers' statutory rights under applicable non-U.S. securities legislation (except to the extent such rights are available to U.S. offerees or purchasers); or (v) certificates of the issuer or any underwriter.

Item 2. Informational Legends

The following legends, to the extent applicable, shall appear on the outside front cover page of the prospectus (or on a sticker thereto) in bold-face roman type at least as high as ten-point modern type and at least two points leaded:

This offering is made by a foreign issuer that is permitted to prepare this prospectus in accordance with the disclosure requirements of its home jurisdiction. Prospective investors should be aware that such requirements are different from those of the United States. Financial statements included or incorporated herein, if any, have been prepared in accordance with foreign generally accepted accounting principles, and are subject to foreign auditing and auditor independence standards, and thus may not be comparable to financial statements of United States companies.

Prospective investors should be aware that the acquisition of the securities described herein may have tax consequences both in the United States and in the Registrant's jurisdiction of incorporation. Such consequences for investors who are resident in, or citizens of, the United States may not be described fully herein.

The enforcement by investors of civil liabilities under the federal securities laws may be affected adversely by the fact that the Registrant is incorporated or organized under the laws of a foreign country, that some or all of its officers and directors may be residents of a foreign country, that some or all of the underwriters or experts named in the registration statement may be residents of a foreign country, and that all or a substantial portion of the assets of the Registrant and said persons may be located outside the United States.

THESE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION NOR HAS THE COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The Registrant should also include in the prospectus any legend or information required by the laws of any jurisdiction in which the securities are to be offered.

Item 3. Incorporation of Certain Information by Reference

Information called for by this Form, including exhibits, may be incorporated by reference at the Registrant's option from documents that the Registrant has filed previously with the Commission pursuant to Section 13(a) or 15(d) of the Exchange Act or submitted to the Commission pursuant to Rule 12g3–2(b) under the Exchange Act. Any such incorporation by reference shall be done in accordance with Rule 24 of the Commission's Rules of Practice.

Item 4. List of Documents Filed With the Commission

There shall be set forth in or attached to the prospectus a list of all documents filed with the Commission as part of the registration statement and all documents incorporated by reference into the registration statement.

PART II—INFORMATION NOT REQUIRED TO BE SENT TO SHAREHOLDERS

The exhibits specified below shall be filed as part of the registration statement. Exhibits shall be appropriately lettered or numbered for convenient reference.

(1) Any reports or information that, in accordance with the requirements of the home jurisdiction of the Registrant, must be made publicly available in connection with the transaction.

(2) Copies of any documents incorporated by reference into the registration statement and any publicly available documents filed with any home jurisdiction regulatory authority concurrently with the prospectus.

(3) If any name is signed to the registration statement or amendment pursuant to a power of attorney, manually signed copies of such power of attorney and, if the name of any officer signing on behalf of the Registrant is signed pursuant to a power of attorney, certified copies of a resolution of the Registrant's board of directors or similar governing body authorizing such signature.

Signatures

Pursuant to the requirements of the Securities Act, the Registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form F–11 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of_____, Country of_____, on_____.

Registrant _____

By (Signature and Title) _____

Pursuant to the requirements of the Securities Act, this registration statement has been signed by the following persons in the capacities and on the dates indicated.

(Signature) _____

(Name and Title) _____

(Date) _____

Instructions

A. The registration statement shall be signed by the Registrant, its principal executive officer or officers, its principal financial officer, its comptroller or principal accounting officer, at least a majority of the board of directors or persons performing similar functions and its authorized representative in the United States. Where the Registrant is a limited partnership, the registration statement shall be signed by a majority of the board of directors of any corporate general partner signing the registration statement.

B. The name of each person who signs the registration statement shall be typed or printed beneath his signature. Any person who occupies more than one of the specified positions shall indicate each capacity in which the registration statement is signed.

Appendix B—Securities and Exchange Commission Regulatory Flexibility Act Certification

I, Richard C. Breeden, Chairman of the Securities and Exchange Commission (the "Commission"), hereby certify pursuant to 5 U.S.C. 605(b) that: Proposed Form F–11 under the Securities Act of 1933 (the "Securities Act"); proposed Rules 441, 466 and 801, proposed changes to Rules 174, 404 and 473, and proposed changes to Forms F–2 and F–3 under the Securities Act; and proposed Rule 12h–5 under the Securities Exchange Act of 1934 (the "Exchange Act"), if promulgated, will not have a significant economic impact on a substantial number of small entities. The reasons for this certification are as follows:

The proposed rules and form and proposed changes to existing rules noted above are intended primarily to facilitate cross-border rights offerings of equity securities by eligible foreign private issuers to their existing U.S. shareholders. The resulting reduction in the expense, time and effort of making such offerings will benefit foreign entities that issue securities, rather than U.S. entities. In connection with the cross-border rights offering proposal, the Commission also is proposing revisions to Form F–2 and Form F–3 to extend the availability of Form F–3 to a broader class of reporting foreign issuers for registration of rights offerings and certain other specified transactions under the Securities Act. Such revisions also would benefit foreign entities registering securities and reporting with the Commission, rather than U.S. entities.

An expected result of adoption of the proposed rules and form and proposed changes to existing rules is that offerings by foreign companies would be made in the

1991
UMI

United States in situations where hitherto investors in the United States would have been excluded due to the time and expense of compliance with the regulatory requirements of more than one jurisdiction. The resulting increase in exempt and registered rights offerings in the United States by foreign issuers can be expected to increase ease of investment for small U.S. entities acting as investors. Small U.S. entities are not more likely than large U.S. entities, however, to be affected by the greater ease of investment in offerings of foreign issuers. These effects, in any case, are not expected to be significant for a substantial number of small entities in the United States. Since U.S. holdings in foreign securities are relatively small, the likelihood of such increased offerings in the U.S. significantly affecting a substantial number of small U.S. entities is minimized.

The proposed new rules and form and the proposed amendments to rules and forms are summarized in the attached memorandum.[1] That their primary effect is on foreign entities is apparent from such document.

Dated: June 4, 1991.

Richard C. Breeden,

Chairman.

[1] Note: The above-referenced memorandum is not included in this release.

International Tender and Exchange Offers

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules, forms, and order.

SUMMARY: The Securities and Exchange Commission (the "Commission") is publishing for comment proposed tender offer exemptive rules and registration procedures under the Securities Act of 1933,[1] the Securities Exchange Act of 1934,[2] and the Trust Indenture Act of 1939,[3] intended to facilitate the inclusion of United States investors in tender offers and exchange offers for a foreign target company's securities. The proposals would permit offers to be made to United States investors in compliance with foreign law and regulation, where the holdings by United States investors of the securities sought in the bid do not exceed a specified ceiling.

[1] 15 U.S.C. 77a *et seq.*

[2] 15 U.S.C. 78a *et seq.*

[3] 15 U.S.C. 77aaa *et seq.*

The release also proposes for comment procedures to be made available for tender offers and exchange offers for United Kingdom companies to allow for compliance with both the Williams Act [4] and the City Code on Takeovers and Mergers ("City Code").[5]

And finally, the Commission is announcing proposed technical amendments to its general organization rule which delegates authority to the Directors of the Divisions of Corporation Finance and Market Regulation.[6] The amendments would permit the Directors to exempt tender offers from certain provisions of the Williams Act requirements.

DATES: Comments should be received on or before September 9, 1991.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7-18-91. All comment letters will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: John C. Maguire, Office of Tender Offers, Division of Corporation Finance, at (202) 272-3097; For questions on Rules 10b-6, 10b-7, 10b-13 and Rule 13e-4 under the Exchange Act contact George E. Scargle, Office of Legal Policy and Trading Practices, Division of Market Regulation, at (202) 272-2848, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment:

(1) Proposed Form F-12 under the Securities Act of 1933;

(2) Proposed Form 13E4H, and Form 14D1C under the Securities Exchange Act;

(3) Proposed Rules 440, 469, and 802, and proposed changes to Rules 174, 464, 473 under the Securities Act;

(4) Proposed Rule 12h-4, and proposed changes to Rules 12g3-2(b), 13e-4 and 14d-1 under the Securities Exchange Act;

(5) Proposed changes to Rules 30-1 and 30-3 under the Commission's rules of practice; and

(6) Proposed Rule 4d-10 under the Trust Indenture Act of 1939.

I. Executive Summary

A. Background

On June 6, 1990, the Commission issued a concept release [7] addressing the conduct of tender and exchange offers in the context of the growing internationalization of the world's securities markets. The Concept Release was issued in recognition of the general practice of foreign bidders and issuers to seek to exclude U.S. investors from a multinational offer, where U.S. investors comprise a small portion of a foreign target company's security holdings, based upon a determination that the cost of compliance with U.S. securities laws and regulations outweighs the benefit of U.S. security holder participation. In the case of exchange offers, foreign issuers often are unwilling to register securities with the

[7] Concept Release on Multinational Tender and Exchange Offers, Securities Exchange Act Release No. 28003 (June 6, 1990) (55 FR 23731) (hereinafter "Concept Release").

Commission under the Securities Act of 1933 ("Securities Act") [8] and incur a continuous reporting obligation under the Securities Exchange Act of 1934 ("Exchange Act").[9] When excluded from participation in a tender or exchange offer, U.S. holders are denied the opportunity to receive a significant premium for their shares or participate in what may be an attractive investment opportunity.

Securities markets around the world have become increasingly global as U.S. investors have increased their holdings in foreign securities and foreign issuers have expanded their use of the U.S. capital markets. Currently, approximately 425 foreign issuers, representing 30 countries, have securities traded on an exchange in the United States or on NASDAQ and approximately 1,100 issuers, representing 25 foreign countries,[10] furnish information to the Commission pursuant to Rule 12g3-2(b).[11] In addition, U.S. investors purchased an estimated $130.9 billion in foreign equities in 1990, up from $10.4 billion in 1980.[12]

The evolution of an increasingly international marketplace has resulted in tender and exchange offers being made across national boundaries to holders resident in several countries.[13] This trend also has been accelerated by the prospect of a unified European market in 1992, where a significant number of cross border acquisitions have occurred in recent years.[14] A significant amount of this activity has been centered in the United Kingdom; over 35% of all cross border purchases in 1990 by European Community companies emanated from the United Kingdom.[15] In the United Kingdom itself, 239 takeovers were commenced in 1990 for U.K. companies subject to the City Code on Take-overs and Mergers ("City Code").[16] Although data on the percentage of target company shares held by U.S. investors generally is not available,[17] these acquisitions routinely have excluded shareholders resident in the United States where their holdings were not necessary for the success of the offering.[18]

In light of the increasing U.S. ownership of foreign securities and the likelihood of significant acquisition activity with respect to securities of foreign issuers in the future through mergers, tender offers, and exchange offers, the practice of excluding U.S. holders is expected to have an increasingly significant effect both in terms of the number of U.S. investors affected and the potential number of transactions involved. Despite their exclusion, U.S. investors are directly affected by these transactions, since they generally will be forced to sell into the market, incurring significant transaction costs not associated with the tender or exchange offer, or relegated to minority shareholder status with significantly less liquidity and subject to the possibility of being cashed out in a subsequent "freeze-out" merger.

The Commission's Concept Release posed the fundamental question of whether U.S. investors' interests would be better served by insisting upon compliance with U.S. regulations for all offers extended into this country, resulting in the continued exclusion of U.S. security holders from tender and exchange offers, or facilitating the participation of U.S. investors on equal terms with foreign security holders, with the protections afforded by the target company's regulatory scheme and U.S. antifraud provisions. Commenters overwhelmingly endorsed the view that U.S. investors would be better served by their inclusion in the offer, even where they have to rely on a foreign regulatory scheme.[19]

B. Summary of Proposals

The rules proposed today would permit tender offers for a foreign issuer's securities, whether subject to section 12 of the Exchange Act [20] or subject only to section 14(e) [21] and Regulation 14E of the Exchange Act,[22] to proceed in the U.S. on the basis of the applicable regulation of the target company's home jurisdiction,[23] where a small percentage of the shares sought are held of record by United States holders. Under the new procedures, offers eligible for the proposed exemptions would not be subject to the disclosure, filing, dissemination and minimum offering period requirements, proration and withdrawal rights, and other requirements of Rule 13e-4 and Regulations 14D or Regulation 14E,[24] other than Rule 14e-3 insider trading prohibitions.

The conditions for reliance on the proposed rules would be (1) that 10 percent or less of the class of securities sought in the tender offer are held by U.S. holders other than U.S. holders of more than 10 percent of the subject class; [25] (2) in the case of a class of securities otherwise subject to Rule 13e-4 or Regulation 14D, that an English language translation of the offering materials, be submitted to, not filed with, the Commission; (3) that U.S. securityholders are permitted to participate in the offer on terms not less favorable than those offered any other holders of the same class of securities sought in the offer; and (4) that

[25] In a companion release (hereinafter "Foreign Disclosure Release"), the Commission is proposing amendments to its disclosure system to require foreign issuers to disclose the percentage of each class of securities held of record by U.S. residents in certain documents filed or submitted to the Commission. These amendments are intended to facilitate the ability of third-parties or issuers, contemplating a tender or exchange offer, to ascertain whether compliance with the Williams Act will be required. As part of the revision, the Commission is proposing new forms to facilitate processing of materials furnished to the Commission pursuant to Rule 12g3-2(b), which will require the yearly disclosure of the percentage of each class of securities held by U.S. residents.

dissemination of the tender offer, if required by the home jurisdiction, is provided to U.S. securityholders on a comparable basis as provided to securityholders in the foreign target company's home jurisdiction. The procedures would be equally applicable to Regulation 14D and Regulation 14E offers, except those offers that would otherwise be subject solely to section 14(e) and Regulation 14E, in which case no disclosure document would be submitted to the Commission, since a filing in such offers is not currently required.

With respect to the registration of exchange offers for a foreign issuer's securities under the Securities Act, the Commission is proposing two procedures. The first, proposed Rule 802, an exemptive rule under section 3(b) of the Securities Act,[25] would permit an exchange offer to proceed in the United States without registration so long as the aggregate dollar value of the securities offered for exchange in the United States is $5 million or less. Debt securities issued pursuant to this exemption would be exempt from the requirements of the Trust Indenture Act of 1939 ("Trust Indenture Act").[27] And second, registration under the Securities Act on the basis of the disclosure documents prepared in accordance with the registration requirements of the foreign target company's home jurisdiction would be provided under cover of proposed Form F-12.[28] Proposed Form F-12 would be available if five percent or less of the foreign target's securities prior to the exchange offer were held by U.S. holders other than by U.S. holders of more than 10 percent of the subject class and certain other conditions with respect to the offeror were met. These conditions include the requirement that an offeror (whether a third-party bidder or issuer) is a foreign private issuer, has made an initial submission pursuant to Rule 12g3-2(b) of the Exchange Act on or before the filing of the Form F-12, has a class of equity securities listed or traded on a "designated offshore securities market" [29] for the 36 months immediately preceding the offering, and is currently in compliance with the applicable listing and reporting requirements of the designated offshore securities market at the time of the exchange offer, or alternatively, has a 36 month operating history and a public float of $75 million. Proposed Form F-12 also would be available for the registration of securities to be issued in a merger, arrangement or other similar business combination.

The rules, forms and order proposed today would permit single-jurisdiction regulation with respect to both the tender offer and registration requirements, so that multijurisdictional cash tender offers, exchange offers and business combinations may be made more efficiently and at less expense. The regulatory authorities of the target company's jurisdiction would be responsible for establishing the applicable disclosure standards for any of the above offers. As a general rule, the Commission would not expect the documents submitted or filed with the Commission to be reviewed by the staff; such review, if any, would be left to the foreign target company's jurisdiction.

With respect to continuous disclosure requirements under the Exchange Act, any obligation arising under section 15(d) of the Exchange Act [30] as a result of the registration of securities on proposed Form F-12 would be suspended. Moreover, the registration of securities on proposed Form F-12 would not disqualify a foreign private issuer from maintaining its exemption under Rule 12g3-2(b) from the registration requirements of section 12(g) of the Exchange Act following the exchange offer.[31] However, an offeror desiring to use Form F-12 would be required to make an initial submission, pursuant to Rule 12g3-2(b) of the Exchange Act, on or before the offeror files the Form F-12 [32] if the offeror has not previously filed or furnished information to the Commission.[33]

The Commission is currently working with the North American Securities Administrators Association, Inc. ("NASAA") to determine whether existing state blue sky exemptions would accommodate the rules proposed today, or whether a new exemption under the Uniform Securities Act, necessitating adoption by the states, would be required. The usefulness of proposed Rule 802, as well as the proposed registration procedures, depends in large degree on a parallel exemption being implemented by the states, and acceptance of filings on Form F-12 in satisfaction of state registration requirements.

As proposed, the tender offer exemptive rules, Rule 802 and Form F-12 would not be available for the securities issued by an investment company that is registered or required to be registered under the Investment Company Act of 1940.[34]

The Commission also is proposing to formalize the accommodations arrived at with the United Kingdom's Panel on Take-overs and Mergers to permit tender offers for securities of a U.K. chartered company that is a foreign private issuer to be conducted pursuant to the requirements of both the Williams Act and the City Code. The proposed exemptive order would allow these offers to be conducted simultaneously in the United States and the United Kingdom without the need for case-by-case relief from certain provisions of the Williams Act as currently has been the practice. The offering circular would be prepared according to the requirements of the City Code and would be filed with the Commission and incorporated by reference to satisfy the requirements of Schedules 14D-1 and 14D-9,[35] thus allowing bidders for a United Kingdom company, subject to the City Code, to conduct the tender offer in the United States in accordance with the Commission's tender offer rules on the basis of the U.K. offering document. However, no provision beyond that provided for all foreign exchange offers is being proposed at this time for the registration of exchange offers for U.K. chartered companies.

Finally, the Commission is proposing a technical amendment to its general organization rule which delegates to the Directors of the Divisions of Corporation Finance and Market Regulation the authority to exempt tender offers from complying with certain provisions of the Williams Act. The Commission has previously delegated to these Directors the authority to grant relief from the all-holders requirement and the best price provision pursuant to Rule 14d-10(e) and Rule 13e-4(h)(7).[36] In addition, the Director of the Division of Market Regulation has the broad authority under Rule 13e-4(g)(7) to grant exemptions for certain issuer tender offers, either unconditionally, or on specified terms and conditions, as not constituting a fraudulent, deceptive or manipulative act or practice, which

authority has not been delegated to the Division of Corporation Finance. The action taken today is consistent with existing procedure and will facilitate the timely disposition of requests for exemptions from these provisions prior to the commencement of a tender offer.

II. Tender Offers

A. Tender Offer Regulation

As outlined above, third-party and issuer tender offers for a foreign private issuer [37] whose securities are held almost entirely outside the United States would be made in the United States in compliance with the tender offer regulation of the foreign target company's home jurisdiction. Such predominately foreign tender offers would be permitted to be made in the United States on the basis of the procedural requirements and documentation mandated by the foreign target's home jurisdiction. The steps taken today are intended to encourage bidders and issuers to extend such offers to all target company shareholders, including U.S. securityholders.[38]

The controlling regulations would be those of the foreign target company's home jurisdiction, as the likely jurisdiction with the center of gravity of the bid including the place of significant shareholdings, and the jurisdiction whose regulatory scheme will more likely than not apply. Home jurisdiction is defined in the proposals to mean the jurisdiction of incorporation, organization or chartering of the foreign target company.[39] For example, if a company incorporated in France made an offer for all outstanding ordinary shares of a company chartered in the United Kingdom, with a small percentage of the U.K. company's shares held in the United States, the offering documents generally would be those prescribed by the City Code, both with respect to the tender offer procedures and disclosure, and with respect to the prospectus requirements in a registered exchange offer, as discussed below.[40]

However, more than a single country, as well as states or provinces within a country, may assert jurisdiction over an offer, depending on the location of investors and/or the principal trading market, as well as the target's business operations and executive management.[41] In those instances where more than one jurisdiction asserts authority over an offer, because of significant securityholdings within that country or as a result of business activities or assets within that country, the equal treatment provisions of the proposed exemptions and form requirements would mandate that U.S. securityholders receive the benefits of any additional protections or disclosures made available to non-U.S. securityholders. If the bidder or issuer does not wish to extend those additional protections or disclosures to securityholders outside the jurisdiction mandating the additional protections or disclosures, and thus extends the offer on different terms and conditions to holders in different jurisdictions, the bidder or issuer would have to seek relief from the equal treatment requirements and the Commission would determine on a case-by-case basis which set of procedures should apply to U.S. holders in order for the transaction to proceed in the United States.[42] The Commission requests comment on the appropriateness of relying on the foreign target company's home jurisdiction to regulate not only the tender offer procedures and disclosures, but also the prospectus requirements in a registered exchange offer.

Pursuant to amendments to Rule 14d-1 and Rule 13e-4 [43] proposed today, a third-party or issuer tender offer for a class of securities of a foreign target company would be exempt from the procedural and disclosure requirements of the Williams Act if (1) U.S. holders, other than U.S. holders of more than 10 percent of the subject class, hold 10 percent or less of the class of securities sought in the tender offer; (2) except in the case of offers that would otherwise only be subject to section 14(e) of the Exchange Act, an English language translation of the offering materials, either published in the United States or delivered to U.S. investors in accordance with foreign regulatory requirements is submitted to (not filed with) the Commission; (3) U.S. holders are permitted to participate in the offer on terms not less favorable than those offered any other holder of the same class of securities; and (4) dissemination of the tender offer, if required by the home jurisdiction, is provided to U.S. securityholders on a comparable basis as provided to securityholders in the foreign target company's home jurisdiction.

Under the proposal, the nationality of the bidder would not determine the availability of the rules with respect to the Williams Act requirements. Both U.S. and foreign bidders for a foreign target company would be eligible for the new procedures with regard to cash tender and exchange offers (including the proposed Rule 802 exemption from registration).[44] Although U.S. companies could not avoid the applicability of the Williams Act by excluding U.S. securityholders from a tender offer for a foreign target company, the potential regulatory inequality that could result if U.S. companies were required to comply with multiple regulatory schemes appears to outweigh the need to impose additional costs on United States bidders, particularly in instances of competing foreign and U.S. offers. The Commission requests comment on the appropriateness of permitting U.S. bidders to extend offers for foreign securities to U.S. investors in compliance with a foreign regulatory scheme.

Under the new procedures, offers eligible for the proposed exemptions would not be subject to the disclosure, filing, dissemination and minimum offering period requirements, proration and withdrawal rights, and other requirements of Rule 13e-4 and Regulation 14D or Regulation 14E,[45] other than Rule 14e-3 insider trading prohibitions. The procedures would be equally applicable to Regulation 14D and Regulation 14E offers, except that in offers that would otherwise be subject solely to section 14(e) and Regulation 14E, no disclosure document would be required to be submitted to the

[37] "Foreign Private Issuer" is defined in Rule 3b-4(c) under the Exchange Act and Rule 405 under the Securities Act [17 CFR 240.3b-4(c) and 230.405]. The terms foreign target company or foreign private issuer are used interchangeably throughout the release.

[38] With respect to rights offerings, which may be used by a bidder to raise funds to make an acquisition, the Commission is proposing, concurrently with this Release, rules that would facilitate the extension of rights offerings into the United States if certain tests were met. Cross-Border Rights Offers (hereinafter "Rights Offering Release").

[39] Proposed Rule 802(a)(4) [17 CFR 230.802(a)(4)].

[40] See *infra* Section III.C.

[41] Like the United States, Canada, Japan, and France regulate bids for foreign companies on the basis of domestic market interest or holdings. Most other jurisdictions only apply their takeover codes to offers for domestic companies, although some jurisdictions reserve the right to apply their regulation to offers for foreign chartered companies if the transaction is predominately domestic. See, *e.g.*, City Code Introduction 4 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), A-7 at 140,243.

[42] One significant factor that the Commission will consider in determining which jurisdiction's regulatory scheme should control is where the majority of securityholders are located.

[43] Proposed Rule 14d-1(c) (tender offers); proposed Rule 14e-1(c) (target company's response); and proposed Rule 13e-4(h) (issuer tender offers).

[44] This approach would not, however, govern the availability of proposed Form F-12. See Section III.C.2.

[45] 17 CFR 240.13e-4, 240.14d-1 through 240.14d-10 and 240.14e-1 through 240.14e-3.

VOL 56 ISS 115 JE 14 1991 UMI

Commission, since a filing in such offers is not currently required.

1. United States Ownership Ceiling

The proposal incorporates a 10 percent ceiling for U.S. ownership in light of a number of factors including, but not limited to, the stated purpose of encouraging foreign bidders to extend multinational tender offers to U.S. investors, the degree of U.S. interest warranting the full application of the protections of the federal securities laws, and a balancing of the benefits and costs of any proposed rules. The Commission requests comment on the ceiling to be used under the proposed rules and whether the percentage should be increased (*e.g.*, to 15 or 20 percent) or decreased (*e.g.*, to 7.5, 5 or 3 percent)? Comment is requested whether the ceiling on ownership in the United States should instead be subject to a limit on the dollar amount of securities to be purchased, or on the number of beneficial or record holders in the United States. Furthermore, the Commission requests comment on whether there should be two categories of bids, one with a higher ceiling (*e.g.*, 15 or 20 percent) for those offers that, either voluntarily or pursuant to the regulatory schemes of a foreign jurisdiction provide for prescribed disclosure, minimum offering periods, prorationing, and equal treatment of securityholders, and with whom the Commission has a comprehensive Memorandum of Understanding ("MOU") or other agreement providing for the exchange of information, including information relating to tender offers. Should there be a lower ceiling (*e.g.*, 7.5, 5 or 3 percent) for partial offers? Also, comment is requested whether there is a need to accommodate those transactions where the ability to avoid jurisdiction would be unlikely because U.S. securityholdings are necessary to the success of a transaction, and the offeror is subject to the all holders requirement of Rule 14d–10 under the Exchange Act.[46]

The Commission proposes to calculate the 10 percent ceiling by reference to securities held of record by U.S. holders, other than U.S. holders of more than 10 percent of the subject class of the issuer.[47] Comment is requested, however, on the appropriateness of excluding U.S. holdings of more than 10 percent from the calculation. In measuring the percentage of the class of securities held by U.S. holders, securities convertible into or exchangeable for securities of such class would not be included in the calculation under the proposal. Comment is requested as to the appropriateness of excluding these types of securities. American Depositary Receipts ("ADRs") exchangeable or convertible for such securities, however, would be included. Common stock or ordinary shares represented by ADRs would be included in both the numerator and the denominator in calculating the percentage of outstanding securities of the target class held in the United States, treating ADRs and ordinary shares as a single class held both in the United States and the foreign jurisdiction, as is currently the case.

The calculation of the percentage of the class of securities held by U.S. holders would be determined as of the foreign target company's latest fiscal year end. The Commission is concurrently proposing revisions to Regulation S–K,[48] Form 20–F [49] and Rule 12g3–2(b) [50] to require foreign private issuers using the above forms or rules to disclose on an annual basis the extent to which their equity securities are held by U.S. holders.[51] Therefore, a bidder seeking to acquire securities of a foreign target company that files or furnishes information to the Commission under one of the above rules or forms would be permitted to rely on the foreign target company's latest fiscal year end report, either on Form 10–K, Form 20–F, or proposed Form 12–FA,[52] or on the foreign target company's most recent filing under the Securities Act or initial submission on proposed Form 12–F [53] in determining the amount of securities held by U.S. securityholders. In addition, a third-party bidder or issuer, instituting a subsequent competing offer, will be permitted to use the same information as to U.S. securityholdings as the initial bidder or issuer in order to calculate the percentage of U.S. record ownership. In this manner, an offer commenced during the pendency of a competing offer being conducted pursuant to the proposed rules, would be permitted to take advantage of the rules, regardless of an interim filing of an annual report disclosing greater than 10 percent holdings in the United States.[54] However, the Commission requests comment on whether a more current time frame, such as the quarterly basis adopted in the multijurisdictional disclosure system with Canada,[55] should be used, taking note of the fact that most foreign companies are only subject to semi-annual reporting and may not have access to a current shareholder list on a quarterly basis.[56] Comment also is requested on whether bidders should be permitted to use the proposed rules even though disclosure with the Commission reflects greater than 10 percent U.S. ownership, if a bidder has a reasonable basis for believing that U.S. security holdings are below the ten percent threshold after excluding U.S. holders of more than 10 percent of the subject class.

Where the foreign target company is neither a reporting company under the Exchange Act nor has submitted reports pursuant to the exemption provided under Rule 12g3–2(b), the bidder or issuer may presume that the U.S. ownership does not exceed the ceiling amount, unless it has knowledge to the contrary. Comment is sought on the appropriateness of the proposed safe harbor.

2. Equal Treatment of U.S. Holders

To take advantage of the proposed rules, the offeror must extend its offer to all U.S. securityholders of the class of securities subject to the tender offer (including ADRs),[57] and U.S. securityholders must be permitted to participate in the tender offer on terms not less favorable than those offered any other holder of the same class of securities sought in the offer. If the bidder chooses to offer securityholders in a foreign jurisdiction one form of consideration and securityholders in another jurisdiction a different form of consideration, or an option to choose between alternative forms of consideration, U.S. holders must be provided an opportunity to choose from among each form of consideration offered. Appropriate adjustments would be permitted with respect to ADRs

[54] Under the multijurisdictional disclosure system with Canada ("MJDS") approved by the Commission on May 30, 1991, the calculation of U.S. record holders will be made as of the subject company's last fiscal quarter or, if the quarter ended within the last 60 days, as of the subject company's preceding quarter.

[55] *Id.*

[56] Those countries requiring semi-annual reporting include Australia, France, Germany, Italy, Japan, Luxembourg, Netherlands, Spain, and the United Kingdom.

[57] Proposed Rules 14d–1(c)(1) and 13e–4(h)(1) (17 CFR 240.14d–1(c)(1) and 240.13e–4(h)(1)).

representing a multiple or fraction of ordinary shares or other common stock that is the subject of the offer. Comment is sought on whether additional measures are necessary to ensure equal treatment of persons holding through ADR facilities rather than holding the ordinary or common shares directly. For example, should specific measures be adopted by the Commission to ensure that persons holding through an ADR facility receive offering materials and are provided the same opportunity and ability to participate in the offer as a person holding the ordinary or common stock?

An exception to the equal treatment requirement is being proposed to permit offerors conducting an exchange offer to offer securityholders in a particular state only cash, where after a good faith effort to register or qualify the offer, the sale of the securities is prohibited in that state under blue sky law provisions, so long as the cash consideration has previously been offered securityholders in any other jurisdiction. If cash is not being offered elsewhere, securityholders in that state may be excluded. Moreover, an offeror would not be required to extend an alternative consideration to securityholders in any other state. Should the good faith effort to register or qualify an offer an appropriate standard: Or should such an effort be required only with respect to those states that permit an offeror to register or qualify an offer by filing Form F–12? In addition, if the exchange offer in the United States were exempt from registration under the Securities Act pursuant to proposed Rule 802, the offeror would be permitted to offer cash only consideration to target company securityholders residing in any state that does not provide for a corresponding exemption so long as the cash consideration has previously been offered securityholders in any other jurisdiction. Again, if cash is not being offered to any holder, securityholders in that state may be excluded. Comment is requested whether the Commission should require that an offeror conducting an exchange offer at a minimum offer securityholders cash consideration for their securities rather than excluding completely securityholders in a particular state.

It is quite common in the United Kingdom for a bidder in a cash tender offer to extend a "loan note" option to the target company's securityholders, allowing target securityholders to receive a short-term note, which may be redeemed in whole or in part for cash at par on any interest date in the future, in lieu of receiving cash at the conclusion of the offer.[58] The loan note alternative permits a U.K. securityholder to receive, at the securityholder's option, the cash consideration over a delayed period, usually five years, thereby deferring any capital gain that may be applicable to the transaction until such time as the securityholder either redeems the notes or the company redeems the notes at expiration. The proposed rules would not require that a loan note alternative, or any other comparable tax deferral arrangement that may be permitted by another foreign country, be extended to U.S. securityholders. The Commission requests comment on whether, despite the fact that U.S. holders would not be entitled to receive the tax benefit associated with the loan note alternative or other comparable tax deferral arrangements, U.S. holders should be given the opportunity to receive the same consideration as residents of any other country, which in these instances would necessitate the filing of a registration statement in the United States, absent an exemption. Comment also is sought on whether there are circumstances or arrangements other than blue sky law registration and tax deferral arrangements that should be accorded an exception from the equal treatment requirement.

3. Dissemination and Disclosure

The rules provide that dissemination of the offer shall be in accordance with the requirements of the foreign target company's home jurisdiction, with two exceptions. First, any offering circular/document disseminated in the United States shall be in English. Second, where dissemination is required or permitted by publication, such publication shall also be in a United States newspaper of general circulation.[59]

As noted, the disclosure provided to U.S. securityholders generally would be governed by the requirements of the foreign target company's home jurisdiction. An offering circular disseminated or sent to U.S. securityholders nevertheless would be required to contain informational legends on the outside front cover page of the offering circular, or in any published notice, explaining that the offer is being conducted pursuant to the laws of the jurisdiction of the foreign target company and that certain rights of U.S. securityholders may be affected.[60]

Except in the case of registered exchange offers, offering materials would be required to be submitted to the Commission for notice purposes only under the cover of proposed Form 14D1C, for third-party offers, or proposed Form 13E4H, for issuer tender offers, unless the offer would otherwise only be subject to Regulation 14E, which does not impose a filing obligation. The materials submitted would not be deemed filed with the Commission and an offeror would not be subject to liability under Section 18 of the Exchange Act.[61]

A number of commenters responding to the Concept Release expressed concern that antifraud provisions of the Exchange Act would continue to apply to these transactions. However, the antifraud rules relating to insider trading, and other kinds of fraudulent and manipulative conduct,[62] would be the only substantive antifraud provisions applicable to these types of transactions. These provisions should not serve to inhibit an offeror from including U.S. securityholders in the tender offer. Even if the offering circular were not disseminated in the United States, a foreign bidder generally would be liable for fraud, not only in the foreign target company's home jurisdiction,[63] but in the United States as well, given the foreseeable effect of the fraud in the United States.

In the case of tender offers that would have a "going private" effect, the issuer and any affiliated bidder would be

[58] "Loan notes" generally are unsecured short-term debt obligations, which are guaranteed as to principal and interest by a bank and permit the holder to require all or any part of the principal amount of the loan notes to be repaid at par together with any accrued interest on any interest payment date. Under U.K. tax laws, a securityholder who does not own more than five percent of the outstanding shares of the target company will not be treated as having made a disposition thereby incurring a capital gains tax to the extent the securityholder receives loan notes. A U.S. securityholder, on the other hand, would be treated as having made a disposition under the Internal Revenue Code, since the securityholder would not be accorded special treatment under the installment sales method of income recognition. I.R.C. 453(k)(2)(A).

[59] See Rule 14d–4(b) (17 CFR 240.14d–4(b)) (guidance as to what constitutes adequate publication). In addition, the mailing of a copy of any advertisement that has been published in a foreign newspaper in compliance with foreign law, translated into English, to securityholders of record in the U.S. of the foreign target company would be considered adequate dissemination.

[60] See proposed Form 14D1C, Form 13E4H (17 CFR 240.14d–100 and 240.13e–102) and proposed Rule 802(d) (17 CFR 230.802(d)).

[61] 15 U.S.C. 78r.

[62] Section 14(e), section 10(b) of the Exchange Act (15 U.S.C. 78n(e) and 78j(b)), and Rules 14e–3 and 10b–5 thereunder (17 CFR 240.14e–3, 240.10b–5). Rules 14e–1, 14e–2 and 10b–13 (17 CFR 240.14e–1, 240.14e–2 and 240.10b–13) would not apply to these transactions.

[63] See letter of comment City of London Law Society (Sept. 28, 1990). The Law Society suggests that Rule 10b–5 "does not appear to apply a higher standard of liability than the UK regulatory system."

required to comply with Rule 13e–3 of the Exchange Act, if applicable.[64] Rule 13e–3 requires enhanced disclosure in going-private transactions engaged in by the issuer or an affiliate [65] and is designed to assist securityholders by providing them with information from the most knowledgeable sources regarding the terms of the transaction in relation to the business and prospects of the issuer.

The cash tender offer by Aktiebolaget Volvo ("Volvo"), a Swedish company with shares traded on NASDAQ, for Pharmacia Aktiebolag ("Pharmacia"), another Swedish company controlled by Volvo, illustrates the issues that may arise in applying Rule 13e–3 to tender offers involving foreign participants.[66] At the commencement of the offer, approximately 7.9 percent of the class of Pharmacia's securities sought in the offer were held in the United States, either directly or through American Depositary Receipts. Compliance by Volvo with Rule 13e–3 was necessary due to Volvo's affiliation with Pharmacia.[67] However, the disclosure required pursuant to Schedule 13E–3 reflected the substantially different obligations of affiliates under Swedish law; the Commission was advised that an affiliated transaction would not be subject to challenge under Swedish law solely on the basis of lack of fairness. Therefore, the Schedule 13E–3 disclosure regarding the Volvo board of director's consideration of the fairness of the transaction focused mainly on how the Volvo directors arrived at their determination to purchase the interests of the unaffiliated shareholders at the offering price.

No exception from the obligation to comply with Rule 13e–3 is being proposed; instead, the Commission will seek to accommodate significant problems created by going-private transactions on a case-by-case basis.[68] Comment, however, is solicited regarding whether the proposed exemptive rules should be expanded to encompass those provisions. Commenters should address the type of protections afforded unaffiliated shareholders in foreign countries in "going-private" or similar types of transactions that present conflicts of interests by an issuer or affiliate; whether these transactions in foreign countries are subject to the same or similar procedural and disclosure requirements that are currently provided by Rule 13e–3 and Schedule 13E–3; and, alternatively, what protections should apply if foreign countries have not developed the same or similar procedural and disclosure requirements applicable to these transactions?

III. Exchange Offers

A. Overview

As noted by the Commission in the Concept Release, and by many of the commenters who responded, exchange offers pose a much more difficult problem from a regulatory perspective than cash tender offers, since an exchange transaction involves the offer and sale of securities in the United States, thereby establishing a continuing presence of the offering person in the United States capital markets. On the other hand, the need for regulatory accommodations may be more acute with respect to exchange offers, since foreign bidders find the prospect of having to comply with the U.S. registration requirements and its attendant reporting obligation to be a particularly strong disincentive to extending an offer to U.S. investors.[69] Additionally, both the necessary preparation of a registration statement and the potential for Commission review create greater time pressure than in a cash tender offer and are more likely to be inconsistent with the foreign tender offer scheme. For first-time foreign issuers registering with the Commission, the amount of time and cost involved in complying with the Commission requirements, especially the reconciliation of financial statements to U.S. generally accepted accounting principles ("GAAP") is considerable, and foreign issuers often view such costs as disproportionate in comparison to the significance of the U.S. securityholders' interest in the transaction.[70]

The rules proposed today would implement a two-tier system to facilitate exchange offers for foreign securities made to U.S. securityholders. The rules and exemptions proposed would provide: (1) A registration exemption, proposed rule 802, pursuant to section 3(b) of the Securities Act, for the foreign issuer's securities offered in exchange for the foreign target company's securities, provided that the aggregate dollar amount of the securities being offered in the United States does not exceed $5 million; [71] or (2) registration on the basis of home country disclosure documents on proposed Form F–12, [72] if five percent or less of the foreign target company's securities prior to the exchange are held by U.S. residents and certain other eligibility standards with respect to the offeror are met. If neither of these alternatives are available to the bidder or issuer involved in the exchange offer, registration of the securities on another Commission form, such as Form S–4 or Form F–4, [73] or qualification for an exemption, such as section 3(a)(9) or section 4(2), [74] would be required.

Rule 802 and Form F–12, as proposed today, would not be available for any securities issued by an investment company that is registered, or is required to register, under the Investment Company Act of 1940. [75] However, the proposed rules would be available for the securities of a foreign issuer that is able to make a public offer of its securities in the United States in reliance on rule 6c–9 under that Act or

---

[64] Section 13(e) of the Exchange Act (15 U.S.C. 78m(e)) and Rule 13e–3 (17 CFR 240.13e–3). A Rule 13e–3 transaction is any transaction or series of transactions which has either a reasonable likelihood or purpose of causing directly or indirectly a class of equity securities of an issuer which is subject to section 12(g) or section 15(d) of the Exchange Act to be held of record by fewer than 300 persons, or causing a class of equity securities of the issuer to be no longer listed on an exchange or authorized to be quoted in an inter-dealer quotation system.

[65] An affiliate of an issuer is a person that directly or indirectly through one or more intermediaries controls, is controlled by, or is under common control with such issuer. See Rule 13e–3(a)(1) (17 CFR 240.13e–3(a)(1)).

[66] In the Matter of Aktiebolaget Volvo and Procordia Aktiebolag, Securities Exchange Act Release No. 27071 (February 2, 1990).

[67] Pharmacia was not required to comply with Rule 13e–3, since it did not negotiate, approve, recommend or otherwise engage in the tender offer for its shares. See Securities Exchange Act Release No. 17719, Question 5 [April 13, 1981], 3 Fed. Sec. L. Rep. (CCH) ¶17,345–38, *et seq.*

[68] In addition, bidders using the proposed rules and forms would not be relieved of their obligation to file a Schedule 13D that may arise should their beneficial ownership of a foreign target's equity securities registered with the Commission under section 12 of the Exchange Act, exceed five percent.

[74] 15 U.S.C. 77c(a)(9) and 77d(2).

[75] 15 U.S.C. 80a–1 *et seq.* Section 7(d) of the Investment Company Act of 1940 (15 U.S.C. 80a–7(d)) prohibits a foreign investment company from using the jurisdictional means to publicly offer its securities for sale in the United States unless the company receives an exemptive order permitting it to register under the Investment Company Act. Nothing in the proposed Rule 802 or proposed Form F–12 obviates a foreign investment company's obligation to apply for an exemptive order from the Commission under section 7(d) permitting it to register under the Investment Company Act if it makes a public offer of its securities in the United States.

an individual exemptive order.[76] These issuers may publicly offer securities of which they are the issuer in the United States without registering under the Investment Company Act, and reliance on the rules proposed today should not present any Investment Company Act concerns. Comment is requested by the Commission as to whether this approach regarding investment companies is appropriate. Comment is requested by the Commission as to the appropriateness of this restriction and whether closed-end funds should be eligible to use the proposed rule and form. Any comments regarding the appropriateness of this restriction should include empirical data regarding exchange offers for foreign issuers by U.S. or foreign companies that are registered or required to be registered under the Investment Company Act.

B. Proposed Rule 802

The proposed exemption would be available to any offeror (whether a third-party bidder or issuer) regardless of whether the offeror is a U.S. company or a foreign private issuer. Furthermore, the proposed rule would not limit the type of securities that may be offered in the transaction. To encourage the extension of exchange offers to U.S. shareholders, which normally would not be extended due to the minimal dollar amount involved, no offeror or security eligibility standards are required for proposed Rule 802. Comment is requested on the necessity for offeror eligibility requirements, e.g., based on size, exchange listing or availability of information on a periodic basis. The Commission also seeks comment on whether issuer exchange offers should be treated less restrictively, on the basis that securityholders have made a pre-existing investment decision with respect to the issuer. In addition, comment is requested on the appropriateness of extending proposed Rule 802 to U.S. offerors; would it be preferable simply to provide for registration using the full extent of incorporation by reference permitted by Form S–3,[77] with automatic effectiveness of the registration statement? Furthermore, comment is sought on whether any limitations should be placed on the type of security that may be offered under proposed Rule 802.

Securities issued in a proposed Rule 802 exchange offer or business combination would be unrestricted securities. Comment is requested on whether any resale restrictions should be imposed on the securities issued in the exchange offer or business combination pursuant to proposed Rule 802.

The proposed exemption from registration requires that U.S. securityholders be permitted to participate in the exchange offer on terms not less favorable than those offered any other holder of the same class of securities sought in the offer, except in those instances where a state's blue sky law does not provide for a comparable exemption, thereby requiring registration or qualification. In such cases, the offeror would be permitted to offer cash consideration, if such consideration is being offered to securityholders in any other jurisdiction as an alternative. If a cash alternative has not been offered elsewhere, the offeror may exclude securityholders resident in that state.[78] In addition, an offeror would not be required to extend an alternative consideration to securityholders in any other state.

Proposed Rule 802 defines "aggregate dollar amount" of the securities being offered to mean the total consideration the offeror proposes to issue upon exchange for securities held by U.S. holders, for a single class of securities, assuming that all securities of the class held in the United States are exchanged.[79] The value of securities being offered shall be based on the market value of the securities to be acquired by the offeror from U.S. holders in the exchange offer, calculated in accordance with Rule 457 under the Securities Act.[80] For purposes of calculating the aggregate dollar value, only the securities to be offered to U.S. securityholders in connection with the exchange offer need be included in the calculation. An exchange offer for another class of securities of the same target or of another company would be deemed a different offering, subject to its own $5 million ceiling. Comment is requested on the usefulness of the proposed exemption. Specifically, is the $5 million ceiling necessitated by section 3(b) of the Securities Act so low as to neutralize the exemption's usefulness by enough offerors to warrant the rulemaking effort on both the federal and state levels?

While the proposed exemptive rule would not require the filing, submission or furnishing of any offering materials to the Commission pursuant to the Securities Act, disclosure concerning the exchange offer will be submitted to the Commission under the tender offer provisions on proposed Form 14D1C or Form 13E4H if the security that is sought in the exchange offer is registered pursuant to section 12 of the Exchange Act. Moreover, in the case of reporting companies, information concerning the exchange offer is likely to be included in the company's periodic reports. Should a foreign offeror be required to make a submission under Rule 12g3–2(b) of the Exchange Act simultaneously with the commencement of the exchange offer? In the case of exchange offers subject only to Section 14(e) of the Exchange Act, where no requirement to submit information has been proposed, comment is requested whether a notice, similar to that required under Regulation D, should be required.[81]

As previously noted, the disclosure provided to U.S. securityholders would be governed by the requirements of the foreign target company's home country. However, any offering circular or notice disseminated or sent to U.S. securityholders, would be required to contain, to the extent applicable, informational legends on the outside front cover page of the offering circular, or in any published notice, explaining that the offer is being conducted pursuant to the laws of the jurisdiction of the foreign target company and that certain rights of U.S. securityholders may be affected.[82]

Under state blue sky laws, securities offered in exchange for securities held by the residents of a particular state, either must be registered under that state's filing and review procedures, or qualify for an exemption from the registration process. Currently, state blue sky laws generally will exempt securities that qualify for certain self-

---

[76] Rule 6c–9 (17 CFR 270.6c–9), adopted by the Commission in 1967, permits foreign banks and their finance subsidiaries to publicly offer and sell their debt securities and non-voting preferred stock in the United States without registering under the Investment Company Act or obtaining an individual exemptive order. The Commission has also issued a number of individual exemptive orders allowing public offerings in the United States of securities not covered by Rule 6c–9, e.g., equity securities issued by foreign banks and their finance subsidiaries, offerings by foreign insurance companies and their finance subsidiaries, and offerings by foreign bank and foreign insurance holding companies, among others. In August, 1990, the Commission proposed amendments to Rule 6c–9 that would expand the rule to include: (1) Equity securities issued by foreign banks and their finance subsidiaries, (2) all securities issued by foreign insurance companies and their finance subsidiaries, (3) all securities issued by foreign banks and foreign insurance holding companies, and (4) all securities issued by Canadian trust and loan companies. See Investment Company Act Release No. 17662 (Aug. 17, 1990) (55 FR 34560).

executing registration exemptions, such as an exemption for securities listed on a U.S. exchange [84] or NASDAQ/NMS designation.[84] The Commission has undertaken discussions with NASAA, to explore whether the applicable registration provisions of the various state blue sky laws would exempt an offer subject to proposed Rule 802 to shareholders resident in that state. The utility of the proposed approach will depend significantly on the states' efforts to provide comparable exemptions for such offerings.

C. Registration of Exchange Offers on the Basis of Foreign Disclosure Documents

Proposed Form F–12 would permit eligible offerors to register securities in the United States using documents prepared according to the disclosure and/or listing requirements of the foreign target company's home jurisdiction. An offeror that is not incorporated in the same jurisdiction as the foreign target company may nevertheless use its home country disclosure documents for purposes of proposed Form F–12, if the foreign target company's home jurisdiction permits the offeror to use such disclosure documents. As presently structured, proposed Form F–12 would only be available to foreign private issuers that are currently reporting companies or are furnishing information pursuant to Rule 12g3–2(b) or have made an initial submission pursuant to that rule on or before the filing of Form F–12.[85] An exchange offer may be registered on proposed Form F–12 so long as five percent or less of the outstanding class of securities sought in the exchange offer are held of record in the United States other than by U.S. holders of more than 10 percent of the subject class. To be eligible for Form F–12, U.S. securityholders must be permitted to participate in the exchange offer on terms not less favorable than those offered any other holders of the same class of securities sought in the offer. In addition, the proposed rules would permit the exchange of debt or equity securities to be registered on proposed Form F–12.[86]

Paralleling MJDS, the proposals have incorporated a listing and reporting history criteria for offerors to minimize the potential for abuse by insubstantial or start-up companies. The listing requirement also would have the benefit in many jurisdictions of insuring the continued availability of issuer information in the market place.

1. Ownership of Target Securities

The limitation on the use of proposed Form F–12 to register exchange offers involving a foreign target company to transactions where five percent or less of the target class is held by U.S. persons, rather than the 10 percent ceiling proposed with respect to the Williams Act exemptions, is based upon the more significant disclosure and investor protection questions presented in an exchange offer, and the proposed unlimited reliance on the foreign regulatory scheme. As proposed, Form F–12 would be available regardless of the foreign regulatory requirements applicable to these transactions. If the Commission took a more narrow approach, it would significantly curtail the efficacy of the proposal in facilitating the inclusion of U.S. securityholders in foreign exchange offers. Comment is requested whether the Commission should raise the ceiling for U.S. holdings (*e.g.*, 10–15%) for exchange offers made by bidders incorporated in, and listed on exchanges, in those jurisdictions with which the Commission has a comprehensive MOU or other agreement providing for the sharing of information, and where there are regulatory provisions governing exchange offers, i.e., British Columbia, France, Japan, Ontario, Quebec, and the United Kingdom. Comment also is sought on whether the calculation of the five percent level should be based on the subject company's securities held in the United States prior to the exchange offer or should be similar to that provided for business combinations which is based upon the amount of the offerors securities that will be held by U.S. holders upon the completion of the business combination.

Under the proposal, the calculation of the percentage of U.S. record ownership of the foreign target company would be determined on the same basis as under the tender offer proposals.

2. Offeror Qualifications

An offeror that seeks to register an exchange offer or business combination on proposed Form F–12 must have had a class of equity securities listed or quoted on a "designated offshore securities market" [87] for the 36 months immediately preceding the offering, and the offeror must be in compliance with the continuous reporting requirements of such market or supervisory authorities at the time of the exchange offer. The proposed rule provides an alternative to the 36 month listing history for newly listed companies with at least a 36 month operating history, and a public float of at least $75 million.[88] The Commission requests comment on the offeror eligibility criteria. Should there be a size test for all offerors? And, should a reporting history be required for all companies intending to use the proposed form?

The list of designated offshore securities markets currently includes 19 offshore exchanges and off exchange markets. The Commission understands that these exchanges and markets either impose a periodic disclosure obligation on companies whose securities are traded on the market or exchange, or such obligations are imposed by law because of listing or trading on the exchange or market. Rule 902(a) of Regulation S provides that the Commission may designate additional markets that have some or all of the attributes listed in Rule 902(a)(2),[89] including, among others, whether the market has an established operating history; is subject to oversight by a "foreign securities authority," as that term is defined in section 3(a)(50) of the Exchange Act;[90] and whether sufficient trading volume exists to indicate liquidity. Comment is requested whether, as future markets are designated under Rule 902(a)(2), only companies whose equity securities are listed on those markets that mandate disclosure and continuous reporting of information should be eligible to use proposed Form F–12.

Proposed Form F–12 would be available for registration for any class of securities provided the offeror has a class of equity securities listed or quoted on a designated offshore securities market. Comment is requested whether the form should be limited to that class of securities that is listed or quoted on the designated offshore securities market. Also, comment is requested regarding the appropriateness of using "designated offshore securities market" rather than incorporating the definition of "specified foreign securities market" recently proposed by the Commission in Rule 3b–10(f).[91] In addition, comment is sought with respect to whether the 36 month listing and reporting requirement should be changed to only a requirement for a 36 month reporting history with any securities commission or equivalent regulatory authority.

Proposed Form F–12 also would permit any foreign private issuer formed as a result of a merger, a business combination, a spinoff or a reorganization to tack on the listing history of its predecessors in satisfying the three-year listing requirement for use of the form, if it is unable on its own to satisfy the listing or reporting requirement imposed by the form.[92] Each significant predecessor, taken together with the surviving company, would be required to meet the listing and reporting requirements.[93]

3. Mechanics of Registering on Form F–12

Simultaneously with the earlier of public filing of the offering circular/prospectus with the home jurisdiction regulating the exchange offer or disseminating the offering materials to target securityholders, the offeror would file those documents, under cover of proposed Form F–12, with the Commission. Proposed Form F–12 is essentially a "wrap-around" form to be used for the registration of securities issued in an exchange offer. The form itself provides for, among other things, disclosure of the registrant's name and address, and that of its agent for service in the United States, and includes the foreign prospectus or offering circular, and a list of the exhibits filed with the Commission, including documents that may have been incorporated by reference from filings made in the foreign jurisdiction into the offering circular/prospectus. The proposed form also requires that the registrant add to the offering circular/prospectus that is distributed to U.S. holders, to the extent applicable, certain informational legends advising target securityholders that the investment may have tax consequences in the foreign jurisdiction, that U.S. securityholders may have to pursue legal remedies in a foreign jurisdiction, and that financial statements included in proposed Form F–12 have been prepared in accordance with foreign accounting standards and foreign auditing and auditor independence standards.[94]

Like Forms F–8 and F–80 under the MJDS, Form F–12 provides that the provisions of Regulation C of the Securities Act[95] shall not apply to exchange offers registered on the proposed Form, unless specifically referred to in the proposed Form. Proposed Form F–12 would specifically preserve the application of Rule 408 and addresses shelf offerings, incorporation by reference, English language requirements, and other matters covered by Regulation C.[96] In addition, Regulation C is itself being amended to address effective date, delaying amendments, and consent requirements with respect to Form F–12 filings. Comment is requested whether, unlike the MJDS which relies upon Canadian registration procedures and concepts, additional provisions of Regulation C should apply to exchange offers registered on proposed Form F–12, which is not based upon any comprehensive review of specific foreign regulatory schemes.

The proposal distinguishes between the documents required to be disseminated to target securityholders in the exchange offer and the documents to be filed with the Commission in order to register the securities. Offerors would be required to provide target securityholders resident in the United States with the same information (appropriately legended as specified) delivered abroad in the foreign target company's home jurisdiction, except that if the offering circular/prospectus delivered in the home jurisdiction is in a language other than English, an English translation of the offering circular/prospectus must be delivered to U.S. securityholders. Unlike the proposal governing cash tender offers, which does not require a document to be delivered to securityholders if not required by foreign law, the offering circular/prospectus would be required to be delivered to securityholders in accordance with section 5(b) of the Securities Act.[97] Rule 174 would, however, be amended to eliminate the requirement for aftermarket prospectus delivery.[98] Commenters are requested to address whether amendments to Rule 15c2–8 also would be appropriate in this respect.[99]

For purposes of section 5(b) of the Securities Act, the prospectus would consist of the entire disclosure document or documents used to make the exchange offer or business combination. The Commission understands that each of the designated offshore securities markets and/or jurisdictions in which they are located, currently impose a prospectus delivery requirement for registered offerings. Comment is requested whether the regulatory schemes and listing standards of the designated offshore markets, as well as market practice,

[84] Forty-eight U.S. jurisdictions have the exchange-listing exemption for New York Stock Exchange and American Stock Exchange listed securities. Use of the exemption is self-executing in forty-six of these jurisdictions with the other two requiring a filing in order to claim the exemption.

[84] Forty states currently have the equivalent exemption for NASDAQ/NMS designated securities.

[85] Foreign private issuer is defined in Rule 3b–4(c) of the Exchange Act (17 CFR 240.3b–4(c)) as any foreign issuer, unless it has more than 50 percent of the outstanding voting securities held of record either directly or through voting trust certificates or depositary receipts by residents of the United States, and either the majority of the executive officers or directors are United States citizens or residents, or more than 50 percent of the assets of the issuer are located in the United States, or the business of the issuer is administered principally in the United States. See also 17 CFR 230.405.

[86] See infra Section III.E. regarding the Trust Indenture Act of 1939.

[87] See Rule 902(a) of Regulation S (17 CFR 230.902(a)). The Commission notes that the Johannesburg Stock Exchange has been included as a designated offshore securities market under Rule 902(a). However, exchange offers involving securities traded on this exchange may be precluded from using proposed Rule 802 and proposed Form F–12 if they would be considered in violation of the sanctions currently imposed on South Africa by the Comprehensive Anti-Apartheid Act of 1986 (Pub. L. 99–440).

[88] The market value of the "public float" is the market value of all outstanding equity securities owned by nonaffiliates. Foreign private issuers would include non-voting common stock in the calculation of public float.

[89] 17 CFR 230.902(a)(2).

[90] 15 U.S.C. 78(a)(50).

[91] "Specified foreign securities market" would include the International Stock Exchange of the United Kingdom and the Republic of Ireland Ltd., the Montreal Exchange, the Bourse de Paris, the Tokyo Stock Exchange and the Toronto Stock Exchange. See Definitions Principally Relating to International Transactions, Securities Act Release No. 6861 (January 9, 1991) (56 FR 820) (proposing Rule 3b–10(f) (17 CFR 230.3b–10(f))).

[92] Proposed Form F–11 under the Rights Offering Release and Form F–8 under the MJDS also permit successor issuers to tack on listing histories of their predecessors for purposes of satisfying the three-year listing requirement. See Rights Offering Release, *supra* fn 38; MJDS, *supra* fn 54.

[93] For example, if A had been reporting for four years in Ireland, and B had been reporting for two years in the U.K., and A and B in a business combination formed C, which has been reporting for one year in Ireland, C would be deemed to meet the three-year reporting history requirement. The one year of reporting by C when added to the reporting history of A or B in each case would be three years or more. If, however, either A or B had been reporting for less than two years, C would not be deemed to satisfy the three year reporting history test, if A and B were both considered significant participants.

[94] See proposed Form F–12, Part I, Item 2.

[95] 17 CFR 230.400 to 230.494, inclusive.

[96] See Rule 400 under Regulation C (17 CFR 230.400), providing that the regulation shall not control where the provisions of a form address the same subject matter.

[97] 15 U.S.C. 77e(b).

[98] Proposed Rule 174(a) under the Securities Act (17 CFR 230.174(a)).

[99] Rule 15c2–8 (17 CFR 240.15c2–8) provides that it shall constitute a deceptive act or practice for a broker or dealer to participate in a distribution unless the broker or dealer complies with certain delivery prospectus requirements set forth in the rule. Rule 15c2–8(b), however, exempts a broker or dealer from the prospectus delivery requirement if the issuer is exempt from the requirement to file reports pursuant to section 12(h) of the Exchange Act, as provided in proposed Rule 12h–4, with respect to Form F–12 offerings. Nothing in the rules proposed today, except proposed Rule 12h–4, would relieve a broker or dealer from their obligations under Rule 15c2–8.

does in fact require that a prospectus be delivered to each securityholder.

Information that is permitted in the home jurisdiction to be incorporated by reference in the prospectus would not be required to be distributed to target shareholders resident in the United States, unless so required by the regulating home jurisdiction, but would be deemed part of the prospectus,[99] and would be required to be filed as an exhibit to proposed Form F-12.[100] Any document already furnished to the Commission under Rule 12g3-2(b) may be incorporated by reference into proposed Form F-12 without having to be filed as an exhibit to the form. Incorporated information would be part of the registration statement and would be deemed filed for liability purposes.

The form proposed today would be accompanied by Form F-X, which includes not only a consent to service of process and appointment of a U.S. person as agent for process, but also a consent to service of an administrative subpoena and an undertaking to assist the Commission with an administrative investigation.[101] Form F-X further requires that the Commission be advised of any change to the name or address of an agent for service of process.

Under the proposal, the properly completed registration statement on proposed Form F-12 would become effective upon filing. Automatic effectiveness of the registration statement would permit the U.S. offer to proceed on the same time schedule as the offshore offer. Moreover, the registration statement generally would not be subject to prior review by the Commission staff. Therefore, exchange offers or business combinations registered on proposed Form F-12 would commence in the United States simultaneously with the dissemination, if any, or commencement of the offer in the foreign target company's home jurisdiction.[102] Notwithstanding the above relating to the effectiveness of a registration statement on proposed Form F-12, the proposed rules would not permit a registration statement relating to the issuance of debt securities to become effective until the provisions of the Trust Indenture Act of 1939 ("Trust Indenture Act") have been complied with,[103] or an exemption from the provisions of the Trust Indenture Act has been granted pursuant to section 304(d) of the Trust Indenture Act.[104]

In the United States, if any report or opinion of an expert or counsel is quoted or summarized in a registration statement or prospectus filed under the Securities Act, or if an expert is named in the registration statement as having prepared or certified a report or valuation, the written consent of the expert or counsel must be filed as an exhibit expressly consenting to the inclusion of the expert's or counsel's material in the registration statement. Form F-12, as proposed today, would not require experts, including auditors or counsel, to consent to the use of their material so long as it was not prepared or certified directly or for the sole purpose of the proposed Form F-12 registration statement or prospectus provided to U.S. securityholders, but was prepared for example for an offshore offer, for foreign periodic reporting requirements, or for a prior foreign registration statement.[105] The Commission is seeking comment on whether requiring the filing of a consent by experts in connection with offerings on Form F-12 would be impracticable or involve undue hardship on the person filing the registration statement within the meaning of section 7 of the Securities Act. In this regard, commenters should focus on whether the consent requirement is common among foreign registration and listing schemes such that a consent would be obtainable in connection with a Form F-12 filing, and whether it is appropriate to exempt experts or counsel from having to consent to the use of their report or opinion in these types of transactions.

All documents filed with the Commission would be subject to the civil liability and general antifraud provisions of the U.S. securities law applicable to a registration statement filed under the Securities Act.[106] Moreover, such documents would be in the Commission's public files, and therefore subject to public inspection.

As proposed, Form F-12 entirely incorporates the disclosure requirements under applicable foreign law, as defined and construed under the law of the foreign jurisdiction. Other than the specified legends and the English language requirement, no disclosure requirement is being defined by U.S. rule or regulation. Financial statements may be prepared under the standards of the foreign jurisdiction, and may be prepared in accordance with foreign accounting principles by auditors subject to foreign auditing and independence standards.

Commenters on both the Commission's Multijurisdictional Disclosure Release [107] and the Concept Release expressed concern that an offering circular/prospectus prepared in accordance with MJDS forms and requirements could be considered misleading solely because information that is required by the Commission's existing forms is not included based on applicable foreign disclosure rules. As stated in the MJDS, however, the Commission, in adopting the multijurisdictional disclosure system with Canada, adopted as its own requirements the disclosure requirements of the foreign regulatory scheme.[108] The same principles would apply under the rules and forms proposed today with respect to offering materials disseminated in this country, including documents filed with or submitted to the Commission on proposed Form F-12, Form 14D1C and Form 13E4H. A foreign private issuer that complies in good faith with applicable foreign disclosure law, even if such compliance results in the omission of information which might otherwise have been required as a line item as required by United States disclosure law, will constitute compliance with applicable U.S. disclosure law. The Commission requests comment on the applications of this total incorporation of foreign disclosure and solicits comment as to any minimum disclosure requirements that should be imposed.

4. Business Combinations

The Commission also is extending proposed Form F-12 to encompass the registration of securities in connection with statutory amalgamations, mergers, arrangements and other extraordinary reorganizations that require the vote of one or more of the acquired companies ("business combinations"). Registration on proposed Form F-12 of these transactions would be permitted if each significant participant [110] is a foreign private issuer, is currently furnishing information pursuant to Rule 12g3-2(b) or has made an initial submission pursuant to the rule on or before the filing of Form F-12, [111] has a security listed on a designated offshore securities market [112] for at least 36 months or meets the alternative operating experience and public float test, and five percent or less of the class of securities being registered would be held of record by U.S. residents other than U.S. holders of more than 10 percent of the subject class, as measured upon the completion of the business combination. The information provided to the foreign regulatory authority in satisfaction of the proxy and other disclosure requirements, as well as any information circular or any other disclosure documents required to be delivered by companies participating in a business combination to their securityholders, would be filed with the Commission under cover of proposed Form F-12 in satisfaction of the Securities Act registration requirements and delivered to securityholders in the United States in accordance with section 5(b) of the Securities Act.

As noted, each significant participant in a business combination must meet the offeror qualifications standard established for exchange offers. As in the case of exchange offers, the listing and reporting history of any participant that itself was the result of a business combination may be combined with each of its predecessor companies. The listing or operating history of any non-qualifying predecessor company could be disregarded if other qualifying predecessor companies whose assets and gross revenues, respectively, would contribute at least 60 percent of the combined entity's assets and gross revenues from the continuing operations.

Comment is requested whether the applicable foreign regulatory schemes or listing requirements exempt business combinations from the prospectus requirements in light of the disclosure that may be provided in an information circular required by applicable proxy solicitation rules. Comment is sought whether the regulatory scheme and the listing or reporting requirements of the designated offshore securities markets are sufficiently comparable so that specific disclosure of certain information as a precondition to the use of proposed Form F-12 for business combinations need not be required?

D. Continuous Reporting Requirement

Issuers that make a registered offering of securities in the United States are subject to continuous reporting requirements under the Exchange Act. section 15(d) of the Exchange Act [113] requires each issuer that has filed a registration statement that has become effective pursuant to the Securities Act to file periodic reports thereafter. This requirement is applicable for the fiscal year during which the registration statement became effective and any subsequent fiscal year in which securities of the class registered are held of record by 500 or more persons at the beginning of such fiscal year.[114] A foreign private issuer that registers an offering in the United States on proposed Form F-12, would be required by section 15(d) of the Exchange Act, absent an exemption, to file Commission continuous reporting disclosure documents (Forms 20-F and 6-K) to satisfy its Exchange Act reporting obligation. Pursuant to section 12(h) of the Exchange Act,[115] proposed Rule 12h-4 [116] would exempt foreign private issuers, with no existing reporting obligation, from any section 15(d) reporting obligation arising from the use of proposed Form F-12. A foreign private issuer that does incur a section 12(g) obligation as a result of having more than 500 securityholders resident in the U.S. after an exchange offer registered on proposed Form F-12 may nevertheless maintain an exemption from registration by continuing to furnish information pursuant to Rule 12g3-2(b); under proposed amendments to Rule 12g3-2(b), registration of securities on proposed Form F-12 would not disqualify a registrant from claiming the exemption, even if the foreign target was a reporting company.[117] Comment is requested as to whether an offeror registering securities on proposed Form F-12 should be required to file periodic reports under section 15(d), where it has over a specified number of securityholders (*e.g.*, 300, 500 or 1000), but be permitted to meet this obligation by filing with the Commission the same documents as it would furnish under Rule 12g3-2(b), so long as the offeror is not listed on a national securities exchange or quoted through an "automated inter-dealer system." Foreign private issuers having a class of securities listed on an exchange or quoted through an "automated inter-dealer system" in the U.S. would be entitled to use proposed Form F-12 but generally would file Commission-mandated continuous disclosure documents such as Form 20-F and 6-K reports.[118]

E. Trust Indenture Act Requirements

As previously noted, there presently are no restrictions on the type of securities that a third-party or issuer may offer in exchange for the securities of a foreign target company in reliance on proposed Rule 802 or proposed Form F-12. Consequently, the proposal would permit debt securities to be offered in an exchange offer for the foreign target company's equity or debt securities. The issuance of debt securities requires compliance with the provisions of the Trust Indenture Act [119] unless such debt securities are exempt, or are issued in transactions which are exempt, from the provisions of the Trust Indenture Act, pursuant to section 304 of the Trust Indenture Act.[120]

As part of the proposals today, pursuant to section 304(d) of the Trust Indenture Act [121] the Commission is proposing to adopt a new rule under the Trust Indenture Act to exempt any debt security issued pursuant to proposed Rule 802 under the Securities Act, whether or not issued pursuant to an indenture, from having to comply with

---

[99] Such documents or exhibits, filed or incorporated by reference into the offering circular/prospectus, would be part of the registration statement, and subject to liability under sections 11 and 12(2) of the Securities Act (15 U.S.C. 77k and 77*(2)*) *for any misleading statements included therein.*

[100] In addition, if any exhibit or other paper or document filed with the Commission as part of a registration statement is in a foreign language, it must be accompanied by a substantive summary, version or translation in English. *See* Rule 403(c) of Regulation C (17 CFR 230.403(c)).

[101] Form F-X was approved as part of the MJDS.

[102] See proposed Rule 466 under the Securities Act (17 CFR 230.466).

[120] 15 U.S.C. 77ddd.

[121] 15 U.S.C. 77ddd(d). Section 304(d) provides that the Commission may, by rule or order, exempt conditionally or unconditionally any indenture from one or more provisions of the Trust Indenture Act. Such exemptive authority may be exercised by the Commission "if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended" by the Trust Indenture Act.

VOL 56 ISS 115 JE 14 1991 UMI

the provisions of the Trust Indenture Act. [123]

It appears to the Commission that an unconditional exemption from the requirements of the Trust Indenture Act for any debt security issued pursuant to proposed rule 802 under the Securities Act would encourage inclusion of United States investors in tender offers and exchange offers for a foreign target company's securities. In keeping with its articulated goal of expanding opportunities for United States investors to participate in such offers, the Commission is of the view that its enforcement of the statutory requirement that debt securities be issued pursuant to an indenture qualified under the Trust Indenture Act would constitute a significant impairment to the ability of United States investors to participate in these offerings.

So long as the offeror is in compliance with proposed Rule 802, the exchange of debt securities would not be integrated with any other offerings, and thus would not affect the availability of an exemption from the Trust Indenture Act with respect to the issuance of other debt securities. The Commission requests comment on the appropriateness of exempting all transactions subject to proposed rule 802 from the provisions of the Trust Indenture Act. Comment also is requested on whether this exemption should be conditioned on the debt securities being issued pursuant to an indenture or other agreement specifying the rights of the parties, but that such indentures or agreements would not be required to be qualified under the Trust Indenture Act.

If a third-party bidder or issuer fails to qualify for an express exemption under proposed rule 4d–10 or some other provision of section 304 of the Trust Indenture Act, it may apply under section 304(d) of the Trust Indenture Act for an order from the Commission for exemption from one or more provisions of the Trust Indenture Act. In addition, in the absence of an exemption, if the bidder or issuer proposes to appoint a non-U.S. person to act as sole trustee under an indenture, an application may be filed under section 310(a)(1) of the Trust Indenture Act for permission to use a foreign person as the sole trustee. Applications for exemption under section 304(d) or section 310(a)(1) would be made pursuant to such rules and regulations as adopted by the Commission.

[123] Proposed Rule 4d–10 of the Trust Indenture Act (17 CFR 260.4d–10).

F. Exchange Act Provisions Affecting the Activities of Certain Participants in Tender and Exchange Offers

A number of foreign jurisdictions permit participants in tender offers and exchange offers to engage in certain activities that would be prohibited in the U.S. by Rules 10b–6, [124] 10b–7 [125] and 10b–13. [126] In connection with the adoption of the MJDS with Canada, the Commission adopted exemptions with respect to such rules for tender or exchange offers relying on the MJDS. G5126 The exemptions which, under certain conditions, permit securities to be purchased in Canada otherwise than pursuant to the terms of the offer, recognize that Canadian procedures applicable to tender and exchange offers afforded a large measure of the protections provided by Rules 10b–6 and 10b–13. Also, in the Concept Release the Commission requested whether it would be necessary or appropriate to grant exemptions from Rules 10b–6 and 10b–13 for offshore tender and exchange offers. Commenters generally stated that relief from Rules 10b–6 and 10b–13 would be appropriate for tender or exchange offers that are essentially foreign in character, especially if any such exemptions recognized the laws, rules and practices of the foreign jurisdiction governing the offer.

Rule 10b–6 has played an important role in protecting U.S. markets from potentially manipulative conduct during a distribution. [127] The rule is designed to protect the market for the security in distribution as an independent pricing mechanism, free from any influence on the price of the security that may result from bids or purchases of the distribution security or related securities by distribution participants or other persons having a financial or other stake in the success of the distribution.

Many foreign jurisdictions do not have anti-manipulation provisions similar to Rule 10b–6. In fact, foreign jurisdictions may have rules or procedures that conflict in various respects with that rule. [128] Flexible application of Rules 10b–6, 10b–7, and 10b–13 appear to be necessary and appropriate to encourage foreign offerors to permit U.S. securityholders to participate fully in tender offers and exchange offers for foreign securities. At the same time, the importance of maintaining the integrity of the U.S. markets requires that any exemption should be limited to circumstances where the characteristics of the offering indicate that the concerns expressed in Rules 10b–6, 10b–7, and 10b–13 are sufficiently attenuated. Neither of the proposed exemptions discussed below would have any effect on the continuing application of the general antifraud and antimanipulation provisions of the federal securities laws. [129]

Many of the exchange offers utilizing Rule 802 or Form F–12 will not be "distributions" as defined in Rule 10b–6, [130] and the persons participating in such offers will not be affected by the rule or the need to consider whether the proposed exemptions are available. Nevertheless, the Commission believes it is appropriate to exercise its authority under Rules 10b–6(h), 10b–7(o), and 10b–13(d) to propose a complete exemption for exchange offers pursuant to proposed Rule 802 on the presumption that such exchange offers for foreign securities are unlikely to raise significant manipulative concerns.

[124] Rule 10b–6 (17 CFR 240.10b–6), generally prohibits a person participating in certain offerings ("distributions") from, directly or indirectly, bidding for or purchasing, or inducing other persons to bid for or purchase, the securities in distribution, or any security of the same class and series, or any right to purchase such security ("related securities"), until the distribution has been completed. An exchange offer may involve a "distribution" as that term is defined in Rule 10b–6(c)(5). See *infra* fn 127. Moreover, Rule 10b–6 applies to both the securities offered and the securities sought in an exchange offer, but not to tender offers for cash.

[125] Rule 10b–7 (17 CFR 240.10b–7), prohibits a person from, directly or indirectly, stabilizing the price of a security to facilitate an offering of any security, unless such stabilization is effected in accordance with the rule's provisions.

[126] Rule 10b–13 (17 CFR 240.10b–13), prohibits a person who is making a cash tender offer or exchange offer from, directly or indirectly, purchasing or making any arrangement to purchase such security (or any other security which is immediately convertible into or exchangeable for such security) otherwise than pursuant to such offer, from the time of public announcement of the offer until its expiration, including any extensions thereof.

[128] MJDS, *supra* fn 54. See also Original MJDS Proposal, *supra* fn 60 at 32243–32244 and MJDS Reproposal *supra* fn 47 at 46296.

[127] The term "distribution" is defined in paragraph (c)(5) of Rule 10b–6 as an offering of securities, whether or not subject to registration under the Securities Act, that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods. This definition is designed to apply the prohibitions of the rule to those situations where there would be an incentive to manipulate the security's price in order to facilitate the distribution.

[128] See Letter regarding International Stock Exchange of the United Kingdom and the Republic of Ireland Ltd (September 20, 1967), (1967–1968) Fed. Sec. L. Rep. (CCH) ¶ 78,712.

[129] See *supra* fn 62.

[130] In determining whether a distribution is present, only the portion of the securities offered in the United States would be considered. However, for purposes of Rule 10b–6, the offeror would have to take into account all securities concurrently offered by the issuer in the United States, including securities offered pursuant to exemptions from registration under the Securities Act.

The Commission also proposes to exempt from Rules 10b–6 and 10b–7 exchange offers made on Form F–12, subject to the following conditions: (1) The issuer of the foreign securities in distribution has voting stock with an aggregate market value of at least $150 million held worldwide by persons that are not affiliates of the issuer; (2) in required proposed Form F–12 legends, [131] the registrant discloses, where such is the case, the possibility of, or the intent to make, bids or purchases outside the United States as permitted by the applicable laws and regulations of the governing foreign jurisdictions; (3) the registrant discloses in the United States information regarding such purchases to the extent such disclosure is made in a foreign jurisdiction; (4) any bids or purchases of the security by distribution participants are made on a "designated offshore securities market," as defined in Rule 902 under the Securities Act; [132] and (5) no bids or purchases of the offered securities are effected in the United States.

The Commission seeks commenters' views on the proposed exemptions. Specifically, should the issuer qualification of $150 million in voting securities be changed to equity with a "public float" [133] of $150 million; $75 million? With regard to the qualifying markets for such purchases, would it be more appropriate to limit the availability of the exemptions to purchases on "specified foreign securities markets," as defined in proposed Rule 3b–10 under the Exchange Act, [134] or markets located in countries with which the Commission has an MOU or other comparable information sharing agreement? [135] Finally, comment is requested concerning the role played by issuers and their affiliated purchasers in foreign exchange offers and whether it is appropriate to extend the proposed exemptions to them. [136]

Rule 10b–13 principally is intended to prevent the offeror from providing greater or different consideration to certain shareholders by purchasing their shares outside the offer, to the detriment of other shareholders who are limited to the terms of the offer. A number of foreign jurisdictions do not prohibit the offeror from purchasing or arranging to purchase the subject security during the offer, although some jurisdictions require the bidder to provide consideration to tendering shareholders that is equivalent to the higher of the offer price and the highest price paid to any person whose securities were purchased outside of the offer. [137]

Affording U.S. securityholders the opportunity to participate in cash tender offers and exchange offers that are primarily foreign in character appears to outweigh the benefits that would be derived from applying Rule 10b–13 to such offers. Accordingly, the Commission is proposing an exemption that would permit a bidder relying on proposed Rules 802, 14d–1(c) or13e–4(h) to conduct a cash tender offer or exchange offer [138] in the United States without complying with Rule 10b–13, subject to the following conditions: (1) Any purchases or arrangements to purchase the security that is the subject of the offer (or any security which is immediately convertible into or exchangeable for such security), otherwise than pursuant to the tender or exchange offer are not made in the United States; (2) where such is the case, disclosure of the possibility of such purchases, or the intent to make such purchases, in accordance with the applicable laws and regulations of foreign jurisdictions, is included in any information legend required by Form 14D1C or Form 13E4H; and (3) the offeror discloses such purchases in the United States to the extent such disclosure is made in a foreign jurisdiction. The Commission solicits commenters' views on the proposed exemptions from Rules 10b–6, 10b–7, and 10b–13. [139]

[131] See Part I, Item 2. to proposed Form F–12.

[132] 17 CFR 230.902(e).

[133] See Instruction 4 to proposed Form F–12.

[134] See Securities Exchange Act Release No. 28736 (January 3, 1991) (56 FR 820).

[135] See *supra* Section II.A.1.

[136] Limiting the exemption to persons other than the issuer and its affiliates would be consistent with prior Commission actions. *See, e.g.*, Letter regarding Application of Rules 10b–6, 10b–7, and 10b–8 to Rights Offerings and Rule 144A Transactions Involving Foreign Securities (April 25, 1991).

[137] See City Code Rules 6.1 and 6.2 (1990) 2 Fin. Serv. Rep. (CCH Ltd.) E–10 at p. 140,402. *See also, e.g.*, Ontario Securities Act sections 93(3) and 93(6) and Ontario Securities Commission Policy Statement 9.3.

Persons whose shares are purchased in the market before payment is made in the offer, however, receive a consideration different from that received by tendering shareholders, even though they receive the same per share price. See Brief of the Securities and Exchange Commission, Amicus Curiae, *Texaco Inc.* v. *Pennzoil Inc.* (Supreme Court of Texas, July 22, 1987).

[138] An exchange offer conducted pursuant to proposed Rule13e–4(h) or proposed Rule 14d–1(c) (17 CFR 240.13e–4(h) and 240.14d–1(c)] may also be subject to Rule 10b–6, but would have the benefit of the proposed exemptions discussed above for offers made under Rule 802 or Form F–12.

[139] The Commission would continue to consider requests for individual exemptions in the context of tender and exchange offers that would not be covered by the proposed exemptions.

IV. United Kingdom Exemptive Order

Over the past two years, the Commission and the Panel on Takeovers and Mergers (the "Panel") [140] have worked together to facilitate on a case-by-case basis takeover bids for U.K. chartered companies with U.S. securityholders in order to promote the equal treatment of all securityholders. This approach was undertaken by the Commission and the Panel in the Ford Motor Company Ltd. cash offer for Jaguar plc, [141] and most recently in the exchange offer by Manpower Inc. for the ordinary shares of Manpower plc. [142] The experience of these offers, [143] and a review by the Commission and the Panel have highlighted six principal points of potential conflicts between the City Code and the Williams Act: (1) The availability of withdrawal rights and the prompt purchase of tendered shares; (2) the equal treatment of all securityholders; (3) the timing of public announcements; (4) the use of guaranteed deliveries of target securities in U.S. tender offers; (5) the adequacy of the U.K. disclosure documents; and (6)

[140] Tender offers in the United Kingdom are regulated by the Panel, which is a non-statutory body sponsored by the Bank of England and the institutions using the International Stock Exchange of the United Kingdom and the Republic of Ireland Ltd. ("ISE"). Both the ISE and the Panel's requirements are set forth in the City Code on Take-Overs and Mergers (the "City Code") (1990) 2 Fin. Serv. Rep. (CCH Ltd.), which states general principles for the regulation of takeovers conducted in the United Kingdom and the Republic of Ireland. The City Code is intended to be interpreted flexibly and is viewed as a codification of good standards of commercial behavior. The City Code applies to public and certain private companies, while the ISE disclosure requirements apply only to listed companies.

[141] Securities Exchange Act Release No. 27425 (Nov. 7, 1989).

[142] Letter Regarding Manpower plc and Manpower Inc. (February 15, 1991) ("Manpower"). The Manpower transaction included an exchange offer by a newly formed U.S. company for all the shares of a company chartered in the United Kingdom in order to change the domicile of the parent company. Approximately 75 percent of Manpower plc's ordinary shares were held in the United States and most of its executive offices and operations were in the United States, thus disqualifying the target from the status of a foreign private issuer. In the transaction, a single offer was extended to both U.S. and U.K. holders. While relief was granted from the withdrawal rights requirements following the offer going wholly unconditional, withdrawal rights were otherwise afforded in accordance with U.S. requirements, both with respect to U.S. and U.K. holders.

[143] See also In the Matter of Aktiebolaget Volvo and Procordia Aktiebolag, *supra* fn 69 (exchange and cash offers of Aktiebolaget Volvo, a Swedish company with shares traded on NASDAQ, and Procordia Aktiebolag, a company controlled by the Swedish government, for all shares of another Swedish company, Pharmacia Aktiebolag, a Swedish company reporting in the U.S. and affiliated with Volvo).

purchases outside the tender offer during the pendency of the offer. The Commission is proposing to formalize the accommodations arrived at in these six areas in order to facilitate concurrent jurisdiction of tender offers subject to both the City Code and the Williams Act.

In order to codify these accommodations as well as to alleviate the necessity of individual Commission orders, the Commission is considering the entry of an exemptive order that would permit third-party exchange and cash tender offers for U.K. target companies, that are subject to the City Code, to take advantage of certain limited exemptions from the requirements of the Williams Act. The proposed exemptive order would allow tender or exchange offers to proceed simultaneously in the United Kingdom and the United States on the same terms and in accordance with both the Williams Act and the City Code.[144]

The exemptive order would extend to tender offers for the securities of U.K. companies that meet the definition of foreign private issuer. [145] Comment is requested whether this test is appropriate, since it could encompass U.K. companies where a majority of the securities are held in the United States, but the other disqualifying factors in the definition of foreign private issuer contained in Rule 3b–4 of the Exchange Act are not present. Should the scope of the order instead be based upon a specified maximum level of U.S. ownership such as 40, 50, or 60 percent?

A. Withdrawal Rights and the Prompt Purchase of Tendered Shares

As highlighted by the Commission's previous exemptive orders, Williams Act requirements regarding withdrawal rights conflict with the City Code. Specifically, the Williams Act and Commission rules require that withdrawal rights be maintained throughout the entire length of a tender offer,[146] whereas withdrawal rights are generally made available under the City Code only after the expiration of 21 days following the first closing date of the initial offer, if the tender offer has not by such date become or been declared unconditional as to acceptances.[147]

The extension of withdrawal rights in the U.S. throughout the offer has the effect of preventing the bidder from purchasing shares until the expiration of the offer, regardless of the reasons for an extension.[148] The City Code, however, requires that an offer remain open for at least 14 days after going unconditional as to acceptances and that shares be immediately purchased once the offer goes wholly unconditional.[149] These requirements would thus create a conflict with the U.S. requirement that withdrawal rights be extended, and therefore the previously tendered shares could not be purchased, absent an exemption, so long as the offer remained open.

To alleviate the conflicts erected by the diverging regulatory schemes, the proposed order contemplates that bidders will proceed simultaneously in the United States and the United Kingdom, complying with the rules and regulations of the Williams Act, including the applicability of withdrawal rights, with respect to U.S. holders, and complying with the City Code with respect to U.K. holders. In order to coordinate the different parts of the offer, however, and to ensure that all holders are paid at the same time, the offer would be permitted to remain open both in the U.S. and U.K. after the offer is declared wholly unconditional in accordance with U.K. tender offer practice, without extension of withdrawal rights, provided that (1) all U.S. minimum time periods had been satisfied, including U.S. mandated extensions, and all conditions to the offer had been satisfied or waived,[150] (2) all previously tendered securities would be accepted [151] and promptly paid for; [152] and (3) all securities tendered thereafter are immediately accepted and promptly paid for by the bidder.

B. All Holders

The proposed order also would provide limited exemptive relief under the all-holders provisions of Rule 14d–10 and Rule 13e–4(f)(8) under the Exchange Act.[153] Pursuant to this relief, a bidder may divide the offer into two separate offers, as done in the *Ford/Jaguar* transaction, excluding U.S. holders from the U.K. portion and limiting the U.S. offer to U.S. persons. In the alternative, a bidder could conduct one offer open to all holders, but affording different withdrawal rights to U.S. and U.K. holders prior to going wholly unconditional.

C. Public Announcements

An additional regulatory conflict involves the City Code requirement that a bidder promptly make a brief public announcement of a possible offer under a number of circumstances, including where the target becomes subject to rumor or speculation following an approach by the bidder.[154] Under Rule 2.5 of the City Code, however, if the bidder has formed a firm intention to make an offer, it must make a detailed announcement of the terms of the offer. The bidder is then required to mail an offer document within 28 calendar days of such an announcement.[155] Rule 14d–2(b) under the Williams Act, on the other hand, requires that the requisite disclosure documents be published, sent or given to securityholder within five business days of the announcement of the material terms of the offer.[156] A conflict would be created, though, since the brief announcement could, and the Rule 2.5 announcement in all likelihood would, trigger the requirements of Rule 14d–2(b).

The proposed order would permit bidders for a U.K. chartered foreign private issuer to delay filing a Schedule 14D–1 [157] with the Commission and disseminating the tender offer materials until the disclosure document is mailed or disseminated in the United Kingdom, so long as a public announcement is made in the United Kingdom and in the United States containing the information required by Rule 2.5(b) of the City Code within five business days of any announcement triggering Rule 14d–2(b).[158] In the case of registered exchange offerings, the announcement made in the United Kingdom would not constitute "gun jumping" [159] so long as the announcement contains no more information than is required by the Panel, and includes a statement that a registration statement regarding the securities is not yet effective, and securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.[160]

D. Guaranteed Deliveries

The Williams Act permits a bidder to allow securityholders to tender their securities without the physical or book entry delivery of the securities, but with a guarantee of delivery of the tendered securities within a specified period of time. The Williams Act does not mandate the use of guaranteed delivery in a tender offer; rather, it is up to the bidder as to whether the procedure will be made available to securityholders. In the Ford/Jaguar transaction, at the request of the Panel, only holders of ADRs, and not U.S. residents who held the ordinary shares of Jaguar, were given the option of tendering pursuant to the guaranteed delivery procedure. After the initial offering period in Ford/Jaguar and after acceptance for payment under the simultaneous U.S. and U.K. tender offers, all holders of U.S. securities received the option of tendering pursuant to the guaranteed delivery procedures. This difference in treatment during the initial offering period and prior to the acceptance for payment of the tendered securities, occurred due to the Panel's concern with double counting of securities.[161] The concern expressed by the Panel is based on the Panel's goal of requiring bidders to be as certain as possible that the offer not go wholly unconditional unless the bidder has secured legal control of the subject company.[162] The Panel has advised the Commission that in the ordinary course it does not expect tender offers made in reliance on the order to permit the use of guaranteed delivery procedures. Since an offer would remain open a minimum of 14 days following announcement that the offer has gone unconditional as to acceptances, institutions and other persons holding ordinary shares and ADRs in a fiduciary capacity should have adequate time to tender by physical or book entry delivery. Comment is requested whether the absence of guaranteed delivery procedures would cause undue hardship to U.S. securityholders, or disruption in the U.S. markets for the subject security.

E. Disclosure Documents

The Commission's staff has reviewed U.K. disclosure documents disseminated in connection with cash tender offers in the U.K. and has found that the disclosure documents used in the U.K. are substantially comparable so as to permit the acceptance of the disclosure documents in connection with a tender offer involving U.K. subject companies if extended to U.S. residents. In a sample of tender offers by U.K. and non-U.K. bidders for U.K. chartered companies subject to the City Code, the disclosure contained therein was substantially similar to that contained in U.S. offers and would generally meet the requirements of Schedules 14D–1 and 14D–9.[163] The proposed order would therefore specify that offering materials prepared in accordance with the requirements of the City Code would satisfy the requirements of Schedules 14D–1 and 14D–9. Such offering materials would be filed as an exhibit to, and incorporated by reference into, the Schedules 14D–1 and 14D–9, thereby eliminating the necessity of preparing two sets of offering materials. Comment is requested as to whether there are disclosure provisions that are not substantially comparable and consequently should be specifically addressed under the order.

F. Purchases Outside the Offer

Rule 10b–13 under the Exchange Act,[164] prohibits a person who is making a tender or exchange offer from purchasing or arranging to purchase, directly or indirectly, the securities that are the subject of a tender or exchange offer, or any security that is immediately convertible into or exchangeable for such security, otherwise than pursuant to the offer. The rule's prohibitions apply from the time of public announcement of the offer until such time as the offeror is required, pursuant to the terms of the offer, either to accept or reject the tendered securities.[165]

In contrast, the City Code does not prohibit purchases otherwise than pursuant to the terms of a tender or exchange offer by persons covered by Rule 10b–13 during the period between announcement of the offer and its termination. However, the City Code contains "best price" and other provisions that operate to provide protections similar to Rule 10b–13. General Principle No. 1 of the City Code requires that all shareholders of the same class be treated "similarly" by an offeror.[166] Additionally, City Code Rule 6.2(a) requires the offeror and persons "acting in concert" with the offeror, including U.K market maker affiliates of dealer-managers conducting concurrent U.S. and U.K tender offers,[167] who

---

[144] Section 14(d)(8) (15 U.S.C. 78n(d)(8)) permits the Commission by rule or order to exempt from the provisions of section 14(d) transactions that are "not comprehended within the purposes of this subsection." In addition, the Commission is empowered to alter the requirements of specific provisions of the Williams Act by rule or order, such as withdrawal rights under section 14(d)(5) of the Exchange Act (15 U.S.C. 78n(d)(6)).

[145] *See supra* fn 88.

[146] *See* Section 14(d)(5) (15 U.S.C. 78n(d)(5)); Rule 14d–7 and Rule 13e–4(f)(2) (17 CFR 240.14d–7 and 240.13e–4(f)(2)).

[147] City Code Rule 34 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), M–13 at 140,981. Unconditional as to acceptances is normally achieved on receiving a sufficient number of tendered securities, when combined with securities already owned or to be purchased, constitute more than 50 percent of the aggregate number of outstanding shares. See City Code Rule 10 [1990] 2 Fin. Serv. Rep. (CCH Ltd.), C–1 at 140,561.

The City Code, though, would not preclude a bidder from voluntarily providing additional withdrawal rights.

[148] Rule 14d–7(a) and Rule 13e–4(f)(2) (17 CFR 240.14d–7(a) and 240.13e–4(f)(2)).

[149] City Code Rule 31.4 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), M–2 at 140,802.

[150] Bidders taking advantage of these procedures normally would include in the United States offer the same conditions to the offer as those contained in the United Kingdom offer, including the minimum condition, in order to eliminate any question of the bidder's entitlement to delay closing the U.S. offer during any extension of the U.K. offer.

[151] Subject to meeting valid tender offer regulations, including proration requirements in a partial offer.

[152] 17 CFR 240.14e–1(c). The Commission generally has looked to the clearance and payment practices of the target's home country in this respect. See *Pryor* v. *United States Steel Corp.*, 591 F.Supp. 942 (S.D.N.Y. 1984); and Securities Exchange Act Release No. 16384 (Nov. 29, 1979) (44 FR 70362).

[153] 17 CFR 240.14d–10 and 240.13e–4(f)(8).

[154] City Code Rules 2.2 and 2.5 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), D–3 at 140,302 and D–5 at 140,321–322.

[155] City Code Rule 30.1 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), M–6 at 140,922.

[156] 17 CFR 240.14d–2(b). The rule deems the offer to have commenced upon the public announcement of the identity of the bidder and target, the number of shares sought and the price or range of prices to be paid, unless the Schedule 14D–1 is filed and tender offer materials are disseminated within five business days or the bidder otherwise announces an intent not to proceed with the offer.

[157] 17 CFR 240.14d–100.

[158] Rule 10b–13 (17 CFR 240.10b–13) would continue to apply from the initial public announcement of the offer in the United States and the United Kingdom.

[159] Section 5(c) of the Securities Act (15 U.S.C. 77e(c)) makes it unlawful for any person directly or indirectly to make use of any means or instruments of interstate commerce or of the mails to offer to sell a security unless a registration statement has been filed with the Commission as to such security.

[160] See generally Rule 134(b)(1) (17 CFR 230.134(b)(1)).

[161] The concern also reflected the City Code requirement that an offer be withdrawn unless within 60 days of posting, the offer becomes "unconditional as to acceptances."

[162] *Id.*, City Code Rule 10 at 562, 561.

[163] 17 CFR 240.14d–100 and 240.14d–101.

[164] 17 CFR 240.10b–13.

[165] See fn 128 and accompanying text. Rule 10b–13 supports the Exchange Act's "best price" provisions. See, e.g., section 14(d)(7) of the Exchange Act (15 U.S.C. 78n(d)(7)), and Rules 14d–10(a)(2), 14e–1(b), and 13e–4(f)(8)(ii) (17 CFR 240.14d–10(a)(2), 240.14e–1(b), and 240.13e–4(f)(8)(ii)).

[166] City Code General Principle No. 1 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), B–1 at 140,281.

[167] Under the "acting in concert" presumptions set forth in the definitions section of the City Code, purchases by a market maker controlled by, controlling, or under common control with a dealer-manager or any other adviser to the bidder will be attributable to the bidder. City Code Definitions (1990) 2 Fin. Serv. Rep. (CCH Ltd.), C–1 at 140,253. City Code Rule 8 requires market makers controlled by, controlling, or under common control with the dealer-manager or any other adviser to the offeror to report each transaction in "relevant securities" (which includes securities that are the subject of an exchange offer for purposes of Rule 10b–13) to the Panel and the ISE by noon on the day following the transactions, unless the market maker has been recognized by the Panel as an "exempt market maker." City Code Rule 8 (1990) 2 Fin. Serv. Rep. (CCH Ltd.), E–16 at 140,434. This disclosure is designed to provide a significant deterrent to manipulation and thus to provide protection to tendering securityholders.

purchase securities outside the offer and above the offer price, to increase immediately the offer price to the highest price paid for shares purchased outside the offer.[168] Moreover, the City Code requires any purchases by an offeror and certain other persons to be disclosed on a next-day basis.[169]

Strictly construed, where the dual offer structure is employed, Rule 10b–13 would prevent the acquisition of shares in the concurrent U.K. offer during the pendency of the U.S. offer.[170] As discussed above, Rule 10b–13 conflicts with City Code provisions that permit an offeror and certain other persons to purchase target securities during the offer. Moreover, Rule 10b–13 may interfere with purchases of target securities pursuant to the compulsory acquisition rules (clean-up merger rules) of the U.K.,[171] since the Rule 10b–13 period generally applies from the time of the public announcement of the offer until the expiration of the offer period, including any extensions thereof.[172] Finally, Rule 10b–13 may interfere with the normal U.K. practice of permitting a market maker affiliate of the dealer-manager to continue to act as a market maker with respect to the subject securities.[173]

Accordingly, the Commission is requesting comment on its proposal to exempt offerors (and dealer-managers) from Rule 10b–13 to permit tender and exchange offers for foreign private issuers listed for trading on the ISE and subject to the City Code to proceed in the United States in accordance with the rules of the City Code. The proposed exemption would be conditioned on: (1) Disclosure in documents filed in the U.S. in connection with the offer, where such is the case, of the possibility of, or the intention to make, such purchases during the offer; (2) all such purchases being made outside the United States; and (3) an undertaking by the offeror to disclose in the United States information regarding any such purchases to the extent such disclosure is made pursuant to the City Code.

V. Cost-Benefit Analysis

To evaluate fully the benefits and costs associated with proposed Rule 802 and Form F–12, and proposed amendments to Rules 13e–4, 14d–1 and 14e–2, the Commission requests commenters to provide views and data as to the costs and benefits associated with multijurisdictional tender and exchange offers and the registration system proposed in order to facilitate the inclusion of U.S. securityholders in such offers. The Commission requests that foreign regulators, foreign issuers, their counsel and auditors provide views and data as to the costs and benefits associated with multijurisdictional tender and exchange offers under current law as compared to the costs and benefits under the proposed system. The Commission is not aware of any additional costs that would result from the proposed rules and forms whose use would be entirely optional. In addition, because eligible issuers taking advantage of the rules and forms would avoid expenses associated with the preparation of more than one document, benefits are expected to result for such issuers.

VI. Regulatory Flexibility Certification

A Regulatory Flexibility Certification relating to proposed Rule 802, Form F–12, under the Securities Act of 1933, Form 13E4H and Form 14D1C under the Securities Exchange Act of 1934, and Rule 304 of the Trust Indenture Act of 1939, has been prepared in accordance with 5 U.S.C. 606(b).

A copy of the Regulatory Flexibility Certification is attached as appendix B or a copy may be obtained by contacting John C. Maguire, Esq., in the Office of Tender Offers, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

VII. Request for Comments

Any interested persons wishing to submit written comments on the proposals, to suggest additional changes, or to submit comments on other matters that might have an impact on the proposals are requested to do so. In addition to the specific inquiries made throughout this release, the Commission solicits comments on the usefulness of the proposals to foreign issuers, foreign issuers who are reporting companies with the Commission, registrants and the marketplace at large. The Commission also requests comment on whether the proposals, if adopted, would have an adverse effect on competition or would impose a burden on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a)(2) of the Exchange Act.[174] The Commission also encourages the submission of written comments with respect to any aspect of the initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis if the proposed rules are adopted.

Persons wishing to submit written comments should file three copies thereof with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–18–91. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

VIII. Statutory Basis of Rule, Form Proposals and Rule and Form Changes

These revisions are being proposed pursuant to sections 3(b), 7, 8, 10 and 19 of the Securities Act,[175] sections 12, 13, 14, and 23 of the Exchange Act,[176] and section 304 of the Trust Indenture Act.[177]

List of Subjects in 17 CFR Parts 200, 230, 239, 240, and 260

Authority delegations, Reporting and recordkeeping requirements, Securities, Trusts and trustees.

[168] City Code Rule 8.2(a) (1980) 2 Fin. Serv. Rep. (CCH Ltd.), E–10 at 140,402. See also *supra* fn 165.

[169] City Code Rule 8 (1980) 2 Fin. Serv. Rep. (CCH Ltd.), E–10 at 140,402. The City Code recognizes a special category of market makers called "exempt market makers" whose activities would not trigger the "best price" provisions of the City Code.

[170] See, e.g., *supra* fn 141, where the Commission granted, among other things, Ford Motor Company Limited's request for an exemption from Rule 10b–13 to permit it to conduct a U.K. tender offer in accordance with the City Code during the pendency of its concurrent tender offers for Jaguar plc in the United States and the United Kingdom.

[171] Sections 428–430F of the U.K. Companies Act of 1985.

[172] See, e.g., Manpower *supra* fn 142. An accommodation was made between conflicting U.K and U.S. tender offer requirements to permit Manpower, among other things, to purchase ordinary shares and ADSs pursuant to the U.K. compulsory acquisition rules. As noted, the Manpower transaction was unusual in that the offeror was not a foreign private issuer within the meaning of Rule 3b–4 under the Exchange Act (17 CFR 240.3b–4). The availability of the proposed exemptive order would be limited to foreign private issuers.

[173] Rule 10b–13 has been interpreted to apply to the dealer-manager of a tender offer because the dealer-manager acts as the agent of the bidder to facilitate the bidder's objectives. The dealer-manager is thus prohibited from, directly or indirectly, purchasing or making any arrangement to purchase the security subject to the tender offer during the pendency of the offer. Purchases of a market maker affiliate of the dealer-manager are indirect purchases by the dealer-manager. See, e.g., Letter regarding S.G. Warburg Securities (November 9, 1989), (1989) Fed. Sec. L. Rep. (CCH) ¶79,411 at 77,159.

[174] 15 U.S.C. 78w(a)(2).

[175] 15 U.S.C. 77c, 77g, 77h, 77j and 77s.

[176] 15 U.S.C. 78l, 78m, 78n, and 78w.

[177] 15 U.S.C. 77ddd.

IX. Text of Rules, Form Proposals and Rule and Form Changes

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Subpart A—Organization and Program Management

1. The authority citation for part 200, Subpart A continues to read as follows:

Authority: 15 U.S.C. 77s, 78d–1, 78d–2, 78w, 79t, 77sss, 80a–37, 80b–11, unless otherwise noted.

2. By amending § 200.30–1 to add paragraph (f)(15) to read as follows:

§ 200.30–1 Delegation of authority to Director of Division of Corporation Finance.

* * * * *

(f) With respect to the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*):

* * * * *

(15) To grant exemptions from all or certain tender offer provisions of the Exchange Act (sections 14(d)(1) through 14(d)(7) (15 U.S.C. 78n(1)–(7)), Regulation 14D (§§ 240.14d–1 through 240.14d–10 of this chapter) and Schedules 14D–1, 14D–9, and Form 14D1C (§§ 240.14d–100, 240.14d–101, 240.14d–104 of this chapter) thereunder, and Rule 14e–1 of Regulation 14E (§ 240.14e–1 of this chapter)) pursuant to sections 14(d)(5) and 14(d)(8)(C) (15 U.S.C. 78n(d)(5) and 78(d)(8)(C)).

* * * * *

3. By revising paragraph (a)(36) of § 200.30–3 to read as follows:

§ 200.30–3 Delegation of authority to Director of Division of Market Regulation.

* * * * *

(a) With respect to the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*):

* * * * *

(36) To grant exemptions from Rule 13e–4 (§ 240.13e–4 of this chapter) pursuant to Rule 13e–4(i)(7) (§ 240.13e–4(i)(7) of this chapter).

* * * * *

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

4. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78l, 78m, 78n, 78o, 78w, 79t, and 80a–37, as amended, unless otherwise noted.

5. By revising paragraph (a) of § 230.174 to read as follows:

§ 230.174 Delivery of prospectus by dealers; exemptions under Section 4(3) of the Act.

* * * * *

(a) No prospectus need be delivered if the registration statement is on Form F–6 or F–12 (§ 239.36 or 44 of this chapter).

* * * * *

6. By adding § 230.440 to read as follows:

§ 230.440 Exemption from the requirement to provide consents for registration statements on Form F–12.

The written consent of an expert pursuant to section 7 of the Act shall not be required with respect to a registration statement on Form F–12 (§ 239.44 of this chapter), except with respect to a certification, report or valuation prepared solely in connection with such registration statement.

7. By revising § 230.464 to read as follows:

§ 230.464 Effective date of post-effective amendments to registration statements filed on Form S–8 and Form F–12, and on certain Forms S–3, S–4, F–3, and F–4.

Providing. That, at the time of filing of each post-effective amendment with the Commission, the issuer continues to meet the requirements of filing on Form S–8 (§ 239.16b of this chapter) or Form F–12 (§ 239.44 of this chapter); or on Form S–3 (§ 239.13 of this chapter) for a registration statement relating to a dividend or interest reinvestment plan; or on Form F–3 (§ 239.33 of this chapter) for a registration statement relating to a transaction meeting the requirements specified in paragraph 4 of General Instruction I.B. of that Form; or in the case of a registration statement on Form S–4 (§ 239.25 of this chapter) that there is continued compliance with General Instruction G of that Form or on Form F–4 (§ 239.34 of this chapter) that there is continued compliance with General Instruction F of that Form:

(a) The post-effective amendment shall become effective upon filing with the Commission; and

(b) With respect to securities sold on or after the filing date pursuant to a prospectus which forms a part of a Form S–8 or Form F–12 registration statement; or a Form S–3 registration statement relating to a dividend or interest reinvestment plan; or a Form F–3 registration statement relating to a transaction meeting the requirements specified in paragraph 4 of General Instruction I.B. of that Form; or a Form S–4 registration statement complying with General Instruction F of that Form and which has been amended to include or incorporate new full year financial statements or to comply with the provisions of section 10(a)(3) of the Act, the effective date of the registration statement shall be deemed to be the filing date of the post-effective amendment.

8. By adding § 230.469 to read as follows:

§ 230.469 Effectiveness of registration statements made on Form F–12.

(a) A registration statement on Form F–12 (§ 239.44 of this chapter) relating to securities offered in connection with an exchange offer or a business combination, shall become effective upon the filing of the Form F–12 with the Commission by the registrant.

(b) Notwithstanding the provisions of paragraph (a) of this section, a registration statement or post-effective amendment relating to an issue of debt securities shall not become effective until the provisions of the Trust Indenture Act of 1939 (15 U.S.C. 77aaa *et seq.*) have been complied with or an exemption from the provisions of that Act has been granted pursuant to section 304(d) (15 U.S.C. 77ddd(d)) under that Act.

9. By revising paragraph (d) of § 230.473 to read as follows:

§ 230.473 Delaying amendments.

* * * * *

(d) No amendments pursuant to paragraph (a) of this section may be filed with a registration statement on Form S–8 or Form F–12 (§ 239.16b or 44 of this chapter); on Forms S–3, F–2, F–3 (§ 239.13, 32 or 33 of this chapter) relating to a dividend or interest reinvestment plan; or on Form S–4 (§ 239.25 of this chapter) complying with General Instruction G of that Form or on Form F–4 (§ 239.34 of this chapter) complying with General Instruction F of that Form.

10. By adding § 230.802 to read as follows:

§ 230.802 Exemption for limited offerings, not exceeding $5,000,000, in connection with an exchange offer or business combination.

Preliminary Notes

1. The following § 230.802 relates solely to the application of section 5 of the Securities Act of 1933 (the "Act") (15 U.S.C. 77e) and not to the applicability of the antifraud, civil liability or other provisions of the federal securities laws.

2. In view of the objectives of this § 230.802 and the policies underlying the Act, § 230.802 is not available with respect to any transaction or series of transactions that, although in technical compliance with this rule, is part of a plan or scheme to evade the

VOL 56 ISS 115 JE 14 1991 UMI

registration provisions of the Act. In such cases, registration under the Act is required.

3. Nothing in this § 230.802 obviates the need for any issuer or any other person to comply with the securities registration or broker-dealer registration requirements of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a *et seq.*) or other provisions of the federal securities laws, whenever such requirements are applicable.

4. Nothing in this § 230.802 obviates the need to comply with any applicable state law relating to the offer and sale of securities.

5. Attempted compliance with § 230.802 does not act as an exclusive election; a person making an offer or sale of securities or engaging in a business combination in reliance on § 230.802 may also claim the availability of any other applicable exemption from the registration requirements of the Act.

6. Section 230.802 provides an exemption only for the transaction in which the securities are exchanged by the issuer, not for the securities themselves. Securities of foreign private issuers, whether or not acquired in a transaction made in reliance on § 230.802, may be resold in the United States only if they are registered under the Act or an exemption from registration is available.

7. The provisions of this rule shall not apply to exchange offers or business combinations by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*)

8. Offers and sales made outside the United States, will not affect a contemporaneous exchange offer made in compliance with this § 230.802 and will not be included in calculating the aggregate dollar amount of securities to be exchanged for securities held by U.S. holders in compliance with this § 230.802. A transaction made in compliance with § 230.802 will not be integrated with registered domestic offerings or domestic offerings that satisfy the requirements for an exemption from registration under the Act, including an exemption under other rules adopted pursuant to section 3(b) of the Act, even if undertaken contemporaneously. No adjustment to the aggregate offering amount shall be made for other offerings by an offeror made in reliance upon an exemption under other rules adopted pursuant to section 3(b) of the Act.

(a) *Definitions.* As used in Rule 802, the following terms shall have the meaning indicated.

(1) *Foreign private issuer* shall have the same meaning as set forth in Rule 405 of Regulation C (§ 230.405 of this chapter).

(2) *Foreign target company* as applied in § 230.802 shall mean any foreign private issuer whose securities are the subject of a tender or exchange offer ("subject securities").

(3) The term *U.S. holder*, as applied to security holders, shall mean any person whose address appears on the records of the issuer of the subject securities, of any voting trustee, depositary, share transfer agent, or any person acting on behalf of the issuer of the subject securities, as being located in the United States.

(4) *Home jurisdiction.* With respect to an exchange offer of securities made in reliance on § 230.802, the *home jurisdiction* shall mean the country of the foreign target company's organization, incorporation or chartering.

(5) *United States* means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

(6) *Business combination* is defined as a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of shareholders of one or more of the participating companies.

(7) For purposes of § 230.802 *aggregate dollar amount* means the total dollar amount the offeror proposes to issue upon exchange for those securities of a single class held by U.S. holders, assuming that all the subject securities held in the United States are exchanged. The dollar amount of the securities being offered shall be calculated based upon the market value of the securities held by U.S. holders to be received by the registrant or cancelled in the exchange offer or business combination as established by the price of the securities of the same class, as determined in accordance with paragraph (c) of Rule 457 of the Act (17 CFR 230.457 of this chapter). If any securities being offered are valued in a foreign currency, the aggregate amount shall be translated into United States currency at the currency exchange rate in effect at a reasonable time prior to or on the date the exchange offer is first published, sent or given to security holders.

(b) *Exemption.* Any exchange offer for a class of securities of a foreign private issuer, or any exchange of securities for the securities of a foreign private issuer in connection with any business combination, that satisfies the conditions of paragraphs (c), (d) and (e) of this § 230.802 shall be exempt from the registration provisions of section 5 of the Act (15 U.S.C. 77e) under section 3(b) of the Act (15 U.S.C. 77c(b)).

(c) *Conditions to be met—(1) Limitation on aggregate dollar amount.* As of the commencement of the exchange offer or business combination, the aggregate dollar amount of securities being offered pursuant to the tender offer or business combination shall not exceed $5,000,000.

(2) *Manner of the exchange offer.* Any exchange offer or business combination made in reliance on this § 230.802 must permit U.S. holders to participate in the offer on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the offer; *provided, however,* if the offer and sale of securities constituting the consideration offered in an exchange offer is required to be registered or qualified in a particular U.S. state or jurisdiction, and the offeror does not so register or qualify the offering, the offeror shall offer security holders in such state a cash alternative, if cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the offeror need not extend the offer to security holders in any state requiring registration or qualification.

(d) *Statements required in all offering circulars for securities of foreign issuers.* To the extent applicable, there shall be set forth on the outside cover page of any offering document(s) the following legends in bold-face roman type at least as high as ten-point modern type and at least two points leaded:

THIS EXCHANGE OFFER IS MADE FOR THE SECURITIES OF A FOREIGN PRIVATE ISSUER AND WHILE THE OFFER IS SUBJECT TO DISCLOSURE REQUIREMENTS OF THE COUNTRY IN WHICH THE SUBJECT COMPANY IS ORGANIZED, INVESTORS SHOULD BE AWARE THAT THESE REQUIREMENTS ARE DIFFERENT FROM THOSE OF THE UNITED STATES. FINANCIAL STATEMENTS INCLUDED HEREIN, IF ANY, HAVE BEEN PREPARED IN ACCORDANCE WITH FOREIGN ACCOUNTING STANDARDS, AND ARE SUBJECT TO FOREIGN AUDITING AND AUDITOR INDEPENDENCE STANDARDS, AND THUS MAY NOT BE COMPARABLE TO FINANCIAL STATEMENTS OF UNITED STATES COMPANIES.

THE ENFORCEMENT BY INVESTORS OF CIVIL LIABILITIES UNDER THE FEDERAL SECURITIES LAWS MAY BE AFFECTED ADVERSELY BY THE FACT THAT THE SUBJECT COMPANY IS LOCATED IN A FOREIGN COUNTRY, AND THAT SOME OR ALL OF ITS OFFICERS AND DIRECTORS ARE RESIDENTS OF A FOREIGN COUNTRY.

INVESTORS ALSO SHOULD BE AWARE THAT THE BIDDER OR ITS AFFILIATES, DIRECTLY OR INDIRECTLY, MAY BID FOR OR MAKE PURCHASES OF THE SUBJECT COMPANY'S SECURITIES THAT ARE THE SUBJECT OF THE EXCHANGE OFFER OR OF THE SUBJECT COMPANY'S RELATED SECURITIES, OR OF THE BIDDER'S SECURITIES TO BE DISTRIBUTED OR OF THE BIDDER'S RELATED SECURITIES, DURING THE PERIOD OF THE EXCHANGE OFFER, AS PERMITTED BY THE HOME JURISDICTION'S LAWS, REGULATIONS OR POLICIES.

(e) *Dissemination of information.* All offerees that are U.S. holders shall be provided with the same notices, documents or other information as that provided to the offerees in the home jurisdiction of the issuer at the same time that, or as soon as practicable after, such notices, documents or other information are made available to home jurisdiction offerees. If in lieu of delivering notices, documents, or other information to offerees in the home jurisdiction, information regarding the offering is being published or advertised in a home jurisdiction publication, then the issuer may at its option publish substantially equivalent information in the English language in a publication of general circulation in the United States or deliver a written copy of the home jurisdiction publication or advertisement to each offeree that is a U.S. holder at the same time that, or as soon as practicable after, the information becomes publicly available in the home jurisdiction of the issuer. If such notice document, or other information is furnished to the home jurisdiction offerees in a language other than English, then an English translation or summary of such notice, document, or other information shall be furnished to the offerees that are U.S. holders.

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

11. The authority citation for part 239 is revised to read:

Authority: 15 U.S.C. 77a, *et seq.*, unless otherwise noted.

12. By adding § 239.44 to read as follows:

Note: See appendix of this release for text of proposed Forms. The Forms do not appear in the Code of Federal Regulations.

§ 239.44 Form F–12, for registration under the Securities Act of 1933 of securities of certain foreign private issuers to be issued in exchange tender offers or business combinations.

(a) Eligibility Requirements for Use of Form F–12.—(1) *General.* Form F–12 may be used for registration under the Securities Act of 1933 ("Securities Act") of securities to be issued in an exchange offer or in connection with a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of shareholders of one or more of the participating companies (a "business combination"). Securities may be registered on this Form whether they constitute the sole consideration for such exchange offer or business combination, or are offered in conjunction with cash, provided the conditions specified in paragraphs (b)–(f) of this section are met.

(2) Form F–12 shall not be used if the Registrant is an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*).

(b) *Eligibility Requirements for Exchange Offers on Form F–12.* In the case of an exchange offer, Form F–12 is available if:

(1) The Registrant is a foreign private issuer;

(2) The Registrant is a Reporting Issuer, or has furnished on or before the date of filing of this Form F–12 an initial submission of information required by Rule 12g3–2(b) of the Securities Exchange Act of 1934 ("Exchange Act") (§ 240.12g3–2(b));

(3) Five percent or less of the class of securities that is the subject of the exchange offer are held by U.S. holders other than U.S. holders of more than 10 percent of the subject class; and

(4) The Registrant has a class of equity securities listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S (§ 230.902(a)(1) of this chapter) for the 36 months immediately preceding the filing of the registration statement on this Form, and is currently in compliance with the obligations arising from such listing; or such equity security is listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S and has a 36 month operating history and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing.

(5) If the Registrant is a successor Registrant surviving after a business combination, it shall be deemed to meet the eligibility requirements of the Form if the successor Registrant has had a class of equity securities listed on a designated offshore securities market as defined in Rule 902(a)(1) of Regulation S, for a period of time that, when added separately to the time each predecessor company had been so listed at the time of the business combination, equals at least 36 months and is currently in compliance with the obligations arising from such listing; or the successor Registrant has had a class of equity securities listed on a designated offshore securities market since the business combination and has an operating history that when added separately to that of each predecessor company equals 36 months or more, and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing; *provided, however,* that the listing or operating history of any predecessor company need not be combined with that of the successor Registrant for purposes of satisfying such 36 month listing and operating requirements if other predecessor companies whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the successor Registrant, as measured based on a pro forma combination of such participating companies' most recently completed fiscal years immediately prior to the business combination, when combined with the listing and operating history of the successor Registrant, each meet such listing or reporting requirements.

(c) *Eligibility Requirements for Business Combinations on Form F–12.* In the case of a business combination, Form F–12 is available if:

(1) Each company participating in the business combination, including the Registrant, is a foreign private issuer;

(2) The Registrant has made on or before the filing of this Form an initial submission of information required by Rule 12g3–2(b) of the Exchange Act;

(3) Five percent or less of the class of securities that is offered in the exchange offer by the Registrant is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, as measured upon the completion of the business combination; and

(4) Each company participating in the business combination other than the Registrant has a class of its equity securities listed on a designated offshore securities market for the 36 months immediately preceding the filing of this Form and is currently in compliance with the obligations arising from such listing; or if one or more participating companies has not been listed on a designated offshore securities market for 36 months immediately prior to the offer, the Registrant may nevertheless use Form F–12 if such participating company or companies has a class of equity securities currently listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S and has a three year operating history and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing; *provided, however,* that a participating company shall not be required to meet such listing or reporting requirements if other participating companies whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the Registrant, as measured based on a pro forma combination of such participating companies' most recently completed fiscal years, when combined with the

VOL 56 ISS 115 JE 14 1991 UMI

listing and operating history of the successor Registrant, each meet such listing or reporting requirements.

(d) *Equal treatment of security holders.* Form F-12 shall only be available with respect to exchange offers and business combinations in which U.S. holders participate on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the exchange offer or business combination. If the offer and sale of securities constituting the consideration offered in an exchange offer is prohibited by the appropriate authority of a state after a good faith effort by the offeror to register or qualify the offer and sale of such securities in such state or jurisdiction, the offeror shall offer security holders in such state a cash alternative, if such cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the offeror need not extend the offer to security holders in any state requiring registration or qualification.

(e) *Incorporation by reference.* Information may be incorporated by reference into the Form F-12 that is permitted to be incorporated by the home jurisdiction or by the regulatory authority on whose designated offshore securities market the class of equity securities of the offeror is listed. In addition, information contained in a filing with the Commission or information that has been furnished to the Commission pursuant to Rule 12g3-2(b) of the Exchange Act may be incorporated by reference to the Form F-12 and will in such case be deemed a part of such registration statement. Information incorporated by reference that has not already been filed or furnished to the Commission must be included in the Form F-12 as an exhibit.

(f) *Consent to service of process.* Registrants shall file a Form F-X (§ 239.41 of this chapter) with the Commission together with this Form.

Instructions for Form F-12

1. For purposes of this Form, *foreign private issuer* shall have the same meaning as set forth in Rule 405 (§ 230.405) under the Securities Act.

2. For purposes of this Form, *Reporting Issuer* means an issuer other than an investment company registered or required to be registered under the Investment Company Act of 1940 that: (i) has a class of securities registered pursuant to section 12(b) or 12(g) of the Exchange Act (15 U.S.C. 78*l*(b) or 78*l*(g)) or is required to file reports pursuant to section 15(d) of the Exchange Act (15 U.S.C. 78o(d)); and (ii) has filed all the materials required to be filed pursuant to section 13(a) or 15(d) of the Exchange Act (15 U.S.C. 78m(a) or 78o(d)) for a period of at least 12 months immediately preceding the commencement date of the offering being registered on this Form (or such shorter period that the issuer was required to file such material).

3. For purposes of satisfying the 36 month listing and reporting requirement of this Form, *equity securities* shall mean common shares, non-voting equity shares and subordinate or restricted voting equity shares, but shall not include preferred shares.

4. For purposes of this Form, the term *designated offshore securities market* shall have the same meaning as Rule 902(a)(1) of Regulation S under the Securities Act.

5. For purposes of this Form, the *public float of specified securities* shall mean only such securities held by persons other than U.S. holders of more than 10 percent of the issuer. The market value of the Registrant's outstanding equity securities shall be computed by use of the price at which such shares were last sold, or the average of the bid and asked prices of such shares, in the principal market for such shares as of a date within 60 days prior to the date of filing. If there is no market for any of such securities, the book value of such securities computed as of the latest practicable date prior to the filing of this Form shall be used for purposes of calculating the market value, unless the issuer of such securities is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such securities shall be used.

6. For purposes of this Form, the term *U.S. holder* shall mean any person whose address appears on the records of the issuer of the subject securities, any voting trustee, depositary, share transfer agent or any person acting in a similar capacity on behalf of the issuer of the subject securities, as being located in the United States. With respect to any exchange offer eligible to proceed in accordance with Rule 14d-1(c) or 13e-4(h) under the Exchange Act, U.S. holders, other than U.S. holders of more than 10 percent of the subject class, will be presumed to hold of record, as calculated in accordance with these instructions, five percent or less of the class of securities that are the subject of the exchange offer, if the foreign target company does not have an obligation to file reports with the Commission pursuant to section 13(a) or 15(d) of the Securities Act and has not furnished documents to the Commission pursuant to the exemption provided by Rule 12g3-2(b), unless the offeror has actual knowledge at the commencement of the exchange offer that the level of ownership of the class of securities that are the subject of the exchange offer by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, exceeds five percent.

7. If this Form is filed during the pendency of an ongoing third-party or issuer tender or exchange offer for securities of the class subject to the offer that was commenced on Schedule 13E-4, Schedule 14D-1, Form 13E4H, Form 14D1C and/or Form F-8M, the date for calculation of U.S. record ownership for purposes of this Form shall be the same as that date used by the initial offeror.

8. For purposes of this Form, the outstanding class of securities that is the subject of the exchange offer or business combination shall include American Depositary Receipts exchangeable or convertible for such securities, but shall not otherwise include any securities that may be converted into or are exchangeable for the subject securities.

9. For purposes of this Form, the calculation of securities held by U.S. holders shall be made as of the end of the subject company's last fiscal year or, if such fiscal year terminated within 180 days of the filing date, as of the end of the subject company's preceding fiscal year.

10. For purposes of this Form, the term *home jurisdiction* is defined as the jurisdiction of the foreign target company's incorporation, organization or chartering.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

13. The authority citation for part 240 continues to read as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a-29, 80a-37, unless otherwise noted.

14. By revising paragraphs (d)(1) and (d)(2) of § 240.12g3-2 to read as follows:

§ 240.12g3-2 Exemptions for American depositary receipts and certain foreign securities.

* * * * *

(d) * * *

(1) Securities of a foreign private issuer that has or has had during the prior eighteen months any securities registered under section 12 of the Act or a reporting obligation (suspended or active) under section 15(d) of the Act (other than arising solely by virtue of the use of Form F-12);

(2) Securities of a foreign private issuer issued in a transaction (other than a transaction registered on Form F-12) to acquire by merger, consolidation, exchange of securities or acquisition of assets, another issuer that had securities registered under section 12 of the Act or a reporting obligation (suspended or active) under section 15(d) of the Act; and

* * * * *

15. By adding § 240.12h-4 to read as follows:

§ 240.12h-4 Exemption from duty to file reports under section 15(d).

An issuer shall be exempt from the duty under section 15(d) of the Act to file reports required by section 13(a) of the Act with respect to securities registered under the Securities Act of 1933 on Form F-12 under the Securities Act of 1933.

16. By amending § 240.13e-4 to redesignate paragraph (h) as (i) and to add new paragraph (h) to read as follows:

§ 240.13e-4 Tender offers by issuers.

* * * * *

(h) Any issuer tender offer, including any exchange offer, by a foreign private issuer, shall be exempt from the requirements imposed by Rule 13e-4 (§ 240.13e-4) and Schedule 13E-4 (§ 240.13e-101) thereunder, if 10 percent or less of the outstanding class of securities that is the subject of the tender offer is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, *provided that:*

(1) U.S. holders must participate in the offer on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the offer; unless:

(i) The offer and sale of securities constituting the consideration offered in the issuer tender offer is prohibited by the appropriate authority of a state after a good faith effort by the issuer to register or qualify the offer and sale of such securities in such state or jurisdiction, in which case the issuer shall offer security holders in such state a cash alternative if such cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the issuer need not extend the offer to security holders in any state requiring registration or qualification.

(ii) In the case of an issuer exchange offer exempt from registration under § 230.802 of the Securities Act, if the offer and sale of securities constituting the consideration offered is required to be registered or qualified and the issuer does not register or qualify the exchange offer, the issuer shall offer security holders in such state a cash alternative, if such consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the issuer need not extend the offer to security holders in any state requiring registration or qualification.

(iii) In the case of a cash tender offer, an issuer will not be required to extend an alternative non-cash consideration that has been offered security holders in the subject company's home jurisdiction, so long as the purpose of such alternative consideration is the deferral of income taxes.

(2) The entire disclosure document, registration statement and/or prospectus required to be furnished to holders of the class of securities to be acquired shall be furnished to the Commission on Form 13E4H (§ 240.13e-102) and disseminated to U.S. holders in accordance with the issuer's home jurisdiction's laws, regulations or policies, including any amendment or supplement; *provided, however,* that if dissemination solely by publication is permitted by the issuer's home jurisdiction, the tender offer shall be published in the United States in a manner reasonably calculated to inform U.S. holders of the offer: *Provided, further,* that publication in all U.S. editions of a daily newspaper with a national circulation shall be deemed to constitute adequate publication. If such document, notice, summary publication, advertisement or other information is furnished to the home jurisdiction security holders in a language other than English, then an English translation of such document, notice or other information shall be furnished to U.S. holders.

(3) For purposes of this paragraph (h):

(i) The calculation of the securities held by U.S. holders shall be determined by reference to the issuer's latest fiscal year end report filed or submitted to the Commission or, if such fiscal year end terminated within 180 days of the filing date, as of the end of the issuer's preceding fiscal year.

(ii) An issuer or affiliate may conclusively presume that the securities held by U.S. holders, other than by U.S. holders of more than 10 percent of the subject class, does not exceed 10 percent of the outstanding securities if the issuer has not filed any reports pursuant to sections 13(a) or 15(d) of this Act nor furnished documents pursuant to the exemption provided by Rule 12g3-2(b) of this Act to the Commission, unless the issuer or affiliate otherwise knows at the commencement of the offer that the percentage of securities held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, exceeds the prescribed level.

(iii) For purposes of identifying the class of securities that is the subject of the offer, the class shall include American Depositary Shares exchangeable or convertible for such securities, but shall not otherwise include any securities that may be converted into or are exchangeable for the subject securities.

(iv) The term *home jurisdiction* shall mean the jurisdiction of the issuer's incorporation, organization or chartering.

(v) If a Form 13E4H is submitted during the pendency of an ongoing tender or exchange offer for securities of the class subject to this offer that was commenced on Schedules 13E-4, 14D-1, Forms 13E4H, 14D1C and/or Form F-12, the date for calculation of the securities held by U.S. holders for purposes of this Form shall be the same as that date used by the initial offeror.

(vi) For purposes of this section, *U.S. holder* shall mean any person whose address appears on the records of the issuer of the subject securities, of any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity on behalf of the issuer of the subject securities as being located in the United States.

(4) This paragraph (h) shall not be used by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*)

17. By adding § 240.13e-102 to read as follows:

§ 240.13e-102 Form 13E4H, Tender offer submission pursuant to section 13(e)(1) of the Securities Exchange Act of 1934 and § 240.13e-4 thereunder.

Form 13E4H

Issuer Tender Offer Submission Pursuant to Section 13(e)(1) of the Securities Exchange Act of 1934

(Amendment No._____)

(Exact name of Issuer as specified in its charter)

(Translation of Issuer's Name into English (if applicable))

(Jurisdiction of Issuer's Incorporation or Organization)

(Name(s) of Person(s) Submitting Form)

(Title of Class of Securities)

(CUSIP Number of Class of Securities) (if applicable)

(Name, address (including zip code) and telephone number (including area code) of person authorized to receive notices and communications on behalf of the person(s) filing statement)

(Date tender offer first published, sent or given to security holders)

General Instructions

I. Eligibility Requirements for Use of Form 13E4H

A. This Form shall be used for furnishing information pursuant to paragraph (h) of Rule 13e-4 under the Securities Exchange Act of 1934 ("Exchange Act"). Form 13E4H may be used by any issuer or affiliate if: (1) the issuer

VOL 56 ISS 115 JE 14 1991 UMI

or affiliate is a foreign private issuer; (2) the issuer is making a tender or exchange offer for the issuer's own securities; and (3) 10 percent or less of the outstanding class of such issuer's securities that is the subject of the tender offer or exchange offer is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class.

B. Any issuer or affiliate using this Form must permit security holders residing in the United States to participate on terms not less favorable than those offered any other holder of the class of securities that is the subject of the tender offer. See Rule 13e–4(h) under the Exchange Act.

C. The information and documents furnished on this Form are not to be deemed "filed" with the Commission or otherwise subject to the liabilities of Section 18 of the Exchange Act.

D. If this Form is filed during the pendency of an ongoing tender or exchange offer for securities of the class subject to this offer that was commenced on Schedules 13E–4, 14D–1, Forms 13E4H, 14D1C and/or Form F–12, the date for calculation of the securities held by U.S. holders for purposes of this Form shall be the same as that date used by the initial offeror.

II. Instructions for Submitting Form

A. Five copies of this Form and any amendment thereto (see Part I, Item 1.(b)), including all exhibits and any other paper or document filed as part of the Form, shall be furnished to the Commission at its principal office. Each copy shall be bound, stapled or otherwise compiled in one or more parts, without stiff covers. The binding shall be made on the side or stitching margin in such manner as to leave the reading matter legible.

B. The original and at least one copy of this Form and any amendments thereto shall be signed manually by the persons specified herein. Unsigned copies shall be conformed.

C. The entire disclosure document, registration statement and/or prospectus required to be furnished to holders of the class of securities to be acquired shall be furnished to the Commission on this Form and disseminated to security holders of the issuer residing in the United States in accordance with the issuer's home jurisdiction's laws, regulations or policies, including any amendment or supplement; *provided, however,* that if dissemination solely by publication is permitted by the issuer's home jurisdiction, the tender offer shall be published in the United States in a manner reasonably calculated to inform U.S. holders of the offer: *provided, further,* that publication in all U.S. editions of a daily newspaper with a national circulation shall be deemed to constitute adequate publication. If such document, notice, summary publication, advertisement or other information is furnished to the home jurisdiction security holders in a language other than English, then an English translation of such document, notice or other information shall be furnished to U.S. holders. A substantive summary, version or translation in English must be furnished of all exhibits.

D. The manually signed original of the Form or any amendment thereto shall be numbered sequentially (in addition to any internal numbering which otherwise may be present) by handwritten, typed, printed or other legible form of notation from the first page of the document through the last page of that document and any exhibits or attachments thereto. Further, the total number of pages contained in a numbered original shall be set forth on the first page of the document.

E. The issuer's attention is directed to Rules 10b–6 and 10b–7 under the Exchange Act in the case of an exchange offer, and to Rule 10b–13 under the Exchange Act for any exchange or cash tender offer. [See Securities Exchange Act Release No. 34–xxxxx containing exemptions from Rules 10b–6, 10b–7 and 10b–13.]

PART I—INFORMATION TO BE SENT TO SHAREHOLDERS

Item 1. Home Jurisdiction Documents

(a) This Form shall be accompanied, if applicable, by the entire disclosure document or documents required to be delivered to holders of securities to be acquired by the issuer in the proposed transaction pursuant to the laws, regulations or policies of the home jurisdiction in which the issuer is incorporated, organized or chartered, and any other foreign, provincial and/or territorial law, regulation or policy relating to the terms and conditions of the offer. The Form must include any documents incorporated by reference into such disclosure document(s) and not distributed to offeree's pursuant to any such law, regulation or policy. If any part of the document or documents to be sent to shareholders is in a language other than English, it shall be accompanied by a translation in English.

(b) Any amendment made by the issuer to a home jurisdiction document or documents shall be furnished to the Commission under cover of this Form, which must indicate on the cover page the number of the amendment.

(c) In an exchange offer where securities of the issuer registered pursuant to Section 12 of the Exchange Act have been or are to be offered or cancelled in the transaction, absent an exemption: (i) Securities shall be registered on the Commission's Form F–12, if permitted, and (ii) such securities shall be registered on other Commission prescribed forms, and (iii) the home jurisdiction offering document and the Commission prescribed form shall be included in Form 13E4H as an exhibit.

Item 2. Informational Legends

The following legends, to the extent applicable, shall appear on the outside cover page of any offering document(s) used pursuant to Rule 13e–4(h) in bold-face roman type at least as high as ten-point modern type and at least two points leaded:

THIS TENDER OFFER IS MADE BY A FOREIGN PRIVATE ISSUER FOR ITS OWN SECURITIES, AND WHILE THE OFFER IS SUBJECT TO DISCLOSURE REQUIREMENTS OF THE COUNTRY IN WHICH THE ISSUER IS INCORPORATED OR ORGANIZED, INVESTORS SHOULD BE AWARE THAT THESE REQUIREMENTS ARE DIFFERENT FROM THOSE OF THE UNITED STATES. FINANCIAL STATEMENTS INCLUDED HEREIN, IF ANY, HAVE BEEN PREPARED IN ACCORDANCE WITH FOREIGN ACCOUNTING STANDARDS, AND ARE SUBJECT TO FOREIGN AUDITING AND AUDITOR INDEPENDENCE STANDARDS, AND THUS MAY NOT BE COMPARABLE TO FINANCIAL STATEMENTS OF UNITED STATES COMPANIES.

THE ENFORCEMENT BY INVESTORS OF CIVIL LIABILITIES UNDER THE FEDERAL SECURITIES LAWS MAY BE AFFECTED ADVERSELY BY THE FACT THAT THE ISSUER IS LOCATED IN A FOREIGN COUNTRY, AND THAT SOME OR ALL OF ITS OFFICERS AND DIRECTORS ARE RESIDENTS OF A FOREIGN COUNTRY.

INVESTORS SHOULD BE AWARE THAT THE ISSUER OR ITS AFFILIATES, DIRECTLY OR INDIRECTLY, MAY BID FOR OR MAKE PURCHASES OF THE SECURITIES OF THE ISSUER SUBJECT TO THE OFFER, OR OF ITS RELATED SECURITIES, DURING THE PERIOD OF THE ISSUER TENDER OFFER, AS PERMITTED BY APPLICABLE FOREIGN LAWS OR PROVINCIAL LAWS OR REGULATIONS.

PART II—INFORMATION NOT REQUIRED TO BE SENT TO SHAREHOLDERS

The exhibits specified below shall be furnished as part of the Form, but are not required to be sent to shareholders unless so required pursuant to the laws, regulations or policies of the home jurisdiction. Exhibits shall be lettered or numbered appropriately for convenient reference.

(1) Furnish to the Commission any reports or information that, in accordance with the requirements of the home jurisdiction(s), must be made publicly available by the issuer in connection with the transaction, but need not be disseminated to shareholders.

(2) Furnish to the Commission copies of any documents incorporated by reference into the home jurisdiction document(s).

(3) If any name is signed to the Form pursuant to a power of attorney, manually signed copies of any such power of attorney shall be furnished to the Commission. If the name of any officer signing on behalf of the issuer is signed pursuant to a power of attorney, certified copies of a resolution of the issuer's board of directors authorizing such signature also shall be filed.

PART III—SIGNATURES

A. The Form shall be signed by each person on whose behalf the Form is being furnished or its authorized representative. If the Form is signed on behalf of a person by his authorized representative (other than an executive officer or general partner of the company), evidence of the representative's authority shall be furnished with the Form.

B. The name of each person who signs the Form shall be typed or printed beneath his signature.

After due inquiry and to the best of my knowledge and belief, I certify that the information set forth in this statement is true, complete and correct.

(Signature) _____

(Name and Title) _____

(Date) _____

18. By amending § 240.14d–1 to redesignate paragraph (c) (proposed at 55 FR 46321, Nov. 2, 1990) as (d) and to add a new paragraph (c) and Notes thereto to read as follows:

§ 240.14d–1 Scope of and definitions applicable to Regulations 14D and 14E.

* * * * *

(c) Any tender offer, including any exchange offer, for the securities of a foreign private issuer shall be exempt from the requirements imposed by sections 14(d)(1) through 14(d)(7) of the Act, Regulation 14D and Schedules 14D–1 and 14D–9 thereunder, and Rule 14e–1 of Regulation 14E under the Act, if 10 percent or less of the outstanding class of securities that is the subject of the tender offer is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, *provided that:*

(1) U.S. holders must participate in the offer on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the tender offer; unless

(i) The offer and sale of securities constituting the consideration offered in the tender offer is prohibited by the appropriate authority of a state after a good faith effort by the bidder to register or qualify the offer and sale of such securities in such state or jurisdiction, in which case the bidder shall offer security holders in such state a cash alternative. If such cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the bidder need not extend the offer to security holders in any state requiring registration or qualification.

(ii) In the case of an exchange offer exempt from registration under Rule 802 of the Securities Act, if the offer and sale of securities constituting the consideration offered in the tender offer is prohibited by the appropriate authority of a state after a good faith effort by the bidder to register or qualify the offer and sale of such securities in such state or jurisdiction, in which case the bidder shall offer security holders in such state a cash alternative, if such cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered to security holders, the bidder need not extend the offer to security holders in any state requiring registration or qualification.

(iii) In the case of a cash offer a bidder will not be required to extend an alternative non-cash consideration that has been offered security holders in the home jurisdiction, so long as the purpose of such alternative consideration is the deferral of income taxes.

(2) The entire disclosure document, registration statement and/or prospectus required to be furnished to holders of the outstanding class of securities to be acquired, in the case of a class of equity securities registered under section 12 of the Exchange Act, shall be furnished to the Commission on Form 14D1C (§ 240.14d–104) and disseminated to U.S. holders in accordance with the subject company's home jurisdiction's laws, regulations and policies, including any amendment or supplement; *provided, however,* that if dissemination solely by publication is permitted by the issuer's home jurisdiction, the tender offer shall be published in the United States in a manner reasonably calculated to inform U.S. holders of the offer: *provided, further,* that publication in all U.S. editions of a daily newspaper with a national circulation shall be deemed to constitute adequate publication. If such document, notice, summary publication, advertisement or other information is furnished to the home jurisdiction security holders in a language other than English, then an English translation of such document, notice or other information shall be furnished to the U.S. holders.

(3) For purposes of this paragraph (c):

(i) The calculation of the securities held by U.S. holders shall be determined by reference to the subject company's latest fiscal year end report filed or submitted to the Commission or, if such fiscal year end terminated within 180 days of the filing date, as of the end of the subject company's preceding fiscal year.

(ii) A bidder may conclusively presume that the securities held by U.S. holders, other than by U.S. holders of more than 10 percent of the subject class, does not exceed 10 percent of the outstanding securities if the subject company has not filed any reports pursuant to section 12(a) or 15(d) of this Act nor furnished documents pursuant to the exemption provided by Rule 12g3–2(b) (§ 240.12g3–2[b]) of this Act to the Commission, unless the bidder otherwise knows at the commencement of the offer that the percentage of securities held by U.S. holders, other than by U.S. holders of more than 10 percent of the subject class, exceeds the prescribed level.

(iii) For purposes of identifying the outstanding class of securities that is the subject of the offer, the class shall include American Depositary Shares exchangeable or convertible for such securities, but shall not otherwise include any securities that may be converted into or are exchangeable for the subject securities.

(iv) The term *home jurisdiction* shall mean the jurisdiction of the subject company's incorporation, organization or chartering.

(v) If a Form 14D1C is submitted during the pendency of an ongoing tender or exchange offer for securities of the class subject to this offer that was commenced on Schedules 13E–4, 14D–1, Forms 13E4H, 14D1C and/or Form F–12, the date for calculation of the securities held by U.S. holders for purposes of this Form shall be the same as that date used by the initial offeror.

(vi) For purposes of this section, "U.S. holder" shall mean any person whose address appears on the records of the issuer of the subject securities, of any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity on behalf of the issuer of the subject securities as being located in the United States.

(4) This paragraph (c) shall not be used by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*).

19. By adding § 240.14d–104 to read as follows:

§ 240.14d–104 Form 14D1C. Tender offer statement pursuant to section 14(d) of the Securities Exchange Act and § 240.14d–1(c) thereunder.

Tender Offer Form Pursuant to Rule 14d–1(C) Under the Securities Exchange Act of 1934

(Amendment No. _____)

(Name of Subject Company [Issuer])

(Translation of Subject Company's [Issuer's] name into English (if applicable))

(Jurisdiction of Subject Company's [Issuer's] Incorporation or Organization)

(Name of Person(s) Furnishing Form)

(Title of Class of Securities)

(CUSIP Number of Class of Securities [if applicable])

(Name, address (including zip code) and telephone number (including area code) of person(s) authorized to receive notices and communications on behalf of subject company)

VOL 56 ISS 115 JE 14 1991 UMI

(Date tender offer first published, sent or given to security holders)

General Instructions

I. Eligibility Requirements for Use of Form 14D1C

A. This Form shall be used for furnishing information pursuant to Rule 14d–1(c) under the Securities Exchange Act of 1934 ("Exchange Act"). Form 14D1C may be used by any person making a tender offer or exchange offer (the "bidder") for securities of any foreign private issuer, where 10 percent or less of the class of the securities sought in the tender offer or exchange offer is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class.

B. Form 14D1C also may be used by the subject company to respond to a tender offer or exchange offer if required to by the home jurisdiction's laws, regulations or policies.

C. Any bidder using this Form must permit security holders residing in the United States to participate on terms no less favorable than those offered any other holder of the class of securities that is the subject of the tender offer. See Rule 14d–1(c)(1) under the Exchange Act.

D. The information and documents furnished on this Form are not to be deemed "filed" with the Commission or otherwise subject to the liabilities of Section 18 of the Exchange Act.

E. If this Form is filed during the pendency of an ongoing third-party or issuer tender offer or exchange offer for securities of the class subject to this offer that was commenced on Schedules 13E–4, 14D–1, Forms 13E4H, 14D1C and/or Form F–12, the date for calculation of the securities held by U.S. holders for purposes of this Form shall be the same as that date used by the initial offeror.

F. This Form shall not be used to comply with the reporting requirements of Section 13(d) of the Exchange Act. Bidders using this Form are reminded of their obligation to file or update a Schedule 13D where required by Section 13(d)(1) of the Exchange Act and the Commission's rules and regulations thereunder.

II. Instructions for Submitting Form

A. Five copies of this Form and any amendment thereto (see Part I, Item 1.(b)), including all exhibits and any other paper or document furnished as part of the Form, shall be furnished to the Commission at its principal office. Each copy shall be bound, stapled or otherwise compiled in one or more parts, without stiff covers. The binding shall be made on the side or stitching margin in such manner as to leave the reading matter legible.

B. The original and at least one copy of this Form and any amendments thereto shall be signed manually by the persons specified herein. Unsigned copies shall be conformed.

C. The entire disclosure document, registration statement and/or prospectus required to be furnished to holders of the outstanding class of securities to be acquired, shall be furnished to the Commission on Form 14D1C and disseminated to security holders of the subject company residing in the United States in accordance with the subject company's home jurisdiction's laws, regulations and policies, including any amendment or supplement; *provided, however,* that if dissemination solely by publication is permitted by the issuer's home jurisdiction, the tender offer shall be published in the United States in a manner reasonably calculated to inform U.S. holders of the offer; *provided, further,* that publication in all U.S. editions of a daily newspaper with a national circulation shall be deemed to constitute adequate publication. If such document, notice, summary publication, advertisement or other information is furnished to the home jurisdiction security holders in a language other than English, then an English translation of such document, notice or other information shall be furnished to the U.S. holders. A person supplying information under cover of this Form shall furnish whatever information the bidder is required to furnish to the Commission pursuant to the rules and regulations of the subject company. A substantive summary, version or translation in English must be furnished of all exhibits.

D. The manually signed original of the Form or any amendment thereto shall be numbered sequentially (in addition to any internal numbering which otherwise may be present) by handwritten, typed, printed or other legible form of notation from the first page of the document through the last page of that document and any exhibits or attachments thereto. Further, the total number of pages contained in a numbered original shall be set forth on the first page of the document.

E. The issuer's attention is directed to Rules 10b–6 and 10b–7 under the Exchange Act in the case of an exchange offer, and to Rule 10b–13 under the Exchange Act for any exchange or cash tender offer. (See Securities Exchange Act Release No. 34–xxxxx containing exemptions from Rules 10b–6, 10b–7 and 10b–13.)

PART I—INFORMATION SENT TO SHAREHOLDERS

Item 1. Home Jurisdiction Documents

(a) This Form shall be accompanied, if applicable, by the entire disclosure document or documents required to be delivered to holders of securities to be acquired in the proposed transaction by the bidder pursuant to the home jurisdiction's laws, regulations or policies governing the conduct of the tender offer. It shall include any documents incorporated by reference into such disclosure document(s) and not distributed to offerees pursuant to any such law, regulation or policy. If any part of the document or documents to be sent to shareholders is in a foreign language, it shall be accompanied by a translation in English.

(b) Any amendment made by the bidder to a home jurisdiction document or documents shall be furnished to the Commission under the cover of this Form, which must indicate on the cover page the number of the amendment.

(c) In an exchange offer where securities of the bidder have been or are to be offered in the transaction, such securities shall be registered, absent an exemption, on forms promulgated by the Commission under the Securities Act of 1933 ("Securities Act") including, where available, the Commission's Form F–12 providing for inclusion in that registration statement of the home of jurisdiction prospectus.

Item 2. Informational Legends

The following legends, to the extent applicable, shall appear on the outside cover page of any offering document(s) used pursuant to Rule 14d–1(c) in bold-face roman type at least as high as ten-point modern type and at least two points leaded:

THIS TENDER OFFER IS MADE FOR THE SECURITIES OF A FOREIGN PRIVATE ISSUER AND WHILE THE OFFER IS SUBJECT TO DISCLOSURE REQUIREMENTS OF THE COUNTRY IN WHICH THE SUBJECT COMPANY IS INCORPORATED, ORGANIZED OR CHARTERED, INVESTORS SHOULD BE AWARE THAT THESE REQUIREMENTS ARE DIFFERENT FROM THOSE OF THE UNITED STATES. FINANCIAL STATEMENTS INCLUDED HEREIN, IF ANY, HAVE BEEN PREPARED IN ACCORDANCE WITH FOREIGN ACCOUNTING STANDARDS, AND ARE SUBJECT TO FOREIGN AUDITING AND AUDITOR INDEPENDENCE STANDARDS, AND THUS MAY NOT BE COMPARABLE TO FINANCIAL STATEMENTS OF UNITED STATES COMPANIES.

THE ENFORCEMENT BY INVESTORS OF CIVIL LIABILITIES UNDER THE FEDERAL SECURITIES LAWS MAY BE AFFECTED ADVERSELY BY THE FACT THAT THE SUBJECT COMPANY IS LOCATED IN A FOREIGN COUNTRY, AND THAT SOME OR ALL OF ITS OFFICERS AND DIRECTORS ARE RESIDENTS OF A FOREIGN COUNTRY.

INVESTORS SHOULD BE AWARE THAT THE BIDDER OR ITS AFFILIATES, DIRECTLY OR INDIRECTLY, MAY BID FOR OR MAKE PURCHASES OF THE ISSUER'S SECURITIES SUBJECT TO THE OFFER, OR OF THE ISSUER'S RELATED SECURITIES, DURING THE PERIOD OF THE TENDER OFFER, AS PERMITTED BY THE HOME JURISDICTION'S LAWS OR REGULATIONS.

PART II—INFORMATION NOT REQUIRED TO BE SENT TO SHAREHOLDERS

The exhibits specified below shall be furnished as part of the Form, but are not required to be sent to shareholders unless so required pursuant to the laws, regulations or policies of the home jurisdiction. Exhibits shall be appropriately lettered or numbered for convenient reference.

(1) Furnish to the Commission any reports or information that, in accordance with the requirements of the home jurisdiction(s), must be made publicly available by the bidder in connection with the transaction but need not be disseminated to shareholders.

(2) Furnish copies of any documents incorporated by reference into the home jurisdiction document(s).

(3) If any name is signed to this Form pursuant to a power of attorney, manually signed copies of any such power of attorney shall be furnished to the Commission.

PART III—SIGNATURES

A. The Form shall be signed by each person on whose behalf the Form is furnished or its authorized representative. If the Form is signed on behalf of a person by his authorized representative (other than an executive officer or general partner of the company), evidence of the representative's authority shall be furnished with the Form.

B. The name and any title of each person who signs the Form shall be typed or printed beneath his signature.

After due inquiry and to the best of my knowledge and belief, I certify that the information set forth in this statement is true, complete and correct.

(Signature) _____
(Name and Title) _____
(Date) _____

* * * * *

20. By adding new paragraph (c)(1) to § 240.14e–2 to read as follows:

§ 240.14e–2 Position of subject company with respect to a tender offer.

* * * * *

(c) * * *

(1) Any issuer, a class of securities of which is the subject of a tender offer furnished to the Commission on Form 14D1C and conducted in reliance upon and in conformity with Rule 14d–1(c) under the Act, and any director or officer of such issuer where so required by the laws, regulations and policies of the home jurisdiction, in lieu of the statements called for by paragraph (a) of this section and Rule 14d–9 under the Act, shall furnish to the Commission on Form 14D1C the entire disclosure document(s) required to be furnished to holders of securities of the subject company by the laws, regulations and policies of the home jurisdiction and/or any of its provinces or territories governing the conduct of the tender offer, and shall disseminate such document(s) in accordance with such laws, regulations and policies.

PART 260—GENERAL RULES AND REGULATIONS, TRUST INDENTURE ACT OF 1939

21. The authority citation for part 260 continues to read as follows:

Authority: 15 U.S.C. 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss.

22. By adding § 260.4d–10 to read as follows:

§ 260.4d–10 Exemption for Securities issued pursuant to Rule 802 of the Securities Act.

Any debt security, whether or not issued under an indenture, shall be exempt from the operation of the Act if issued pursuant to Rule 802 of the Securities Act (§ 230.802).

Dated: June 5, 1991.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Appendix A—Proposed Form Under the Securities Act of 1933

Form F–12

Note: These Forms are not contained in the Code of Federal Regulations.

OMB Approval

OMB Number: xxxx–xxxx
Expires: Approval Pending
Estimated average burden hours per response..... 2.0
U.S. Securities and Exchange Commission, Washington, DC 20549

Form F–12

Registration Statement Under the Securities Act of 1933

(Exact name of Registrant as specified in its charter)

(Translation of Registrant's name into English (if applicable))

(Country or other jurisdiction of incorporation or organization)

(Primary Standard Industrial Classification Code Number (if applicable))

(I.R.S. Employer Identification Number (if applicable))

(Address and telephone number of Registrant's principal executive offices)

(Name, address (including zip code) and telephone number (including area code) of agent for service in the United States)

Approximate date of commencement of proposed sale of the securities to the public.

This registration statement and any post-effective amendment thereto shall become effective in accordance with Rules 464 and 466.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to the home jurisdiction's shelf procedures, check the following box. [ ]

Check if appropriate:

[ ] An application for exemption under Section 304(d) of the Trust Indenture Act of 1939 from Section 310 of that Act has been submitted to the Commission.

[ ] There are existing security holders under the indenture to which such application relates.

Calculation of Registration Fee *

Title of each class of securities to be registered	Amount to be registered	Proposed maximum offering price per unit	Proposed maximum aggregate offering price	Amount of registration fee

* See General Instruction II.G. for rules as to calculation of the registration fee.

If, as a result of stock splits, stock dividends or similar transactions, the number of securities purported to be registered on this registration statement changes, the provisions of Rule 416 shall apply to this registration statement.

General Instructions

I. Eligibility Requirements for Use of Form F–12

A. General

1. Form F–12 may be used for registration under the Securities Act of 1933 ("Securities Act") of securities to be issued in an exchange offer or in connection with a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of shareholders of the participating companies (a "business combination"). Securities may be registered on this Form whether they constitute the sole consideration for such exchange offer or business combination, or are offered in conjunction with cash.

2. This Form shall not be used if the Registrant is an investment company registered or required to be registered under the Investment Company Act of 1940.

B. Eligibility Requirements for Exchange Offers

1. In the case of an exchange offer, Form F–12 is available if:

(a) the Registrant is a foreign private issuer;

(b) the Registrant is a Reporting Issuer, or has furnished on or before the filing of this Form F–12 an initial submission of information required by Rule 12g3–2(b) of the Securities Exchange Act of 1934 ("Exchange Act");

(c) five percent or less of the class of securities that is the subject of the exchange offer is held by U.S. holders, other than U.S. holders of more than 10 percent of the subject class; and

(d) the Registrant has a class of equity securities listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S for the 36 months immediately preceding the filing of the registration statement on this Form, and is currently in compliance with the obligations arising from such listing; or such equity

VOL 56 ISS 115 JE 14 1991 UMI

security is listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S and has a 36 month operating history and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing.

2. U.S. holders must participate in an exchange offer, registered on Form F-12, on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the exchange offer. If the offer and sale of securities constituting the consideration offered in a tender offer is prohibited by the appropriate authority of a state after a good faith effort by the offeror to register or qualify the offer and sale of such securities in such state, the offeror shall offer security holders in such state a cash alternative, if such cash consideration has been offered in any other jurisdiction. Where a cash consideration is not being offered, the offeror need not extend the offer to security holders in any state requiring registration or qualification.

3. If the Registrant is a successor Registrant surviving after a business combination, it shall be deemed to meet the eligibility requirements of the Form if the successor Registrant has had a class of equity securities listed on a designated offshore securities market as defined in Rule 902(a)(1) of Regulation S, for a period of time that, when added separately to the time each significant predecessor company had been so listed at the time of the business combination, equals at least 36 months and is currently in compliance with the obligations arising from such listing; or the successor registrant has had a class of equity securities listed on a designated offshore securities market since the business combination and has an operating history that when added separately to that of each significant predecessor company equals 36 months or more, and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing; *provided, however,* that the listing or operating history of any predecessor company need not be combined with that of the successor Registrant for purposes of satisfying such 36 month listing and operating requirements if other predecessor companies whose assets and gross revenues, respectively, would contribute at least 80 percent of the total assets and gross revenues from continuing operations of the successor Registrant, as measured based on a pro forma combination of such participating companies' most recently completed fiscal years immediately prior to the business combination, when combined with the listing and operating history of the successor Registrant, each meet such listing or reporting requirements.

C. Eligibility Requirements for Business Combinations

1. In the case of a business combination, Form F-12 is available if:

(a) each company participating in the business combination, including the Registrant, is a foreign private issuer;

(b) the Registrant is a Reporting issuer, or has furnished on or before the filing of this Form an initial submission of information required by Rule 12g3-2(b) of the Exchange Act;

(c) five percent or less of the class of securities that is being offered in the exchange offer by the Registrant is held by U.S. holders, other than by U.S. holders of more than 10 percent of the subject class, as measured upon completion of the business combination;

(d) each company participating in the business combination other than the successor Registrant has a class of its equity securities listed on a designated offshore securities market for the 36 months immediately preceding the filing of this Form and is currently in compliance with the obligations arising from such listing; or if one or more participating companies has not been listed on a designated offshore securities market for 36 months immediately prior to the offer, the Registrant may nevertheless use Form F-12 if such participating company or companies has a class of equity securities currently listed on a designated offshore securities market as set forth in Rule 902(a)(1) of Regulation S and has a three year operating history and a public float of $75 million or more, and is currently in compliance with the obligations arising from such listing; *provided, however,* that any participating company shall not be required to meet such listing or reporting history requirements if other participating companies whose assets and gross income, respectively, would contribute at least 80 percent of the total assets and gross income from continuing operations of the Registrant, as measured based on a pro forma combination of the participating companies' most recently completed fiscal years, each meet such listing or reporting requirements.

2. U.S. holders must participate in a business combination, registered on Form F-12, on terms not less favorable than those offered any other holder of the same class of securities that is the subject of the exchange offer or business combination. If the offer and sale of securities constituting the consideration offered in a tender offer is prohibited by the appropriate authority of a state after a good faith effort by the bidder or issuer to register or qualify the offer and sale of such securities in such state, the Registrant shall offer security holders in such state a cash alternative, if such cash consideration has been offered in any other jurisdiction.

Instructions for Form F-12

1. For purposes of this form, "foreign private issuer" shall have the same meaning as set forth in Rule 405 of Regulation C under the Securities Act.

2. For purposes of this Form, "Reporting Issuer" means an issuer other than an investment company registered or required to be registered under the Investment Company Act of 1940 that: (i) has a class of securities registered pursuant to Section 12(b) or 12(g) of the Exchange Act [15 U.S.C. § 78*l*(b) or § 78*l*(g)] or is required to file reports pursuant to Section 15(d) of the Exchange Act [15 U.S.C. § 78o(d)]; and (ii) has filed all the materials required to be filed pursuant to Section 13(a) or 15(d) of the Exchange Act [15 U.S.C. § 78m(a) or 78o(d)] for a period of at least 12 months immediately preceding the commencement date of the offering being registered on this Form (or such shorter period that the issuer was required to file such material).

3. For purposes of satisfying the 36 month listing and reporting requirement of this Form, "equity securities" shall mean common shares, non-voting equity shares and subordinate or restricted voting equity shares, but shall not include preferred shares.

4. For purposes of this Form, the term "designated offshore securities market" shall have the same meaning as Rule 902(a)(1) of Regulation S under the Securities Act.

5. For purposes of this Form, the public float of specified securities shall mean only such securities held by persons other than U.S. holders of more than 10 percent of the issuer. The market value of the Registrant's outstanding equity securities shall be computed by use of the price at which such shares were last sold, or the average of the bid and asked prices of such shares, in the principal market for such shares as of a date within 60 days prior to the date of filing. If there is no market for any of such securities, the book value of such securities computed as of the latest practicable date prior to the filing of this Form shall be used for purposes of calculating the market value, unless the issuer of such securities is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such securities shall be used.

6. For purposes of this Form, the term "U.S. holder" shall mean any person whose address appears on the records of the issuer of the subject securities, any voting trustee, depositary, share transfer agent or any person acting in a similar capacity on behalf of the issuer of the subject securities, as being located in the United States. With respect to any exchange offer eligible to proceed in accordance with Rule 14d-1(c) or 13e-4(h) under the Exchange Act, U.S. holders, other than U.S. holders of more than 10 percent of the subject class, will be presumed to hold of record, as calculated in accordance with these instructions, five percent or less of the class of securities that are the subject of the exchange offer, if the foreign target company does not have an obligation to file reports with the Commission pursuant to Section 13(a) or 15(d) of the Securities Act and has not furnished documents to the Commission pursuant to the exemption provided by Rule 12g3-2(b), unless the offeror has actual knowledge at the commencement of the exchange offer that the level of ownership of the class of securities that are the subject of the exchange offer by U.S. holders, other than U.S. holders of more than 10 percent of the subject class, exceeds five percent.

7. If this Form is filed during the pendency of an ongoing tender or exchange offer for securities of the class subject to the offer that was commenced on Schedule 13E-4, Schedule 14D-1, Form 13E4H, Form 14D1C and/or Form F-12, the date for calculation of the securities held by U.S. holders for purposes of this Form shall be the same as that date used by the initial offeree.

8. For purposes of this Form, the outstanding class of securities that is the subject of the exchange offer or business combination shall include American Depositary Shares exchangeable or convertible for such securities, but shall not otherwise include any securities that may be converted into or are exchangeable for the subject securities.

9. For purposes of this Form, the calculation of securities held by U.S. holders shall be made as of the end of the subject company's last fiscal year or, if such fiscal year terminated within 180 days of the filing date, as of the end of the subject company's preceding fiscal year.

10. For purposes of this Form, the term "home jurisdiction" is defined as the jurisdiction of the foreign target company's incorporation, organization or chartering.

II. Application of General Rules and Regulations

A. The rules comprising Regulation C under the Securities Act shall not apply to filings on this Form unless specifically referred to in the Form, or unless any such rule refers specifically to this Form. Instead, the rules and regulations applicable in the foreign target company's home jurisdiction regarding the form and method of preparation of disclosure documents shall apply to filings on this Form. Securities Act rules and regulations, other than Regulation C, shall apply to filings on this Form unless specifically excluded in this Form.

B. Rule 408 under the Securities Act, which provides that in addition to the information expressly required to be included in the registration statement, there shall be added such further material information, if any, as may be necessary to make the required statements, in light of the circumstances under which they are made, not misleading, shall apply to filings on this Form.

C. Five copies of the complete registration statement and any post-effective amendments thereto, including exhibits and all other papers and documents filed as a part of the registration statement or post-effective amendment, shall be filed with the Commission at its principal office. Each copy shall be bound, stapled or otherwise compiled in one or more parts, without stiff covers. The binding shall be made on the side or stitching margin in such manner as to leave the reading matter legible. Three additional copies of the registration statement and any amendments thereto, similarly bound, shall also be filed. No exhibits are required to accompany such additional copies.

D. Any amendment to a registration statement on this Form shall be filed under cover of an appropriate facing sheet, shall be numbered consecutively in the order in which filed, and shall indicate on the facing sheet the applicable registration form on which the amendment is prepared and the file number of the registration statement.

If, however, an amendment to the home jurisdiction document(s) is filed after effectiveness of this registration statement that increases the number of securities that may be sold, in lieu of filing a post-effective amendment hereto, a new registration statement shall be filed on this Form. As provided in Rule 429, the prospectus included in the new registration statement shall be deemed to include a prospectus covering unsold securities registered previously. If this is the case, the following legend shall appear at the bottom of the facing page of the registration statement: "Pursuant to Rule 429 under the Securities Act, the prospectus contained in this registration statement relates to registration statement[s] 33-[insert file numbers of previous registration statements]."

E. At least one copy of every registration statement and any post-effective amendment thereto shall be signed manually by the persons specified herein. Unsigned copies shall be conformed.

F. At the time of filing this registration statement, the Registrant shall pay to the Commission in accordance with Rule 111 under the Securities Act, a fee in U.S. dollars in the amount prescribed by Section 6 of the Securities Act. The amount of securities to be registered on this Form need not exceed the amount to be offered in the United States as part of the offering.

G. In the case of an exchange offer, the registration fee is to be calculated as follows:

(1) Upon the basis of the market value of the securities that may be received by the registrant or cancelled in the exchange offer from United States holders as established by the price of securities of the same class, as determined in accordance with paragraph (4) of this section.

(2) If there is no market for the securities to be received by the Registrant or cancelled in the exchange offer, the book value of such securities computed as of the latest practicable date prior to the date of filing the registration statement shall be used, unless the issuer of such securities is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such securities shall be used.

(3) If any cash may be received by the Registrant from United States residents in connection with the exchange offer, the amount thereof shall be added to the value of the securities to be received by the Registrant or cancelled as computed in accordance with paragraph (1) or (2) of this section. If any cash is to be paid by the Registrant in connection with the exchange offer, the amount thereof shall be deducted from the value of the securities to be received by the Registrant in exchange as computed in accordance with paragraph (1) or (2) of this section.

(4) The market value of the Registrant's outstanding securities shall be the average of the bid and asked prices of such stock, in the principal market for such securities as of a date within 30 days prior to the date of filing.

H. In the case of a business combination, the registration fee is to be calculated as follows:

(1) Upon the basis of the market value of the equity securities of the predecessor companies held by United States holders being offered the Registrant's securities, as established by the price of the predecessors' securities of the same class determined in accordance with paragraph (4) of this section.

(2) If there is no market for the securities of the predecessor companies, the book value of such securities computed as of the latest practicable date prior to the date of filing the registration statement shall be used, unless the issuer of such securities is in bankruptcy or receivership or has an accumulated capital deficit, in which case one-third of the principal amount, par value or stated value of such securities shall be used.

(3) If any cash may be received by the Registrant from United States holders in connection with the business combination, the amount thereof shall be added to the value of the securities as computed in accordance with paragraph (1) or (2) of this section. If any cash is to be paid by the Registrant in connection with the business combination, the amount thereof shall be deducted from the value of the securities as computed in accordance with paragraph (1) or (2) of this section.

(4) The market value of a predecessor's outstanding securities shall be the average of the bid and asked prices of such securities, in the principal market for such securities as of a date within 60 days prior to the date of filing.

I. If any part of the offering circular/prospectus filed as part of the registration statement or amendment is in a language other than English, it shall be accompanied by a translation in the English language. If any other part of the registration statement or an amendment thereto, or any exhibit or other paper or document filed as part of the registration statement or an amendment, is in a language other than English, it shall be accompanied by a substantive summary, version or translation in the English language.

J. One manually signed original of the registration statement or any amendment thereto shall be numbered sequentially (in addition to any internal numbering which otherwise may be present) by handwritten, typed, printed or other legible form of notation from the first page of such document through the last page of such document, including any exhibits or attachments thereto. Further, the total number of pages contained in such numbered original shall be set forth on the first page of the document.

K. Any change to the name or address of a Registrant's agent for service shall be communicated promptly in writing to the Commission, referencing the file number of the relevant registration statement.

L. Where the offering registered on this Form is being made pursuant to the home jurisdiction's shelf procedures or procedures for pricing offerings after the final receipt has been issued, three copies of each supplement to, or supplemented version of, the home jurisdiction disclosure document(s) prepared under such procedures shall be filed with the Commission within one business day after such supplement or supplemented version is filed with the home jurisdiction. Such filings shall be deemed not to constitute amendments to this registration statement. Each such filing shall contain in the upper right corner of the cover page the following legend, which may be set forth in longhand if legible: "Filed pursuant to Instruction II.L. of Form F-12; File No. 33-[insert number of the registration statement]."

VOL 56 ISS 115 JE 14 1991 UMI

III. Compliance with Exchange Act and Auditor Independence and Reporting Requirements

A. Pursuant to Rule 12h-4 under the Exchange Act, a Registrant shall be exempt from reporting obligations under Section 15(d) of the Exchange Act if such reporting obligation would have arisen solely from registration of securities on this Form. Registrants' attention is directed, however, towards other provisions of the Exchange Act that may be applicable, and specifically to the provisions of Sections 12(b) and 12(g) of the Exchange Act and Rules 10b-6, 10b-7 and 10b-13 under the Exchange Act. [See Securities Exchange Act Release No. 34-xxxxx containing exemptions from Rules 10b-6, 10b-7 and 10b-13.]

B. The Commission's rules on auditor independence, as codified in Section 602 of the Codification of Financial Reporting Policies, shall not apply to auditor reports on all financial statements that are included in a registration statement under the Securities Act filed by the issuer on Form F-12.

C. Pursuant to Rule 13e-4(h) under the Exchange Act, the provisions of Rule 13e-4 are not applicable, and pursuant to Rule 14d-1(c) under the Exchange Act, the provisions of Sections 14(d)(1) through 14(d)(7) of the Exchange Act, Regulation 14D under the Exchange Act and Schedule 14D-1 thereunder, and Rule 14e-1 under Regulation 14E, may not be applicable to a transaction involving offerings of securities that may be registered on this Form in connection with exchange offers or business combinations. Such transaction, however, is not exempt from the antifraud provisions of Sections 10(b), 12(a) or 14(e) of the Exchange Act or Rules 10b-5, 13e-4(b)(1) or 14e-3 thereunder.

PART I—INFORMATION REQUIRED TO BE DELIVERED TO OFFEREE'S OR PURCHASERS

Item 1. Home Jurisdiction Document

In the case of an exchange offer, the prospectus shall consist of the entire disclosure document or documents required to be delivered to holders of securities to be acquired in the proposed transaction by the registrant pursuant to the laws of the home jurisdiction in which the foreign target company is incorporated, organized or chartered as well as, where applicable, the rules of any designated offshore securities market in such jurisdiction upon which the registrant has any class of equity securities listed. Except as noted hereinafter, such disclosure document(s) shall be prepared in accordance with the disclosure requirements of such foreign target company's home jurisdiction as interpreted and applied by the securities commission or other regulatory authority in such jurisdiction.

In the case of a business combination, the prospectus shall consist of the entire disclosure document or documents required to be delivered to holders of securities whose votes are being solicited in connection with the proposed business combination pursuant to the laws of the jurisdiction governing such solicitation including, where applicable, the rules of any designated offshore securities markets upon which the equity securities of the participating companies are listed. Except as noted hereinafter, such disclosure document(s) shall be prepared in accordance with the disclosure requirements of the foreign target company's home jurisdiction governing such solicitation as interpreted and applied by the securities commission or other regulatory authority in such jurisdiction.

The prospectus used in the United States shall contain additional information and legends required by this Form. It need not include any documents incorporated by reference into the home jurisdiction disclosure document and not required to be delivered to offerees or purchasers (in the case of an exchange offer) or security holders being solicited (in the case of a business combination) pursuant to the laws of such jurisdiction.

Notwithstanding the foregoing, the prospectus used in the United States need not contain any disclosure applicable solely to offerees or purchasers that would not be material to offerees or purchasers in the United States, including, without limitation, (i) any "red herring" legend; (ii) any discussion of tax considerations other than those material to U.S. offerees or purchasers; (iii) the names of any underwriters not acting as underwriters in the United States or a description of the plan of distribution (except to the extent necessary to describe the material facts of the U.S. plan of distribution); (iv) any description of offerees or purchasers statutory rights under applicable securities legislation (except to the extent such rights are available to U.S. offerees or purchasers); or (v) certificates of the issuer or any underwriter.

Item 2. Informational Legends

The following legends, to the extent applicable, shall appear on the outside front cover page of the prospectus (or on a sticker thereto) in bold-face roman type at least as high as ten-point modern type and at least two points leaded:

THIS EXCHANGE OFFER IS MADE FOR THE SECURITIES OF A FOREIGN COMPANY AND WHILE THE OFFER IS SUBJECT TO DISCLOSURE REQUIREMENTS OF THE COUNTRY IN WHICH THE SUBJECT COMPANY IS ORGANIZED, INVESTORS SHOULD BE AWARE THAT THESE REQUIREMENTS ARE DIFFERENT FROM THOSE OF THE UNITED STATES. FINANCIAL STATEMENTS INCLUDED HEREIN, IF ANY, HAVE BEEN PREPARED IN ACCORDANCE WITH FOREIGN ACCOUNTING STANDARDS, AND ARE SUBJECT TO FOREIGN AUDITING AND AUDITOR INDEPENDENCE STANDARDS, AND THUS MAY NOT BE COMPARABLE TO FINANCIAL STATEMENTS OF UNITED STATES COMPANIES.

THE ENFORCEMENT BY INVESTORS OF CIVIL LIABILITIES UNDER THE FEDERAL SECURITIES LAWS MAY BE AFFECTED ADVERSELY BY THE FACT THAT THE SUBJECT COMPANY IS LOCATED IN A FOREIGN COUNTRY, AND THAT SOME OR ALL OF ITS OFFICERS AND DIRECTORS ARE RESIDENTS OF A FOREIGN COUNTRY.

INVESTORS ALSO SHOULD BE AWARE THAT THE REGISTRANT OR ITS AFFILIATES, DIRECTLY OR INDIRECTLY, MAY BID FOR OR MAKE PURCHASES OF THE SUBJECT COMPANY'S SECURITIES THAT ARE THE SUBJECT OF THE EXCHANGE OFFER OR OF THE SUBJECT COMPANY'S RELATED SECURITIES, OR OF THE REGISTRANT'S SECURITIES TO BE DISTRIBUTED OR OF THE REGISTRANT'S RELATED SECURITIES, DURING THE PERIOD OF THE EXCHANGE OFFER, AS PERMITTED BY THE HOME JURISDICTION'S LAWS REGULATIONS OR POLICIES.

THESE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION NOR HAS THE COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The Registrant should also include in the prospectus any legend or information required by the laws of any jurisdiction in which the securities are to be offered.

Item 3. List of Documents Filed With the Commission

There shall be set forth in or attached to the prospectus a list of all documents filed with the Commission as part of the registration statement and all documents incorporated by reference.

PART II—INFORMATION NOT REQUIRED TO BE DELIVERED TO OFFEREE'S OR PURCHASERS

The exhibits specified below shall be filed as part of the registration statement. Exhibits shall be appropriately lettered or numbered for convenient reference.

(1) Any reports or information that, in accordance with the requirements of the home jurisdiction of the subject issuer or, in the case of a business combination, in accordance with the requirements of the home jurisdiction of the companies involved in the transaction other than the registrant, must be made publicly available by the Registrant in connection with the transaction.

(2) A copy of any agreement relating to the proposed acquisition or business combination, as applicable.

(3) Copies of any documents incorporated by reference into, or filed with any other regulatory authority concurrently with, the prospectus.

(4) If any accountant, engineer or appraiser, or any person whose profession gives authority to a statement made by him, is named as having prepared or certified any part of the registration statement, or is named as having prepared or certified a report or valuation for use in connection with the offering document, the written consent of such person may be required. See Rules 436-440 of the Exchange Act.

However, this Form may not require experts, including auditors or counsel, to consent to the use of their material so long as it was not prepared directly for this registration statement or prospectus provided to security holders resident in the United States. See Rule 448 of the Exchange Act.

(5) If any name is signed to the registration statement pursuant to power of attorney, manually signed copies of such power of attorney and, if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the Registrant's board of directors or similar governing body authorizing such signature.

(6) If applicable, a copy of any indenture relating to the registered securities and, if such indenture is to be qualified under the Trust Indenture Act of 1939 ("Trust Indenture Act"), a cross-reference sheet to the location in the indenture of Sections 310-318(a) of the Trust Indenture Act and a table of contents and, if any such indenture is to be qualified under the Trust Indenture Act, the statement of eligibility of the trustee on Form T-1 and, if applicable, for individual trustee(s) on Form T-2.

PART III—CONSENT TO SERVICE OF PROCESS AND SIGNATURES

1. Consent to Service of Process

(a) At the time of filing Form F-12, the Registrant shall furnish to the Commission on Form F-X a written consent and power of attorney which designates an agent upon whom may be served any process, pleadings, subpoenas, or other papers in connection with

(1) any investigation or administrative proceeding conducted by the Commission; and

(2) any civil suit or action brought against the Registrant or to which the Registrant has been joined as defendant or respondent, in any appropriate court in any place subject to the jurisdiction of any state or of the United States or of the District of Columbia or Puerto Rico,

where the investigation, proceeding or cause of action arises out of or relates to or concerns any offering made or purported to be made in connection with the securities registered on Form F-12 or any purchases or sales of any security in connection therewith, and stipulates and agrees that any such civil suit or action or administrative proceeding may be commenced by the service of process upon, and that service of an administrative subpoena shall be effected by service upon, said agent for service of process, and that the service as aforesaid shall be taken and held in all courts and administrative tribunals to be as valid and binding as if due personal service thereof had been made.

(b) At the time of filing Form F-12, any trustee for which an exemption pursuant to Rule 4d-1 under the Trust Indenture Act is being applied by virtue of filing this Form shall furnish to the Commission on Form F-X a written consent and power of attorney which designates an agent upon whom may be served any process, pleadings, subpoenas, or other papers in connection with

(1) any investigation or administrative proceeding conducted by the Commission; and

(2) any civil suit or action brought against the trustee or to which the trustee has been joined as defendant or respondent, in any appropriate court in any place subject to the jurisdiction of any state or of the United States or of the District of Columbia or Puerto Rico,

where the investigation, proceeding or cause of action arises out of or relates to or concerns the securities in connection with which the trustee acts as trustee pursuant to an exemption under Rule 4d-1 under the Trust Indenture Act and stipulates and agrees that any such civil suit or action or administrative proceeding may be commenced by the service of process upon, and that service of an administrative subpoena shall be effected by service upon, said agent for service of process, and that the service as aforesaid shall be taken and held in all courts and administrative tribunals to be as valid and binding as if due personal service thereof had been made.

2. Signatures

Pursuant to the requirements of the Securities Act, the Registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form F-12 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of _____ State (Province or Territory) of _____, on _____, 19____.

Registrant _____

By (Signature and Title) _____

Pursuant to the requirements of the Securities Act, this registration statement has been signed by the following persons in the capacities and on the dates indicated.

(Signature) _____

(Name and Title) _____

(Date) _____

Instructions

A. The registration statement shall be signed by the Registrant, its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer, at least a majority of the board of directors or persons performing similar functions and its authorized representative in the United States. Where the registrant is a limited partnership, the registration statement shall be signed by a majority of the board of directors of any corporate general partner signing the registration statement.

B. The name of each person who signs the registration statement shall be typed or printed beneath his signature. Any person who occupies more than one of the specified positions shall indicate each capacity in which the registration statement is signed.

C. If the securities to be offered are those of a corporation not yet in existence at the time the registration statement is filed and which will be a party to a consolidation involving two or more existing corporations, then each such existing corporation shall be deemed a Registrant and shall be so designated on the cover page of this Form, and the registration statement shall be signed by each such existing corporation and by the officers and directors of each such existing corporation as if each such existing corporation were the sole Registrant.

D. By signing this Form, the Registrant consents without power of revocation that any administrative subpoena may be served, or any administrative proceeding, civil suit or civil action where the cause of action arises out of or relates to or concerns any offering made or purported to be made in connection with the securities registered pursuant to Form F-12 or any purchases or sales of any security in connection therewith, may be commenced against it in any administrative tribunal or in any appropriate court in any place subject to the jurisdiction of any state or of the United States or of the District of Columbia or Puerto Rico by service of said subpoena or process upon the Registrant's designated agent.

Attachment B—Securities and Exchange Commission Regulatory Flexibility Act Certification

I, Richard C. Breeden, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that: proposed Form F-12 under the Securities Act of 1933 (the "Securities Act"); proposed Forms 13E4H and Form 14D1C under the Securities Exchange Act of 1934 (the "Exchange Act"); proposed Rules 460, 469 and 802, and proposed changes to Rule 473 under the Securities Act; proposed Rule 12h-4, and proposed changes to Rules 12g3-2(b), 13e-4, 14d-1 under the Exchange Act; proposed changes to Rules 30-1 and 30-3 under the Commission's Rules of Practice; and proposed Rule 4d-10 under the Trust Indenture Act of 1939 (the "Trust Indenture Act"), if promulgated, will not have a significant economic impact on a substantial number of small entities. The reasons for this certification are as follows:

The proposed rules, forms and proposed rule amendments are intended primarily to facilitate tender and exchange offers for securities of foreign issuers held by U.S. residents. The resulting reduction in the expense, time and effort of making such offerings will benefit U.S. securityholders, who are normally excluded from such offerings, and foreign entities that wish to extend these offers to U.S. securityholders.

Since the proposals are intended to facilitate international tender and exchange offers by minimizing the existing regulatory disincentives for extending these offers into the United States, the likelihood of such increased offerings in the United States significantly affecting a substantial number of small U.S. entities is expected to be minimal.

The proposed new rules, forms and proposed rule amendments are summarized in the attached memorandum.* That their primary affect is on foreign entities is apparent from such document.

Dated: June 5, 1991.

Richard C. Breeden,

Chairman.

Proposed Amendments to Regulation S-K, Form 20-F, Proposed Form 40-F and Rule 12g3-2; Proposed New Forms for Furnishing Materials Pursuant to Rule 12g3-2(b)

AGENCY: Securities and Exchange Commission.

ACTION: Proposed amendments to rules and forms; proposed forms.

SUMMARY: The Securities and Exchange Commission (the "Commission") today is publishing for comment (a) proposed revisions to existing and proposed rules and forms which would require foreign private issuers to disclose the extent to which their equity securities are held by U.S. holders, and (b) proposed covering forms for furnishing information pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934. These proposals are part of the Commission's proposals relating to cross-border tender and exchange offers and would facilitate access to U.S. holder information and materials submitted under Rule 12g3-2(b).

DATES: Comments should be received on or before September 9, 1991.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7-19-91. All comments received will be available for public inspection and copying in the Commission's Public Reference Room at the same address.

FOR FURTHER INFORMATION CONTACT: Paul M. Dudek at (202) 272-3240, Office of International Corporate Finance, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION:

I. Proposed Amendments to Form 20-F, Proposed Form 40-F, Rule 12g3-2 and Regulation S-K to Require Disclosure of U.S. Holder Information

As part of the Commission's proposals relating to cross-border tender and exchange offers,[1] the Commission is proposing amendments to Item 5 of Form 20-F,[2] General Instruction B to proposed Form 40-F,[3] Rule 12g3-2 [4] under the Securities Exchange Act of 1934 (the "Exchange Act") and Item 201 of Regulation S-K [5] which would require a foreign private issuer to disclose, in certain filings and submissions with the Commission, the number of U.S. holders of its equity securities and the percentage of its outstanding equity securities held by U.S. holders. The disclosure of U.S. holder information would permit current and prospective investors in equity securities of foreign private issuers and potential third party bidders for such securities to determine from publicly available documents whether tender and exchange offers relating to such securities could proceed under proposed cross-border tender and exchange offer regulations.

The proposed amendments to Form 20-F, proposed Form 40-F and Regulation S-K would identify the records to be checked to determine the number of U.S. holders. As is currently the case for initial submissions under Rule 12g3-2(b), the proposed amendments to Rule 12g3-2(b) would require an issuer to furnish the specified U.S. holder information only to the extent such information is known or can be obtained without unreasonable effort or expense. Comment is requested regarding whether U.S. holder information should be required to be provided in the manner proposed or in an alternative manner, whether other information would be more useful, and whether disclosure of that information under Rule 12g3-2(b) should be mandatory.

II. Proposed Forms for Rule 12g3-2(b) Submissions

The Commission is proposing to require that all submissions under Rule 12g3-2(b) be made under cover of one of two proposed new forms: Proposed Form 12-F for initial submissions under Rule 12g3-2(b), and proposed Form 12-FA for all other submissions under the rule. The proposed forms would implement a format in which the U.S. holder information furnished by foreign issuers would be easily identifiable and obtainable by investors and other third parties. Adoption of the forms should also result in more efficient processing of all submissions and faster and easier public access to the information furnished.[6] Notwithstanding the use of a form, submissions under Rule 12g3-2(b) would continue not to be deemed "filed" with the Commission or otherwise subject to section 18 of the Exchange Act.[7]

Comment is solicited regarding whether either initial submissions or subsequent submissions under Rule 12g3-2(b) should be required to be under the cover of a form, and what other information, if any, should be required to be provided on such forms. The Commission is proposing to make use of the forms mandatory for materials submitted after 90 days following adoption. Foreign issuers would be encouraged, however, to use the forms as soon as practicable following adoption.

III. Cost-Benefit Analysis

To evaluate fully the benefits and costs associated with the proposed amendments to Form 20-F, proposed Form 40-F, Rule 12g3-2 and Regulation S-K and the proposed forms under Rule 12g3-2(b), the Commission requests commenters to provide views and data as to the costs to issuers associated with compliance with such rules and forms as they presently exist as compared to such estimated costs under the proposed changes. The Commission also requests commenters to provide views regarding the costs and benefits of the proposed amendments and forms to investors and other third parties.

The proposed Forms 12-F and 12-FA are covering sheets which contain no substantive requirements (other than the provision of certain identifying information and certain information relating to the extent to which equity securities of the subject issuer are held by U.S. residents). Such forms may be easily produced and reproduced by issuers and others furnishing information. The proposed amendments to Rule 12g3-2 would require only that the issuer's file number and the U.S. holder information be furnished in addition to information already required.

The Commission does not expect that any significant additional costs would result from the proposals.

[3] Proposed 17 CFR 249.240f, Securities Act Release No. 6879 (Oct. 22, 1990) [55 FR 45606].

[4] 17 CFR 240.12g3-2.

[5] 17 CFR 229.201, Market price of and dividends on the registrant's common equity and related stockholder matters.

[6] In recent years, the number of issuers claiming the Rule 12g3-2(b) exemption has increased markedly. From adoption in 1967 through the end of 1980, file numbers were assigned to 443 issuers. By contrast, 585 file numbers were assigned in the aggregate during 1989 and 1990 alone. Over 1,050 issuers are currently furnishing material to the Commission in order to maintain their exemptions under Rule 12g3-2(b).

IV. Request for Comments

Any interested persons wishing to submit written comments on the proposed amendments and forms are requested to do so.

V. Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman of the Commission has certified that adoption of the proposed forms and proposed revisions to existing and proposed rules and forms will not have a significant impact on a substantial number of small entities. That certification, including the reasons therefor, is attached to this release as Appendix B.

VI. Statutory Basis for Proposals

Regulation S-K, Form 20-F and proposed Form 40-F are being proposed to be amended by the Commission pursuant to sections 7, 10 and 19 of the Securities Act of 1933 [8] and sections 12(b), 12(g), 13, 14, 15(d) and 23(a) of the Exchange Act.[9] Forms 12-F and 12-FA are being proposed by the Commission and Rule 12g3-2 is proposed to be amended by the Commission pursuant to Sections 12(g), 12(h) [10] and 23(a) of the Exchange Act.

List of Subjects in 17 CFR Parts 229, 240 and 249

Reporting and recordkeeping requirements, Securities.

VII. Text of Proposals

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S-K

1. The authority citation for part 229 continues to read as follows:

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77aa(25), 77aa(26), 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss, 78*l*, 78m, 78n, 78o, 78w, 80a-8, 80a-29, 80a-30, 80a-37, 80b-11, unless otherwise noted.

2. By adding Instruction 6 to § 229.201 as follows:

[8] 15 U.S.C. 77g, 77j and 77s.

[9] 15 U.S.C. 78*l*(b), 78*l*(g), 78m, 78n, 78o(d) and 78w(a).

[10] 15 U.S.C. 78*l*(h).

§ 229.201 (Item 201) Market price of and dividends on the registrant's common equity and related stockholder matters.

* * * * *

Instructions to Item 201.

* * * * *

6. If the registrant is a foreign private issuer, for each class of equity securities of the issuer (whether or not registered or to be registered), state the approximate number, as of the most recent practicable date, of persons holding such securities (either directly or through voting trust certificates or depositary receipts) which are U.S. holders, and the percentage of all the outstanding securities of such class which as of such date was so held by U.S. holders. The term *U.S. holder* shall mean any person whose address appears on the records of the issuer, any voting trustee, any depositary, any share transfer agent or any person acting on behalf of the issuer as being located in the United States.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

3. The authority citation for part 240 is amended by adding the following citation:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78*l*, 78j, 78*l*, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a-29, 80a-37, unless otherwise noted.

* * * * *

Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77s(a).

4. By revising paragraphs (b)(1)(iii) and the second sentence and last sentence of paragraph (b)(4), and adding a new third sentence to paragraph (b)(4) of § 240.12g3-2 to read as follows:

§ 240.12g3-2 Exemptions for American depositary receipts and certain foreign securities.

* * * * *

(b) * * *

(1) * * *

(iii) Shall furnish to the Commission, during each subsequent fiscal year:

(A) Whatever information is made public as described in paragraph (b)(1)(i)(A), (B) or (C) of this section promptly after such information is made or required to be made public as described therein, and

(B) Upon the submission pursuant to paragraph (b)(1)(iii)(A) of this section of materials which include the annual report (or other document) of such issuer which includes the audited financial statements of such issuer covering the prior fiscal year of such issuer, or within four months after the end of each fiscal year of the issuer if no such annual report (or other document) is required to be submitted pursuant to such paragraph, the following information to the extent known or which can be obtained without unreasonable effort or expense: the number of holders of each class of equity securities resident in the United States, and the amount and percentage of each class of outstanding equity securities held by residents of the United States.

* * * * *

(4) * * * Such information and documents shall not be deemed to be "filed" with the Commission or otherwise subject to the liabilities of section 18 of the Act. Such information and documents shall be furnished under cover of Form 12-F (§ 249.212f of this chapter) in the case of an initial submission under paragraph (b)(1) of this section and under cover of Form 12-FA (§ 249.212fa of this chapter) in the case of all other submissions under paragraph (b)(1) of this section. * * * When a Commission file number is assigned to an issuer furnishing information under paragraph (b)(1) of this section, that file number shall appear on each form under cover of which any subsequent information relating to that issuer is furnished.

* * * * *

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

5. The authority citation for part 249 continues to read in part as follows:

Authority: The Securities Exchange Act of 1934, 15 U.S.C. 78a, *et seq.*, unless otherwise noted;

* * * * *

6. By adding §§ 249.212f and 249.212fa to read as follows:

Note: See appendix of this release for text of Forms. The Forms do not appear in the Code of Federal Regulations.

§ 249.212f Form 12-F, for initial submissions of information pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Form 12-F shall be used for initial submissions of information pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

§ 249.212fa Form 12-FA, for submissions of information pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934 other than in connection with an initial submission.

Form 12-FA shall be used for submissions of information pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934 other than in connection with an initial submission.

7. By revising the paragraph under Item 5 of Part I, and adding Instruction 3 to Item 5 of Part I, of Form 20-F (17 CFR 249.220f) to read as follows:

Part I

* * * * *

Item 5. Nature of Trading Market

As to each class of securities registered or to be registered, indicate briefly the nature and extent of the principal non-United States trading market for such securities, and also the nature of the trading market in the United States. State the high and low sales prices for the securities in both such markets for each full quarterly period within the two most recent fiscal years. For each class of the registrant's equity securities (whether or not registered or to be registered), state the approximate number, as of the most recent practicable date, of persons holding such securities (either directly or through voting trust certificates or depositary receipts) which are U.S. holders, and the percentage of all the outstanding securities of such class which as of such date was so held by U.S. holders.

Instructions

* * * * *

3. The term *U.S. holder* shall mean any person whose address appears on the records of the issuer, any voting trustee, any depositary, any share transfer agent or any person acting on behalf of the issuer as being located in the United States.

* * * * *

8. By amending proposed Form 40–F (17 CFR 249.240f) to add paragraph 6 under B of the General Instructions to read as follows:

Note: Form 40–F does not appear in the Code of Federal Regulations.

Form 40–F

* * * * *

General Instructions

* * * * *

B. Information To Be Filed on this Form

* * * * *

(6) State the approximate number, as of the most recent practicable date, of persons holding securities of the Registrant (either directly or through voting trust certificates or depositary receipts) which are U.S. holders, and the percentage of all the outstanding securities of such class which as of such date was so held by U.S. holders. The term *U.S. holder* shall mean any person whose address appears on the records of the issuer, any voting trustee, any depositary, any share transfer agent or any person acting on behalf of the issuer as being located in the United States.

Form 12–F

Initial Submission of Information Pursuant to Rule 12g3–2(b) Under the Securities Exchange Act of 1934

(Exact name of Issuer as specified in its charter)

(Translation of Issuer's name into English)

(Jurisdiction of issuer's incorporation or organization)

(Address and telephone number of Issuer's principal executive offices)

(Exact name of person furnishing information if other than Issuer)

(Address and telephone number of principal offices of person furnishing information if other than Issuer)

To the extent such information is known or can be obtained without unreasonable effort or expense, furnish the following information: (i) The number of holders of each class of equity securities resident in the United States; (ii) the amount of each class of outstanding equity securities held by such residents; (iii) the percentage of each class of outstanding equity securities held by such residents; (iv) the title of class(es) of securities as to which such information relates; and (v) the date as of which such information is provided.

(i) Number of holders resident in the United States	(ii) Amount held by such residents	(iii) Percentage held by such residents	(iv) Title of, class of securities	(v) Date of information

General Instructions

A. This Form shall be used by persons furnishing information pursuant to paragraphs (i), (ii) and (v) of Rule 12g3–2(b) under the Securities Exchange Act of 1934 in order to establish the exemption provided by Rule 12g3–2(b).

B. A person supplying information under cover of this Form shall furnish whatever information the issuer of the securities is required to furnish to the Commission pursuant to paragraphs (i), (ii) and (v) of Rule 12g3–2(b). Only one complete copy of any information or document need be furnished. Press releases and all other communications or materials distributed directly to holders of the subject securities shall be in English. English versions or adequate summaries in English may be furnished in lieu of original English translations. No other documents need be furnished unless the issuer has prepared or caused to be prepared English translations, versions or summaries of them. If no English translations, versions or summaries have been prepared, a brief description in English of any such documents shall be furnished.

C. The information and documents furnished on this Form are not to be deemed "filed" with the Commission or otherwise subject to the liabilities of section 18 of the Securities Exchange Act of 1934.

D. This Form and the accompanying information shall be delivered to the Filing Desk at the Commission's office in Washington, D.C.

Signature

The undersigned submits these materials in order to establish the exemption pursuant to Rule 12g3–2(b) under the Securities Exchange Act of 1934 in respect to the above named issuer.

Form 12–FA

Submission of Information Pursuant to Rule 12g3–2(b) Under the Securities Exchange Act of 1934, Other Than in Connection With an Initial Submission

82–_____

(Issuer's file number)

Check Appropriate Box(es)

[ ] Annual Report (or other document) containing audited financial statements.

[ ] Proxy statement or other material distributed to security holders in connection with a meeting of security holders.

[ ] Other Information.

(Exact name of Issuer as specified in its charter)

(Translation of Issuer's name into English)

If an annual report (or other document) containing audited financial statements for the issuer's most recently ended fiscal year is furnished with this Form, then to the extent such information is known or can be obtained without unreasonable effort or expense, furnish the following information (see Instruction D below): (i) The number of holders of each class of equity securities resident in the United States; (ii) the amount of each class of outstanding equity securities held by such residents; (iii) the percentage of each class of outstanding equity securities held by such residents; (iv) the title of class(es) of securities as to which such information relates; and (v) the date as of which such information is provided.

(i) Number of holders resident in the United States	(ii) Amount held by such residents	(iii) Percentage held by such residents	(iv) Title of, class of securities	(v) Date of information

General Instructions

A. This Form shall be used for furnishing information pursuant to paragraphs (iii) and (iv) of Rule 12g3–2(b) under the Securities Exchange Act of 1934.

B. A person supplying information under cover of this Form shall furnish whatever information the issuer of the securities exempt under Rule 12g3–2(b) is required to furnish to the Commission pursuant to paragraphs (iii) and (iv) of Rule 12g3–2(b). Only one complete copy of any information or document need be furnished. Press releases and all other communications or materials distributed directly to security holders of each class of securities to which the exemption relates shall be in English. English versions or adequate summaries in English may be furnished in lieu of original English translations. No other documents need be furnished unless the issuer has prepared or caused to be prepared English translations, versions or summaries of them. If no English translations, versions or summaries have been prepared, a brief description in English of any such documents shall be furnished.

C. The information and documents furnished on this Form are not to be deemed "filed" with the Commission or otherwise subject to the liabilities of Section 18 of the Securities Exchange Act of 1934.

D. If a foreign private issuer is not required under Rule 12g3–2(b)(1)(iii) to furnish to the Commission an annual report (or other document) containing audited financial statements of the issuer, such issuer is required to provide the information requested above with respect to the extent to which its securities are held by U.S. residents within four months after the end of each fiscal year of such issuer.

E. This Form and the accompanying information shall be delivered to the Filing Desk at the Commission's offices in Washington, DC.

Appendix B—Securities and Exchange Commission Regulatory Flexibility Act Certification

I, Richard C. Breeden, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that: proposed Form 12–F and Form 12–FA under the Securities Exchange Act of 1934 (the "Exchange Act"); proposed changes to Form 20–F and proposed Form 40–F under the Exchange Act; and proposed changes to Rule 12g3–2(b) under the Exchange Act and to Item 201 of Regulation S–K, if promulgated, will not have a significant economic impact on a substantial number of small entities. The reasons for this certification are as follows:

The proposed forms and proposed changes to existing and proposed forms and existing rules discussed below are intended primarily to implement proposals (the "Cross-Border Tender and Exchange Offer Proposal") to facilitate cross-border tender and exchange offers relating to securities of foreign issuers held by U.S. investors. These proposals are a companion to the Cross-Border Tender and Exchange Offer Proposal. The resulting reduction in the expense, time and effort of making such tender and exchange offers will benefit U.S. securityholders, who are normally excluded from such offerings, and foreign entities that wish to extend these offers to U.S. securityholders. Since the proposals are intended to facilitate cross-border tender and exchange offers by minimizing the existing regulatory disincentives for extending these offers into the United States, the likelihood of such increased offerings in the United States significantly affecting a substantial number of small U.S. entities is expected to be minimal.

In connection with this proposal, the Securities and Exchange Commission (the "Commission") also is proposing revisions to existing rules and new forms to provide that submissions under Rule 12g3–2(b) shall be under cover of one of two proposed forms. These revisions and forms would affect foreign entities submitting materials to the Commission under Rule 12g3–2(b) rather than U.S. entities. An expected result of adoption of the proposed forms and proposed changes to existing rules and forms is that foreign companies will disclose on at least an annual basis the number of U.S. holders of their equity securities and the percentage of holders of their equity securities who are U.S. holders. The resulting increase in information can be expected to increase the ease with which small U.S. entities acting as investors can obtain U.S. holder information and assess the potential of tender and exchange offers being made under the Cross-Border Tender and Exchange Offer Proposal. Since U.S. holdings of foreign equity securities are relatively small, however, the likelihood of such increased information significantly affecting a substantial number of small U.S. entities is minimized.

The proposed forms and the proposed amendments to an existing form, a proposed form and existing rules are summarized below. That their primary effect is on foreign entities is apparent from such summary. Thus, the Division of Corporation Finance recommends that a certification be signed stating that these proposed rules and form and proposed amendments will not have a significant economic impact on a substantial number of small U.S. entities.

The proposed forms and the proposed amendments to an existing form, a proposed form and existing rules are summarized in the attached memorandum.* That their primary effect is on foreign entities is apparent from such document.

Dated: June 6, 1991.

Richard C. Breeden,

Chairman.

Environmental Protection Agency

Coastal Nonpoint Source Pollution Management Measures Guidance; Notice

VOL 56 ISS 115 JE 14 1991 UMI

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3962-7]

Coastal Nonpoint Source Pollution Management Measures Guidance

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability and request for comment.

SUMMARY: Pursuant to section 6217(g)(3)(A) of the Coastal Zone Act Reauthorization Amendments of 1990, EPA has developed, and requests public comment on, proposed guidance specifying management measures for the control of nonpoint sources that cause coastal water pollution. This guidance includes measures to control nonpoint source pollution from the following sources: Agriculture, silviculture, urban (including construction activities), hydromodification, and marinas. EPA has prepared the guidance in consultation with State and Federal agencies.

The purpose of this guidance is to provide a basis for the development of state coastal nonpoint pollution control programs by states with approved coastal zone management programs as required by section 6217(a). In addition to other requirements, section 6217(b) requires that these programs provide for the implementation, at a minimum, of management measures in conformity with the section 6217(g) guidance. The new coastal nonpoint pollution control programs will be implemented through existing state coastal zone management programs, administered by NOAA, and existing state nonpoint source control management programs, administered by EPA. EPA and NOAA are currently preparing to publish joint program development and approval guidance for section 6217 in draft form in August 1991. State coastal nonpoint pollution control programs must be submitted to EPA and NOAA for approval within 30 months after EPA issues section final 6217(g) guidance in May 1992.

EPA will consider comments on this proposed guidance and will issue final guidance in May 1992.

DATES: Written comments should be addressed the person listed directly below by October 15, 1991.

ADDRESSES: Comments should be sent to Steve Dressing, Assessment and Watershed Protection Division (WH-553), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Copies of the complete draft may be obtained by August 2, 1991.These documents are also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, room 2404 (rear), 401 M St. SW., Washington, DC 20460. As provided in 40 CFR part 2, a reasonable fee may be charged for copying services. Copies of these documents are also available for review in the EPA Regional Office libraries.

FOR FURTHER INFORMATION CONTACT: Dov Weitman or Steve Dressing at (202) 382-7065.

SUPPLEMENTARY INFORMATION:

I. Background

A. Requirement for Coastal Nonpoint Pollution Control Programs

Congress enacted section 6217 of the Coastal Zone Reauthorization Amendments of 1990 in November 1990. This section requires all states with a federally approved coastal zone management program to develop, and submit to EPA and NOAA for approval, a Coastal Nonpoint Pollution Control Program. The statutory purpose of the program "shall be to develop and implement management measures for nonpoint source pollution to restore and protect coastal waters, working in close conjunction with other State and local authorities".

Under section 6217, State coastal nonpoint pollution control programs must contain a number of provisions in order to be approvable by EPA and NOAA. First, all State programs must provide for implementation of management measures "in conformity with" guidance developed by EPA in consultation with NOAA, the Fish and Wildlife Service, and other Federal agencies as required by section 6217(g). Congress required that proposed guidance be issued within six months after the statute was enacted (May 1991) and final guidance within eighteen months of enactment (May 1992).

In addition to providing for implementation of management measures in conformity with the 6217(g) guidance, section 6217 requires State programs to:

1. Identify land uses which, individually or cumulatively, may cause or contribute significantly to a degradation of (a) coastal waters where there is a failure to attain or maintain applicable water quality standards or protect designated uses, or (b) coastal waters that are threatened by reasonably foreseeable increases in pollution loadings form new or expanding sources;

2. Identify critical coastal areas adjacent to coastal waters identified under the preceding paragraph;

3. Implement additional management measures applicable to land uses and areas identified under paragraphs (1) and (2) above that are necessary to achieve and maintain applicable water quality standards and protect designated uses:

4. Provide technical assistance to local governments and the public to implement management measures;

5. Provide opportunities for public participation in all aspects of the program;

6. Establish mechanisms to improve coordination among State and local agencies and officials responsible for land use programs and permitting, water quality permitting and enforcement, habitat protection, and public health and safety; and

7. Propose to modify State coastal zone boundaries as necessary to implement NOAA recommendations under section 6217(e). (Section 6217(e) requires NOAA, in consultation with EPA, to evaluate the landward coastal zone boundary of each coastal State to determine whether it extends inland sufficiently to control land and water uses that have a significant impact on coastal waters of the state and to recommend boundary modifications as necessary.)

In addition to the provisions of section 6217, the Coastal Zone Act Reauthorization Amendments of 1990 amends section 306 of the Coastal Zone Management Act to require that, before approving a coastal zone management program submitted by a coastal State, NOAA shall find that: "* * * the management program contains enforceable policies and mechanisms to implement the applicable requirements of the Coastal Nonpoint Pollution Control Program of the State required by section 6217 * * *".

Within 30 months after EPA's issuance of management measures guidance in May, 1992, States are required to submit to NOAA and EPA their coastal nonpoint pollution control programs for review. EPA and NOAA are currently in the process of drafting program development and approval guidance in order to assist States in developing and implementing the coastal nonpoint pollution control programs. EPA and NOAA plan to issue draft program approval guidance in August 1991 and final guidance in May 1992.

B. Management Measures Guidance

Section 6217(g) of the Coastal Zone Act Reauthorization Amendments of 1990 requires EPA to publish (and periodically revise thereafter), in consultation with NOAA, the Fish and Wildlife Service, and other Federal agencies, "guidance for specifying management measures for sources of nonpoint pollution in coastal waters." "Management measures" are defined as:

> Economically achievable measures for the control of the addition of pollutants from existing and new categories and classes of nonpoint sources of pollution, which reflect the greatest degree of pollutant reduction achievable through the application of the best available nonpoint pollution control practices, technologies, processes, siting criteria, operating methods, or other alternatives.

The management measures guidance is to include, at a minimum, six elements set forth in section 6217(g)(2):

"(A) A description of a range of methods, measures, or practices, including structural or nonstructural controls and operation and maintenance procedures, that constitute each measure;

"(B) A description of the categories and subcategories of activities and locations for which each measure may be suitable;

"(C) An identification of the individual pollutants or categories or classes of pollutants that may be controlled by the measures and the water quality effects of the measures;

"(D) Quantitative estimates of the pollution reduction effects and costs of the measures;

"(E) A description of the factors which should be taken into account in adapting the measures to specific sites or locations; and

"(F) Any necessary monitoring techniques to accompany the measures to assess over time the success of the measures in reducing pollution loads and improving water quality."

II. Scope of the Proposed Guidance—Categories of Nonprofit Sources Addressed

According to the legislative history (floor statement of Representative Gerry Studds, house sponsor of section 6217, as part of debate on Omnibus Reconciliation Bill, October 26, 1990), Congress is expecting that EPA, "* * * in developing its guidance, will concentrate on the large nonpoint sources that are widely recognized as major contributors of water pollution." Hence, EPA, in consultation with NOAA, the Fish and Wildlife Service, USDA, and a number of other federal agencies, has decided to focus on the major categories of nonpoint sources that impair or threaten coastal waters nationally as identified in State water quality reports required under section 305(b) of the Clean Water Act and State nonpoint source assessments required by section 319(a). The five major categories of nonpoint sources and subcategories for which management measures are specified are:

(1) *Agricultural runoff*: Erosion and Sediment control, confined animal production facilities, nutrient management, pesticide management, grazing management, and irrigation water management;

(2) *Urban runoff*: Pre-development and post-development controls in urban areas including erosion and sediment control on construction sites, highways, airports and septic systems;

(3) *Silvicultural runoff*: Forest road management, timber harvest planning and site preparation, and revegetation of disturbed areas;

(4) Hydromodification, dams and levees, and shoreline erosion control; and

(5) Marinas and recreational boating.

EPA has also included management measures that apply to multiple categories of nonpoint sources. These measures include protection of wetlands and riparian areas, and vegetative filter strips.

III. Approach Used to Develop Guidance

A. Process Used to Develop Proposed Guidance

EPA adopted a work group approach to develop the proposed guidance in order to address the broad requirements of the guidance and to draw upon technical expertise outside the agency. EPA convened workgroups for each of the five major pollutant source group categories. Each of these groups held several meetings to develop the guidance. Work group members included representatives of EPA; NOAA; U.S. Department of Agriculture (Soil Conservation Service, Extension Service, and Forest Service); the U.S. Fish and Wildlife Service; and several other Federal agencies. Representatives of a number of State water quality and coastal zone management agencies also participated actively in these work groups.

B. Technical Approach Used to Develop Proposed Guidance

In developing this guidance on management measures, we have been guided by the knowledge that nonpoint source pollutants are transported via multiple environmental pathways, principally runoff, infiltration, and atmospheric deposition. Therefore, the management measures place high priority on preventing or reducing nonpoint source pollution at the source. Recognizing that it is not possible to rely solely on pollution prevention, we have also incorporated in the guidance management measures to intercept pollutants which leave the source either for treatment and release or for the purpose of permanently keeping them from reaching water resources.

In addition, this guidance adopts the approach, routinely used and recommended by nonpoint source technical experts, of specifying management measures in terms of management systems as opposed to focusing on individual practices. This approach is analogous to the use of treatment "trains", or series of treatment steps, in most point source wastewater treatment systems. This approach is reflected in the guidance in two ways: (1) The management measures are usually presented as systems, and (2) for those sources that generate pollutants from a number of somewhat separable activities or unit areas, the guidance includes management measures for each activity or area.

The management measures specified in the proposed guidance generally have the following characteristics:

- The measures reflect the greatest degree of pollutant reduction economically achievable. EPA has specified management measures in terms of particular systems of practices that are known to be highly effective and that can serve as a benchmark for the development of other approaches that provide equivalent or better pollutant reduction.
- The measures focus first on pollution prevention activities such as minimizing the application of nutrients and pesticides and minimizing soil erosion. These types of measures are often the most cost effective. The measures then specify pollution delivery reduction measures which intercept pollutants leaving the source by capturing the runoff or infiltrate.
- Whenever appropriate, the measures include consideration of nonpoint pollution of both ground water and surface water because of their interactions in the hydrologic cycle. In coastal areas, management practices that may contribute to ground-water contamination are of special concern because of the role ground water plays in recharging coastal waters. EPA plans to more closely examine the relationship between ground and surface water contamination in coastal areas during the coming year and address the

VOL
56

115
JE
14
1991
UMI

resulting information as appropriate in the guidance.

Due to the very tight timeframe provided by Congress to EPA to publish the proposed guidance, the proposed guidance contains only those limited data and information on pollutant reduction effects and costs of the management measures that were immediately available. EPA specifically solicits relevant data from the public. EPA will consider these and additional information regarding costs and pollutant reduction effects prior to publishing the final guidance.

The proposed guidance invites commenters to identify measures that they believe are or are not economically achievable and to suggest alternative methodologies that they believe would be useful in determining economic achievability. Finally, EPA has separately prepared a preliminary assessment of the benefit of implementing the management measures.

IV. Implementation of Proposed Management Measures

As described above in section I of this notice, States must develop Coastal Nonpoint Pollution Control Programs which "provide for the implementation, at a minimum, of management measures in conformity with the guidance published under subsection (g) to protect coastal waters generally. * * *". States will implement the new programs through amendments to their existing State nonpoint source programs under section 319 of the Clean Water Act and their Coastal Zone Management programs.

EPA and NOAA are currently drafting State program approval guidance to assist States in developing their coastal programs. Issues to be addressed in this guidance include the following:

- Section 6217(b) requires State coastal nonpoint pollution control programs to be "in conformity with" the management measures specified by EPA in EPA's management measures guidance. The program guidance under development will define the degree of flexibility States will have in adopting management practices appropriate to their circumstances while remaining "in conformity with" the management measures specified by EPA.
- The program guidance will define the kinds of land uses and critical coastal areas that States must identify, and the additional management measures which States must implement, in order to comply with section 6217(b)'s requirement for a higher level of protection for particular coastal waters than that afforded generally by the management measures guidance.
- The guidance will provide States direction on whether the management measures will apply to applicable sources within all coastal watersheds or should instead be targeted to high priority sources, activities, or waters.
- The program guidance will provide direction to States on how best to integrate their nonpoint source programs under section 319 of the Clean Water Act with their coastal zone management programs, as well as with other EPA programs such as those developed under the Clean Water Act, the Federal Insecticide, Fungicide and Rodenticide Act, and the Safe Drinking Water Act, and with programs administered by other Federal agencies.

EPA and NOAA hope to issue draft guidance by August 1991, and will solicit public comment at that time.

V. Request for Comments

EPA is soliciting comments on the proposed guidance on management measures to control coastal nonpoint pollution. The Agency is soliciting additional information and supporting data on the measures specified in this guidance and on additional measures that may be as effective or more effective in controlling nonpoint source pollution. The following information is sought by EPA in preparing the final guidance:

1. Information on the activities and locations for which each measure may be suitable and information on factors which should be taken into account in adapting the measures to specific sites or locations;
2. Information on the pollutants that may or may not be controlled by the measures;
3. Data regarding the pollution reduction effects of the measures;
4. Data regarding the costs and cost-effectiveness of each measure;
5. Appropriate monitoring techniques for each resource category;
6. Monetary data on benefits of each measure; and
7. Information on opportunities for point/nonpoint source trading, including information on possible cost advantages of this approach in specific watersheds.

EPA also welcomes comments on the general approach used in the proposed guidance, including the level of detail used to describe management measures. EPA requests that commenters focus their comments upon the technical soundness of the proposed management measures guidance and reserve implementation-related considerations until the forthcoming state program approval guidance is published for public comment.

LaJuana S. Wilcher,

Assistant Administrator for Water.

Part IV

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 235

Implementation of Section 235(r) of the National Housing Act; Final Rule

VOL 56 ISS 115 JE 14 1991 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 235

[Docket No. R-91-1547; FR-2739-F-01]

Implementation of Section 235(r) of the National Housing Act

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule implements section 235(r) of the National Housing Act as amended by section 125 of the Department of Housing and Urban Development Reform Act of 1989 (Pub. L. 101-235) which was signed by the President on December 15, 1989 (Reform Act). Section 235(r), as amended, authorizes the Secretary to insure a mortgage, the proceeds of which are used to refinance a mortgage insured under section 235. Section 235(r)(7) provides that section 235(r) shall be implemented by the Secretary by a notice published in the **Federal Register**. However, since the implementation of section 235(r) requires amendments to the current regulations, HUD is implementing the program through a final rule by adding a new 24 CFR 235.4, "Refinancing under 235(r) of the National Housing Act" to subpart A of part 235. Appendix A to part 235, published with this final rule, contains the special requirements that must be met for eligibility of a mortgage to be insured under section 235(r), as well as identifying the provisions of 24 CFR part 235, subparts A, B, and G, that are applicable to Section 235(r) mortgages. The Appendix also contains the provisions which, together with the applicable sections of 24 CFR part 235, subpart C, constitute the new assistance payments contract for the mortgage insured under section 235(r). In addition, the direct endorsement program, whereby mortgagees approved for that program may process and underwrite mortgage loans, is extended in appendix A to part 235 to mortgages to be insured under section 235(r). Delegations of authority to execute specific documents on HUD's behalf in conjunction with mortgages to be insured under section 235(r) are also contained in appendix A to part 235.

EFFECTIVE DATE: July 15, 1991.

FOR FURTHER INFORMATION CONTACT: Robert E. Falkenstein, Jr., Office of Insured Single Family Housing, Department of Housing and Urban Development, room 9270, 451 Seventh Street SW., Washington, DC 20410, telephone number (202) 708-2720. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 and have been assigned OMB Control Number 2502-0456.

Public reporting burden for this collection of information is estimated to include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the documents making up the collection of information. Information on the estimated public reporting burden is provided elsewhere in this document.

Background

Section 235 was added to the National Housing Act (Act) in 1968 (12 U.S.C. 1715z) and authorizes the Secretary to insure mortgages for the purpose of acquisition of housing by lower income families. In addition to insuring the mortgages, the Secretary was also authorized to enter into a contract with the mortgagee to make a portion of the mortgage payments on behalf of the mortgagor. The assistance payments are based on the lesser of:

(1) The difference between 20 percent (or 28 percent for contracts with an original term of ten years or less) of the homeowner's adjusted monthly income and the required monthly payments under the mortgage for principal, interest, taxes, insurance and mortgage insurance premium; and

(2) The difference between the required monthly payment under the mortgage for principal, interest and mortgage insurance premium and the monthly payment for principal and interest as if the mortgage bore a lower rate of interest, depending upon the date on which the mortgage was approved by the Secretary for insurance.

Many of the mortgages insured under section 235, which are still outstanding, were made during the high interest rate years of 1980, 1981 and 1982. The interest rates on those mortgages are between 11 and 17.5 percent. If those mortgages could be refinanced at the current lower interest rates, HUD may be able to save substantially in dollar outlays in assistance payments. However, until the enactment of section 235(r), mortgagors had very little incentive to agree to refinance their loans. The only incentive was the potential savings to them on the mortgage held by HUD to secure a repayment of the assistance payments received (recapture mortgage) when they dispose of the property to an ineligible purchaser. Under a refinancing mortgage at a lower interest rate, the mortgagor would receive less assistance on its behalf from HUD and, therefore, possibly owe HUD less at the time of disposition of the property. The amount of assistance to be repaid by the mortgagors is the lesser of the amount of assistance actually received, or 50 percent of the net appreciation in the property. Therefore, if the property does not appreciate in value, the mortgagors would not have to make any repayment. When this potential savings is measured against the costs (origination fees, discount and closing costs), trouble, and time to refinance, such savings would be a very limited inducement to mortgagors to undertake the refinancing.

In addition, mortgagees would not be interested in making the loans unless they are paid a discount. The mortgagors on mortgages insured under section 235 are low-income persons, who generally would not be able to afford closing costs, origination fees or discounts necessary to refinance. To a limited extent, closing costs, origination fees, and discounts could have been included in the mortgage amount in a refinancing under section 203 or 235, but the mortgagor may not have agreed to the inclusion of these costs since his debt would have been increased.

In the appropriations Act for the Departments of Veterans Affairs and Housing and Urban Development for the fiscal year ending September 30, 1990 (Pub. L. 101-144) signed by the President on November 9, 1989, a new subsection (r) was added to section 235 of the Act entitled Refinancing. The new subsection required the Secretary to periodically review each assistance payments contract to determine whether a refinancing was warranted. There were some defects in this legislation and, before it was implemented, subsection (r) was amended by the Reform Act.

Section 235(r) as Amended by the Reform Act

Section 235(r) authorizes the Secretary to insure a mortgage, the proceeds of which are used to refinance a mortgage insured under section 235, and contains the eligibility requirements for such refinancing mortgage. It further provides for assistance payments in connection with mortgages insured under section

235(r). In addition, the Secretary is authorized, and, to the extent provided in appropriation Acts, may pay to the mortgagor (1) an amount as an incentive to the mortgagor to refinance a mortgage insured under section 235 and (2) an amount for costs incurred in connection with the refinancing, including but not limited to discounts, loan origination fees, and closing costs. To the extent that these amounts are not paid by the Secretary, the interest rate of the refinancing mortgage may be increased over the rate otherwise allowed by the Secretary to compensate the mortgagee for its payments to, or on behalf of, the mortgagor of these amounts. Since appropriation Acts have not provided any funds for the Secretary to make the payments specified in (1) and (2) above, the interest rate for the section 235(r) mortgages will be set initially at an amount to compensate the mortgagees for making these payments. After the period of the loan required to repay the mortgagee for making these payments, which period cannot exceed 60 months, then the interest rate will decrease to the market rate. The 235(r) market rate is determined by using the current coupon rate (i.e. the maximum VA 30-year fixed rate less ½ percent) on Government National Mortgage Association Mortgage-Backed Securities (GNMA's MBS) scheduled for 60 day delivery shown on the Telerate Systems' Mortgage Service page 7105, or successor, at the market's closing on the date of application plus an additional one-half of one percent (½%). In the event that the price discount on the current coupon exceeds 2 points, the market rate will be the next higher GNMA coupon rate (not exceeding par), as shown on page 7105 of the Telerate Service, plus an additional one-half of one percent (½%). The market rate will remain in effect for the remainder of the mortgage term.

Direct Endorsement

It has been administratively determined that mortgages to be insured under section 235(r) should be eligible for processing and underwriting by mortgagees who are approved for the direct endorsement program under 24 CFR 200.164. However, under 24 CFR 200.163(a)(1) mortgages insured under section 235 are not presently eligible for processing under the direct endorsement program. Therefore, appendix 235, implementing the provisions of subsection (r), also contains authority for mortgages to be insured under this subsection to be processed through the direct endorsement program. There are certain requirements in the direct endorsement program which are not applicable to the properties securing mortgages under section 235(r), e.g., those requirements involving new construction. appendix 235 specifies which of the regulations under Direct Endorsement, 24 CFR 200.163-164a, apply to a mortgage insured under Section 235(r), and the certifications that the mortgagee and mortgagee's underwriter must make with respect to a 235(r) mortgage.

Further, appendix 235 contains authority for the direct endorsement mortgagees to sign, for and on behalf of HUD, the "Application for Homeownership Assistance under section 235 of the National Housing Act" (HUD-93100), approving the amount of assistance payment which HUD will make on behalf of the mortgagor under the 235(r) mortgage, if any. The direct endorsement mortgagee shall also have the authority to sign, for and on behalf of HUD, together with the mortgagor, an agreement subordinating the recapture mortgage, held by HUD for the purpose of securing repayment by the mortgagors of assistance payments made on their behalf, to the section 235(r) mortgage. This agreement shall also modify the recapture mortgage to include a reference to the new note being executed by the mortgagor to reflect assistance payments to be made in connection with the mortgage to be insured under section 235(r).

Findings and Certifications

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, 451 Seventh Street SW., room 10276, Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in section 1(d) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. If the rule impacts on small entities at all, such impact will be positive as the notice is implementing another HUD-insured mortgage program.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus is not subject to review under the Order. The rule involves the refinancing of mortgages insured under section 235 by mortgages to be insured under section 235(r). The purpose of the refinancing is to lower the interest rate on the mortgages so that the assistance payments being made by the Department will be reduced, thus saving the Department large cash outlays. The effect on families would be beneficial in that they would have a potential savings with respect to repayment of assistance payments to the Department and would also receive an incentive payment to refinance.

Information Collection Requirements

The collection of information requirements for this program were submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980, and were approved by OMB as Control No. 2502-0456. In accordance with 5 CFR 1320.21, the following table discloses the Department's estimated burden for each of the collections of information in this rule.

VOL 56 ISS 115 JE 14 1991 UMI

List of Subjects in 24 CFR Part 235

Condominiums, Cooperatives, Grant programs: housing and community development, Low and moderate income housing, Mortgage insurance, Reporting and recordkeeping requirements, Homeownership.

Accordingly, the Department amends 24 CFR part 235 as follows:

PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

1. The authority citation for 24 CFR part 235 continues to read as follows:

Authority: Sections 211, 235, National Housing Act (12 U.S.C. 1715b, 1715z); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. A new § 235.4 is added to subpart A, to read as follows:

§ 235.4 Refinancing under section 235(r) of the National Housing Act.

Subparts A, B, C and G of part 235 apply to a refinancing mortgage insured under section 235(r) of the National Housing Act, except as these subparts are modified and supplemented by Appendix A to part 235. (Appendix A to part 235 appears at the end of this part.)

3. A new Appendix A to part 235 is added to read as follows:

Appendix A to Part 235—Refinancing Section 235(r)

This Appendix contains the requirements for insuring mortgages under section 235(r) of the Act. Mortgages to be insured under section 235(r) will be eligible for direct endorsement processing as well as regular HUD processing. The following requirements, contract rights and obligations apply to a mortgage to be insured under section 235(r) of the Act.

Part I Direct Endorsement

A. Programs Included Under the Direct Endorsement Programs

The regulations implementing the direct endorsement program are contained in 24 CFR 200.163 through 200.164a. 24 CFR 200.163(a)(1) specifies the single family programs which are eligible for processing under the direct endorsement program. Section 235(r) is hereby made an eligible program for direct endorsement processing.

B. Provisions of 24 CFR 200.163 Through 200.164a Which Do Not Apply to Mortgages Insured Under Section 235(r)

The properties, which are to be security for the section 235(r) mortgages, are (1) currently security for mortgages insured under section 235, and (2) are existing with no requirement for appraisals. In addition, the eligibility requirements for the mortgagors and the mortgages differ from the other programs under the Direct Endorsement program.

There are several provisions of 24 CFR 200.163 which do not apply to mortgages insured under section 235(r). The paragraphs of 24 CFR 200.163 which are not applicable to mortgages insured under section 235(r) are as follows:

Paragraph 3 of subsection (b), *Appraisal*
Paragraph 4 of subsection (b), *Mortgagor's income*
Paragraphs (i), (iv), (vi) (viii) through (x) of subsection (b)(5), *Submission for Endorsement*
Paragraphs (A) through (I) of subsection (b)(5)(xi), *Submission for Endorsement*
Paragraphs (1) through (11) of subsection (c), *Underwriter Certification*
Paragraphs (1) through (4) of subsection (d), *HUD/FHA Pre-Endorsement Review*

C. Special Requirements for Section 235(r)

In lieu of the following paragraphs which are eliminated by section B, above, the following provisions are applicable for mortgages insured under section 235(r):

(1) Paragraph (A) Through (I) of Subsection (b)(5)(xi) (Submission for Endorsement)

In lieu of the certifications required of the mortgagees by paragraphs A through I of 24 CFR 200.163(b)(5)(xi), the mortgagee shall give the following certifications:

(a) That the mortgage term does not exceed the unexpired term of the insured mortgage being refinanced.

(b) That the mortgage shall be on real estate held in fee simple, or on a leasehold under a lease for not less than 99 years which is renewable, or under a lease which has at least ten years to run from the maturity of the mortgage.

(c) That the stated mortgage amount does not exceed the lesser of (i) the outstanding principal balance due on the mortgage being refinanced as shown on the amortization schedule without taking into account prepayments and delinquencies and (ii) the actual unpaid principal balance due on the mortgage being refinanced.

(d) That the mortgage satisfies the requirements of 24 CFR 235.22 (a), (b), (c) and (f).

(e) That the recapture second mortgage, if applicable, has been subordinated to the mortgage being submitted for insurance and that the recapture mortgage is a second lien; provided that in the case where there is a loan made, held or insured by a Federal, State or local governmental agency which was approved by the Secretary as a second lien and which has been subordinated to the mortgage being submitted for insurance, the recapture mortgage may be a third lien.

(f) That the interest rates on the mortgage meet the requirements contained in part II, B. (4) of this notice, and that the initial interest rate is at least one percent (1%) higher than the interest rate on the remaining term of the mortgage.

(g) That the period for repayment of the refinancing cost by the mortgagor shall not extend beyond that necessary for the mortgagee to recover the eligible refinancing costs, but in no event shall it exceed a period of 60 months from the date of the first monthly payment of principal and interest due under the mortgage to be insured.

(h) That the mortgagor has not received payment, nor have payments been made on his behalf, as described in part II, B. (4) for a five year period from the date of the first monthly payment to principal and interest which was due on the mortgage to be refinanced.

(2) Paragraphs (1) Through (11) of Subsection (c) (Underwriter Certification)

In lieu of the certifications required by the Underwriter under 24 CFR 200.163(c), the underwriter shall give the following certifications:

(a) That, in the event the mortgagor's portion of the monthly principal and interest payments on the mortgage submitted for insurance, increases by more that $50.00 over the mortgagor's payments on the mortgage being refinanced, (i) a mortgage credit analysis has been performed, (ii) the mortgagor's income is and will be adequate to meet his portion of the periodic payments required by the mortgage submitted for insurance in accordance with part II, B. (6)(b) herein, and (iii) the mortgagor has a general credit standing satisfactory to the Secretary as required by 24 CFR 203.34 incorporated by referenced by 24 CFR 235.1.

(b) That the mortgagor is eligible for, and receiving, assistance payments with respect to the mortgage being refinanced and that the last recertification of the mortgagor was within the preceding twelve months prior to the application for the 235(r) mortgage.

(c) That the mortgagor is eligible to continue to receive assistance in connection with the 235(r) mortgage.

(d) That the monthly payments of principal and interest at the 235(r) interest rate on the mortgage submitted for insurance are less than the monthly payments of principal and interest on the mortgage being refinanced.

(e) That the property which is security for the mortgage is occupied by the mortgagor.

(f) That the computation of the amount of assistance payments which the Secretary will pay on behalf of the mortgagor was computed in accordance with the formula contained in part IV, B. of this notice.

(g) That the mortgagors agreed to recertify, on a form prescribed by the Secretary, as to occupancy, employment, family composition and income in accordance with 24 CFR 235.350.

(3) Paragraphs (1) Through (4) of Subsection (d) (HUD/FHA Pre-Endorsement Review)

In lieu of the review and determinations to be made of loan documents by HUD as provided in 24 CFR 200.163(d), upon submission by an approved mortgagee of the documents required by 24 CFR 200.163 (b) and (c), as modified by this notice, HUD/FHA will review the loan documents to determine:

(a) That the mortgage is executed on a form which meets the requirements of the Secretary.

(b) That the mortgage maturity meets the requirements of part II, B. (3) of this notice.

(c) That the stated mortgage amount does not exceed the maximum dollar limitation under part II, B. (2) hereunder.

(d) That the mortgage interest rates meet the requirements of part II, B. (4) of this notice.

(4) References to 24 CFR 200.163 (b) and (c)

For the purposes of section 235(r) mortgages, all references in 24 CFR 200.163 to paragraphs (b) and (c) shall mean (b) and (c), as modified by this appendix.

D. Authority To Sign

A direct endorsement mortgagee processing and underwriting a Section 235(r) mortgage shall have the authority to sign, for and on behalf of the Secretary, in accordance with procedures established by the Secretary, without further specific approval, the following documents:

(1) Approval of Amount of Assistance Payments

The Form HUD 93100, "Application for Homeownership Assistance under section 235 of the National Housing Act," which evidences a review of the information obtained from the mortgagor on the application, a determination of eligibility or ineligibility for assistance payments, and the amount of the assistance payments to which the mortgagor is entitled.

(2) Subordination and Modification Agreement

An agreement, which subordinates a recapture second mortgage or deed of trust (recapture mortgage) held by HUD in accordance with 24 CFR 235.12, to the lien of the mortgage being submitted for insurance so that the recapture mortgage will remain a second lien. If the recapture mortgage is a third lien following a second lien made, held or insured by a Federal, State or local governmental agency, and approved by the Secretary, the direct endorsement mortgagee may sign an agreement subordinating the recapture mortgage to third lien place. The agreement shall also contain a modification of the recapture mortgage to include a new note to be signed by the mortgagor securing repayment of the assistance to be paid under the mortgage to be insured under section 235(r).

Part II Eligibility Requirements of Mortgages

In accordance with the authority contained in section 235(r) of the Act, the Secretary may insure, under subpart A of part 235, any mortgage given to refinance an existing mortgage which is insured under section 235 of the National Housing Act. Except as provided in this part II, all of the provisions of subpart A shall apply to the insurance of a mortgage under section 235(r).

A. Applicable Sections of 24 CFR Part 235, Subpart A

The provisions of 24 CFR part 235, subpart A which apply to a mortgage insured under section 235(r) are the following:

Sec.
235.1 Cross-reference
235.3 Waiver
235.5 Definitions used in this subpart

VOL 56 ISS 115 JE 14 1991 UMI

Sec.
235.12 Recapture of assistance payments
235.22(a)–(c) and (f) Mortgage provisions
235.33 Mortgage lien
235.40 Late charge

B. Special Requirements

The refinancing mortgage must meet the following special requirements:

(1) First Lien

It must be a first lien on real estate held in fee simple, or on a leasehold under a lease (1) for not less than 99 years which is renewable, or (2) has a period of not less than ten years to run beyond the maturity date of the mortgage.

(2) Mortgage Amount

It must be in an amount not exceeding the lesser of (i) the outstanding principal balance due on the mortgage being refinanced as shown on the amortization schedule, not taking into account prepayments and delinquencies, and (ii) the actual unpaid balance due on the mortgage being refinanced.

(3) Maturity Date

It must have a maturity not to exceed the remaining term of the section 235 mortgage being refinanced. In the event that the remaining term is measured in years and months, the term for the refinancing mortgage shall be rounded down to the next whole year.

(4) Interest Rates

(a) *235(r) Interest Rate.* The 235(r) interest rate is determined by using the current coupon rate (i.e. the maximum VA 30-year fixed rate less ½ percent) on Government National Mortgage Association Mortgage-Backed Securities (GNMA's MBS) scheduled for 60 day delivery shown on the Telerate Systems' Mortgage Service page 7105, or successor, at the market's closing on the date of application plus an additional one-half of one percent (½%). In the event that the price discount on the current coupon exceeds 3 points, the market rate will be the next higher GNMA coupon rate (not exceeding par), as shown on page 7105 of the Telerate Service, plus an additional one-half of one percent (½%).

(b) *Initial interest rate.* (i) From the date of the execution of the mortgage note until the date set forth in the mortgage note, it shall bear an additional increment of interest so that the total interest for that period is the same as the interest rate shown on the mortgage being refinanced, in order for the mortgagee to recover its payment to, or on behalf of, the mortgagor of the refinancing costs described below:

(A) An amount, as approved by the Secretary, as an incentive to the mortgagor to refinance a mortgage insured under section 235;

(B) An amount, as approved by the Secretary, for costs incurred in connection with the refinancing, including but not limited to discounts, loan origination fees, and closing costs;

(C) Current interest and delinquent interest not to exceed two months, on the mortgage being refinanced;

(D) Prepaid interest on the mortgage to be insured but not to exceed a period of ten (10) days; and

(E) Any excess of the actual outstanding principal balance not including current or delinquent interest over and above the scheduled unpaid principal, not taking into account any prepayments or delinquencies, as shown on the amortization schedule for the mortgage being refinanced.

(ii) The initial interest rate must be at least one percent (1%) higher than the 235(r) interest rate which is described in subparagraph (a).

(5) Eligible Mortgagee

It shall have been made to, and held by, a mortgagee approved by the Secretary.

(6) Eligible Mortgagor

(a) It must be executed by a mortgagor who is eligible for, and receiving, assistance payments with respect to the mortgage being refinanced.

(b) If the mortgage submitted for insurance requires an increase in the mortgagor's portion of the periodic payments due under the mortgage by more than $50.00 over the amount the mortgagor was paying on the mortgage being refinanced, then a mortgage credit analysis must be performed on the mortgagor who must establish that his income is or will be adequate to meet his portion of the periodic payment due under the new mortgage. Only that part of the mortgagor's income which can be expected to continue for approximately the first five years of the mortgage term will be considered effective income for the purpose of determining the adequacy of the mortgagor's income.

(c) Cooperative members, who are receiving assistance payments, which in all cases are based on the cooperative member's proportionate share of the obligation under the project mortgage, are not eligible for section 235(r) mortgages.

(d) If the property is subject to a recapture mortgage securing the payment to the Secretary of assistance payments made on behalf of the mortgagor, the mortgagor must agree to modify and subordinate such mortgage to the mortgage to be insured under section 235(r) in accordance with instructions of the Secretary.

(e) The mortgagor has not received payments for the costs of refinancing, nor have such payments been made on his behalf, as described in Part II, B. (4), for a period fo 60 months from the date of the first payment of principal and interest on the mortgage to be refinanced; provided, however, that if the mortgagor pays its own cost to refinance, then this prohibition will not apply.

(f) The mortgagor must be an occupant of the property securing the mortgage.

(7) Monthly Payments

It must have monthly principal and interest payments at the 235(r) interest rate which are less than the monthly payments of principal and interest on the mortgage being refinanced.

(8) Refinancing costs

The refinancing costs may include those costs specified in paragraph (4)(b)(i). The period during which the mortgagor is to repay at the initial interest rate the refinancing costs paid by the mortgagee shall not extend beyond that necessary for recovery of eligible costs, but in no event shall it exceed 60 months from the date of the first monthly payment of principal and interest on the mortgage to be insured.

Part III. Contract Rights and Obligations

The provisions of subpart B of title 24 of part 235 shall be applicable to mortgages insured in accordance with section 235(r) of the Act.

Part IV. Assistance Payments Contract

A. Contract for Assistance Payments

Title 24, part 235, subpart C shall constitute the contract between the mortgagee and the Secretary for assistance payments in connection with a mortgage insured under section 235(r) of the Act, as modified by this appendix. The assistance payments contract for the mortgage being refinanced shall be terminated on the day before the disbursement of the proceeds of the mortgage to be insured and no further assistance payments shall be made under such contract. The sections of subpart C which apply in connection with a mortgage insured under section 235(r) are the following:

Sec. 235.301 Definitions
Sec. 235.340 Time of Payments
Sec. 235.350 Mortgagor's Required Recertification
Sec. 235.355 Mortgagor's Optional Recertification
Sec. 235.360 Adjustment in assistance payments
Sec. 235.361 Recovery of assistance payments
Sec. 235.365 Mortgagee records
Sec. 235.370 Effect of assignment of mortgage with an assistance payment contract
Sec. 235.375 Termination, suspension or reinstatement of the assistance payments contract
Sec. 235.499 Effect of amendments

The sections cited above and the following additional provisions constitute the assistance payments contract for a mortgage insured under section 235(r).

B. Assistance Payments and Handling Charges

(1) The assistance payments on behalf of the mortgagor shall be the lesser of the following:

(a) The difference between 20 percent (or 28 percent in the case of contracts entered into for a ten year term (ten year contracts)) pursuant to the authority under section 235(c)(1) of the Act, as amended by the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. No. 98–181) of the homeowner's adjusted monthly income and the required monthly payment under the mortgage for principal, interest, taxes, insurance, and mortgage insurance premium.

(b) The difference between the required monthly payment under the mortgage for principal, interest, and mortgage insurance premium and the monthly payment which would be required for principal and interest if the mortgage bore the lower interest rate established by the Secretary and in effect at the time of the closing of the mortgage being refinanced and which is referred to as the "floor rate."

(2) The floor rates are determined by the date of the closing of the mortgage being refinanced.

As an example, the following chart contains floor rates. However, mortgagees must check the HUD Form 93100 for the mortgage being refinanced to obtain the floor rate for that mortgage, which rate is to be used to compute the formula contained in paragraph (1)(b).

Date of closing	Note rate (%)	Interest rate to compute second element of paragraph (1)(b) (%)
8/9/66–1/4/76	N/A	1
1/5/76–3/6/78	N/A	5
3/7/78–3/8/81	N/A	4
On or after 3/9/81	13.50 or below	4
	13.75–14.00	4¾
	14.25–14.50	5¼
	15.00	6
	15.50	6¾
	16	7¼
	16.50	8
	17.50	8

(3) In addition to the assistance payments referred to in paragraph (1), the mortgagee shall be entitled to the monthly payment of an amount the Secretary deems sufficient to reimburse the mortgagee for its expense in handling the mortgage.

(4) Special assessments levied by a governmental body are to be included under the term "taxes" as part of the monthly payment. However, ground rents, assessments of a homeowners' association or condominium association, and special assessments levied by persons or private organizations are not to be included.

C. Execution of Assistance Payment Contract

The issuance of a mortgage insurance certificate pursuant to section 235.1 et seq. shall also constitute the execution of the assistance payments contract with respect to the mortgage being insured.

D. Eligibility for Assistance Payments

(1) In order to be eligible for assistance payments, a homeowner shall:

(a) Be a mortgagor on a mortgage insured, or to be insured, under section 235(r);

(b) Shall have been entitled to and receiving assistance payments under the mortgage being refinanced; and

(c) According to the formulae contained under subparagraph (B) under this part, shall continue to be eligible for such payments under the 235(r) mortgage.

(2) The mortgagee, holding the mortgage being refinanced, must certify that the mortgagor is eligible for, and receiving, assistance payments under the mortgage being refinanced and that the last recertification by the mortgagor was within the preceding twelve months prior to the application for the section 235(r) mortgage. If the last recertification was not within that period, then the mortgagee will have to obtain a current recertification from the mortgagor for the purpose of determining whether the mortgagor remains eligible to continue receiving assistance payments under the mortgage being refinanced.

(3) In addition, the mortgagee originating the 235(r) mortgage must obtain a new certification from the mortgagor for eligibility for assistance payments under the 235(r) mortgage. For purposes of determining eligibility under the 235(r) mortgage, the mortgagor must certify as to occupancy, employment, family composition and income on a form prescribed by the Secretary.

(4) The mortgagor shall agree to recertify, on a form prescribed by the Secretary, as to occupancy, employment, family composition and income in accordance with 24 CFR 235.350.

(5) Homeowners, who are cooperative members and have been receiving assistance payments under section 235, are not eligible for assistance payments in connection with section 235(r) since they are not eligible for a mortgage insured under that section.

E. Term of Assistance Payment Contract in Connection With Mortgages Insured Under Section 235(r) of the Act

(1) Existing Contracts With Original Terms in Excess of Ten Years

In cases where the existing contracts has an original term in excess of ten years, the term of the new assistance payment contract in connection with section 235(r) shall commence on the date of disbursement of the mortgage proceeds as certified by the mortgagee, and shall continue until the contract is terminated pursuant to 24 CFR 235.375.

(2) Existing Ten Year Contracts

(a) In cases of ten year contracts, the term of the new assistance payments contract in connection with section 235(r) shall commence on the date of the disbursement of the mortgage proceeds as certified by the mortgagee, and shall continue for the unexpired term of the ten year contract, or until such earlier time as the contract is otherwise terminated pursuant to 24 CFR 235.375. The mortgagor will acknowledge receipt of a notice containing the expiration date of the new assistance payment contract.

(b) If the Secretary determines that the mortgagor is unable, by reason of the new contract having reached its maturity to resume full payments due under the mortgage insured under section 235(r) of the Act, the Secretary will, to the extent of funds available pursuant to section 235(c)(3) of the Act, contract to make, and make, continued assistance payments on behalf of the mortgagor for such period as the Secretary determines to be appropriate.

F. Recapture of Assistance Payments

The mortgagor shall execute an agreement subordinating the recapture mortgage, if any, to the section 235(r) mortgage. The mortgagor shall also execute a new note for recapture of assistance payments, and amend the recapture mortgage to include in the principal balance, assistance payments made in connection with the mortgage insured under section 235(r).

Part V. Servicing Responsibilities

The provisions of subpart G of 24 CFR part 235 shall be applicable to mortgages insured under section 235(r).

Dated: June 10, 1991.

Arthur J. Hill,

Assistant Secretary for Housing—Federal Housing Commissioner.

Requirements for Preparation, Adoption, and Submittal of Implementation Plans; Approval and Promulgation of Implementation Plans; Standards of Performance for New Stationary Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rule.

SUMMARY: The applicability of the new source requirements of title I of the Clean Air Act (CAA) to physical or operational changes at electric utility generating units is an issue of considerable interest at this time because of the recent passage of the 1990 Clean Air Act Amendments (CAAA). Many utilities will be undertaking major pollution control projects at their units in the next few years. In enacting title IV, Congress did not suspend any title I requirements for this work. However, the massive industry-wide undertakings of pollution control projects warrants a clarification of the new source review requirements of title I. In particular, New Source Review (NSR) provisions should not inadvertently bias a utility towards or against any means of complying with the acid rain provisions. The EPA believes the amendments proposed today and the clarification of its current policy under its present NSR regulations provide adequate assurances that utilities can undertake title IV pollution control projects without uncertainty as to the applicability of the various title I new source requirements. At the same time, the applicability of existing new source regulations to modifications has been the source of two recent federal appellate decisions, *Wisconsin Electric Power Co.* v. *Reilly. (WEPCO)*, 893 F.2d 901 (7th Cir. 1990), and *Puerto Rican Cement Co.* v. *EPA*, 889 F.2d 292 (1st Cir. 1989). As a result, EPA is today proposing clarifying amendments to these regulations and confirming its policies regarding of some these provisions as they apply to utility projects pending adoption of the proposed amendments.

The EPA today proposes to adopt a broad NSR exclusion for utility pollution control projects and, until these proposed regulations are adopted in final form, to adhere to its policy that new source regulations already generally exclude coverage of pollution control projects undertaken at electric utility units. Similarly, EPA today proposes to adopt an "actual to future actual" methodology for determining whether all other nonroutine physical or operational changes at utilities (other than the replacement of a unit or addition of a new unit) are subject to new source review under either prevention of significant deterioration (PSD) or nonattainment provisions and to maintain in the interim that this methodology is applied where the unit has "begun normal operations." For those utility projects which undergo PSD new source review, today's notice proposes a presumption that for EPA-issued permits, "low-NOx burners" can satisfy the best available control technology (BACT) requirements.

In addition, EPA also proposes to modify its regulations implementing the modification provisions of the title I new source performance standards (NSPS) program to provide that a utility may use for its pre-change baseline the highest hourly emissions rate achievable at any time during the 5 years prior to the physical or operational change. The EPA also proposes to modify its regulations to reflect changes made by Congress in the 1990 Amendments to the applicability of new source requirements to clean coal technology (CCT) and repowering projects, and to "very clean" units.

DATES: *Comments.* Comments on the revisions proposed today must be received on or before August 19, 1991.

Public Hearing. A public hearing is scheduled for 10 a.m., July 19, 1991. The hearing may be canceled if no speakers have requested time to present their comments 15 days prior to the scheduled hearing date. Written comments in lieu of testimony are encouraged. For information about the hearing contact JoAnn Allman at (919) 541–5591.

ADDRESSES: Supporting information used in developing this proposed rule is contained in docket A–90–06. This docket is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., weekdays at EPA's Air Docket (LE–131), room M–1500, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying.

The public hearing will be held at the Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Chebryll Edwards, New Source Review Section (MD–15), Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina 27711, (919) 541–2343.

SUPPLEMENTARY INFORMATION:

I. Introduction

The EPA today proposes to amend its regulations implementing the various title I new source requirements governing physical or operational changes at electric utility generating units. Specifically, these proposed changes are being issued to clarify the coverage of the NSPS, PSD and nonattainment preconstruction review requirements of title I of the Clean Air Act to projects undertaken at electric utility steam generating units. [1]

The EPA proposes to amend the definition of "major modification" in 40 CFR parts 51 and 52 to set forth the conditions under which the addition, replacement or use at existing electric utility generating units of any system or device whose primary function is the reduction of air pollutants (including the switching to a less polluting fuel where the primary purpose of the switch is the reduction of air pollutants) will or will not subject the source to preconstruction review. Specifically, EPA proposes in PSD and nonattainment areas to adopt a regulatory exclusion explicating its authority under the statutory definition of "modification" and confirming EPA's current practice that pollution control projects which "do not render the unit less environmentally beneficial" are not "physical or operational changes," and hence, are not "modifications" for the purposes of parts C and D of title I and are not "major modifications" for the purposes of EPA's regulations implementing those provisions. The EPA is today also proposing to amend its PSD and nonattainment new source review regulations (40 CFR parts 51 and 52) [2] as they apply to utilities to (1) clarify the NSR baseline for determining whether a proposed physical or operational change will subject a utility to the preconstruction review requirements of these provisions; (2) set forth an actual to future actual methodology for determining whether a physical or operational change is subject to NSR; (3) provide further clarification of the existing regulatory requirement that only those increases in emissions that actually result from the physical

[1] The proposed regulations define electric utility steam generating units as any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW of electrical output to any utility power distribution system for sale, See, *e.g.*, proposed 40 CFR 51.165(xx).

[2] For the purposes of this notice, references to "new source review" (or "NSR") refer to the preconstruction review requirements of both part C (PSD) and part D (nonattainment) of the Clean Air Act, unless otherwise indicated.

change or change in the method of operation can be considered in determining whether the proposed change subjects the utility to NSR requirements; and (4) implement sections 409 and 415 of title IV of the Clean Air Act Amendments of 1990 which create special NSPS treatment for certain repowering projects and limited NSR exemptions for temporary and permanent CCT projects, and for certain "very clean" units. Finally, EPA is also proposing to amend its NSPS regulations (40 CFR part 60) to allow a utility to use as its pre-change baseline its highest hourly emissions rate achievable during the 5 years prior to the proposed physical or operational change. To the extent the proposed amendments implement existing EPA policies, EPA will continue to administer its regulations in a manner consistent with these policies pending adoption of the regulations proposed today. Portions of the preamble of today's proposal set forth EPA's present policies under its current regulations, and may be relied on as such pending final action on today's proposal.

Today's proposal addressing pollution control projects and other non-routine physical and operational changes at electric utility units is timely for several reasons. First, the 1990 Clean Air Act amendments establish, in title IV, a new control scheme for addressing the acid rain problem which focuses exclusively and immediately on utility power plants. Title IV will force most electric utility steam generating units to undertake pollution control projects and provides full flexibility to achieve compliance without a bias towards or against any particular pollution control method. Second, the Agency believes its extensive experience with other non-routine physical and operational changes at such units and the unique characteristics of the electric utility industry (e.g., the general similarity of equipment within the category and the extent of publicly available information) support a revision to the new source review applicability criteria for this source category. Further, while Congress did not make significant changes in the NSR and NSPS statutory language in 1990, the conference committee provided the following guidance to EPA in its Joint Explanatory Statement:

> "[T]he deletion of most provisions relating to the WEPCO decision is not intended to affect or prejudice in any way the issues or resolution of the WEPCO matter. At the same time, the conferees urge a quick resolution of the WEPCO matter by EPA as appropriate."

Conference Comm., Joint Explanatory Statement of the Committee of the Conference to Accompany S. 1630, Rep. 101–952, 101st Cong., 2nd Sess. (1990) pp. 344–45. In passing title IV, Congress did not suspend any requirements of title I. However title I and title IV are clearly intended to work in concert, not conflict, and today's ruling is intended to ensure that harmony.

II. Background

A. The New Source Performance Standards, Prevention of Significant Deterioration and Nonattainment Programs of Title I

Title I of the Clean Air Act has three programs specifically designed to ensure that no new air pollution—whether from new sources or from modifications to existing sources—can be emitted unless the source complies with new source requirements.

The 1970 Clean Air Act required EPA to promulgate technology-based new source performance standards applicable to the construction or modification of stationary sources that cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. Clean Air Act ("CAA") Section 111(b)(1)(A), 42 U.S.C. 7411(b)(1)(A). The NSPS provisions were "designed to prevent new air pollution problems" by regulating newly-constructed sources and changes occurring at existing sources that result in emissions increases. See *National Asphalt Pavement Assoc.* v. *Train*, 539 F.2d 775, 783 (DC Cir. 1976); see also H.R. Rep. No. 1146, 91st Cong., 2d Sess. 3, reprinted in 1970 U.S. Code Cong. & Admin. News 5356, 5358. Congress defined the term "modification" as "any physical change in, or change in the method of operation of, a stationary source which increases the amount of any air pollutant emitted by such source or which results in the emission of any air pollutant not previously emitted." See CAA 111(a)(4), 42 U.S.C. 7411(a)(4).

In 1977, Congress adopted additional amendments to the Clean Air Act. These changes included preconstruction permitting requirements for major new and modified sources under two programs, prevention of significant deterioration (PSD) and nonattainment new source review (respectively, parts C and D of the Clean Air Act). Congress intended these programs to apply generally where industrial changes might increase pollution in an area. *Alabama Power Co.* v. *Costle*, 636 F.2d 323, 400 (DC Cir. 1979). Congress incorporated in parts C and D the same definition of the term "modification" set forth in the NSPS provisions. See CAA 111(a)(4), 169(2)(C), and 171(4).

The NSR program for PSD (CAA 160–169) applies in attainment areas, i.e., those areas which have attained the national ambient air quality standards (NAAQS). To receive a PSD permit, a prospective major new source or major modification must (among other things) show that (1) it will not cause or contribute to a violation of the available air quality "increment" (designed to prevent ambient air quality from deteriorating by more than certain specified levels), (2) it will not cause or contribute to a violation of a NAAQS, and (3) it will use the "best available control technology (BACT)," which must be at least as stringent as any applicable NSPS or hazardous pollutant standard under section 112 of the Act.

Part D of the 1977 Amendments applies to nonattainment areas, i.e., those areas which have not met the NAAQS under section 109. To receive a permit in such areas, major new and modified sources must (among other things) (1) obtain emissions offsets, thereby assuring that reasonable progress toward attainment of the NAAQS will occur, and (2) comply with the "lowest achievable emission rate (LAER)." See CAA 171–173. [3]

B. The Two-Step Test for Modifications

The modification provisions of the NSPS and NSR programs are based on the broad NSPS definition of "modification" in section 111(a)(4) of the Act. That section contemplates a two-step test for determining whether activities at an existing facility constitute a modification subject to new source requirements. In the first step, which is largely the same for NSPS and NSR, the reviewing authority determines whether a physical or operational change will occur. [4] If so, the reviewing authority proceeds in the second step to determine whether the physical or operational change will result in an emissions increase over baseline levels. In this second step, the applicable rules branch apart, reflecting the fundamental distinctions between the technology-based provisions of NSPS and the air quality-based provisions of NSR.

Briefly, the NSPS program examines maximum hourly emissions rates, expressed in kilograms per hour. [5]

[3] The 1970 Clean Air Act also included a provision applicable to construction or modification of any stationary source. This provision is presently set forth in section 110(a)(2)(C). Today's notice does not propose to change the scope of the regulations implementing this provision. See 40 CFR 51.160–164.

[4] This is further described in section III.H below.

[5] An hourly emissions rate may be determined by a stack test or calculated from the product of the

UMI

Emissions increases for NSPS purposes are determined by changes in the hourly emissions rates at maximum physical capacity. On the other hand, the NSR regulations examine total emissions to the atmosphere. For applicability determination purposes, emissions increases under NSR are determined by changes in annual emissions as expressed in tons per year (tpy).[6]

C. Step One: Physical or Operational Change

The EPA has always recognized that the definition of physical or operational change in section 111(a)(4) could, standing alone, encompass the most mundane activities at an industrial facility (even the repair or replacement of a single leaky pipe, or a change in the way that pipe is utilized). However, EPA has always recognized that Congress obviously did not intend to make every activity at a source subject to new source requirements.

As a result, EPA has defined "modification" in the NSPS and NSR regulations to include common-sense exclusions from the "physical or operational change" component of the definition. For example, both sets of regulations contain similar exclusions for routine maintenance, repair, and replacement; for increases in the hours of operation or in the production rate; and for certain types of fuel switches. See *e.g.*, 40 CFR 52.21(b)(2)(iii) and 60.14(e). In addition, with respect to pollution control equipment, the NSPS regulations contain an exclusion for:

> The addition or use of any system or device whose primary function is the reduction of air pollutants, except when an emissions control system is removed or is replaced by a system which the Administrator determines to be less environmentally beneficial.

40 CFR 60.14(e)(5). As will be discussed, in recent individual applicability determinations EPA has excluded pollution control projects from NSR following a similar "environmentally beneficial" test.

[6] Instantaneous emissions rate, i.e., the amount of pollution emitted by a source, after control, per unit of fuel combusted or material processed (such as pounds of sulfur dioxide emitted per ton of coal burned) times the production rate (such as tons of coal burned per hour). See 40 CFR 60.14.

[6] Annual emissions may be calculated as the product of the hourly emissions rate times the utilization rate, expressed as hours of operation per year, or as the product of an emissions factor (e.g., from *Compilation of Air Pollutant Emission Factors*, AP-42, 4th Ed. and subsequent supplements) in units of mass emitted per unit of process throughput times the annual throughput. See 40 CFR 52.21(b)(21).

D. Step Two: Emissions Increases for NSPS Applicability

The EPA's NSPS regulations define the term "modification" as any "physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies." See 40 CFR 60.2 and 60.14. Under current NSPS regulations, emissions increases, for applicability purposes, are calculated by comparing the hourly emission rate, at maximum physical capacity, before and after the physical or operational change. That is, to determine whether a change to an existing facility will increase the emissions rate, the existing NSPS regulations authorize the use of an "emissions factor analysis," or a materials balance, continuous monitoring, or manual emissions test to evaluate emissions before and after the change. 40 CFR 60.14(b)(2).

Absent the exclusions from modifications specified at 40 CFR 60.14(e), any increase in emissions to the atmosphere over the previous emissions rate will subject the unit to NSPS. See, 40 CFR 60.14 (a) and (b). In addition, under the "reconstruction rules," physical or operational changes which would cost 50 percent or more of the total cost of a comparable new facility may be classified as reconstructions (see 40 CFR 60.15) and are subject to NSPS as a new source, even if there is no emissions increase.

E. Step Two: Emissions Increases Under NSR Requirements 1. Existing Regulations

The EPA's regulations implementing the PSD and nonattainment programs require preconstruction review for sources undertaking a "major modification," *i.e.*, a physical change or change in the method of operations "that would result in a significant net emissions increase of any pollutant subject to regulation under the Act." 40 CFR 52.21(b)(2)(i), 52.24(f)(5).[7] A "net emissions increase" is defined as the increase in "actual emissions" from the particular physical or operational change together with any other "contemporaneous" increases or decreases in actual emissions. 40 CFR 52.21(b)(3)(i).[8]

Applicability of the Act's new source review provisions must be determined in advance of construction and is pollutant specific. In cases involving existing sources, this requires a pollutant-by-pollutant projection of the emissions increases, if any, that will result from the physical or operational change. Specifically, to determine whether a proposed physical or operational change will result in an emissions increase, the source must first determine a baseline level of actual emissions. The regulations define actual emissions on a particular date as "the average rate, in tons per year, at which the unit actually emitted the pollutant during a 2-year period which precedes the particular date and which is representative of normal source operation." 40 CFR 52.21(b)(21)(ii) The Administrator "shall" allow use of a different time period "upon a determination that it is more representative of normal source operation." *Id.* The EPA has typically used the 2 years immediately preceding the physical or operational change to establish the baseline. See 45 FR 52676, 52705, 52718 (1980). However, it can allow the use of an earlier 2-year period that is more representative of normal source operations. For example, in *WEPCO*, EPA found the fourth and fifth years prior to the modification more representative of WEPCO's normal operations.

Because the applicability determination must be made in advance of construction, EPA's NSR regulations provide that when an emissions unit "has not begun normal operations," actual emissions equal the "potential to emit of the unit." 40 CFR 52.21(b)(21)(iv). This approach is referred to as the actual to potential methodology. This regulatory provision may be overcome —and new source review will not apply—if the source owner agrees, in a federally enforceable instrument—not to increase its actual emissions above baseline levels. *See e.g.*, 40 CFR 52.21(b)(4).

[7] The current PSD program is set forth in two sets of regulations. One of the regulations cited (40 CFR 52.21) is part of the federal PSD permit program which applies as part of a Federal implementation plan for States that have not submitted a PSD program meeting the regulatory requirements of 40 CFR 51.166 (standards for PSD provisions in State implementation plans). In most States where the federal requirements apply, EPA has delegated the authority to implement the PSD program back to the State. Roughly two-thirds of the States are implementing their own PSD program pursuant to an EPA-approved state implementation plan. Sections 52.21 and 51.166 have identical modification provisions.

EPA's regulations for nonattainment areas are set forth at 40 CFR 51.165, 51.24 and in part 51, appendix S. These sections contain applicability provisions regarding modification that are largely identical to those in the PSD provisions.

[8] Roughly speaking, "contemporaneous" emissions increases or decreases are those which have occurred between the date five years preceding the proposed physical or operational change and the date that the increase from the change occurs. 40 CFR 52.21(b)(3)(ii). Once a modification is determined to be major, the PSD requirements apply only to those specific pollutants for which there would be a significant net emissions increase. E.g., 40 CFR 52.21(j)(2) (best available control technology); 40 CFR 52.21(m)(1)(b) (air quality analysis).

2. The WEPCO and Puerto Rican Cement Decisions

As noted above, to calculate whether a physical or operational change "increases" emissions, EPA regulations require it to find an increase in actual emissions. 40 CFR 52.21(b)(3)(i)(a). Where the emissions unit has not "begun normal operations," EPA regulations recognize that future actual emissions are difficult to predict and employ future "potential" emissions as a proxy. 40 CFR 52.21(b)(21)(iv). The linchpin under the current regulations for predicting future emissions after a modification is thus whether the unit has "begun normal operations."

Two recent federal appellate court decisions have addressed EPA's interpretation of the phrase "begun normal operations." These decisions, *Puerto Rican Cement Co., Inc.* v. *U.S. EPA*, 889 F.2d 292 (1st Cir. 1989) and *Wisconsin Elec. Power Co.* v. *Reilly*, 893 F.2d 901 (7th Cir. 1990) ("*WEPCO*"), occasion a reexamination of EPA's interpretation of the phrase, and of the usefulness of the regulatory language itself. The meaning of the phrase is highly fact-dependent, and these decisions have created uncertainty regarding its application; thus, as described later in this notice, EPA today proposes to change its regulations for electric utility steam generating units to employ a more useful criterion.

Both cases involved physical changes to existing emissions units, but changes of differing extent, nature and result. In *Puerto Rican Cement*, the owner of a cement plant [9] with several kilns sought to convert one "wet" kiln into a "dry" kiln, and to combine that kiln with another kiln. 889 F.2d at 293. The court observed that the total production capacity of the renovated single kiln would exceed the combined production capacity of the previous two separate kilns by "about 35%." *Id.* It noted that the renovated single kiln would employ a different "cement-making process" than the original kiln from which it was "converted," *id.* And it said that the new kiln would be "more efficient (and) may lead the firm to decide to increase the level . of production," *id.* at 297 (emphasis in original). In reviewing EPA's interpretation of "begun normal operations," the court applied a highly deferential standard of review, since an agency's interpretation of its own regulatory language is typically given " 'controlling weight unless it is plainly erroneous or inconsistent with the regulation.' " 889 F.2d at 297, quoting *Udall* v. *Tallman*, 380 U.S. 1, 16–17 (1965) (citation omitted). The court concluded that on the facts of the case, EPA's interpretation that "normal operations" had not begun was not "arbitrary or irrational," *id.* at 298, and hence EPA's application of the actual-to-potential test to predict future emissions was permissible.

In *WEPCO*, 893 F.2d 901, the Seventh Circuit was faced with a different kind of modification. There renovations were proposed for several older (35 to 50 year old) coal-fired electric utility boilers. The physical changes involved repair and replacement of turbine-generators, steam drums and other major components. The EPA contended, as it had in *Puerto Rican Cement*, that these changes went beyond "normal operations" and thus warranted use of future potential emissions as the test for an emissions increase over past actual emissions. Here the court disagreed with EPA's interpretation that "normal operations" had not begun. The court coined the phrase "like-kind replacement" to describe the type of renovation occurring at the WEPCo plant. *Id.* at 917. The court described a "like-kind replacement" as one that "does not 'change or alter' the design or nature of the facility. Rather, it merely allows the facility to operate again as it had before the specific equipment deteriorated." *Id.* at 906. In determining whether such a "like-kind replacement" had "begun normal operations," *id.* at 917, the court considered whether a "realistic assessment of (the) impact (of the change) on ambient air quality levels is possible." *Id.* at 917 (quoting *Alabama Power Co.* v. *Costle*, 636 F.2d 323, 379 (DC Cir. 1979)). The court said that where the renovations were "like-kind replacements," EPA could not reasonably interpret its regulations to say that such a unit was so different that it has not "begun normal operations." Thus, it concluded that the "actual-to-potential" test could not be applied, under EPA's regulations, to units simply undergoing "like-kind replacements." [10]

Neither of these decisions specified the threshold for when a unit has "begun normal operations." Based on these decisions, under its current regulations, EPA must consider the facts of each case and apply the actual-to-potential test only where the change is sufficiently significant to support a finding that "normal operations" have not "begun." At least for changes that are "like kind replacements," "normal operations" have begun, and the actual-to-potential test is impermissible.

Because the "begun normal operations" criterion is highly fact-dependent and its application is inherently case-by-case, it may be an uncertain indicator of what emissions test will be applied in a given instance. However, EPA's extensive experience with electric utilities, and the generally similar nature of operations within this source category, provide EPA an adequate basis on which to predict future actual emissions from such units in most cases. Consequently, as explained below, EPA is today proposing to revise its regulations to apply the actual-to-actual test on all physical or operational changes at electric utility steam generating units save those that are an addition of a new unit or constitute a replacement of an existing unit. Pending final adoption of this new rule, EPA will continue to apply an actual-to-actual test to units that undertake "like-kind replacements" and other units which are found to have "begun normal operations."

[9] *Puerto Rican Cement* involved a cement plant, not an electric utility, but the court's legal analysis of the phrase "begun normal operations" in the current regulations is relevant to all facilities.

[10] On remand, EPA employed an actual-to-future actual test, comparing WEPCo's representative actual emissions for the baseline period to estimated future actual emissions based on all the available facts in the record.

F. The Clean Air Act Amendments of 1990

1. New Source Review and the Acid Rain Provisions

The Clean Air Act Amendments of 1990, Public Law No. 101–549, 104 Stat. 2399 (Nov. 15, 1990), made numerous changes in the nonattainment provisions of the Clean Air Act and added a new title to address the problem of acid rain. The amendments attack nonattainment problems with a broad array of new requirements all designed to bring all areas of the country into attainment with the national ambient air quality standards for all pollutants. These requirements include traffic reduction strategies, use of alternative clean fuels, increased offset requirements for stationary sources, and changes in the threshold size of stationary sources subject to new source review. A principal theme of the legislation is the establishment of categories of nonattainment areas based on the severity of the pollution problem. The more severe the area, the more controls Congress required be imposed.

The Amendments also establish, in title IV, a new control scheme for addressing the acid rain problem. The

VOL
56
ISS
1

14
1991
UMI

exclusive focus of this program is on utility power plant emissions of sulfur dioxide and nitrogen oxides. The 1990 Amendments require sulfur dioxide emissions from utilities to be reduced by approximately 10 million tons annually in two phases—the first to take effect in 1995, the second in 2000. A total of 111 specific plants are targeted in Phase I, and will be required to reduce their SO_2 emissions to specified emissions limits. In Phase II, these plants, and almost all others, are subject to even lower SO_2 emissions limits. This reduction program is to be implemented through a new market-based system under which emissions allowances reflecting the required reduction in current emissions are allocated to existing utility plants. Plant owners, who are required to hold allowances equal to their actual emissions, are then free to trade these allowances. Thus, the emissions of individual units may vary from the initial allocation of allowances, but aggregate emissions are always held to the program's overall target level. This program will provide powerful incentives to sources to undertake pollution control projects.

Because of these requirements, many of the plants subject to Phase I controls must make compliance decisions within the next year in order to assure that the complicated control equipment that may be necessary to meet Phase I standards is in place by the 1995 deadline. In enacting title IV, Congress did not suspend any title I requirements for this work. However, the massive industry-wide undertakings of pollution control projects warrants a clarification of the new source review requirements of title I. In particular, New Source Review (NSR) provisions should not inadvertently bias a utility towards or against any means of complying with the acid rain provisions. The EPA believes the amendments proposed today and the clarification of its current policy under its present NSR regulations provide adequate assurances that utilities can undertake title IV pollution control projects without uncertainty as to the applicability of the various title I new source requirements.

2. Repowering and CCT Projects

In title IV of the 1990 Amendments, which creates the acid rain program, Congress made changes in the applicability of new source requirements to changes involving repowering and Clean Coal Technology (CCT) projects.

Section 409 grants an extension of the acid rain controls deadline to sources that seek to comply with the acid rain reductions by repowering a unit with qualifying clean coal technology. Section 402(12) defines repowering as:

> (The) replacement of an existing coal-fired boiler with one of the following clean coal technologies: Atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of the date of enactment of the Clean Air Act Amendments of 1990. Notwithstanding the provisions of section 409(a), for the purpose of this title, the term "repowering" shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

See CAA 402(12) and 409(a).

Congress provided that repowering projects that qualify for a Phase II compliance extension would also be exempt from NSPS requirements, so long as the repowering "does not increase actual hourly emissions for any pollutant regulated under the Act." See CAA 409(d). An operator can qualify for the 3-year extension of the Phase II emissions limitation by demonstrating (by December 31, 1997) to the permitting authority that one or more units will be repowered with a qualifying clean coal technology to meet the title IV restrictions. The operator must provide, no later than January 1, 2000, additional documentation of the repowering project including a preliminary design and engineering effort for the project and a binding contract for the majority of the equipment needed, as well as any additional information the reviewing authority requires.

Today's proposal also implements an exemption from new source requirements for CCT demonstration projects created by Congress in section 415 of title IV of the 1990 Amendments. In these provisions, CCT is defined as any technology not in widespread use on the date of enactment that achieves significant reductions in SO_2 or nitrogen oxides (NO_x) emissions associated with burning coal in the generation of electricity, process steam, or industrial products. See CAA 415(a). A CCT "demonstration project" is a project funded under DOE's CCT program or a similar project funded by EPA.[11]

[11] Section 415(h)(1) defines a CCT project as a project "using funds appropriated under the heading 'Department of Energy-Clean Coal Technology', up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency."

Repowering projects that are awarded funding from the Department of Energy (DOE) as permanent CCT demonstration projects (or similar projects funded by EPA) are exempt from NSPS and PSD requirements so long as potential emissions (see 40 CFR 52.21(b)(4)) from the unit do not increase as a result of the project. CAA § 415(h)(3). These funded projects may still be required to comply with the nonattainment NSR provisions of title I of the Act, unless they are excluded as pollution control projects.

The installation, operation, cessation, or removal of a temporary CCT demonstration project that is operated for 5 years or less is exempt from NSPS and both PSD and nonattainment new source requirements. See CAA 415(h)(2). However, the facility still must comply with the applicable SIP and other requirements necessary to attain and maintain the NAAQS.

Finally, in section 415(c), Congress provided an exemption from NSPS and PSD for the reactivation of "very clean units" otherwise in compliance with the Act that had been shut down for at least the 2 years prior to enactment of the 1990 Amendments and that, prior to the shutdown, had been equipped with pollution controls with a removal efficiency of at least 85 percent for sulfur dioxide and 90 percent for particulates, and had been equipped with low-NO_x burners.

III. Discussion

A. Pollution Control Projects

1. Proposed Regulatory Changes for Pollution Control Projects

The EPA proposes to amend its PSD and nonattainment regulations as they pertain to utility pollution control projects by exercising its authority under the statutory definition of "modification" and confirming the Agency's current policy that such projects are not subject to NSR unless they render the unit less environmentally beneficial. Generally, pollution control projects at existing stationary sources are not major modifications subject to new source review requirements for the simple reason that they do not result in an increase in actual emissions. In addition, EPA has always recognized that Congress did not intend that every activity at an existing facility be considered a physical or operational change for purposes of the new source review.[12]

The EPA is today proposing to adopt revisions to its PSD and nonattainment regulations for the addition, replacement or use at an existing electric utility steam generating unit of any system or device whose primary function is the reduction of air pollutants (including the switching to a less-polluting fuel where the primary purpose of the switch is the reduction of air pollutants). Under today's proposal, a utility pollution control project will not be treated as a physical or operational change unless the project renders the unit less environmentally beneficial.

As indicated above, the key to this addition to the list of exclusions from the term physical or operational change is EPA's judgment that Congress did not intend that pollution control projects be considered the type of activity that should trigger NSR. The EPA is today issuing regulatory language to explicate and formalize its statutory authority to exclude pollution control projects under the NSR provisions. In 1977, when Congress enacted the NSR provisions of the Act, it provided that the term "modification" in NSR shall have the same meaning as the term "modification" under NSPS. See Sections 169(2)(c), 171(4). At the time, regulations promulgated under the NSPS provisions defining "modification," provided that the term "modification" does not include:

> The addition or use of any system or device whose primary function is the reduction of air pollutants, except when an emissions control system is removed or is replaced by a system which the Administrator determines to be less environmentally beneficial.

40 CFR 60.14(e)(5). In 1978, EPA noted that "in adding section 169(2)(c) to the Act, Congress indicated that it intended to conform the meaning of 'modification' to 'usage in other parts of the Act.' 123 Congr. Rec. H11955, 11957 (Nov. 1, 1977)." 43 FR 26398 (June 19, 1978). Thus, just as EPA had the statutory authority to exclude pollution control projects by regulation from NSPS, the statutory authority exists for EPA to explicate by regulation an exclusion for pollution control projects from parts C and D of title I.

As discussed in greater detail in a subsequent section, this exclusion under NSR reflects the existing regulatory exclusion for pollution control activities under NSPS regulations, and several recent case-specific nonapplicability determinations under the new source review programs. The NSPS regulatory exclusion contains the proviso that the replacement of a pollution control system or device cannot be less "environmentally beneficial" to qualify for the exclusion. See, 40 CFR 60.15(e)(5). With respect to new source review, today's proposal adopts a similar regulatory exclusion for pollution control projects in the PSD and nonattainment context. The major difference in the proposed NSR exclusion is that it would apply the "not less environmentally beneficial" test to the addition and use, as well as the replacement, of a pollution control system or device. This change reflects the distinct air quality component of the PSD and nonattainment programs. By focusing on whether a pollution control project is a physical or operational change within the meaning of the new source review regulations, today's ruling avoids the need to undertake a quantitative emissions increase calculation in every case, as would be necessary if such projects were deemed to be physical or operational changes. The EPA expects that most, if not all, pollution control projects will reduce net actual emissions. Nevertheless, the Administrator's authority to consider individual pollution control projects provides an adequate opportunity to determine that a pollution control project would somehow result in an adverse environmental impact and thus conclude that the project renders the unit less environmentally beneficial, and is therefore a physical or operational change that may be subject to NSR.

For the purposes of this proposal, a pollution control project refers to a project undertaken at a utility unit for purposes of reducing emissions from such unit. These changes are limited to the installation of conventional or innovative emissions control equipment, including, but not limited to, installation of conventional and advanced flue gas desulfurization, sorbent injection for SO_2 and NOx controls, electrostatic precipitators, and projects undertaken to accommodate switching to a less polluting fuel, including natural gas or coal re-burning, co-firing of natural gas and other fuels for the purpose of controlling SO_2 and NOx emissions.

Likewise, any activity that is necessary to accommodate switching to a less polluting fuel is considered to be part of the pollution control project. In some instances, this may involve changes to the pollution generating equipment (*e.g.*, boiler), but only if the changes are necessary to maintain the normal operating capability of the unit at the time of the project, where the capability would otherwise be impaired as a result of the fuel switch. For example, an electric utility steam generating unit that switches from a higher sulfur bituminous coal to a low-sulfur subbituminous coal may need to make certain changes to the boiler in order to avoid derating the unit.

Changes that are intended primarily to restore original capacity or to improve the operational efficiency of the facility are not considered to be part of a pollution control project for purposes of this proposal. Such changes are addressed elsewhere in this proposal. Also, the source still must comply with all applicable SIP limits and requirements, permit conditions and applicable NAAQS or PSD increment limits.

As proposed, this pollution control project exclusion will not extend to source categories other than electric utility steam generating units. The EPA has so limited this provision because, in contrast with a general lack of experience with other industries, EPA has extensive experience in addressing new source applicability issues regarding pollution control projects in the utility industry. That experience has led EPA to conclude that pollution control projects in the utility industry are generally environmentally beneficial.

2. Additional Modeling Requirements

A proposed pollution control project or physical or operational change cannot result in an emissions increase that will cause or contribute to a violation of a national ambient air quality standard, PSD increment, or visibility limitation. See CAA sections 110(a)(2)(c), 165, 169A(b), 173. The pollution control projects exclusion does not authorize any significant net increase in emissions that would have this proscribed impact. It is possible that a pollution control project, while not causing any increase in maximum hourly emissions, will cause a significant net increase in actual emissions, which in turn could cause or contribute to the violation of a National Ambient Air Quality Standards (NAAQS), increment or visibility limitation. For this reason, under today's proposal, the reviewing authority may require a source to perform an air quality impact analysis (modeling) whenever (1) it has reason to believe that a proposed change will result in a significant net increase in actual emissions of any criteria pollutant ove.

[12] For instance, EPA has specifically recognized that routine maintenance, repair and replacement, and changes in hours of operation or in the production rate are not considered a physical change or change in the method of operation. See 40 CFR 52.21(b)(2)(iii), 52.24(f)(5)(iii), 51.166(a)(1)(v)(C)(1), 51.166(b)(2)(iii), and 60.14(e)(7).

VOL 56 ISS 115 JE 14 1991 UMI

levels used for that source in the most recent air quality impact analysis and (2) it has reason to believe that such an increase would cause or contribute to a violation of a NAAQS, increment or visibility limitation. If this modeling indicates that this increase in emissions will cause or contribute to a violation of any ambient standard, PSD increment or visibility limitation, the pollution control exclusion does not apply.

3. The EPA's Existing Policy Regarding Pollution Control Projects

As noted above, generally pollution control projects at existing stationary sources are not major modifications subject to new source review because they do not usually result in an increase in actual emissions, and EPA believes that, in general, pollution control projects were not intended by Congress to be considered physical or operational changes for purposes of NSR.

The EPA currently applies its PSD regulations in harmony with its NSPS regulations, which exclude most pollution control projects. See 40 CFR 60.14(e)(5). In 1977, Congress incorporated the NSPS definition of modification into the PSD and nonattainment statutes. CAA sections 111(a)(4), 169(a)(c), 171(4). In addition, the legislative history reflects that, as a general matter, Congress intended to conform the meaning of "modification" for PSD purposes to the usage under the NSPS program. See 123 Cong. Rec. H11957 (November 1, 1977). The EPA reiterated this view in 1978. See 43 FR 26390, June 19, 1978. Subsequently, EPA interpreted its NSR regulations to incorporate the NSPS pollution control project exclusion.[13] The EPA later voiced concern about incorporating the precise NSPS pollution control language in the NSR context absent explication through notice-and-comment rulemaking largely because of the ambient air quality component of NSR that is absent from the NSPS program.[14] In recent years however, EPA has consistently excluded pollution control projects from NSR provided that the proposed project would be environmentally beneficial, taking into account ambient air quality.[15] In light of the title IV requirements and other provisions of the Clean Air Act Amendments of 1990, EPA confirms that it will continue to consider the overall environmental consequences of pollution control projects for NSR applicability on an interim basis pending final action on the proposed regulatory exclusion for pollution control projects. By its nature, a determination of whether or not a project renders a unit less environmentally beneficial involves case-by-case assessment of its net emissions and overall impact on the environment. In making such assessments, EPA must consider the overall emissions before and after the project, as well as any other relevant environmental factors. As a result, no single factor can be identified in advance for purposes of making this determination.

B. Representative Actual Annual Emissions

As described above, EPA proposes to revise its methodology for calculating emissions increases at electric utility steam generating sources. The EPA proposes to compare actual emissions before and after changes for all physical or operational changes at an existing electric utility steam generating unit other than the addition of a new unit or the replacement of an existing unit. Under today's action, EPA proposes to consider a unit to be replaced if it would constitute a reconstructed unit within the meaning of 40 CFR 60.15. Since there is no relevant operating history for wholly new units and replaced units, it is not possible to reasonably project post-change utilization for these units, and hence, their future level of "representative annual actual emissions." For other changes, past operating history, and other relevant information, provides a basis for reasonable projections.

As proposed today, the "representative actual annual emissions" methodology requires the utility to compare its baseline emissions with its future actual emissions to determine if the proposed change will increase actual emissions. The EPA's existing regulations define baseline emissions as "the average rate, in tons per year, at which the unit actually emitted the pollutant during a 2-year period which precedes the particular date and which is representative of normal source operation." See e.g., 40 CFR 52.21. The Administrator "shall" allow use of a different time period "upon a determination that it is more representative of normal source operation." *Id.* Although not required by the regulations, EPA has historically used the 2 years immediately preceding the proposed change to establish the baseline. (See 45 FR 52676, 52705, 52718 (1980).) However, in some cases it has allowed the use of earlier periods. For example, in *WEPCO*, EPA found the fourth and fifth years prior to the modification more representative of WEPCO's normal operations since the source's capacity was reduced due to physical problems. The EPA proposes today to retain this regulatory language, but to adopt a new presumption regarding its implementation.

Under today's action, the Administrator will presume that any 2 consecutive years within the 5 years prior to the proposed change is representative of normal source operations for a utility. This presumption is consistent with the 5-year period for "contemporaneous" emissions increases and decreases in 40 CFR 52.21(b)(3)(i)(b).[16] Source owners or operators desiring to use other than a 2-year period or a baseline period prior to the last 5 years may seek the Administrator's specific determination that such period is more representative of normal operations.[17]

The future actual projection is the product of: (1) The hourly emissions rate, which is based on the unit's physical and operational capabilities following the change and federally-enforceable operational restrictions that would affect the hourly emissions rate following this change; and (2) projected capacity utilization, which is based on (a) the unit's historical annual utilization, and (b) all available information regarding the unit's likely post-change capacity utilization.[18] The projection of post-change capacity utilization for applicability purposes should be based on a projection of utilization for a period after the physical or operational change. Specifically, EPA today proposes to allow sources to base the projection of utilization on the 2 years after the change, or a different consecutive 2-year period within the 10 years after the change, where the Administrator determines that such period is more representative of normal source operations.

C. The Causation Requirement

The NSR regulatory provisions require that the physical or operational change "result in" an increase in actual emissions in order to consider that change to be a modification. See e.g. 40 CFR 52.21(2)(i). In other words, NSR will not apply unless EPA finds that there is a causal link between the proposed change and any post-change increase in emissions. The EPA today proposes to amend its rules to clarify this provision in the context of modifications at electric utility steam generating units.

Under these proposed regulations, any emissions increase attributable to a physical or operational change, such as a physical or operational change that significantly alters the efficiency of the plant, (see, *Puerto Rican Cement*, 889 F.2d at 297–8), must continue to be included in the post-change emissions calculation. Today's proposal makes clear that where increased operations are in response to independent factors, such as system-wide demand growth, which would have occurred and affected the unit's operations even in the absence of the physical or operational change, such increases do not result from the change and shall be excluded from the projection of future actual emissions. Thus, in assessing whether the proposed change will result in an increase in actual emissions, utilities need not include in their projection of post-change utilization that portion of the increased rate of utilization, if any, due to factors unrelated to the physical or operational change, such as an increase in projected capacity utilization due to the rate of electricity demand growth for the utility system (of which that source is a member) as a whole.

Under this proposal, during a representative baseline period (see *supra*), the plant must have been able to accommodate the projected demand growth physically and legally even absent the particular change. Increased operations (and resultant increases in actual emissions) that could not physically and legally be accommodated but for the proposed physical or operational change should be considered to result from the change.

D. Repowering

As previously mentioned, title IV of the 1990 Amendments grants special treatment to utilities that seek to comply with mandated acid rain reductions by repowering a unit with qualifying clean coal technology. 1990 Amendments sections 402(12), 409(a). Specifically, repowering projects that qualify for a Phase II compliance extension will also be exempt from NSPS requirements, so long as the repowering "does not increase actual hourly emissions for any pollutant regulated under the Act." Section 409(d). The EPA interprets the requirement that the repowering not lead to an increase in "actual hourly emissions" as an expression of Congressional intent that will respect to repowering projects, EPA should use the same general approach to determining applicability as it has for other physical or operational changes, discussed above. Accordingly, EPA today proposes rules that provide that a repowering project which results in an increase over baseline in a unit's post-modification hourly emissions will not be eligible for this limited NSPS exemption.

The proposed NSPS exemption applies to repowering of existing units at existing sources, so long as the project qualifies for the Phase II extension and satisfies the "actual hourly emissions" increase test. Because of this provision, the reconstruction limitations specified in 40 CFR 60.15 are not applicable to qualifying repowering projects. However, no special treatment can be afforded to a new unit which is located at a different site than the existing unit it replaces. See CAA section 409(d).

Pursuant to section 409(e), EPA will provide expedited NSR processing for repowering projects and will encourage State permitting authorities to do the same.

E. Clean Coal Technology Demonstration Projects

Today's notice also proposes rules implementing the new CCT exemption created by the 1990 Amendments. For the purposes of this proposal, temporary CCT demonstration projects are defined as those CCT demonstration projects lasting 5 years or less. Title IV gives these projects an exemption from NSPS, PSD and nonattainment requirements. *Id.*, section 415(b)(2). However, the facility would still be subject to any applicable SIP and must comply with any other requirements necessary to attain and maintain NAAQS. This ruling proposes to implement this provision and clarifies that EPA considers the 5-year period as starting on the date of startup (as defined in 40 CFR 60.2). A temporary demonstration project may be converted to a permanent status at any time, provided it meets all the requirements that apply to a permanent CCT project criteria at the time of conversion.

Further, EPA proposes that at the end of a temporary project, the facility must be returned to pre-demonstration conditions and hourly emission rates (or lower). The return of the facility to its pre-demonstration physical and operational condition would not result in the loss of the actual emissions margin between pre-demonstration actual emissions rate and SIP allowable emissions rates for that facility. Rather, the facility would be treated as if the temporary demonstration project had never occurred.[19]

This proposal does not extend to emissions increases that are unrelated to the conduct of temporary demonstration projects. The EPA considers emissions increases (above the predemonstration levels) that are attributable to physical or operational changes, other than those necessary to restore that unit to its pre-demonstration condition, to be beyond the scope of the Congressional exemption.

Today's action also proposes to implement an exemption from NSPS and PSD requirements for repowering projects which are awarded funding from the DOE as permanent CCT demonstration projects (or similar projects funded by EPA) so long as potential emissions (see § 52.21(b)(4)) from the unit do not increase as a result of the project. Section 415(b)(3). However, repowering projects that qualify as pollution control projects will be treated as other pollution control projects for the purposes of the nonattainment provisions of title I of the Act.

Finally, today's proposal would implement the statutory exemptions in section 415(c). In that section, Congress provided an exemption from NSPS and PSD for the reactivation of "very clean units" otherwise in compliance with the Act that had been shut down for at least

---

[13] Memorandum from Edward Reich, Director, Stationary Source Compliance Division and William F. Pedersen, Acting Associate General Counsel, Air, Noise, and Radiation Division to Allyn M. Davis, Region IV (April 21, 1983).

[14] See, Memorandum from Gerald A. Emison, Director, OAQPS, to Regional Division Directors (July 7, 1988).

[15] See, Letter, William G. Rosenberg, Assistant Administrator, EPA, to Andrew Aitkan, Vice President, New England Power Service Co., March 28, 1991; Letter, Rosenberg to Patrick M. McCarter, Senior Vice President, Public Service Co. of Colorado, July 23, 1990; Letters, David Kee, Director, Air and Radiation Division, EPA Region V, to Timothy J. Method, Assistant Commissioner, Indiana Dept. of Environmental Management, January 30, 1990 and March 8, 1990.

[16] This presumption does not apply to past modifications at an emissions unit for the purpose of determining contemporaneous emission changes at a source and cannot be used to extend the five year period specified in that provision. See 40 CFR 52.21(b)(3)(i)(b).

[17] The level of baseline emissions selected must be consistent with current assumptions regarding the source's emissions that are used under the state implementation plans (SIP) for planning or permitting purposes. Thus, the source may not select a level of baseline emissions higher than that used by the permitting authority in issuing a PSD or other construction permit to a source in the area, if such higher level would result in a NAAQS or increment violation, or violate a visibility limitation.

[18] In projecting future utilization and emissions factors, the permitting authority may consider the company's historical operational data, its own representations, filings with Federal, State or local regulatory authorities, and compliance plans developed under title IV of the 1990 Amendments.

[19] This would be the case even if there were small differences in the post-demonstration physical and operational conditions due to a technical inability to restore the unit to its precise pre-demonstration condition, or due to normal variability in the coal used. Thus, EPA would not seek to apply NSPS or NSR because of a post-demonstration emissions increase attributable solely to an increase in the hours of operation or production rate of the unit (subject to the NSPS limitation that the production rate increase must be accomplished without a capital expenditure).

VOL 56 ISS 115 JE 14 1991 UMI

the 2 years prior to enactment of the 1990 Amendments and that, prior to the shutdown, had been equipped with pollution controls with a removal efficiency of at least 85 percent for sulfur dioxide and 90 percent for particulates, and had been equipped with low-NOx burners. This exemption appears to have been narrowly tailored and is not expected to have widespread applicability.

Because these proposed rules merely implement straightforward statutory exemptions that were immediately effective upon passage of the 1990 Amendments, EPA intends, as a matter of statutory interpretation, to follow the policies set forth in today's proposal pending final action.

F. Calculation of NSPS Baseline

As discussed in section II of this notice, "any physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies" is a modification for NSPS applicability purposes. See 40 CFR 60.14(a). The NSPS regulations implementing this general definition focus on increases in hourly emissions, expressed in kilograms of pollutant discharged per hour. To determine if an increase in hourly emissions has occurred at a unit, a pre-change baseline must be established. Under current regulations, the emissions rate before and after a physical or operational change is evaluated at each unit by comparing the current hourly potential emissions at maximum operating capacity to hourly emissions at maximum capacity after the change. In this calculation, the reviewing authority disregards the unit's maximum design capacity.[20] The original design capacity of a unit, to the extent it differs from actual maximum capacity at the time that the baseline is established due to physical deterioration of the facility, is immaterial to this calculation.

Today EPA is proposing that, for an existing electric utility steam generating unit, the pre-change baseline for NSPS applicability purposes shall be calculated using the highest hourly emissions rate achievable at any time during the 5 years prior to the change. This proposal retains the key concept in existing regulations that the baseline be determined during a period that is roughly contemporaneous with the proposed change at the affected facility. The EPA believes that this proposed revision, while modest, is still necessary to avoid the current regulation's undue emphasis on the physical condition of the affected facility immediately prior to the change. Today's more flexible provision enables units to establish a baseline that is representative of its physical and operational capacity in recent years, while still precluding the use of a baseline tied to original design capacity, which as noted above may bear no relationship to the facility's capacity in recent years.

Without this revision, the NSPS regulations may unduly burden utilities undertaking physical or operational changes in conjunction with the acid rain program. For instance, if a unit has broken down and is in need of repairs, the utility's baseline will be artificially low. The proposed change will allow utilities to demonstrate that an earlier, higher capacity was more representative of the unit's maximum hourly emissions rate.

G. Utility BACT Presumption for NOx

In today's notice, EPA proposes to adopt a presumption that, in the case of PSD permits issued by EPA under 40 CFR 52.21, best available control technology (BACT) for emissions of nitrogen oxides from existing coal-fired electric utility steam generating units undergoing a modification is the technology required under section 407 of the Clean Air Act. In general, this will call for the use of combustion modification and/or low-NOx burners or similar, cost-effective technologies by those utilities required to obtain PSD permits for NOx emissions following final action on today's proposal.

In brief, section 407 requires most utility units subject to phase I and phase II to meet NOx emission limitations on the same date as the phase I or phase II SO_2 emission limitations become effective. The Administrator must establish annual emission limitations (based on rates listed in the section) for tangentially-fired boilers and dry bottom wall-fired boilers within 18 months of enactment. These limitations must be achievable with low-NOx burner technology. CAA section 407(b)(1). The Administrator must promulgate annual emission limitations for all other boilers by January 1, 1997, based on a "best system of continuous emission reduction * * * which is comparable to the cost of" low-NOx burners. By the same date, the Administrator may make the rates for boiler types identified in section 407(b)(1) more stringent if more effective low-NOx burner technology is available. CAA section 407(b)(2).

Low-NOx burners are commercially available and can be retrofitted on many boiler types, providing a high degree of emissions reduction at relatively low costs. Depending on boiler type, low-NOx burners can reduce emissions of NOx by approximately 20 to 60 percent. Again depending on boiler type and other factors, the cost of replacing conventional burners with these controls is in the range of $8.00 to $16.00 per kilowatt.

Other NOx control technologies are being developed for retrofitted use on at least some coal-fired electric utility units, and thus can provide a much greater degree of emissions reductions. These include selective noncatalytic reduction (SNCR or "thermal de-NOx") and selective catalytic reduction (SCR). (In addition, DOE has funded two new technologies under its CCT demonstration program which are designed for the simultaneous removal of SO_2, NOx and particulate matter that may become commercially "available" in the future.)[21] However, SNR and SNCR are not in use in this country as retrofit technologies for coal-fired boilers, and the DOE sponsored projects have not yet been demonstrated. Current estimates of control costs for these technologies are much higher than for low-NOx burners, especially when considered in the context of retrofitting existing units.

The EPA has in the past issued guidance documents effectively creating presumptions that certain technologies constituted BACT for certain source categories. See Memorandum, Operation Guidance on Control Technology for New and Modified Municipal Waste Combustors, from Gerald A. Emison, Director, Office of Air Quality Planning and Standards, EPA, June 26, 1987, p. 5. The EPA believes it is appropriate to propose to do so here as well in the case of low-NOx burners for modified coal-fired utility boilers in light of the strong congressional policy judgment favoring use of that technology for acid rain control reflected in section 407.

Section 169(3) of the Act, 42 U.S.C. 7479(3) defines BACT as:

> An emissions limitation based on the maximum degree of reduction of each pollutant subject to regulation under the Clean Air Act emitted from or which results from any major emitting facility, which the permitting authority, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such facility through application of production processes and available methods, systems, and techniques, including fuel cleaning, clean fuels, or treatment or innovative fuel combustion techniques for control of each such pollutant. In no event shall application of "best available control technology" result in emissions of any pollutants which will exceed the emissions allowed by an applicable standard established pursuant to section 7411 or 7412 of this title. Emissions from any source utilizing clean fuels, or any other means, to comply with this paragraph shall not be allowed to increase above levels that would have been required under this paragraph as it existed prior to enactment of the Clean Air Act Amendments of 1990.

The BACT provision reflects congressional intent both to grant permitting authorities broad discretion to weigh the statutory factors as they see fit in reaching a final substantive determination on BACT and to create a procedural methodology that would provide a mechanism for stimulating the widespread use of effective pollution control technologies.[22]

The EPA believes that today's proposed presumption is consistent with BACT requirements because it does not purport to relieve the permitting authority of the obligation to weigh the statutory factors in reaching BACT determinations. Rather, it reflects an exercise of policy judgment by EPA where it is the permitting authority that in most cases a BACT analysis of currently demonstrated technologies for retrofitting existing utility boilers would lead to the selection of low NOx burners and/or combustion modifications identified in section 407(b)(1).

Although EPA has authority under the present regulations to create this presumption regarding BACT for NOx, EPA is soliciting comment prior to adopting such a presumption in order to obtain the views of the public on the policy conclusions discussed above.

This proposed presumption would not apply in States with PSD programs that have been incorporated into state implementation plans under regulations promulgated at 40 CFR 51.166. However, such States are encouraged to adopt this presumption as a matter of state policy.

H. Applicability Determinations

In most instances, source owners or operators are able to readily ascertain whether new source review requirements apply to them. Consequently, in administering these requirements, EPA does not require sources to obtain a formal applicability determination before proceeding with construction. In keeping with that practice, EPA will not require utilities to seek applicability determinations under either the revised regulations proposed today or the interpretations of existing regulations contained in this preamble. Utilities in most cases can readily ascertain how this notice will affect them. The EPA anticipates, however, that questions will arise regarding certain aspects of this proposal. Because some instances involve discrete judgments, utilities may wish to obtain determinations of applicability. The EPA will provide such determinations upon request. Such requests should be submitted together with appropriate documentation to the appropriate permitting authority.

IV. Administrative Requirements

A. Docket

A docket has been established for this action under section 307(d)(1)(I) and (N) of the Clean Air Act, 42 U.S.C. 7607(d)(1)(I) and (N). The docket is an organized and complete file of all information considered in the development of this ruling. The docket is intended to allow the public to identify and locate documents related to this ruling. The docket number for this ruling is A-90-06.

B. Paperwork Reduction Act

No additional public reporting burden will result from this ruling. All information collection requirements of the Federal NSR and NSPS regulations have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501, et. seq., and have been assigned OMB control numbers 2060-0003 for NSR, and 2060-0023, 2060-0026 and 2060-0072 for NSPS. The effect of this rule would be a reduction in paperwork related to complying with NSR and NSPS requirements, since this ruling provides additional clarification as to physical and operation changes that may be excluded from these requirements.

C. OMB Review

Under Executive Order 12291 (E.O. 12291), EPA must judge whether a rule is "major" and therefore subject to the requirement of a regulatory impact analysis (RIA). This ruling is a major rule. However, EPA has not prepared an RIA because it will not result in any significant adverse environmental effects and will reduce the economic costs of meeting the requirements of the CAA. This ruling was submitted to the OMB for review as required by E.O. 12291. Any written comments from OMB to EPA and any EPA response to those comments are included in Docket A-90-06.

D. Effective Date

Section 4(d) of the Administrative Procedures Act (APA), 5 U.S.C. 553(d), requires a 30-day waiting period before making a substantive rule effective. Since the regulatory revisions being proposed today are considered substantive, they are subject to the notice-and-comment requirements of the APA and will become effective only after public comments have been received and considered, and final action has been taken. The portions of this notice that merely confirm EPA policy are effective immediately.

E. Regulatory Flexibility Act

This action is not subject to the certification provisions of section 605(b) of the Regulatory Flexibility Act (RFA) because this rule will result in a reduction of administrative costs and no increase in control costs, therefore having no significant impact on industry.

List of Subjects

40 CFR Part 51

Administrative procedure and practices, Intergovernmental relations, Air pollution control, NSR, Clean Coal Technology projects, Sulfur oxides, Nitrogen dioxide, Particulate matter, Carbon monoxide, Hydrocarbons, Lead.

40 CFR Part 52

Air pollution control, NSR, Clean Coal Technology projects, Repowering, Sulfur oxides, Particulate matter, Nitrogen dioxide, Carbon monoxide, Hydrocarbons, Lead.

40 CFR Part 60

Air pollution control, NSPS, Clean Coal Technology projects, Repowering, Sulfur oxides, Particulate matter, Nitrogen dioxide, Carbon monoxide, Hydrocarbons, Lead.

Dated: June 4, 1991.

F. Henry Habicht,

Acting Administrator.

For the reasons set forth in the preamble, parts 51, 52 and 60 of title 40 of the Code of Federal Regulations is proposed to be amended as follows:

---

[20] See 39 FR 36,966 col. 1 (proposed rule). In *WEPCO*, the utility contended that baseline capacity for the purpose of determining whether an increase in emission rate occurs for purposes of an NSPS modification is the original design capacity of the facility. However, the court rejected WEPCO's argument that original design capacity or past "representative" capacity, no longer achievable at the plant, had to be used for the baseline emissions rate.

[21] One technology—low NOx/SOx burner Retrofit—is designed specifically for cyclone boilers which cannot be retrofit with low NOx burners while the other—the Advanced Slagging Combustor—is applicable to a number of boiler types.

[22] See S. Rep. No. 95-317, 95th Cong., 1st. Sess. 31 (1977); Statement of Senator Muskie, 123 Cong. Rec. 26171 (June 8, 1977).

VOL 56 ISS 115 JE 14 1991 UMI

PART 51—REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS

1. The authority citation for part 51 is revised to read as follows:

Authority: 42 U.S.C. 7408(a)(1), 7410, 7601, 7470–7479, 7491, 7501–7508, 7601 and 7602, as amended by the Clean Air Act Amendments of 1990, Pub. L. No. 101–549, 104 Stat. 2399 (Nov. 15, 1990); 402, 409, 415 of the Clean Air Act as amended, 104 Stat. 2399, unless otherwise noted.

2. Section 51.165 is amended by revising paragraph (a)(1)(xii)(D) and by adding paragraphs (a)(1)(v)(C)(*9*), (a)(1)(v)(C)(*10*), (a)(1)(xii)(E), (a)(1)(xx) (a)(1)(xxi), (a)(1)(xxii), (a)(1)(xxiii), (a)(1)(xxiv), (a)(1)(xxv), and (a)(1)(xxvi) to read as follows:

§ 51.165 Permit requirements.

(a) * * *

(1) * * *

(v) * * *

(C) A physical change or a change in the method of operation shall not include:

* * * * *

(*9*) The addition, replacement or use of a pollution control project at an existing electric utility steam generating unit, unless the reviewing authority determines that such addition, replacement, or use renders the unit less environmentally beneficial, and except:

(*i*) When the reviewing authority has reason to believe that the pollution control project would result in a significant net increase in representative actual annual emissions of any criteria pollutant over levels used for that source in the most recent air quality impact analysis in the area conducted for the purpose of Title I, if any, and

(*ii*) The reviewing authority determines that the increase will cause or contribute to a violation of any ambient standard, PSD increment, or visibility limitation.

(*9*) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, provided that the project complies with:

(*i*) The State implementation plan for the State in which the project is located, and

(*ii*) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(*10*) The reactivation of a very clean coal-fired electric utility steam generating unit.

* * * * *

(xii) * * *

(D) For any emissions unit (other than an electric utility steam generating unit specified in paragraph (a)(1)(xii)(*F*) of this section) that has not begun normal operations on a particular date, actual emissions shall equal the potential to emit of the unit on that date.

(E) For an electric utility steam generating unit (other than a new unit or the replacement of an existing unit) actual emissions of the unit following the physical or operational change shall equal the representative actual annual emissions of the unit.

* * * * *

(xx) *Electric utility steam generating unit* means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.

(xxi) *Representative actual annual emissions* means the average rate, in tons per year, at which the source is projected to emit a pollutant for the two-year period after a physical change or change in the method of operation of a unit, (or a different consecutive two-year period within 10 years after that change, where the permitting authority determines that such period is more representative of normal source operations), considering the effect any such change will have on increasing or decreasing the hourly emissions rate and on projected capacity utilization. In projecting future emissions the permitting authority shall:

(A) Consider all relevant information, including but not limited to, historical operational data, the company's own representations, filings with the State or Federal regulatory authorities, and compliance plans under title IV of the Clean Air Act; and

(B) Exclude, in calculating any increase in emissions that results from the particular physical change or change in the method of operation at an electric utility steam generating unit, that portion of the unit's emissions following the change that is attributable to an increase in projected capacity utilization at the unit that is unrelated to the particular change, including any increased utilization due to the rate of electricity demand growth for the utility system as a whole.

(xxii) *Temporary clean coal technology demonstration project* means a clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plan for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(xxiii) *Clean coal technology* means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam which was not in widespread use as of November 5, 1990.

(xxiv) *Clean coal technology demonstration project* means a project using funds appropriated under the heading "Department of Energy—Clean Coal Technology," up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal contribution for a qualifying project shall be at least 20 percent of the total cost of the demonstration project.

(xxv) *Reactivation of very clean coal-fired electric utility steam generating unit* means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

(A) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carried in the permitting authority's emissions inventory at the time of enactment;

(B) Was equipped prior to shut-down with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85 percent and a removal efficiency for particulates of no less than 98 percent;

(C) Is equipped with low-NO_x burners prior to the time of commencement of operations following reactivation; and

(D) Is otherwise in compliance with the requirements of the Clean Air Act.

(xxvi) *Pollution control project* means any physical change or change in the method of operation, at an existing electric utility steam generating unit for purposes of reducing emissions from such unit. Such changes are limited to:

(A) The installation of conventional or innovative pollution control technology, including but not limited to advanced flue gas desulfurization, sorbent injection for sulfur dioxide and nitrogen oxides controls and electrostatic precipitators;

(B) A physical change, or change in the method of operation, to accommodate switching to a fuel which is less polluting than the fuel in use prior to the change including, but not limited to natural gas or coal re-burning, co-firing of natural gas and other fuels for the purpose of controlling emissions;

(C) A permanent clean coal technology demonstration project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency; or

(D) A permanent clean coal technology demonstration project that constitutes a repowering project.

* * * * *

3. Section 51.166 is amended by revising paragraph (b)(21)(iv) and by adding paragraphs (b)(2)(iii)(*h*), (b)(2)(iii)(*i*), (b)(2)(iii)(*j*), (b)(2)(iii)(*k*), (b)(2)(iii)(*l*), (b)(21)(v), (b)(30), (b)(31), (b)(32), (b)(33), (b)(34), (b)(35), (b)(36), and (b)(37) to read as follows:

§ 51.166 Prevention of significant deterioration of air quality.

* * * * *

(b) * * *

(2) * * *

(iii) * * *

* * * * *

(*h*) The addition, replacement or use of a pollution control project at an existing electric utility steam generating unit, unless the reviewing authority determines that such addition, replacement, or use renders the unit less environmentally beneficial and except:

(*1*) When the reviewing authority has reason to believe pollution control project would result in a significant net increase in representative actual annual emissions of any criteria pollutant over levels used for that source in the most recent air quality impact analysis in the area conducted for the purpose of title I, if any, and

(*2*) The reviewing authority determines that the increase will cause or contribute to a violation of any ambient standard, PSD increment, or visibility limitation.

(*i*) Any physical change or change in the method of operation at an existing electric utility generating unit (other than the addition of a new unit or the replacement of an existing unit) that would not result in a significant net increase in representative actual annual emissions of a regulated pollutant at the unit.

(*j*) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, provided that the project complies with:

(*1*) The State implementation plan for the State in which the project is located; and

(*2*) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(*k*) The installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, provided that the project does not result in an increase in the potential to emit of any regulated pollutant emitted by the unit. This exemption shall apply on a pollutant-by-pollutant basis.

(*l*) The reactivation of a very clean coal-fired electric utility steam generating unit.

* * * * *

(21) * * *

(iv) For any emissions unit (other than an electric utility steam generating unit specified in paragraph (b)(21)(v) of this section) that has not begun normal operations on a particular date, actual emissions shall equal the potential to emit of the unit on that date.

(v) For an electric utility steam generating unit (other than a new unit or the replacement of an existing unit) actual emissions of the unit following the physical or operational change shall equal the representative actual annual emissions of the unit following the physical or operational change.

* * * * *

(30) *Electric utility steam generating unit* means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.

(31) *Pollution control project* means any physical change or change in the method of operation at an existing electric utility steam generating unit for purposes of reducing emissions from such unit. Such changes are limited to:

(i) The installation of conventional or innovative pollution control technology, including but not limited to advanced flue gas desulfurization, sorbent injection for sulfur dioxide and nitrogen oxides controls and electrostatic precipitators;

(ii) A physical change, or change in the method of operation, to accommodate switching to a fuel which is less polluting than the fuel in use prior to the change, including but not limited to natural gas or coal re-burning, co-firing of natural gas and other fuels for the purpose of controlling emissions;

(iii) A permanent clean coal technology demonstration project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency, or

(iv) A permanent clean coal technology demonstration project that constitutes a repowering project.

(32) *Representative actual annual emissions* means the average rate, in tons per year, at which the source is projected to emit a pollutant for the two-year period after a physical change or change in the method of operation of a unit, (or a different consecutive two-year period within 10 years after that change, where the reviewing authority determines that such period is more representative of normal source operations), considering the effect any such change will have on increasing or decreasing the hourly emissions rate and on projected capacity utilization. In projecting future emissions the reviewing authority shall:

(i) Consider all relevant information, including but not limited to, historical operational data, the company's own representations, filings with the State or Federal regulatory authorities, and compliance plans under title IV of the Clean Air Act; and

(ii) Exclude, in calculating any increase in emissions that results from the particular physical change or change in the method of operation at an electric utility steam generating unit, that portion of the unit's emissions following the change that is attributable to an increase in projected capacity utilization at the unit that is unrelated to the particular change, including any increased utilization due to the rate of electricity demand growth for the utility system as a whole.

VOL 56 ISS 115 JE 14 1991 UMI

(33) *Clean coal technology* means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam which was not in widespread use as of November 15, 1990.

(34) *Clean coal technology demonstration project* means a project using funds appropriated under the heading "Department of Energy-Clean Coal Technology", up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal contribution for a qualifying project shall be at least 20 percent of the total cost of the demonstration project.

(35) *Temporary clean coal technology demonstration project* means a clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plan for the State in which the project is located and other requirements necessary to attain and maintain the nations ambient air quality standards during and after the project is terminated.

(36)(i) *Repowering* means replacement of an existing coal-fired boiler with one of the following clean coal technologies: Atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.

(ii) Repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

(iii) The reviewing authority shall give expedited consideration to permit applications for any source that satisfies the requirements of this subsection and is granted an extension under 409 of the Clean Air Act.

(37) *Reactivation of a very clean coal-fired electric utility steam generating unit* means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

(i) Has not been in operation for the two-year period to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carried in the permitting authority's emissions inventory at the time of enactment;

(ii) Was equipped prior to shut-down with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85 percent and a removal efficiency for particulates of no less than 98 percent;

(iii) Is equipped with low-NO_x burners prior to the time of commencement of operations following reactivation; and

(iv) Is otherwise in compliance with the requirements of the Clean Air Act.

* * * * *

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

1. The authority citation for part 52 is amended to read as follows:

Authority: 42 U.S.C. 7401–7642 as amended by the Clean Air Act Amendments of 1990, Pub. L. No. 101–549, 104 Stat. 2399 (Nov. 15, 1990), unless otherwise noted.

2. Section 52.21 is amended by revising paragraph (b)(21)(iv) and by adding paragraphs (b)(2)(iii)(*h*), (b)(2)(iii)(*i*) (b)(2)(iii)(*j*), (b)(2)(iii)(*k*), (b)(21)(v), (b)(31), (b)(32) (b)(33), (b)(34), (b)(35), (b)(36), (b)(37), and (b)(38) to read as follows:

§ 52.21 Prevention of significant deterioration of air quality.

* * * * *

(b) * * *

(2) * * *

(iii) * * *

* * * * * *

(*h*) The addition, replacement or use of a pollution control project at an existing electric utility steam generating unit, unless the Administrator determines that such addition, replacement, or use renders the unit less environmentally beneficial, and except:

(*1*) When the Administrator has reason to believe that the pollution control project would result in a significant net increase in representative actual annual emissions of any criteria pollutant over levels used for that source in the most recent air quality impact analysis in the area conducted for the purpose of title I, if any, and

(*2*) The Administrator determines that the increase will cause or contribute to a violation of any ambient standard, PSD increment, or visibility limitation.

(*i*) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, provided that the project complies with:

(*1*) The State implementation plan for the State in which the project is located, and

(*2*) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(*j*) The installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, provided that the project does not result in an increase in the potential to emit of any regulated pollutant emitted by the unit. This exemption shall apply on a pollutant-by-pollutant basis.

(*k*) The reactivation of a very clean coal-fired electric utility steam generating unit.

* * * * *

(21) * * *

(iv) For any emissions unit (other than an electric utility steam generating unit specified in paragraph (v) of this subsection) that has not begun normal operations on a particular date, actual emissions shall equal the potential to emit of the unit on that date.

(v) For an electric utility steam generating unit (other than a new unit or the replacement of an existing unit) actual emissions of the unit following the physical or operational change shall equal the representative actual annual emissions of the unit.

* * * * *

(31) *Electric utility steam generating unit* means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.

(32) *Pollution control project* means any physical change or change in the method of operation, at an existing electric utility steam generating unit for purposes of reducing emissions from such unit. Such changes are limited to:

(i) The installation of conventional or innovative pollution control technology, including but not limited to advanced flue gas desulfurization, sorbent injection for sulfur dioxide and nitrogen oxides controls and electrostatic precipitators;

(ii) A physical change, or change in the method of operation, to accommodate switching to a fuel which is less polluting than the fuel in use prior to the change including, but not limited to natural gas or coal reburning, co-firing of natural gas and other fuels for the purpose of controlling emissions;

(iii) A permanent clean coal technology demonstration project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency; or

(iv) A permanent clean coal technology demonstration project that constitutes a repowering project.

(33) *Representative actual annual emissions* mean the average rate, in tons per year, at which the source is projected to emit a pollutant for the two-year period after a physical change or change in the method of operation of a unit, (or a different consecutive two-year period within 10 years after that change, where the Administrator determines that such period is more representative of normal source operations), considering the effect any such change will have on increasing or decreasing the hourly emissions rate and on projected capacity utilization. In projecting future emissions the Administrator shall:

(i) Consider all relevant information, including but not limited to, historical operational data, the company's own representations, filings with the State or Federal regulatory authorities, and compliance plans under title IV of the Clean Air Act; and

(ii) Exclude, in calculating any increase in emissions that results from the particular physical change or change in the method of operation at an electric utility steam generating unit, that portion of the unit's emissions following the change that is attributable to an increase in projected capacity utilization at the unit that is unrelated to the particular change, including any increased utilization due to the rate of electricity demand growth for the utility system as a whole.

(34) *Clean coal technology* means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emission of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam which was not in widespread use as of November 15, 1990.

(35) *Clean coal technology demonstration project* means a project using funds appropriated under the heading 'Department of Energy-Clean Coal Technology', up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal contribution for a qualifying project shall be at least 20 percent of the total cost of the demonstration project.

(36) *Temporary clean coal technology demonstration project* means a clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plans for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(37)(i) *Repowering* means replacement of an existing coal-fired boiler with one of the following clean coal technologies: Atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.

(ii) Repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

(iii) The Administrator shall give expedited consideration to permit applications for any source that satisfies the requirements of this subsection and is granted an extension under section 409 of the Clean Air Act.

(38) *Reactivation of a very clean coal-fired electric utility steam generating unit* means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

(i) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carried in the permitting authority; emissions inventory at the time of enactment;

(ii) Was equipped prior to shut-down with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85 percent and a removal efficiency for particulates of no less than 98 percent;

(iii) Is equipped with low-NOx burners prior to the time of commencement of operations following reactivation; and

(iv) Is otherwise in compliance with the requirements of the Clean Air Act.

* * * * *

3. Section 52.24 is amended by revising paragraph (f)(13)(iv) and by adding paragraphs (f)(5)(iii)(*h*), (f)(5)(iii)(*i*), (f)(5)(iii)(*j*), (f)(13)(v), (f)(19), (f)(20), (f)(21), (f)(22), (f)(23), (f)(24), and (f)(25) to read as follows:

§ 52.24 Statutory restriction on new sources.

* * * * *

(f) * * *

(5) * * *

(iii) * * *

* * * * * *

(*h*) The addition, replacement or use of a pollution control project at an existing electric utility steam generating unit, unless the Administrator determines that such addition, replacement, or use renders the unit less environmentally beneficial, and except:

(*1*) When the Administrator has reason to believe that the pollution control project would result in a significant net increase in representative actual annual emissions of any criteria pollutant over levels used for that source in the most recent air quality impact analysis in the area conducted for the purpose of title I, if any, and

(*2*) The Administrator determines that the increase will cause or contribute to a violation of any ambient standard, PSD increment, or visibility limitation.

(*i*) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, provided that the project complies with:

VOL 56 ISS 115 JE 14 1991 UMI

(1) The State implementation plan for the State in which the project is located, and

(2) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(j) The reactivation of a very clean coal-fired electric utility steam generating unit.

* * * * *

(13) * * *

(iv) For any emissions unit (other than an electric utility steam generating unit specified in paragraph (f)(13)(v) of this section) that has not begun normal operations on a particular date, actual emissions shall equal the potential to emit of the unit on that date.

(v) For an electric utility steam generating unit (other than a new unit or the replacement of an existing unit) actual emissions of the unit following the physical or operational change shall equal the representative actual annual emissions of the unit.

* * * * *

(19) *Electric utility steam generating unit* means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.

(20) *Representative actual annual emissions* means the average rate, in tons per year, at which the source is projected to emit a pollutant for the two-year period after a physical change or change in the method of operation of a unit (or a different consecutive two-year period within 10 years after that change, where the Administrator determines that such period is more representative of normal source operations), considering the effect any such change will have on increasing or decreasing the hourly emissions rate and on projected capacity utilization. In projecting future emissions the Administrator shall:

(i) Consider all relevant information, including but not limited to, historical operational data, the company's own representations, filings with the State or Federal regulatory authorities, and compliance plans under title IV of the Clean Air Act; and

(ii) Exclude, in calculating any increase in emissions that results from the particular physical change or change in the method of operation at an electric utility steam generating unit, that portion of the unit's emissions following the change that is attributable to an increase in projected capacity utilization at the unit that is unrelated to the particular change, including any increased utilization due to the rate of electricity demand growth for the utility system as a whole.

(21) *Temporary clean coal technology demonstration project* means a clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plans for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(22) *Clean coal technology* means any technology, including technologies applied at the precombustion, combustion, or post combustion stage, at a new or existing facility which will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam which was not in widespread use as of November 15, 1990.

(23) *Clean coal technology demonstration project* means a project using funds appropriated under the heading "Department of Energy-Clean Coal Technology", up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency. The Federal contribution for a qualifying project shall be at least 20 percent of the total cost of the demonstration project.

(24) *Reactivation of a very clean coal-fired electric utility steam generating unit* means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

(i) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carried in the permitting authority's emissions inventory at the time of enactment;

(ii) Was equipped prior to shut-down with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85 percent and a removal efficiency for particulates of no less than 98 percent;

(iii) Is equipped with low-NO_x burners prior to the time of commencement of operations following reactivation; and

(iv) Is otherwise in compliance with the requirements of the Clean Air Act.

(25) *Pollution control project* means any physical change or change in the method of operation, at an existing electric utility steam generating unit for purposes of reducing emissions from such unit. Such changes are limited to:

(i) The installation of conventional or innovative pollution control technology, including but not limited to advanced flue gas desulfurization, sorbent injection for sulfur dioxide and nitrogen oxides controls and electrostatic precipitators;

(ii) A physical change, or change in the method of operation, to accommodate switching to a fuel which is less polluting than the fuel in use prior to the change including, but not limited to natural gas or coal reburning, co-firing of natural gas and other fuels for the purpose of controlling emissions;

(iii) A permanent clean coal technology demonstration project conducted under title II, section 101(d) of the Further Continuing Appropriations Act of 1985 (section 5903(d) of title 42 of the United States Code), or subsequent appropriations, up to a total amount of $2,500,000,000 for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency; or

(iv) A permanent clean coal technology demonstration project that constitutes a repowering project.

* * * * *

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

1. The authority citation for part 60 is revised to read as follows:

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, and 7601 as amended by the Clean Air Act Amendments of 1990, Pub. L. 101-549, 104 Stat. 2399 (Nov. 15, 1990; 402, 408, 415 of the Clean Air Act as amended, 104 Stat. 2399, unless otherwise noted.

2. Section 60.2 is proposed to be amended by adding the following definitions in alphabetical order:

§ 60.2 Definitions.

* * * * *

Clean coal technology demonstration project means a project using funds appropriated under the heading 'Department of Energy-Clean Coal Technology', up to a total amount of $2,500,000,000 for commercial demonstrations of clean coal technology, or similar projects funded through appropriations for the Environmental Protection Agency.

* * * * *

Electric utility steam generating unit means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.

* * * * *

Repowering means replacement of an existing coal-fired boiler with one of the following clean coal technologies: atmospheric or pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the Administrator, in consultation with the Secretary of Energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990. Repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the Department of Energy.

Reactivation of a very clean coal-fired electric utility steam generating unit means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

(1) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carrier in the permitting authority's emissions inventory at the time of enactment;

(2) Was equipped prior to shut-down with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85 percent and a removal efficiency for particulates of no less than 98 percent;

(3) Is equipped with low-NO_x burners prior to the time of commencement of operations following reactivation; and

(4) Is otherwise in compliance with the requirements of the Clean Air Act.

* * * * *

3. Section 60.14 is amended by adding paragraphs (h), (i), (j), (k) and (l) to read as follows:

§ 60.14 Modification.

* * * * *

(h) No physical change, or change in the method of operation, at an existing electric utility steam generating unit shall be treated as a modification for the purposes of this section provided that such change does not increase the maximum hourly emissions of any pollutant regulated under this section above the maximum hourly emissions achievable at that unit during the five years prior to the change.

(i) Repowering projects that are awarded funding from the Department of Energy as permanent clean coal technology demonstration projects (or similar projects funded by EPA) are exempt from the requirements of this section provided that such change does not increase the maximum hourly emissions of any pollutant regulated under this section above the maximum hourly emissions achievable at that unit during the five years prior to the change.

(j)(1) Repowering projects that qualify for an extension under section 409(b) of the Clean Air Act are exempt from the requirements of this section, provided that such change does not increase the actual hourly emissions of any pollutant regulated under this section above the actual hourly emissions achievable at that unit during the five years prior to the change.

(2) This exemption shall not apply to any new unit that:

(i) Is designated as a replacement for an existing unit;

(ii) Qualifies under section 409(b) of the Clean Air Act for an extension of an emission limitation compliance date under section 405 of the Clean Air Act; and

(iii) Is located at a different site than the existing unit.

(k) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project is exempt from the requirements of this section. A "temporary clean coal control technology demonstration project", for the purposes of this section is a clean coal technology demonstration project that is operated for a period of five years or less, and which complies with the State implementation plan for the State in which the project is located and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

(l) The reactivation of a very clean coal-fired electric utility steam generating unit is exempt from the requirements of this section.

Part VI

Department of Education

Innovation in Education Program (Academies for School Leaders and Academies for Teachers); Inviting Applications for New Awards for Fiscal Year 1991; Notice

VOL 56 ISS 115 JE 14 1991 UMI

DEPARTMENT OF EDUCATION

Fund for Innovation in Education: Innovation in Education Program (Academies for School Leaders and Academies for Teachers) Notice inviting applications for new awards for fiscal year 1991

[CFDA No.: 84.215N and 84.215P–84.215U]

Purpose of Program: To provide grants for projects that show promise of identifying and disseminating innovative educational approaches at the preschool, elementary, and secondary levels.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, private schools, and other public and private agencies, organizations and institutions or consortia of those entities.

Deadline for Transmittal of Applications: 7–31–91.

Deadline for Intergovernmental Review: 9–28–91.

Applications Available: 6–24–91.

Available Funds: $7,000,000.

Estimated Range of Awards: $250,000–$500,000.

Estimated Number of Awards: 21.

Note: The Department is not bound by any estimates in this notice.

Project Period: 12–18 months.

Budget Period: 12–18 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86.

Supplementary Information: On May 6, 1991, the Secretary published a notice of proposed priorities for Academies for School Leaders and Academies for Teachers in the **Federal Register** (56 FR 21058). The public comment period for the notice of proposed priorities ended on June 5, 1991.

It is the policy of the Department of Education not to solicit applications before the publication of final priorities. However, in this case it is essential to solicit applications on the basis of the notice of proposed priorities to allow sufficient time to conduct the competition and issue awards prior to the end of the fiscal year (September 30, 1991).

Thirty-five parties, almost all of whom were supportive of the priorities, commented on the notice. The Secretary anticipates making only one change in response to these comments: clarifying that the Academies for School Leaders (Priority 1) must serve current school leaders as well as those desiring to become school leaders.

This notice contains the priorities as the Secretary expects to issue them in the notice of final priorities. Applicants should prepare their applications on the basis of these priorities. If the Secretary makes any substantive changes to these priorities before issuing the notice of final priority, applicants will be given an opportunity to revise their applications.

The Secretary solicits separate applications for each of the absolute priorities. The Secretary anticipates that approximately three awards will be made for each absolute priority.

Priorities

Absolute Priorities

Under 34 CFR 75.105(c)(3) the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary sets funds aside separately for each of the following priorities, and funds under this competition only applications that meet one of these priorities.

Absolute Priority 1—Academies for School Leaders (CFDA 84.215N)

Projects to operate training academies for public and private school leaders. Each academy must serve a State or a multi-State region, and the Governors of the States to be served must be consulted in the design and operation of the academy's program. Only one academy in a State or region will be funded. The activities carried out by an academy must include:

- Construction of a model curriculum for the development of school leaders that focuses on instructional leadership, school-based management, and the design and execution of school improvement strategies and accountability mechanisms;
- Identification of candidates to be trained as new school leaders, including minorities and persons with disabilities, using a carefully designed search process;
- Identification of schools with principal and other school leader vacancies and negotiation with schools and school districts to: match the trainee-candidates with districts or schools that will sponsor and support the candidates; and identify and support exceptional, experienced principals and other school leaders to serve as mentors to the trainee-candidates;
- Operation of school leadership programs during the school year or during the summer that provide intensive training and development both for persons desiring and demonstrating outstanding promise to become school leaders, and for current school leaders seeking enhanced and up-to-date knowledge needed to perform their jobs effectively;
- Monitoring and facilitating an internship, as appropriate, for each of the new school leaders who are graduates of the intensive development programs under the guidance and supervision of an experienced school leader; and
- Providing periodic follow-on development activities for the trainees.

Invitational Priorities

Within Absolute Priority 1, the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications.

Invitational Priority 1

Projects that would match funds provided under this priority with funds from non-Federal sources.

Invitational Priority 2

Projects that would combine the resources of different schools within an institution of higher education, such as the schools of arts and sciences, business or management, and education, or that would provide a similar multidisciplinary approach.

Absolute Priorities 2–7—(Academies for Teachers)

English Academies for Teachers (CFDA 84.215P).

Mathematics Academies for Teachers (CFDA 84.215Q).

Science Academies for Teachers (CFDA 84.215R).

History Academies for Teachers (CFDA 84.215S).

Geography Academies for Teachers (CFDA 84.215T).

Academies for Teachers in the Five Core Disciplines (CFDA 84.215U).

Projects to operate training academies for teachers in each of the five core academic disciplines—English; mathematics; science; history; and geography—and projects to operate single academies that deliver training to teachers in all five disciplines. Each academy must serve a State or a multi-State region, and the Governors of the States to be served must be consulted in the design and operation of the academy's program. Only one academy will be funded in a State or region to deliver training in a given discipline. The activities carried out by an academy must include:

- Development of a model curriculum for the training of teachers that focuses on renewal and enhancement of teachers' knowledge of the core academic discipline or disciplines addressed by the academy; teaching skills and strategies needed to impart academic subject matter to students including students from diverse backgrounds and students with disabilities; the use of educational technologies in teaching the core discipline; and the training that teachers need to become master teachers and to participate in curriculum development;
- Recruitment of teachers within the State or region to participate in the program of the academy, with an effort made to recruit minority teachers, teachers with disabilities, and other teachers who have potential for leadership; and
- Operation of programs during the school year or during the summer that provide intensive training using the model curriculum developed by the academy.

Invitational Priority

Within Absolute Priorities 2–7, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Projects that would match funds provided under this priority with funds from non-Federal sources.

Selection Criteria: Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the criteria to bring the total to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation (34 CFR 75.210(b)(3)). Fifteen (15) additional points will be added for a possible total of 30 points for this criterion.

For Applications or Information Contact: Shirley Steele, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone: 202–219–1496. Deaf and hearing-impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3151.

Dated: June 11, 1991.

Bruno V. Manno,

Acting Assistant Secretary for Educational Research and Improvement.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.215E]

Fund for Innovation in Education: Innovation in Education Program; Notice inviting applications for new awards for fiscal year 1991.

Purpose of Program: To provide grants for projects that show promise of identifying and disseminating innovative educational approaches at the preschool, elementary, and secondary levels.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, private schools, and other public and private agencies, organizations and institutions or consortia of those entities.

Deadline for Transmittal of Applications: 7–31–91.

Deadline for Intergovernmental Review: 9–28–91.

Applications Available: 6–24–91.

Estimated Available Funds: $3,500,000.

Estimated Range of Awards: $250,000–$500,000.

Estimated Number of Awards: 10–12.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 24 months.

Budget Period: 12 months.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86.

Invitational Priorities: The Secretary is particularly interested in applications for projects that demonstrate effective strategies for—

(a) Improving the performance and employment opportunities of underachieving students. Of special interest are school-based projects designed to help students reach high standards of performance in five core subjects: English, mathematics, science, history, and geography;

(b) Improving and expanding instruction in foreign languages at the elementary and secondary levels. Of special interest are projects to expand instruction in the language of Arabic, Chinese, Japanese, Korean, and Russian at both the elementary and secondary levels; or

(c) Restructuring elementary and secondary schools. Of special interest are projects at the school level designed to achieve comprehensive reform through improvements in areas such as school leadership, organization, decisionmaking, teaching, and curriculum, and the use of technology in the school.

However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications.

Selection Criteria: Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the criteria to bring the total to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation (34 CFR 75.210(b)(3)). Fifteen (15) additional points will be added for a possible total of 30 points for this criterion.

Supplementary Information: Although the Secretary has chosen to use the EDGAR selection criteria and invitational priorities for this competition, he may establish specific regulations or absolute priorities for other grant competitions.

For Applications or Information Contact: Shirley Steele, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone: 202–219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3151.

Dated: June 11, 1991.

Bruno V. Manno,

Acting Assistant Secretary for Educational Research and Improvement.

Part VIII

Department of Transportation

Federal Aviation Administration

14 CFR Parts 71 and 91

Proposed Alteration of the Houston Terminal Airport Control Area and Revocation of the William P. Hobby Airport, Airport Radar Service Area; Proposed Rule

VOL 56 ISS 115 JE 14 1991 UMI

DEPARTMENT OF TRANSPORTION

Federal Aviation Administration

14 CFR Parts 71 and 91

[Airspace Docket No. 90-AWA-12]

RIN 2120-AD04

Proposed Alteration of the Houston Terminal Control Area and Revocation of the Houston William P. Hobby Airport, Airport Radar Service Area; TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Houston, TX, Terminal Control Area (TCA) by expanding the lateral limits. This proposal would establish TCA airspace at the William P. Hobby Airport and would revoke the current Airport Radar Service Area (ARSA) to accommodate the proposed configuration for the Houston TCA. The existing Houston TCA would be modified to encompass two major airports: Houston Intercontinental and William P. Hobby. The alteration to the Houston TCA would consist of airspace within a 30-mile radius of the Houston Intercontinental Airport and within a 20-mile radius of the William P. Hobby Airport. The airspace would extend from the surface or higher to and including 10,000 feet above mean sea level (MSL). Establishment of TCA airspace at the William P. Hobby Airport would impose certain operating rules and pilot/equipment requirements, including requirements for an operable two-way radio, a 4096 transponder with automatic altitude-reporting equipment, an operable very high frequency omnidirectional radio range (VOR) or tactical air navigational aid (TACAN) receiver, and restrictions on student pilot operations. This action is intended to increase the capability of the air traffic control (ATC) system to separate aircraft in the terminal airspace around the Houston Intercontinental and William P. Hobby Airports. The objective of this proposal is to substantially increase safety while accommodating the legitimate concerns of airspace users.

DATES: Comments must be received on or before August 12, 1991.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-10], Docket No 90-AWA-12; Notice No., 800 Independence Avenue, SW., Washington, DC 20591.

The official docket may be examined in the Rules Docket, weekdays except Federal holidays, between 8:30 a.m. and 5 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Patricia Crawford, Airspace and Obstruction Evaluation Branch (AIP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 90-AWA-12; Notice No. ." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Related Rulemaking Actions

On May 21, 1970, the FAA published Amendment 91-78 to part 91 of the Federal Aviation Regulations (FAR) which enabled the establishment of TCAs (35 FR 7782).

On February 3, 1987, the FAA published a final rule which established requirements pertaining to the use, installation, inspection, and testing of the Air Traffic Control Radar Beacon System (ATCRBS) and Mode S transponders in U.S.-registered civil aircraft (53 FR 3380). The rule did not affect the requirement to use a transponder for operation in a TCA.

On June 21, 1988, the FAA published a final rule which required Mode C equipment when operating within 30 miles of any designated TCA-primary airport from the surface up to 10,000 feet MSL, except for operations by certain aircraft types specifically excluded (53 FR 23356).

On October 14, 1988, the FAA published a final rule which revised the classification and pilot/equipment requirements for conducting operations in a TCA (53 FR 40318). Specifically, the rule: (a) Established a single-class TCA; (b) required the pilot-in-command of a civil aircraft operating within a TCA to hold at least a private pilot certificate, except for a student pilot who has received certain documented training; and (c) eliminated the helicopter exception from the minimum navigational equipment requirement.

On May 25, 1990, the FAA published a proposal to suspend, until December 30, 1993, certain provisions of the regulation which require the installation and use of automatic altitude reporting (Mode C) transponders (55 FR 21722; notice no. 90-16). This proposal would provide access to specified outlying airports within 30 miles of a TCA primary airport (Mode C veil) for aircraft without a Mode C transponder. The FAA believes that the operation of an aircraft without a Mode C transponder can be safely accommodated provided that the operation is conducted in areas not currently within ATC radar coverage and not predominantly used by aircraft

required to install and use traffic alert and collision avoidance system (TCAS) equipment.

In the preamble to notice no. 90-16, the FAA stated that a list of airports and specified altitudes below which aircraft operations would be excluded from the Mode C transponder requirement would accompany any NPRM regarding future TCAs. Although the FAA has not yet published a final determination regarding notice no. 90-16, the FAA is listing the airports for the revised Houston TCA Mode C veil in this NPRM to allow full consideration of the impact of the proposed TCA and the Mode C veil. Should the revised Houston TCA be adopted, the effective date of the proposed suspension will be coincident with the effective date of the final rule for the revised Houston TCA.

Aircraft operations without Mode C transponders were proposed to be permitted within a 1.5-nautical-mile (NM) radius of a designated airport from the surface up to a specified altitude. Additionally, aircraft operations without a Mode C transponder would be permitted along the most direct route between that designated airport and the boundary of the Mode C veil, at and below the specified altitude. The routing must be consistent with established traffic patterns, noise abatement procedures, and safety.

Aircraft operations at, to, or from the listed airports would be suspended from the Mode C transponder requirement until December 30, 1993. This time period will accommodate the scheduled upgrading of the present ATC radar system in the vicinity of the Houston Intercontinental and Hobby Airports, and an evaluation period to determine the extent of radar coverage within the Houston TCA Mode C veil as a result of radar system enhancements. Based on the results of this evaluation, the period that the Mode C transponder requirement would be suspended for operations at certain airports may be extended on a site-by-site basis by a notice published in the Federal Register.

Operations of aircraft without Mode C transponders at airports not listed by this rule would continue to be safely accommodated in accordance with existing provisions for individual ATC authorizations.

Background

The TCA program was developed to reduce the midair collision potential in the congested airspace surrounding airports with high density air traffic by providing an area in which all aircraft will be subject to certain operating rules and equipment requirements.

The density of traffic and the type of operations being conducted in the airspace surrounding major terminals increase the probability of midair collisions. In 1970, an extensive study found that the majority of midair collisions occurred between a general aviation (GA) aircraft and an air carrier, military, or another GA aircraft. The basic causal factor common to these conflicts was the mix of uncontrolled aircraft operating under visual flight rules (VFR) and controlled aircraft operating under instrument flight rules (IFR). TCAs provide a method to accommodate the increasing number of IFR and VFR operations. The regulatory requirements of TCA airspace afford the greatest protection for the greatest number of people by providing ATC with an increased capability to provide aircraft separation service, thereby minimizing the mix of controlled and uncontrolled aircraft.

To date, the FAA has established a total of 29 TCAs. The FAA is proposing to take action to modify or implement the application of these proven control techniques to more airports to provide greater protection of air traffic in the airspace regions most commonly used by passenger-carrying aircraft.

Pre-NPRM Public Input

Airspace Meetings

The FAA held pre-NPRM airspace meetings on July 20 and 21, 1988, to allow the public and airspace users an opportunity to participate in developing the design for the modified Houston TCA. In attendance were private and student pilots, flight instructors, owners/managers of general aviation airports, as well as representatives from the Texas Aeronautics Commission (TAC), the Air Line Pilots Association (ALPA), the Aircraft Owners and Pilots Association (AOPA), and the Air Transport Association (ATA). During the July 21 meeting, the representatives from AOPA, ATA, and ALPA made statements concerning the configuration of the modified Houston TCA. The participants in the pre-NPRM meetings expressed the following concerns about the proposed alteration to the Houston TCA:

1. A major concern was the establishment of a VFR east/west flyway between Houston Intercontinental Airport and the William P. Hobby Airport. The proposed configuration provides for the establishment of a VFR east/west flyway, 3.5 miles wide, between the airports.

2. Another major concern was the lateral and vertical limits for the proposed TCA around William P. Hobby Airport. Some users requested that the TCA be limited to no more than 20 miles south of William P. Hobby Airport and the ceiling no higher than 10,000 feet MSL. The proposed modification takes into account both requests for the lateral and vertical limits. the FAA recognizes that much of the airspace south of William P. Hobby Airport is over water or adjacent to the Gulf of Mexico and does not generate the volume of traffic to justify a TCA environment.

3. Some users suggested that identifiable landmarks should be used to define the TCA boundary, where feasible. The FAA supports this suggestion and has altered the proposed TCA boundaries along interstate 10 to the east, and along State highway 59 to the west of the Houston Intercontinental and the William P. Hobby Airports.

Houston Ad Hoc Airspace Committee

The Houston Ad Hoc Airspace Committee was created at the time of the July 21 pre-NPRM meeting. The committee consisted of airspace users, fixed-based operators, and other concerned citizens. An FAA representative from the Southwest Region was available to provide the technical support and advice on local air traffic control procedures. The ad hoc committee submitted the following written comments on altering the Houston TCA to the FAA:

1. The committee recommended that the lateral limits of the TCA around Houston Intercontinental Airport remain at the current 20-nautical-mile (NM) limit. The FAA did not propose to adopt this recommendation because of the escalating volume of traffic in the terminal environment, particularly in the airspace north of the airport. Establishing the TCA lateral limits at a 30-NM radius of the airport is necessary to contain air carriers and large turbojets in the controlled TCA environment while sequencing and radar vectoring aircraft for spacing.

2. The committee suggested that the TCA around William P. Hobby Airport be modified to coincide with the lateral limits of the existing ARSA, i.e., a 5-mile radius surface area and 10-mile radius shelf. The FAA offers an alternative to the proposed TCA modification around William P. Hobby Airport: Lateral limits within an 8-NM radius, including the surface area, an 8- to 15-NM radius with a floor of 2,000 feet MSL, and a 15- to 20-NM radius with a floor of 4,000 feet MSL. This configuration would exclude several airports from the surface area, thus allowing for operations to/from airports in an uncontrolled environment.

VOL 56 ISS 115 JE 14 1991 UMI

3. The committee proposed to raise the floor of the TCA south of William P. Hobby Airport between the Hobby (HUB) VOR/DME 145° radial and the HUB 205° radial between the 8- to 10-NM DME arc to 2,000 feet MSL, then between the 10- to 20-NM DME arc to 4,000 feet MSL. This action would accommodate a popular flight training area south of William P. Hobby Airport. The FAA supports this proposal with the following changes: Limits between the HUB 156° radial and the HUB 211° radial, a floor of 2,000 feet MSL between the 8- to 10-NM DME arc, and a floor of 3,000 feet MSL between the 10- to 15-NM DME arc. The floor in the 15-to 20-NM DME area is proposed at 4,000 feet MSL.

Written Comments

In response to the pre-NPRM proposal, 44 written comments were received from individual airspace users and several organizations. The written comments are summarized below.

A fixed base operator with a flight school located on William P. Hobby Airport voiced concern that implementing a TCA recommendations for the TCA design separately. In addition, comments were received from the Spaceland Parachute Center recommending 12–15 mile lateral limits and 7,500 feet MSL ceiling with an exclusion for the Houston Gulf Airport.

The ATA was a participant on the ad hoc committee; however, the association submitted a separate recommendation to the FAA emphasizing its support for a TCA design in accordance with FAA Handbook 7400.2, Procedures for Handling Airspace Matters, which prescribes a 12,500 feet MSL vertical limit and a 30-mile radius outer limit.

ATA's concerns centered on ensuring that all standard instrument approach procedures would be contained within the TCA boundaries encompassing William P. Hobby Airport. ATA emphasized that it would only support a generic TCA design of 12,500 feet MSL and a 30-mile radius.

ALPA acknowledged the need to accommodate the flight schools at William P. Hobby and La Porte Airports. ALPA stated that it vigorously opposed a VFR corridor along Interstate 10. However, the organization will support the concept of a controlled VFR transition route, and requiring pilots to squawk a special code, monitor a discrete frequency, and transition in level flight with aircraft lights illuminated. The ALPA agreed with the ATA on the generic design for the altered Houston TCA.

In addition, one comment suggested that the FAA cancel its endeavor to implement any changes to the current airspace and "leave well enough alone" with a TCA at Houston Intercontinental and an ARSA at William P. Hobby Airport.

Comments received from Cliff Hyde Flying Service, La Porte Airport, supported the concept of TCAs around high traffic airports, expressed concern for the availability of student pilot training areas, and requested assistance to prevent traffic operating to/from Ellington Field from penetrating the La Porte traffic pattern.

The majority of the airspace users support the proposed modification to the Houston TCA. This design accommodates traffic at the La Porte Municipal Airport, allowing unrestricted operation by excluding the airport from the TCA surface area. While the ad hoc committee requested a ceiling of 8,000 feet MSL, the FAA has proposed a 10,000 feet MSL ceiling for the Houston TCA. The FAA has determined, by an evaluation of air traffic procedures and traffic flow, that air carrier and large turbojet aircraft can be contained within the TCA airspace at 10,000 feet MSL, but that a ceiling of 8,000 feet MSL is not adequate for this proposal.

The Proposal

The FAA is considering an amendment to part 71 of the FAR (14 CFR part 71) to alter the TCA at Houston, TX. The proposed modification would establish additional TCA airspace and would revoke the ARSA at William P. Hobby Airport. In 1988, the total number of enplaned passengers at William P. Hobby Airport was 3,647,079, which qualified the airport as a candidate for a TCA. Consequently, the FAA has determined that the establishment of TCA airspace at William P. Hobby Airport is in the interest of flight safety and would result in a greater degree of protection for the greatest number of people during flight in the terminal area. William P. Hobby Airport is currently being served by an ARSA, which would be rescinded with the proposed modification of the Houston TCA. The existing Houston TCA lateral limits would be altered concurrent with the establishment of the proposed configuration for Houston TCA. The proposed modification to the Houston TCA is depicted on the attached chart.

Section 91.131 of the FAR (14 CFR part 91) defines TCAs and prescribes operating rules for aircraft in airspace designated as a TCA. Section 91.131 provides, in part, that before entering the TCA, any pilot arriving at any airport within the TCA or flying through the TCA must: (1) Obtain appropriate authorization from ATC; (2) comply with applicable procedures established by ATC for pilot training operations at an airport within a TCA; (3) hold at least a private pilot certificate; and (4) meet the requirements of § 61.95 of the FAR (14 CFR part 61) if the aircraft is operated by a student pilot.

Any person operating an aircraft arriving at any airport within a TCA or flying through a TCA must have the aircraft equipped with: An operable VOR or TACAN receiver; an operable two-way radio capable of communications with ATC on appropriate frequencies for that TCA; and the applicable operating transponder and automatic altitude-reporting equipment specified in paragraph (a) of § 91.215 of the FAR, except as provided in paragraph (d) of that section. Unless otherwise authorized by ATC, all large, turbine engine-powered aircraft operating to or from a TCA-primary airport must be operated above the designated floors of the TCA. The pilot of any aircraft departing from an airport located within a TCA is required to receive a clearance from ATC before takeoff.

All pilots operating within a TCA are required to comply with all ATC clearances and instructions. However, the TCA rule permits ATC to authorize deviations from any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of the airspace can be attained. Ultralight vehicle operations and parachute jumps in a TCA may only be conducted under the terms of an ATC authorization.

Definitions, operating requirements, and specific airspace designations applicable to TCAs may be found in §§ 71.12 and 71.401 of the FAR (14 CFR part 71); and §§ 91.1 and 91.131 of the FAR (14 CFR part 91).

The standard configuration of a TCA consists of three concentric circles centered on the primary airport extending to 10, 20, and 30 nautical miles, respectively. The vertical limits of the TCA are 12,500 feet MSL, with the floor established at the surface in the inner area and at levels appropriate to containment of operations in the outer areas. Variations of these criteria may be authorized contingent upon terrain, adjacent regulatory airspace, and factors unique to the terminal area. The airspace configuration proposed in this notice is the result of an extensive staff study conducted by FAA authorities after obtaining public input from informal airspace meetings, written comments, the Houston Ad Hoc

Airspace Committee, and coordinating with the FAA regional office.

A unique feature of the proposal is that the proposed TCA for the Houston area is one TCA which would encompass two primary airports instead of one primary airport. The FAA has determined that the proposed alteration of airspace for the Houston area TCA would be consistent with TCA objectives. The proposed configuration considers the existing terminal area flight operations and terrain as follows:

1. That airspace extending upward from the surface to and including 10,000 feet MSL within a 10-mile radius of the Humble (IAH) VORTAC, excluding that airspace south of an east/west line from the IAH 141° radial 10 DME to the IAH 216° radial 10 DME and within an 8-mile radius of the Hobby VOR/DME (HUB), excluding that airspace north of an east/west line from HUB 331° radial 8 DME to the HUB 031° radial 8 DME. The Hobby inner circle would be reduced from the HUB 156° radial to the HUB 211° radial.

This airspace is necessary to contain large turbojet aircraft within the confines of the TCA while operating to and from the primary airports and allow for ingress/egress to secondary airports without affecting the primary airports. The reduction in the inner circle is necessary to accommodate multi-engine aircraft flight training activity. This airspace configuration would provide a VFR east/west flyway, 3.5 miles wide between Houston Intercontinental and William P. Hobby Airports.

2. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL between 10 DME and 15 DME of the IAH VORTAC, excluding that airspace south of the IAH VORTAC on the east side where the 15-mile arc joins the 15-mile arc north of the HUB VOR/DME and on the west side that airspace south of where the 15-mile arc of the IAH VORTAC crosses State highway 59 and northwest of the HUB VOR/DME where the 15-mile arc crosses State highway 59. Included is that airspace between the HUB 156° radial and the HUB 211° radial between 6 and 10 miles DME from the HUB VOR/DME.

This area is necessary to allow sufficient airspace for uncontrolled operations, specifically aircraft landing at and departing from nonprimary airports within the lateral limits. In addition, the airspace between the HUB 156° radial and the HUB 211° radial would allow for flight training activity.

3. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL between 15 DME and 20 DME of the IAH VORTAC, excluding that airspace south of where the 20-mile arc crosses interstate 10 to the east of IAH VORTAC and State highway 59 southwest of IAH VORTAC. Also, including that airspace between the HUB 156° radial and the HUB 211° radial between 10 and 15 miles DME from the HUB VOR/DME.

This airspace is necessary to provide sufficient room for sequencing and vectoring arriving and departing aircraft. In addition, the configuration takes into consideration the airspace for aircraft on downwind and on parallel approaches to Houston Intercontinental Airport. The airspace between the HUB 156° radial and the HUB 211° radial is necessary to accommodate multi-engine flight training activity.

4. That airspace extending upward from 4,000 feet MSL to and including 10,000 feet MSL between 20 DME and 30 DME of the IAH VORTAC, excluding that airspace south of Interstate 10 east of IAH VORTAC and State highway 59 southwest of IAH VORTAC. That airspace between 15 DME and 20 DME from the HUB VOR/DME excluding that airspace north of interstate 10 east of Hobby and State highway 59 southwest of Hobby.

This area is necessary to contain aircraft in a controlled environment and allows for adequate airspace for nonparticipating aircraft conducting VFR operations.

The preceding summary of the proposed alteration of the TCA airspace configuration identifies that airspace which is necessary to contain large turbojet aircraft operations at the Houston Intercontinental Airport and the William P. Hobby Airport. ATC would provide control and separation of all flights within the proposed airspace boundaries. Furthermore, ATC authorization is required for aircraft operations within that airspace. Modifying this TCA would greatly enhance the safety of flight within the congested airspace overlying the Houston metropolitan area by facilitating the separation of controlled and uncontrolled flight operations. Sections 71.401 and 71.501 of the FAR were republished in FAA Handbook 7400.6G, Compilation of Regulations, dated September 4, 1990.

Suspension of Certain Aircraft Operations From the Mode C Transponder Requirement

On December 5, 1990, the FAA published Special Federal Aviation Regulation (SFAR) No. 62 which suspends, until December 30, 1993, certain provisions of the regulation which require the installation and use of automatic altitude-reporting (Mode C) transponders (55 FR 50302). SFAR No. 62 provides access to specified outlying airports within 30 miles of a TCA-primary airport (Mode C veil) for aircraft without Mode C transponders. The FAA believes that the operation of an aircraft without a Mode C transponder can be safely accommodated provided that the operation is conducted in areas not currently within ATC radar coverage and not used predominantly by aircraft required to install and use traffic alert and collision avoidance systems (TCAS) equipment.

SFAR) No. 62 identified 17 airports (within the current Houston Intercontinental TCA Mode C veil) at which operations by aircraft not equipped with Mode C transponders can be conducted at and below 1,200 feet above ground level (AGL): (1) Within a 2-nautical-mile radius of a listed airport; and (2) along a direct route between that airport and the outer boundary of the Mode C veil. Those 17 airports are:

1. Ainsworth Airport, Cleveland, TX (0T6)
2. Biggin Hill Airport, Hockley, TX (TX49)
3. Cleveland Municipal Airport, Cleveland, TX (6R3)
4. Fay Ranch Airport, Cedar Lane, TX (0T2)
5. Freeman Property Airport, Katy, TX (81T)
6. Gum Island Airport, TX (3T6)
7. Harbican Airport, Airpark, Katy, TX (9XS9)
8. Harold Freeman Farm Airport, Katy, TX (8XS1)
9. Hoffpauir Airport, Katy, TX (59T)
10. Horn-Katy Hawk International Airport, Katy, TX (57T)
11. Houston-Hull Airport, Houston, TX (SGR)
12. Houston-Southwest Airport, Houston, TX (AXH)
13. King Air Airport, Katy, TX (55T)
14. Lake Bay Gall Airport, Cleveland, TX (0T5)
15. Lake Bonanza Airport, Montgomery, TX (33TA)
16. R W J Airpark Airport, Baytown, TX (54TX)
17. Westheimer Air Park Airport, Houston, TX (5TA4)

The proposed designation of William P. Hobby Airport as a TCA-primary airport would extend the Houston TCA Mode C veil to include the airspace areas within a 30-nautical-mile radius of Hobby Airport. The FAA has determined that 13 airports would be added to the list of airports for the Houston TCA Mode C veil as a result of the proposed designation of Hobby Airport as a primary airport. The list of the 13 additional airports for the revised Houston TCA Mode C veil primarily comprises those airports located approximately 25 to 30 miles from Hobby Airport and not located within the current Houston Intercontinental TCA Mode C veil. The 13 airports to be added to SFAR No. 62 for the proposed

VOL 56 ISS 115 JE 14 1991 UMI

Houston Intercontinental and Hobby TCA Mode C veil are:

(1) Austrie Ranch Airport, Texas City, TX (T89)
(2) Bailes Airport, Angleton, TX (7R9)
(3) Covey Trails Airport, Pelahatchie, TX (8MS)
(4) Creasy Airport, Santa Fe, TX (8TA8)
(5) Custom Aire Service Airport, Angleton, TX (81D)
(6) Flying C Ranch Airport, Needville, TX (XS25)
(7) Garrett Ranch Airport, Danbury, TX (77XS)
(8) H & S Airfield Airport, Damon, TX (XS21)
(9) HHI Hitchcock Heliport, Hitchcock, TX (8TA5)
(10) Johnnie Volk Field Airport, Hitchcock, TX (37R)
(11) Lane Airpark Airport, Rosenberg, TX(T34)
(12) Meyer Field Airport, Rosharon TX (TA33)
(13) Prairie Aire Field Airport, Damon, TX (4TA0)

Two airports identified on the list of 17 airports for the current Houston Intercontinental TCA Mode C veil, Houston-Southwest (AXH), Houston, TX, and Houston-Hull Airport (SGR), Houston, TX, are proposed to be deleted from the list of airports at which operations in noncompliance with the Mode C transponder equipment requirement are permitted. Houston-Southwest Airport is located approximately 13 nautical miles from William P. Hobby Airport. Houston-Hull Airport is located approximately 19 nautical miles from William P. Hobby Airport. Due to the proximity of these airports to William P. Hobby Airport, operations in the vicinity of the Houston-Southwest Airport and Houston-Hull Airport, or along the most direct routing between those airports and the outer boundary of the revised Houston TCA Model C veil, would underlie an area within which controlled traffic to and from a TCA-primary airport may be operating. Therefore, operations in the vicinity of Houston-Southwest and Houston-Hull Airports would no longer meet the criteria for exclusion from the Mode C transponder equipment requirement.

If Houston-Southwest and Houston-Hull Airports were not deleted from the list, aircraft not equipped with a Mode C transponder could operate along unspecified routes between each airport and the outer boundary of the revised Houston TCA Mode C veil. The FAA believes this situation could result in the display of radar targets without associated altitude information on ATC radar scopes, thus adversely affecting the safety benefits associated with the Mode C transponder equipment requirement.

Regulatory Evaluation Summary

This section summarizes the regulatory evaluation prepared by the FAA which provides more detailed information on estimates of the potential economic consequences of this proposal. This summary and the evaluation quantify, to the extent practicable, estimated costs of the proposal to the private sector, consumers, and Federal, State, and local governments, and also the anticipated benefits.

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or modify existing regulations only if potential benefits to society for each regulatory change outweigh potential costs. The order also requires the preparation of a Regulatory Impact Analysis of all "major" rules except those responding to emergency situations or other narrowly defined exigencies. A major rule is one that is likely to result in an annual effect on the economy of $100 million or more, a major increase in consumer costs, or a significant adverse effect on competition.

The FAA has determined that this proposal is not major as defined in the executive order. Therefore, a full regulatory impact analysis, which includes the identification and evaluation of cost-reducing alternatives to the proposal, has not been prepared. Instead, the agency has prepared a more concise document termed a "regulatory evaluation," which analyzes only this rule without identifying alternatives. In addition to a summary of the regulatory evaluation, this section also contains an initial regulatory flexibility determination required by the 1980 Regulatory Flexibility Act (Pub. L. 96–354) and an international trade impact assessment. If the reader desires more detailed economic information than this summary contains, then he or she should consult the regulatory evaluation contained in the docket.

Costs

The FAA estimates the total cost of implementing the proposed rule to be $1.1 million (discounted, 15 years) in 1989 dollars. This estimate represents costs to the FAA for additional personnel and revision of aeronautical charts. GA aircraft operators are not expected to incur any costs as a result of the proposal. These costs are discussed below.

For the FAA, the proposed rule would impose costs for two additional controllers at Houston TRACON. The discounted cost of the two controllers would be $1,050,000 at 10 percent over 15 years. No additional equipment requirements are anticipated as a result of the proposal.

For GA aircraft operators, the proposal would impose no monetary costs for avionics equipment. Costs incurred by aircraft operators without Mode C transponders have already been accounted for by the Mode C rule. The potentially affected GA aircraft operators are assumed to already have the other types of avionics equipment (such as operable two-way radio and VOR) required for entering a TCA. The only aircraft without Mode C transponders would be nonelectrical and antique types. Costs to these types of aircraft operators have already been accounted for by the Mode C rule.

The FAA does not believe balloonists, parachutists, ultra-light and sailplane owners, or fixed-base operators would be significantly affected by the proposal. Letters of agreement and airspace cutouts are expected to be executed, where advisable, to provide a minimum effect on these operators.

Another cost component of the proposal would be the revision of aeronautical charts to reflect the change of the airspace around the Houston Intercontinental Airport (IAH) and the William P. Hobby Airport (HOU). The change would be incorporated during the routine updating and printing of the charts so that all costs associated with printing aeronautical charts are assumed to be a normal cost of doing business. However, the charts would need to be changed to depict the revised airspace configuration in the Houston TCA. This would require changes to the plates used to print the charts which would depict the modified Houston TCA. These charts include the Sectional, Terminal Area, En Route Low Altitude, En Route Area, and VFR Flyway Charts. The National Oceanic Service, the agency responsible for the publication and distribution of aeronautical charts, estimates the total one-time discounted costs (10 percent, 1 year) of these maps to be $55,000.

Benefits

The proposal is expected to generate potential benefits primarily in the form of enhanced safety to the aviation community and the flying public. Enhanced safety would take the form of reduced aviation fatalities and property damage as a result of a lowered likelihood of midair collisions due to increased positive control in the airspace to be established as the Houston TCA. Other benefits would be expected to accrue in the form of improved operational efficiency of FAA air traffic controllers.

Since deregulation of the airline industry in 1978, passenger enplanements have greatly increased. This has led to large increases in aircraft operations, particularly for part 121 (Large Transport Category) aircraft. As a result of this traffic density, the risk of potential midair collisions has also increased. Since 1978, the FAA has implemented additional regulatory initiatives aimed primarily at mitigating this potential safety problem. These initiatives have included modification of selected TCAs and the conversion of Terminal Radar Service Areas (TRSAs) into ARSAs. Most recently, the FAA has implemented rules expanding Mode C requirements and mandating TCAS on certain aircraft. All of these regulatory actions are aimed at enhancing aviation safety by lowering the likelihood of midair collisions. As a continuation of this effort to enhance aviation safety, the FAA announced in 1987 the proposed conversion of nine ARSAs into TCAs. The proposed establishment of TCA airspace at Houston-Hobby represents one of these TCA initiatives.

The proposed rule is expected to increase benefits in terms of enhanced safety. This point can be illustrated with the use of statistical models based on actual and projected critical near midair collision (CNMAC) incidents in lieu of actual midair collisions. Since midair collisions involving part 135 aircraft and especially part 121 aircraft are rare, the use of CNMACs will serve to illustrate the potential improvements in aviation safety of implementing the proposal. The regression analysis used in this evaluation focused on CNMACs and aircraft operations in 23 TCAs and a random sample of 23 of the 79 ARSAs that existed in 1986 (based on CNMAC data for 1986 and 1987). The results of this analysis indicate that TCAs have approximately 68 percent fewer CNMACs annually, on average, than ARSAs. This lower CNMAC rate suggests more efficient separation of aircraft in congested areas.

As the result of these findings, if the ARSA at HOU remained intact and the Mode C and TCAS rules were not in effect, the HOU Terminal Area would be expected to experience an average of 1.8 CNMACs annually or 25 CNMACs over the next 15 years. However, if the ARSA becomes a TCA, this figure is expected to reduce to an average of 0.5 CNMACs annually or 8 CNMACs over the next 15 years. Thus, over the next 15 years, the proposal could result in the reduction of 17 (25–8) CNMACs.

It is important to note that most of these potential CNMACs would not occur as predicted because the Mode C and TCAS rules are in effect and HOU already lies within the current Houston TCA Mode C veil. Subsequently, the safety benefits of the proposal and the Mode C and TCAS rules are inseparable and cannot be estimated independently from each other. The Mode C and TCAS rules are expected to generate total potential safety benefits of $2,129 million (discounted, 15 years).

Another potential benefit of the proposal would be improved operational efficiency of air traffic controllers. Under the proposal, the Mode C transponder requirement would ease controller workload per controlled aircraft because of the reduction in radio communications. It also would make potential traffic conflicts more readily apparent to the controller. Because of improved operational efficiency, the impact of controller workload would be somewhat offset by the controller's ability to adjust the volume of VFR traffic in any given portion of the TCA. There would be other types of benefits made possible by the additional ATC personnel in the form of significant reductions in the number of VFR aircraft requests denied and VFR aircraft delayed during busy periods. Therefore, the potential benefits of improved operational efficiency, which are difficult to quantify in monetary terms in this evaluation, would also be attributed to this proposed rule.

The proposed modification would alter the current Houston TCA in two ways. First, the proposal would convert the ARSA at HOU into TCA airspace. The benefits associated with converting the ARSA were discussed above. Second, the proposal would expand the TCA airspace currently around IAH by raising the ceiling over IAH from 7,000 feet MSL to 10,000 feet MSL and by extending the outer boundary to 30 nautical miles. This proposed expansion of TCA airspace around IAH would yield potential benefits in the way of a lowered likelihood of CNMACs and efficiency gains for ATC, especially in light of the increasing number of aircraft operations and passenger enplanements at IAH. However, because a TCA is already established around IAH, the FAA contends that the proposed expansion of TCA airspace around IAH would not reduce CNMACs to the extent the conversion of the ARSA at HOU would.

Comparison of Benefits and Costs

The total cost to implement the proposed Houston TCA is estimated to be $1.1 million (discounted, 15 years). The potential safety benefits of the rule would be the lowered likelihood of midair collisions from the proposed conversion of the present Houston ARSA to a TCA. The precise number of midair collisions avoided and their respective monetary values cannot be estimated independent of the Mode C and TCAS rules. However, the FAA contends that even if the Mode C and TCAS rules were not in effect, the estimated cost of the proposed TCA, relative to the reduction in the likelihood of midair collisions and the improved operational efficiency of ATC, makes the proposal cost-beneficial. In addition, even when the potential cost of the proposed TCA is added to the costs of other TCAs and ARSAs (only those established since phase I of Mode C) plus the costs of the Mode C and TCAS rules, the total collective costs, $314.8 million, are still less than the total collective benefits, $2,129 million.

Initial Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted to ensure that small entities are not unnecessarily and disproportionately burdened by Government regulations. The RFA requires agencies to review rules that may have "a significant economic impact on a substantial number of small entities." As stated in the Cost section of this evaluation, the proposal would have no monetary impact on the aviation public and, therefore, it would have no cost impact on small entities. Thus, a regulatory flexibility analysis is not required.

International Trade Impact Assessment

The proposed rule would only affect U.S. terminal airspace operating procedures at and in the vicinity of the Houston TCA. The proposed rule would not impose a competitive trade advantage or disadvantage on foreign firms in the sale of aviation products or services in the United States. In addition, domestic firms would not incur a competitive trade advantage or disadvantage in the sale of United States aviation products or services in foreign countries.

Federalism Implications

This proposed regulation would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, preparation of a Federalism assessment is not warranted.

VOL 56 ISS 115 JE 14 1991 UMI

Conclusion

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation is not major under Executive Order 12291 and is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). It is certified that this proposal, if adopted, would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 14 CFR Parts 71 and 91

Aircraft, Airport radar service areas, Air traffic control, Automatic altitude reporting equipment, Aviation safety, Mode C veil, Terminal control areas, Transponder.

The Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend parts 71 and 91 of the Federal Aviation Regulations (14 CFR parts 71 and 91) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.401(b) [Amended]

2. § 71.401(b) is amended by revising the Houston, TX, description to read as follows:

Houston, TX [Revised]

Primary Airports

Houston Intercontinental Airport (lat. 29°58'49"N., long. 95°20'22"W.)
William P. Hobby Airport (lat. 29°38'43"N., long. 95°16'43"W.)
Humble VORTAC (IAH) (lat. 29°57'24"N., long 95°20'44"W.)
Hobby VOR/DME (HUB) (lat. 29°39'00"N., long. 95°16'44"W.).

Boundaries

Area A. That airspace extending upward from the surface to and including 10,000 feet MSL bounded by a line beginning at lat. 29°49'24"N., long. 95°13'49"W.; to lat. 29°49'30"N., long. 95°27'49"W., thence clockwise along the Humble VORTAC(IAH) 10-mile DME arc to the point of beginning; and that airspace bounded by a line beginning at lat. 29°45'36"N., long. 95°21'57"W.; to lat. 29°45'45"N., long. 95°11'46"W.; thence clockwise along the Hobby VOR/DME (HUB) 8-mile DME arc to lat. 29°31'40"N., long. 95°13'00"W.; to lat. 29°33'30"N., long. 95°13'56"W. (HUB 156°T(150°M)); thence clockwise along the HUB VOR/DME 6-mile arc to lat. 29°33'51"N., long. 95°20'16"W.; to lat. 29°32'07"N., long. 95°21'27"W. (HUB 211°T(205°M)), thence clockwise along the HUB VOR/DME 8-mile arc to the point of beginning.

Area B. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL bounded by a line beginning at the intersection of State Highway 59 and the HUB VOR/DME 15-mile arc (lat. 29°39'09"N., long. 95°33'51"W.), thence counterclockwise along the HUB VOR/DME 15-mile arc to the intersection of HUB VOR/DME 15-mile arc and the IAH VORTAC 15-mile arc, thence counterclockwise along the IAH VORTAC 15-mile arc to the intersection of the IAH VORTAC 15-mile arc and Westheimer Road (lat. 29°44'06"N., long. 95°28'46"W.), thence southwest to and along State Highway 59 to the point of beginning excluding Area A.

Area C. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL bounded by a line beginning at the intersection of State Highway 59 and the IAH VORTAC 20-mile DME arc (lat. 29°40'21"N., long. 95°32'34"W.), thence clockwise along the IAH VORTAC 20-mile DME arc to the intersection of the IAH VORTAC 20-mile DME arc and Interstate 10 (lat. 29°46'00"N., long. 95°00'37"W.), west on Interstate 10 to the HUB VOR/DME 15-mile arc (lat. 29°47'37"N., long. 95°02'36"W.), thence counterclockwise along the HUB VOR/DME 15-mile arc to the IAH VORTAC 15-mile DME arc (lat. 29°50'23"N., long. 95°05'28"W.), thence counterclockwise along the IAH VORTAC 15-mile DME arc to the intersection of the IAH VORTAC 15-mile DME arc and Westheimer Road (lat. 29°44'06"N., long. 95°28'46"W.), thence southwest to and along State Highway 59 to the point of beginning; and that airspace bounded by a line beginning at lat. 29°25'16"N., long. 95°09'44"W.; to lat. 29°29'50"N., long. 95°12'04"W., thence clockwise along the HUB VOR/DME 10-mile arc to lat. 29°30'24"N., long. 95°22'38"W.; to lat. 29°26'06"N., long. 95°25'34"W., thence counterclockwise along the HUB VOR/DME 15-mile arc to the point of beginning.

Area D. That airspace extending upward from 4,000 feet MSL to and including 10,000 feet MSL bounded by a line beginning at the intersection of State Highway 59 and the IAH VORTAC 30-mile DME arc (lat. 29°33'34"N., long. 95°41'20"W.), thence clockwise along the IAH VORTAC 30-mile DME arc to Interstate 10 (lat. 29°46'55"N., long. 94°47'35"W.), west along Interstate 10 to the HUB VOR/DME 20-mile arc (lat. 29°48'40"N., long. 94°56'52"W.), thence clockwise along the HUB VOR/DME 20-mile arc to State Highway 59 (lat. 29°34'36"N., long. 95°36'57"W.), thence southwest on State Highway 59 to the point of beginning excluding Areas A, B, and C.

§ 71.501 [Amended]

3. § 71.501 is amended by removing the Houston William P. Hobby, TX, description.

Houston William P. Hobby, TX
[Removed]

PART 91—GENERAL OPERATING AND FLIGHT RULES

4. The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 (as amended by Pub. L. 100-223), 1422 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 Stat. 1180); 42 U.S.C. 4321 et seq.; E.O. 11514; Pub. L. 100-202; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

5. SFAR No. 62—Suspension of Certain Aircraft Operations from the Transponder with Automatic Pressure Altitude Reporting Capability Requirement [Amended].

SFAR No. 62, Sec. 2., paragraph (10) would be revised as follows:

(10) Airports within a 30-nautical-mile radius of the Houston Intercontinental Airport and the William P. Hobby Airport.

Airport name	Arpt ID	Alt. (AGL)
Ainsworth Airport, Cleveland, TX.	0T6	1,200
Ausinia Ranch Airport, Texas City, TX.	TS50	1,200
Bailes Airport, Angleton, TX	7R9	1,200
Biggin Hill Airport, Hockley, TX	TX49	1,200
Cleveland Municipal Airport, Cleveland, TX.	6R3	1,200
Covey Trails Airport, Fulshear, TX.	80XS	1,200
Cressy Airport, Santa Fe, TX	5TA5	1,200
Custom Aire Service Airport, Angleton, TX.	81D	1,200

Part IX

Department of Education

Educational Research Grant Program: Dissemination of Educational Research; Applications for New Awards; Notice

VOL 56 ISS 115 JE 14 1991 UMI

DEPARTMENT OF EDUCATION

[CFDA No.: 84.117L]

Educational Research Grant Program: Dissemination of Educational Research; Applications for New Awards for Fiscal Year (FY) 1991.

Note to Applicants: This notice is a complete application package. Together with the statute authorizing the program, the regulations for the Educational Research Grant Program (ERGP), and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application forms, and instructions needed to apply for a cooperative agreement under this competition.

Purpose of Program: The Educational Research Grant Program (ERGP) supports scientific inquiry designed to advance educational theory and practice.

Eligible Applicants: The following are eligible for awards under the Educational Research Grant Programs: (a) Institutions of higher education; (b) Public and private organizations, institutions, and agencies; and (c) Individuals.

Supplementary Information: In 1990 the President and the Governors of the United States agreed upon the following six National Education Goals:

Goal 1—Readiness for School—By the year 2000, all children in America will start school ready to learn.

Goal 2—High School Completion—By the year 2000, the high school graduation rate will increase to at least 90 percent.

Goal 3—Student Achievement and Citizenship—By the year 2000, American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy.

Goal 4—Science and Mathematics—By the year 2000, U.S. students will be first in the world in science and mathematics achievement.

Goal 5—Adult Literacy and Lifelong Learning—By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

Goal 6—Safe, Disciplined, and Drug-Free Schools—By the year 2000, every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

What we have learned from research and effective practice about ways to achieve the National Education Goals can be made available to teachers, parents, and the general public in clear and useful ways without sacrificing accuracy or validity. Making this information available to the more than 2.5 million teachers, to the more than 110,000 principals, to the more than 92,000 school board members, and to the parents of more than 45 million school-aged children is a key first step in moving the country toward achieving the National Education Goals.

Deadline for Transmittal of Applications: August 9, 1991.

Available Funds: $2,000,000.

Estimated Range of Awards: $400,000—$1,000,000.

Estimated Number of Awards: 2 to 5.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 12 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), part 75 (Direct Grant Programs), part 77 (Definitions that Apply to Department Regulations), part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), part 81 (General Education Provisions Act—Enforcement), part 82 (New Restrictions on Lobbying), part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), part 86 (Drug-Free Schools and Campuses); and (b) The regulations for this program in 34 CFR part 700.

Eligible Activity: Under 34 CFR 700.3(a) and (b), the Secretary restricts applications under this competition to those proposing the following activity: Dissemination of educational research. Only applications proposing to conduct this activity will be considered under this competition.

Invitational Priority: Under 34 CFR 75.105(c)(1) the Secretary is particularly interested in supporting projects that meet the following invitational priority. However, an application that meets this invitational priority does not receive competitive or absolute preference over other applications.

The Secretary particularly invites applications for projects that would develop innovative, high-quality videotapes and supplementary materials, including users' guides, that disseminate information about strategies that will move the country toward achieving each of the National Education Goals.

The Secretary encourages the development of videotapes that are directed toward teachers, parents, and the general public. The content of the videotapes and supplementary materials must be based upon appropriate research findings and effective practices.

The Secretary is particularly interested in projects that include mechanisms for review to ensure that the information provided in the products and supplementary materials is useful to the intended audiences and based on valid research and effective practice. This quality control and review process should permit evaluation of the product by the Department at a number of stages in the development and production process.

In addition to supporting the production of videotapes and supplementary materials, the Secretary anticipates supporting grantee dissemination of some of the videotapes funded under this competition. The Secretary intends to disseminate some videotapes directly. Therefore, the Secretary is particularly interested in projects that include innovative dissemination plans.

Special Concerns Related to the Production of Audio-Visual Materials: The production of audio-visual materials under a cooperative agreement raises certain issues related to copyright, rights and releases from talent and other contributors, commercialization, and close-captioning. The Secretary retains complete discretion to establish the terms and conditions of the cooperative agreement in these areas, but provides for the guidance of applicants the following discussion of how the Secretary intends to handle these issues.

Copyright: The Department is concerned that materials produced under the cooperative agreement receive the widest possible distribution. The Department foresees permitting two copyright options calculated to promote broad distribution of the materials by the grantee directly or by others at the discretion of the Department.

To facilitate a broad distribution of materials produced under the cooperative agreement, the Department foresees permitting the grantee to copyright the materials and assigning, by acceptance of funding under the cooperative agreement, copyright to the Department for a term of ten years in all copyrightable materials produced by the grantee under the cooperative agreement. Such assignment to the Department, inasmuch as it would be based upon the grantee's acceptance of the terms and conditions of the cooperative agreement, would be automatic and would require no further documentation by the grantee.

Alternatively, the Department foresees permitting the grantee to copyright the materials and provide to the Department (by no later than the end of the project period) a license for a term of ten years in all copyrightable material produced under the cooperative agreement. The license would be coterminous in every respect with the grantee's copyright sufficient to permit the Department, among other things, to distribute, reproduce, exhibit, or otherwise use, and allow others to so use, the materials produced under the cooperative agreement in furtherance of the dissemination objectives of this competition. The Department expects that materials developed under the cooperative agreement would be first produced under the agreement. If the materials contain other copyrighted materials, the Department expects that the grantee would secure releases, licenses or permission to permit non-infringing use of such materials by the Government or others at any time in the future, and provide the Department with evidence of those releases by no later than the end of the project period.

Under either alternative described above, the grantee could claim initial copyright in materials produced under the cooperative agreement.

Rights and Releases: The Department is also concerned about obtaining from the grantee, as necessary, such releases from talent and other contributors to the materials developed under the cooperative agreement as shall be necessary to permit authorized and non-infringing worldwide performance and exhibition rights without payment of further compensation to any party. It is anticipated that the grantee would provide satisfactory evidence of such rights and releases to the Department by no later than the end of the cooperative agreement period.

These rights and releases should at a minimum include releases from all persons recognizably photographed, recorded or otherwise depicted in audio-visual materials produced in the cooperative agreement, including, if necessary, releases from parents or guardians of minor children; worldwide music and exhibition rights; and the right to translate performers' dialogue into foreign languages and other means of communication.

Commercialization: The Department is further concerned that audio-visual materials produced under the cooperative agreement refrain from commercialization through the implied or actual endorsement of products or services that are photographed or otherwise portrayed in such a way as to be identifiable by the viewer.

Close-captioning: The Department expects that videotapes produced under this competition be close-captioned for the hearing impaired.

Selection Criteria: (a)(1) In evaluating applications for new cooperative agreements under this competition, the Secretary uses the selection criteria in 34 CFR 700.22, which are listed in paragraph (b) of this section.

(2) The program regulations in 34 CFR 700.20(b)(2) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 25 points distributed in accordance with 34 CFR 700.20(b)(4).

(3) For this competition the Secretary distributes the 25 points as follows:

(i) Significance (34 CFR 700.22(f)). Ten points are added to this criterion for a total of 25 points.

(ii) Commitment and capacity (34 CFR 700.22(h)). Fifteen points are added to this criterion for a total of 15 points.

(4) The maximum score for each criterion is indicated in parentheses.

(b)(1) *Plan of operation* (10 points). The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(i) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(ii) The quality of the applicant's plans to use its resources and personnel to achieve each objective of the project; and

(iii) The extent to which the applicant will equitably address the educational needs of students and educators in both public and private educational institutions.

(2) *Quality of key personnel* (20 points).

(i) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(A) The qualifications of the principal investigator;

(B) The qualifications of each of the other key personnel to be used in the project;

(C) The time that each person referred to in paragraphs (b)(2)(i) (A) and (B) will commit to the project; and

(D) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(ii) To determine personnel qualifications under paragraphs (b)(2)(i) (A) and (B), the Secretary considers—

(A) Experience and training in fields related to the objectives of the project; and

(B) Any other qualifications that pertain to the quality of the project.

(3) *Budget and cost-effectiveness* (5 points). The Secretary reviews each application to determine the extent to which—

(i) The budget is adequate to support the project; and

(ii) Costs are reasonable in relation to the objectives, design, and potential significance of the project.

(4) *Evaluation plan* (5 points). The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(i) Are appropriate to the project; and

(ii) To the extent possible, are objective and produce data that are quantifiable.

(5) *Adequacy of resources* (5 points). The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(6) *Significance* (25 points).

(i) The Secretary reviews each application to determine the significance of the proposed project.

(ii) The Secretary determines the project's potential to make a significant contribution to American education, as measured by factors such as—

(A) Importance of the proposed project from the standpoint of basic knowledge or of problems in American education;

(B) The likely magnitude of the addition that will be made to knowledge or educational practices if the project is successful, including the extent to which the proposed outcomes can be broadly applied;

(C) The extent to which the project involves creative or innovative approaches that complement or are alternatives to existing approaches to the project's problem area; and

(D) The extent to which the project is designed to yield products and outcomes that can be disseminated and utilized in other settings, such as information, materials, processes, or techniques.

(7) *Technical soundness* (15 points).

VOL 56 ISS 115 JE 14 1991 UMI

(ii) The Secretary reviews each application to determine the technical soundness of the proposed activities.

(iii) The Secretary determines—

(A) The adequacy of the project's design, methodology, instrumentation, and data analysis plan, as applicable;

(B) The extent to which the application exhibits a thorough knowledge of current research and development concepts, theories, and outcomes and relates these to the proposed activity; and

(C) The extent to which, where appropriate, the perspectives of a variety of disciplines are used.

(8) *Applicant's commitment and capacity* (15 points). The Secretary determines the extent of the applicant's commitment to the project, its capacity to continue the project, and the likelihood that it will build upon the project when Federal assistance ends.

Instructions for Transmittal of Applications

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and two copies of the application on or before the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA #84.117–L), Washington, DC 20202–4725, or

(2) Hand deliver the original and two copies of the application by 4:30 p.m. (Washington, DC time) on the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA #84.117–L), Room #3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If an application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes: (1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) The Application Control Center will mail a Grant Application Receipt Acknowledgment to each applicant. If an applicant fails to receive the notification of application receipt within 15 days from the date of mailing the application, the applicant should call the U.S. Department of Education Application Control Center at (202) 708–9494.

(3) The applicant *must* indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and suffix letter, if any—of the competition under which the application is being submitted.

Application Instructions and Forms

The appendix to this application is divided into three parts plus a statement regarding estimated public reporting burden and various assurances and certifications. These parts and additional materials are organized in the same manner that the submitted application should be organized. The parts and additional materials are as follows:

Part I: Application for Federal Assistance (Standard Form 424 (Rev. 4–88)) and instructions.

Part II: Budget Information—Non-Construction Programs (Standard Form 424A) and instructions.

Part III: Application Narrative.

Additional Materials

Estimated Public Reporting Burden.

Assurances—Non-Construction Programs (Standard Form 424B).

Certifications regarding Lobbying; Debarment, Suspension, and Other Responsibility Matters; and Drug-Free Workplace Requirements (ED 80–0013).

Certification regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion: Lower Tier Covered Transactions (ED 80–0014, 9/90) and instructions. (Note: ED 80–0014 is intended for the use of grantees and should not be transmitted to the Department.)

Disclosure of Lobbying Activities (Standard Form LLL) (if applicable) and instructions; and Disclosure of Lobbying Activities Continuation Sheet (Standard Form LLL–A).

An applicant may submit information on a photostatic copy of the application and budget forms, the assurances, and the certifications. However, the application form, the assurances, and the certifications must each have an original signature. No grant may be awarded unless a completed application form has been received.

For further information contact: Dr. Robert Stonehill, U.S. Department of Education, 555 New Jersey Avenue, NW., room 610 Capitol Place, Washington, DC 20208–5646. Telephone: 202–219–2089. FAX: 202–219–1817. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC area code, telephone 703–9360) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1221e.

Dated: June 12, 1991.

Bruno V. Manno,

Acting Assistant Secretary, Educational Research and Improvement.

Standard Form 424 (REV. 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item:	Entry:
1	Self-explanatory.
2.	Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3.	State use only (if applicable).
4.	If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5.	Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6.	Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7.	Enter the appropriate letter in the space provided.
8.	Check appropriate box and enter appropriate letter(s) in the space(s) provided: — "New" means a new assistance award. — "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date. — "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9	Name of Federal agency from which assistance is being requested with this application.
10.	Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11.	Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12.	List only the largest political entities affected (e.g., State, counties, cities).
13.	Self-explanatory.
14.	List the applicant's Congressional District and any District(s) affected by the program or project.
15.	Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16.	Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17.	This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18.	To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

INSTRUCTIONS FOR THE SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary
Lines 1-4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1-4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 — Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i — Show the totals of Lines 6a to 6h in each column.

Line 6j – Show the amount of indirect cost.

Line 6k – Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

INSTRUCTIONS FOR THE SF-424A (continued)

Line 7 – Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8-11 – Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) – Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) – Enter the contribution to be made by the applicant.

Column (c) – Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) – Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) – Enter totals of Columns (b), (c), and (d).

Line 12 — Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 – Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 – Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 – Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16 - 19 – Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 – Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 – Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 – Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 – Provide any other explanations or comments deemed necessary.

BILLING CODE 4000-01-C

Part III—Application Narrative

A. *Application Instructions for new awards:*

1. Information on who is eligible to apply for a cooperative grant award can be found in section 700.2 of the Final Regulations for the program.

2. In order to be considered for funding you must submit an *original* and two copies (and *in order to expedite the review and award process, it is strongly suggested that you voluntarily submit three additional copies*).

B. *Instructions for proposal narrative:*

1. Research Priorities

Applicants are invited to address the priority published in the **Federal Register** Notice Inviting Applications contained in this application package.

2. Proposal Narrative

a. Applicants must provide a proposal narrative not to exceed 80–100 double spaced typed pages (normal sized type, no smaller than 10 point pica). The narrative must address each of the following criteria contained in 34 CFR 700.22:

(1) Plan of operation
(2) Quality of key personnel
(3) Budget and cost-effectiveness
(4) Evaluation plan
(5) Adequacy of resources
(6) Significance
(7) Technical soundness

Under the discussion of technical soundness, applicants should describe in detail and justify the procedures that will be used to carry out the proposed work.

b. Applicants are encouraged to provide a summary of the program project (not to exceed 500 words).

3. Budget Information

Applicants must provide a detailed budget for each project and activity to support the request in the budget information form (SF 424A). The cost categories for the detailed budget for each project must be consistent with the cost categories in the summary budget information form. (Instructions are included.)

Provide (at line 21 and attached sheets) a breakdown detailing individual units or activities and amount for each "object class category." For example, for "personnel," show salaries and wages for each staff member by position or name; for "contractual," show consultants, sub-contractual services, materials.

4. Technical Assistance

Any questions regarding a competition should be addressed to the contact person named in the notice inviting applications contained in this package.

5. Reporting Requirements

Each applicant should consider reporting requirements in developing the plan of operation. Performance of financial reports are required at the completion of each project period. Additional guidance will be given prior to the time that the cooperative agreement is awarded.

Instructions for Estimated Public Reporting Burden

Under terms of the Paperwork Reduction Act of 1980, as amended, and the regulations implementing that Act, the Department of Education invites comment on the public reporting burden in this collection of information. Public reporting burden for this collection of information is estimated to average 27 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. You may send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202–4651; and to the Office of Management and Budget, Paperwork Reduction Project 1850–0651, Washington, DC 20503.

(Information collection approved under OMB control number 1850–0651. Expiration date: November 30, 1993.)

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

SIGNATURE OF AUTHORIZED CERTIFYING OFFICIAL	TITLE
APPLICANT ORGANIZATION	**DATE SUBMITTED**

VOL 56 ISS 115 JE 14 1991 UMI

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 --

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 --

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about--

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will--

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office

Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted--

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

_____

_____

_____

Check ☐ if there are workplaces on file that are not identified here.

DRUG-FREE WORKPLACE (GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 --

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

As the duly authorized representative of the applicant, I hereby certify that the applicant will comply with the above certifications.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.
8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).
11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.
12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.
13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.
14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.
15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.
16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

Title 3—

The President

Proclamation 6305 of June 12, 1991

Pediatric AIDS Awareness Week, 1991

By the President of the United States of America

A Proclamation

Acquired Immune Deficiency Syndrome (AIDS) is always tragic, but especially so among children. According to the U.S. Department of Health and Human Services, 2,800 cases of pediatric AIDS have been reported in this country since 1982. That figure is expected to rise to between 6,000 and 20,000 in the next few years. AIDS is already the ninth leading cause of death among children between the ages of one and four, and it is expected that, during the 1990s, the disease will become an even more significant cause of death among children.

Women who are infected with the human immuno-deficiency (HIV) virus can transmit the virus to their infants during pregnancy or at birth. Currently, about 84 percent of the AIDS cases in children result from perinatal transmission. The outlook for HIV-infected babies is grim. Almost half of these children develop AIDS in their first year, and nearly 70 percent develop AIDS by the end of their second year. The median survival time from diagnosis is 38 months, and it is only 6 months for babies who are diagnosed with AIDS in their first year of life. Moreover, a disproportionate number of HIV-infected mothers are black or Hispanic, poor, or residents of the inner city; many of them will not survive to care for their babies.

As part of their overall fight against AIDS, researchers at the National Institutes of Health are studying ways to prevent transmission of the HIV virus from mother to infant. They are also investigating ways to diagnose the infection in babies at the earliest possible moment. The Federal Government and many private organizations throughout the United States are also working diligently to educate the public about AIDS and to discourage the behaviors that can put parents and their children at risk.

To enhance public awareness of pediatric AIDS, the Congress, by House Joint Resolution 91, has designated the week of June 10 through June 16, 1991, as "Pediatric AIDS Awareness Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby designate the week of June 10 through June 16, 1991, as Pediatric AIDS Awareness Week. I call upon health organizations, the communications media, and the people of the United States to observe this week with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of June, in the year of our Lord nineteen hundred and ninety-one, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

LIST OF PUBLIC LAWS

Last List June 12, 1991

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–275–3030).

H.R. 831/Pub. L. 102–53

To designate the Owens Finance Station of the United States Postal Service in Cleveland, Ohio, as the "Jesse Owens Building of the United States Postal Service". (June 10, 1991; 105 Stat. 266; 1 page) Price: $1.00

Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 196 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued.

Microfiche Subscription Prices:

Federal Register:

One year: $195
Six months: $97.50

Code of Federal Regulations:

Current year (as issued): $188

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: July 2, at 9:00 am
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC

Rules and Regulations

Federal Register
Vol. 56, No. 116
Monday, June 17, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 90-NM-274-AD; Amdt. 39-7042; AD 91-13-11]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which currently requires the installation of protective sleeves on wire breakouts and oxygen lines in the upper deck left sidewall. This condition, if not corrected, could result in chafing of wires, which could arc and possibly burn through an adjacent oxygen line; this could create a fire hazard should the oxygen line be pressurized. This action adds additional airplanes to the applicability of the rule. This amendment is prompted by a report that several additional airplanes may be affected by the same unsafe condition that prompted the existing AD.

EFFECTIVE DATE: July 22, 1991.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. David M. Herron, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S; telephone (206) 227-2672. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 89-21-07, Amendment 39-6343 (54 FR 40635, October 3, 1989), applicable to certain Boeing Model 747 series airplanes, to require the installation of protective sleeves on wire breakouts and oxygen lines in the upper deck left sidewall, was published in the Federal Register on January 28, 1991 (56 FR 3052).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two comments were received. Both commenters supported the amendment.

One of the commenters noted that the amendment will affect two U.S.-registered airplanes. The preamble to the Notice indicated that no additional U.S.-registered airplanes would be affected. The FAA concurs and has revised the economic analysis paragraph, below, to reflect this.

The economic analysis paragraph has also been revised to increase the specified hourly rate from $40 per manhour (as was cited in the preamble to the Notice) to $55 per manhour. The FAA has determined that it is necessary to increase this rate used in calculating the cost impact associated with AD activity to account for various inflationary costs in the airline industry.

Paragraph C. of the final rule has been revised to specify current procedure for submitting requests for approval of alternative methods of compliance.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither significantly increase the economic burden on any operator nor increase the scope of the rule.

There are approximately 127 Model 747 series airplanes of the affected design in the worldwide fleet. It is estimated that 5 airplanes of U.S. registry, including the additional 2 airplanes addressed in this action, will be affected by this AD. It is estimated that approximately 6 manhours per airplane will be needed to accomplish the required actions, and that the average labor cost will be $55 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,650; the total cost impact of this action, relative to the 2 U.S.-registered airplanes added to the applicability of the rule, is estimated to be $660.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1422; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39-6343 and by adding the following new airworthiness directive:

VOL 56 ISS 116 JE 17 1991 UMI

91-13-11. Boeing: Amendment 39-7042. Docket No. 90-NM-274-AD. Supersedes AD 89-21-07.

Applicability: Model 767 series airplanes, listed in Boeing Service Bulletin 747-35-2059, Revision 2, dated March 22, 1990, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent chafing of wire bundles, subsequent arcing and burn-through of adjacent oxygen lines, and a resulting potential fire hazard, accomplish the following:

A. For airplanes listed in Boeing Service Bulletin 747-35-2059, dated August 17, 1989: Within 60 days after October 16, 1989 (the effective date of Amendment 39-6343, AD 89-21-07), install protective sleeves on wire breakouts and oxygen lines in the upper deck left sidewall in accordance with Boeing Service Bulletin 747-35-2059, dated August 11, 1989; Revision 1, dated November 22, 1989; or Revision 2, dated March 22, 1990.

B. For airplanes listed in Boeing Service Bulletin 747-35-2059, Revision 2, dated March 22, 1990, that are not subject to paragraph A. of this AD: Within 60 days after the effective date of this amendment, install protective sleeves on wire breakouts and oxygen lines in the upper deck left sidewall in accordance with Boeing Service Bulletin 747-35-2059, Revision 2, dated March 22, 1990.

C. An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

This amendment supersedes Amendment 39-6343, AD 89-21-07.

This amendment (39-7042, AD 91-13-11) becomes effective July 22, 1991.

Issued in Renton, Washington, on June 5, 1991.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 91-14302 Filed 6-14-91; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-32-AD; Amdt. 39-7039; AD 91-13-08]

Airworthiness Directives; Israel Aircraft Industries (IAI) Models 1121, 1121A, 1121B, 1123, 1124, and 1124A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Israel Aircraft Industries (IAI) Models 1121, 1121A, 1121B, 1123, 1124, and 1124A series airplanes, which requires the removal of a towing instruction placard and the installation of a new placard. This amendment is prompted by a report of a nose gear-up landing due to landing gear actuating system damage that jammed the nose gear in the retracted position. This condition, if not corrected, could result in the inability to extend the nose landing gear for landing.

EFFECTIVE DATE: July 22, 1991.

ADDRESSES: The applicable service information may be obtained from Astra Jet Corporation, Technical Publications, 77 McCullough Drive, Suite 11, New Castle, Delaware 19720. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM-113; telephone (206) 227-2145. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include a new airworthiness directive, applicable to all Israel Aircraft Industries (IAI) Models 1121, 1121A, 1121B, 1123, 1124, and 1124A series airplanes, which requires the removal of a towing instruction placard and the installation of a new placard, was published in the Federal Register on March 14, 1991 (56 FR 10840).

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the proposal.

Paragraph B. of the final rule has been revised to specify the current procedure for submitting requests for approval of alternative methods of compliance.

The economic analysis paragraph, below, has been revised to increase the specified hourly labor rate from $80 per manhour (as was cited in the preamble to the Notice) to $55 per manhour. The FAA has determined that it is necessary to increase this rate used in calculating the cost impact associated with AD activity to account for various inflationary costs in the airline industry.

After careful review of the available data, the FAA has determined that air safety and the public interest required the adoption of the rule as proposed with the changes previously described. The FAA has determined that these changes will neither significantly increase the economic burden on any operator, nor increase the scope of the AD.

It is estimated that 316 airplanes of U.S. registry will be affected by this AD, that it will take approximately 0.5 manhour per airplane to accomplish the required actions, and that the average labor cost will be $55 per manhour. The estimated cost for required placards is $7 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $10,902.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this acting (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

91-13-08. Israel Aircraft Industries (IAI): Amendment 39-7039. Docket No. 91-NM-32-AD.

Applicability: Models 1121, 1121A, 1121B, 1123, 1124, and 1124A series airplanes, certificated in any category.

Compliance: Required within 60 days after the effective date of this AD, unless previously accomplished.

To prevent the inability to extend the nose landing gear for landing, accomplish the following:

A. Remove the existing towing instruction placard and install a new placard in accordance with the applicable service bulletin, as follows:

Airplane models	Service bulletin
1121, 1121A, 1121B.	1121-11-015, dated November 28, 1990.
1123	1123-11-031, dated November 26, 1990.
1124 and 1124A	1124-11-103, dated November 26, 1990.

B. An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Astra Jet Corporation, Technical Publications, 77 McCullough Drive, Suite 11, New Castle, Delaware 19720. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

This amendment (39-7039, AD 91-13-08) becomes effective July 22, 1991.

Issued in Renton, Washington, on June 4, 1991.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 91-14301 Filed 6-14-91; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 26585; Amdt. No. 1454]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these

VOL 56 ISS 116 JE 17 1991 UMI

SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard Instrument, Incorporation by reference.

Issued in Washington, DC, on June 7, 1991.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 g.m.t. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Part 203

[Docket No. R-91-1466; FR-2713-F-02]

RIN 2502-AE94

Mutual Mortgage Insurance and Rehabilitation Loans—Waiver of Seven Unit Rule for Certain Rehabilitation Loans

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule removes the "seven-unit" requirement of 24 CFR 203.42, in certain circumstances. Generally, under § 203.42 a property cannot be insured under the Single Family Mortgage Insurance program if a mortgagor has a financial interest in more than seven other units in projects, subdivisions or other rental properties close in proximity. This amendment exempts mortgagors of single-family properties insured under the section 203(k) rehabilitation loan program in

circumstances where State or local governments have targeted a specific area or neighborhood for redevelopment and have committed "substantial" efforts to this end. The purpose of this rule is to encourage and facilitate rehabilitation activity in the targeted areas.

EFFECTIVE DATE: July 17, 1991.

FOR FURTHER INFORMATION CONTACT: Morris E. Carter, Director Single Family Development Office of Single Family Housing, Development of Housing and Urban Development, room 9272, 451 Seventh Street, SW. Washington, DC 20410-0500, (202) 708-2700. Hearing- or speech-impaired individuals may call the Office of Housing's TDD number (202) 708-4594. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Burden

The information collection requirements contained in this rule have been approved by the Office of Management and Budget under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), and assigned OMB control number 2502-0453.

Background

In enacting the National Housing Act (the Act), Congress provided the Department with the authority to insure, and make commitments to insure, rehabilitation loans made by financial institutions. In section 203(k) of the Act (12 U.S.C. 1709(k)), Congress defined "rehabilitation loans" as those made for the purpose of rehabilitating existing one- to four-family structures used primarily for residential purposes. The Department promulgated 24 CFR 203.50, which made rehabilitation loans eligible for insurance under the Single Family Mortgage Insurance program.

To prevent misuse of this program by leaders who may want to circumvent the requirements of the Multifamily Mortgage Insurance program, and to preclude insurance of a concentration of rental units for one investor, § 203.42 was promulgated. Section 203.42 had the effect of severely limiting the use of the section 203(k) insurance program because it limited mortgage insurance coverage to no more than seven units per mortgagor in a particular geographic area. (This limitation is commonly referred to as the "seven unit rule.") Since its inception ten years ago, only 7,000 mortgages have been insured under section 203(k).

The seven unit rule, as applied to rehabilitation loans, can limit expansion of affordable housing and home ownership opportunities. This runs counter to the Department's objective of increasing such opportunities. For this reason, the Department determined that changes were required to the rule. Several lenders and developers agreed that a successful rehabilitation program must include all, or nearly all, the vacant and deteriorated properties in a neighborhood. Since such an approach may include developers who have an interest in more than seven units, little is gained by applying the limitation of § 203.42 to rehabilitation loans.

Proposed Rule

On March 4, 1991 (56 FR 8941), the Department published, for public comment, a proposed rule that would permit increased use of section 203(k). The Department proposed to achieve this objective by expressingly exempting rehabilitation loans from the seven unit rule, provided that the loans are to be used for the rehabilitation of property located in a specific area or neighborhood targeted by a State or local government for redevelopment, in accordance with a specific program that involves substantial public or private commitments in support of the neighborhood redevelopment. Accordingly, the Department proposed to amend 24 CFR 203.42 to require a State or local government to submit a plan to the Department describing the program of neighborhood redevelopment, before the Department exempts a section 203(k) rehabilitation loan from the seven unit rule. The Department also proposed to revise and update the language of § 203.42.

By the end of the comment period on May 3, 1991, the Department had not received any comments on the March 4, 1991 proposed rule. The Department is adopting the proposed amendments to 24 CFR 203.42 without change.

Other Matters

Impact on Economy

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Impact on Small Entities

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule is limited to exempting certain rehabilitation loans from the multifamily mortgage insurance program requirements. Any entity, regardless of size, may benefit from this exemption.

Regulatory Agenda

This rule was listed as sequence number 1292 in the Department's Semiannual Agenda published on April 22, 1991 (56 FR 17360, 17386) under Executive Order 12291 and the Regulatory Flexibility Act.

Environmental Review

At the time of publication of the proposed rule, a Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The proposed rule is adopted by this final rule without change. Accordingly, the initial Finding of No Significant Impact remains applicable, and is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the office of the Rules Docket Clerk, Office of General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule do not have Federalism implications and, thus, are not subject to review under the Order. This rule is limited to exempting certain rehabilitation loans from the multifamily mortgage insurance program requirements. No programmatic or policy changes result from promulgation of this rule which would affect existing relationships between Federal, State or local governments.

Executive Order 12606, the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have a potential significant impact on family formation, maintenance, and general well-being, and, thus is not subject to review under the Order. No significant change in existing HUD policies or

VOL
56
ISS
116
JE
17
1991
UMI

programs will result from promulgation of this rule, as those policies and programs relate to family concerns.

(The Catalog of Federal Domestic Assistance Program Number is 14.108, Rehabilitation Mortgage Insurance)

List of Subjects in 24 CFR Part 203

Hawaiian Natives, Home improvement, Indians: lands, Loan programs—housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, Solar energy.

Accordingly, 24 CFR part 203 is amended as follows:

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

1. The authority citation for part 203 continues to read as follows:

Authority: Secs. 203, 211 of the National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). In addition, Subpart C is also issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

2. Section 203.42 is revised to read as follows:

§ 203.42 Rental properties.

(a) A mortgage on property upon which there is a dwelling to be rented by the mortgagor shall not be eligible for insurance if the property is a part of, or adjacent or contiguous to, a project, subdivision or group of similar rental properties in which the mortgagor has a financial interest in eight or more dwelling units.

(b) Paragraph (a) of this section shall not apply where:

(1) A mortgage qualifies as a rehabilitation loan under § 203.50 of this part;

(2) The mortgage is to be used for the rehabilitation of property located in a specific area or neighborhood that has been targeted by a State or local government for redevelopment, in accordance with a specific program that involves substantial public or private commitments in support of neighborhood improvement or redevelopment; and

(3) The State or local government has approved, and has submitted to the Commissioner a plan describing the program of neighborhood redevelopment and revitalization, including the geographic area targeted for redevelopment, and the nature and proportion of public or private commitments that have been made in support of the redevelopment program.

(c) No two-, three-, or four-family dwelling, and no single-family dwelling, if it is part of a group of five or more single-family dwellings held by the same mortgagor, or any part or unit thereof, shall be rented or offered for rent for transient or hotel purposes, as defined in § 203.16, so long as the dwelling is subject to any insured mortgage.

Dated: June 10, 1991.

Arthur J. Hill,

Assistant Secretary for Housing-Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7-91-41]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, FL

AGENCY: Coast Guard, DOT.

ACTION: Final rule—Revocation.

SUMMARY: This amendment revokes the regulations for the Dodge Island drawbridges, mile 1089.4, because a high-level fixed bridge has been completed for vehicular use at this same location. Notice and public procedures have been omitted for this action due to the alternative access available.

EFFECTIVE DATES: This rule becomes effective on June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Brodie Rich, (305) 536-4103.

Drafting Information: The drafters of this rule are Mr. Brodie E. Rich, project officer, and Lt. Genelle Tanos, project attorney.

SUPPLEMENTARY INFORMATION: This action has no economic consequences. It merely revokes regulations that are no longer needed to accommodate the needs of vehicular traffic. Consequently, this action is considered to be non-major under Executive Order 12291 and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034, February 26, 1979). Since there is no economic impact, a full regulatory evaluation is unnecessary.

Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act (5 U.S.C. 605(b)). However, this action will not have a significant economic impact on a substantial number of small entities.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, part 117 of title 33, Code of Federal Regulations, is amended to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

§ 117.261 [Amended]

2. In § 117.261 paragraph (pp) is removed and reserved.

Dated: May 29, 1991.

Robert E. Kramek,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6862

[NV-930-01-4214-10; Nev-061742]

Public Land Order No. 6849, Correction; Mineral Withdrawal of a Portion of the Sheldon National Wildlife Refuge, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order will correct three errors in the land description in Public Land Order No. 6849.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, BLM Nevada State Office, P.O. Box 12000, Reno, Nevada 89520, 702-785-6526.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

The legal description in Public Land Order No. 6849, 56 FR 16279-16280, April 22, 1991, is hereby corrected as follows:

1. Page 16279, first column, line 18 from the bottom, "R. 23 E.," should read "R. 23½ E.,".

2. Page 16279, first column, line 13 from the bottom, "R. 23 E.," should read "R. 23½ E.,".

3. Page 16279, second column, line 19 from the bottom, "ENW¼," should read "E½NW¼,".

Dated: June 6, 1991.

Dave O'Neal,

Assistant Secretary of the Interior.

BILLING CODE 4310-HC-M

Bureau of Land Management

43 CFR Public Land Order 6863

[CO-932-4214-10; COC-28566]

Withdrawal and Jurisdictional Transfer of Public Land for the Leadville Fish Hatchery; CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 79.74 acres of public land from surface entry and mining for 40 years and transfers administrative jurisdiction to the Fish and Wildlife Service for use in conjunction with the Leadville Fish Hatchery. The land has been and remains open to mineral leasing.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Doris Chelius, BLM Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215-7076, 303-239-3706.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land is hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the mining laws (30 U.S.C. ch. 2), and is transferred to the Fish and Wildlife Service for management as a part of the Leadville Fish Hatchery:

Sixth Principal Meridian

T. 9 S., R. 81 W.,
Sec. 36, lots 17, 18, 21, 22, and 24.

The area described contains approximately 79.74 acres of public land in Lake County.

2. Effective on date of publication of this order, the above-described land will be subject to the provisions of the National Wildlife Refuge System Administrative Act, 16 U.S.C. 668dd, as part of the Leadville Fish Hatchery.

3. This withdrawal will expire 40 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Mangement Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

Dated: June 5, 1991.

Dave O'Neal,

Assistant Secretary of the Interior.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-437; RM-7284]

Radio Broadcasting Services; Marion and Orrville, AL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document reallots Channel 248A from Marion to Orrville, Alabama, substitutes Channel 247A for Channel 248A at Orrville, and modifies the construction permit of Marion Radio, Inc. for Station WJAM-FM, as requested, to specify operation on Channel 247A, pursuant to the provisions of Section 1.420(i) of the Commission's Rules. The allotment of Channel 247A to Orrville will provide the community with its first local aural transmission service without depriving Marion of local aural service. See 55 FR 41705, October 15, 1990. Coordinates used for Channel 247A at Orrville are 32-18-00 and 87-09-30. With this action, the proceeding is terminated.

EFFECTIVE DATE: July 29, 1991.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 90-437, adopted May 31, 1991, and released June 12, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

[MM Docket No. 89–571; RM–7532]

Radio Broadcasting Services; Benton, TN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Stonewood Communications Corporation, allots Channel 226A to Benton, Tennessee. See 54 FR 52423, December 21, 1989. Channel 226A can be allotted to Benton, Tennessee, in compliance with the Commission's minimum distance separation requirements with a site restriction of 13 kilometers (8.1 miles) south to avoid a short-spacing to Station WWZZ(FM), Channel 226A, Karns, Tennessee. The coordinates for Channel 226A at Benton are North Latitude 35–04–00 and West Longitude 84–43–00. With this action, this proceeding is terminated.

EFFECTIVE DATE: July 29, 1991. The window period for filing applications will open on July 30, 1991, and close on August 29, 1991.

Proposed Rules

Federal Register
Vol. 56, No. 116
Monday, June 17, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 351

Minimum 60 Day Written Notice Period for Reduction in Force Actions

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) proposes to issue regulations that will require agencies to give employees at least 60 days written notice prior to a reduction in force when 50 or more employees are to receive separation notices in the same competitive area. The 60-day requirement would not apply in situations caused by an immediate shortage of funds or other unforeseeable circumstances, or when fewer than 50 employees are being separated. An agency may meet the 60-day reduction in force notice requirement either by issuing a general notice which is followed by a specific notice, or by issuing a 60-day specific notice. At present, agencies are required to give employees at least 30 days advance written notice prior to a reduction in force action.

The new regulations will also permit agencies to issue reduction in force notices to employees more than 90 days prior to the reduction in force by simply notifying OPM. Under the present regulations, agencies may not issue reduction in force notices to employees more than 90 days prior to a reduction in force action without the prior approval of OPM.

Finally, the new regulations clarify that agencies must provide specific placement and unemployment insurance information to employees who have received specific notices of separation by reduction in force. The new regulations add a requirement that when 50 or more employees receive notices of separation by reduction in force at a worksite, the agency must, at the same time it issues notices to employees, also notify (1) the employees' bargaining unit representative if the employee is covered by a collective bargaining agreement, (2) the appropriate State dislocated worker unit, as designated under title III of the Job Training Partnership Act, and (3) the chief elected official of the local governmental jurisdiction(s) where the separations will take place.

DATES: Written comments will be considered if received no later than August 16, 1991.

ADDRESSES: Send or deliver written comments to: Associate Director, Career Entry Group, room 6F08, Office of Personnel Management, Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Edward P. McHugh or Thomas A. Glennon (202) 606–0960.

SUPPLEMENTARY INFORMATION: 5 CFR 351.801(a) presently provides that an agency is required to give an employee at least 30 days written notice of a reduction in force action. The agency may either (1) issue a general reduction in force notice at least 30 days before the reduction in force effective date and follow it with a specific notice at least 10 days before the reduction in force effective date, or (2) issue a specific notice at least 30 days before the reduction in force effective date. 5 CFR 351.801(b) of these proposed regulations changes the minimum 30 day reduction in force notice requirement to 60 days when 50 or more employees in the same competitive area receive separation notices. However, in situations caused by an immediate shortage of funds or other unforeseeable circumstances, the proposed regulations specify that the agency may continue to provide a minimum of 30 days notice.

5 CFR 351.801(b) presently provides that an agency may not issue either a general or specific reduction in force notice more than 90 days prior to the date of the reduction in force action unless OPM approves the longer notice period. Proposed new 5 CFR 351.801(d) provides that the agency must simply notify OPM if it uses a reduction in force notice period of more than 90 days.

5 CFR 351.804 is revised by adding new paragraphs (a) and (b). Paragraph (a) clarifies that agencies must provide information on the Reemployment Priority List and OPM's Displaced Employee Program to each employee who has received a specific notice of separation by reduction in force. Paragraph (a) also notes that agencies should advise these same employees on how to apply for unemployment insurance benefits through their appropriate State government office. Paragraph (b) includes a new requirement that, when an agency issues reduction in force separation notices to 50 or more employees in a competitive area, the agency must, at the same time it issues reduction in force notices to the employees, notify (1) the bargaining unit representative(s) of the affected employees, (2) the State dislocated worker unit, as designated or created under title III of the Job Training Partnership Act, and (3) the chief elected official of the unit of local government(s) within which the separations will take place.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it only affects Federal employees.

List of Subjects in 5 CFR Part 351

Government employees.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, OPM proposes to amend part 351 of title 5, Code of Federal Regulations, as follows:

PART 351—REDUCTION IN FORCE

1. The authority citation for part 351 continues to read as follows:

Authority: 5 U.S.C. 1302, 3502, 3503.

2. Section 351.801 is revised to read as follows:

§ 351.801 Notice period.

(a) Except as provided in paragraph (b) of this section, each competing employee selected for release from a competitive level under this part is entitled to a written notice at least 30 full days before the effective date of release.

VOL 56 ISS 116 JE 17 1991 UMI

(b) Each competing employee selected for release from a competitive level under this part is entitled to a written notice at least 60 full days before the effective date of release if 50 or more employees in a competitive area receive separation notices. When a reduction in force is caused by an immediate shortage of funds or other unforeseeable circumstances, each competing employee covered by this paragraph is entitled to a written notice at least 30 full days before the effective date of release.

(c) Under paragraphs (a) or (b) of this section, when a general notice is supplemented by a specific notice, an agency may not release an employee from his or her competitive level until at least 10 days after the employee's receipt of the specific notice.

(d) A notice shall not be issued more than 90 days before release unless the agency has notified OPM.

(e) The notice period begins the day after the employee receives the notice.

3. Section 351.804 is revised to read as follows:

§ 351.804. Notification of eligibility for reemployment and other placement assistance.

(a) An employee who receives a specific notice of separation under this part must be given information concerning the right to reemployment consideration under subparts B (Reemployment Priority List) and C (Displaced Employee Program) of part 330 of this chapter. The same employee must also be given appropriate information concerning how to apply for unemployment insurance through his or her appropriate State program. This information should be included in or with the specific reduction in force notice. Otherwise, a separate supplemental notice covering this information must be given to the employee.

(b) When more than 50 employees in a competitive area receive separation notices under this part, at the same time that the agency issues specific notices of separation, the agency must also provide notification of this action to:

(1) The representative(s) of the affected employees at the time of the notice, as defined in their applicable collective bargaining agreement;

(2) The State dislocated worker unit, as designated or created under title III of the Job Training Partnership Act; and

(3) The chief elected official of local government(s) within which these separations will occur.

BILLING CODE 6325-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Parts 201, 202, 204, 291, and 302

[Docket No. 47582, Notice No. 91-10]

Procedures and Evidence Rules for Air Carrier Authority Applications

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department is proposing to revise parts 201, 202, 204, 291, and 302 to consolidate and make more consistent the fitness data requirements and filing procedures for all carriers (certificated, all-cargo, and commuter). This will update requirements to reflect our existing needs as they have evolved over the past few years, provide better guidance for carriers, expedite the processing of fitness applications, and make administrative changes to update organizational references.

DATES: Comments must be received on or before August 16, 1991.

ADDRESSES: Comments should be directed to the Documentary Services Division, Docket 47582, Office of the Secretary, Department of Transportation, 400 Seventh Street SW., room 4107, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Carol A. Woods, Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, (202) 366-9721.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this rulemaking action by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions. Communications should identify the regulatory docket number and be submitted in duplicate to the Documentary Services Division at the address listed above. Commenters wishing the Department to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following statement is made: Comments on Docket No. 47582. The postcard will be date/time stamped and returned to the commenter. All communications on or before the specified closing date will be considered by the Assistant Secretary for Policy and International Affairs before taking action on any further rulemaking. Also, this proposal may be changed in light of comments received. All comments submitted will be available for examination in Docket 47582. A report summarizing each substantive public contact with DOT personnel concerned with this rulemaking will be filed in the docket.

Background

Introduction

Section 401 of the Federal Aviation Act of 1958, as amended, requires that air carriers be found "fit, willing, and able" before being awarded a certificate of public convenience and necessity. Similarly, sections 418 and 419 impose fitness requirements on all-cargo air carriers and commuter air carriers, respectively. Section 401(r) provides that the fitness requirements of the Act are continuing requirements.

The Civil Aeronautics Board (CAB) was originally assigned the responsibility for determining and monitoring air carrier fitness. This responsibility was transferred to the Department of Transportation on January 1, 1985, following the sunset of the CAB.

The fitness data requirements are currently contained in parts 291 Subpart B-All Cargo Air Service Certificates for domestic all-cargo carriers and Part 204-Data to Support Fitness Determinations for certificated carriers and commuter carriers.

The procedural requirements pertaining to fitness applications are contained in parts 201, 202, and 302. Part 302 Subpart Q-Expedited Procedures for Processing Licensing Cases contains the Department's procedural rules applicable to proceedings on applications for section 401 certificates. Similarly, Part 201-Applications for Certificates of Public Convenience and Necessity contains additional procedural rules. Part 202-Certificates Authorizing Scheduled Route Service: Terms, Conditions, and Limitations states that carriers holding certificates of air carrier authority shall comply with certain terms, conditions, and limitations.

The Proposed Changes

We find several areas where we believe amendments to parts 201, 202, 204, 291, and 302 are advisable. In general, we propose to amend the rules to consolidate the fitness data requirements for all types of authority—passenger and domestic all-cargo certificate and commuter—into one area (part 204) and to make the requirements more uniform for the various types of operations. Simultaneously, we are consolidating the procedural requirements (parts 291, 202, and 302) to remove duplication in different rules and to make them more consistent. In addition, as an administrative matter, we propose to substitute applicable references to the Department for the obsolete CAB references.

Fitness Data Filing Requirements

The primary purpose of revamping part 204 is to make the fitness filing requirements for applicants more uniform and to place them all in one section of our rules. A detailed explanation of the specific changes follows.

Proposed § 204.3

We are proposing to consolidate in a new § 204.3-Applicants for new certificate or commuter air carrier authority the evidentiary requirements to be addressed by applicants for any type of authority for which a fitness determination is required. The new § 204.3 list of evidentiary requirements would replace the four lists contained in § 204.5 (new certificated carriers), § 204.6 (commuter carriers providing essential air service), § 204.7 (nonessential air service commuter carriers), and § 291.11 (domestic all-cargo certificated carriers). The proposed § 204.3 would be based upon § 204.5, with a small number of additions and deletions.

We propose to add a new paragraph (d) to new § 204.3 requiring applicants that are corporations to submit a statement from the agency of their state government that maintains corporation registrations attesting to the corporation's standing with the state. It has been our experience that applicants claiming corporate status occasionally lack such status. For example, in one recent case, we learned that an applicant had lost its corporate status because of its failure to pay taxes due to the state. Such a failure raises concerns not only about the applicant's financial viability and its disposition to comply with the applicable laws and regulations, but also about what entity will actually operate the service and be responsible for liabilities it may incur.

Paragraphs (e)(3) and (f)(2) of § 204.5 (new paragraphs (f)(3) and (g)(2) of § 204.3) would be amended to require information on the total number of shares of an applicant's stock that are issued and outstanding.

When an individual or organization that holds a substantial interest in an applicant is not the beneficial owner of the stock, new paragraph (g)(2) would require a statement of the citizenship of the beneficial owner for whose account the stock is held. Occasionally, an applicant has stated that a significant amount of its stock is held by, or registered in the name of, a securities or brokerage firm. Having information about the ultimate owner(s) would enable the Department to determine with greater certainty whether an applicant is owned and controlled by U.S. citizens.

Sections 204.5(e)(5) and (f)(4) are being amended (new § § 205.3(f)(5) and (g)(4)) to require the key personnel of and holders of a substantial interest in an applicant to disclose any past ownership, directorship or officership positions held with any aviation-related entities. This information is required by the Department in investigating whether an applicant's owners or managers were involved in any compliance matters in a previous aviation relationship.

Paragraphs (i) and (j) of § 204.5 (new paragraphs (j) and (k) of § 204.3) would be revised to require applicant to furnish financial statements that are current to within three months of the date of application, unless the Department determines that, because of unusual circumstances in a particular case, such a requirement would be unreasonable. Applicants subject to 10K and 10Q reporting requirements of the Securities and Exchange Commission would be required to file recent 10Q reports to meet this requirement. The current rule requires applicants to file financial statements or SEC reports only for the last three years, calendar or fiscal; however, in the ensuing months, a company's financial situation could have changed dramatically, making it impossible for us to accurately assess its present financial fitness.

Section 204.5(m) is duplicative of a similar statement in § 204.1 and is being removed.

Paragraphs § 204.5 (o), (p), and (q) presently require an applicant to describe, respectively, all formal complaints lodged within the past five years against it, any relevant corporations, key personnel or owners regarding compliance with the Act or related orders, rules or requirements; all orders issued in the past ten years finding it, any relevant corporations, key personnel or owners guilty of violations of the Act or related orders, rules or requirements; and all actions taken in the past ten years by the FAA under certain specified sections of the Federal Aviation Regulations against it, any relevant corporations, key personnel or owners.

We propose to replace these paragraphs with new § 204.3(o). Under the revised section, applicants would be required to furnish a description of the current status of all pending investigations and enforcement actions undertaken, or formal complaints filed, by the Department, including the FAA, involving the applicant or any relevant corporation, any personnel employed (or to be employed) by any relevant corporation or person having a substantial interest in any relevant corporation, regarding compliance with the Act or orders, rules, regulations, or requirements issued pursuant to the Act, and any corrective actions taken.

This revision would make a significant reduction in the evidentiary requirements placed on applicants. The proposed new rule would eliminate the necessity for applicants to search or inquire into the records of a number of persons and business entities as far back as ten years and report all matters regarding compliance with the Act and related regulations. When the current regulations were promulgated in 1980, the Department did not have computerized carrier compliance records available to it. When this capability was added, we found that the material on closed enforcement cases filed by applicants with previous operating histories was often duplicative of the data we had at hand. Therefore, to improve our ability to make a current and complete assessment of an applicant's compliance disposition without burdening it with the necessity of filing duplicative material, we propose to limit the evidentiary requirements in this area to information on the current status of open investigations and formal complaints. However, consideration will be given to the total number and the nature of such actions—both those reported by the applicant and those recorded in the Department's files—and the time period over which they occurred in determining whether additional information will be required from an applicant.

We also propose to add a new paragraph (q) which would require applicants to submit a description of any aircraft accidents or incidents (as defined in the National Transportation Safety Board (NTSB) Regulations (49 CFR 830.2)) experienced by the applicant, its personnel, or any relevant corporation, which occurred either (1) during the year preceding the date of application, or (2) at any time in the past and which remain under investigation by the FAA, the NTSB, or by the company itself. In addition, applicants would be required to describe the status of any pending investigations or enforcement actions against it, its

VOL 56 ISS 116 JE 17 1991 UMI

employees, or relevant corporations as a result of any accident or incident, as well as actions taken to prevent their recurrence. Historical accident and incident data from both FAA and NTSB records are available to us, thus obviating a need for such information from applicants for earlier events. However, in the case of those few applicants that have a history of accidents or incidents that warrants additional investigation, we may need to require the submission of additional information.

Sections 204.5(s) and 204.6(a)(19), which require statements from state agencies concerning consumer complaints, would be deleted since we have found that information received in response to these rules has had no material decisional value.

Section 204.5(t)(3) (new § 204.3(t)(2)) would also be amended to require all applicants to furnish, in addition to a forecast income statement, an itemization of all pre-operating and start-up costs associated with initiation of the proposed service. Such an itemization should include, at a minimum, those costs related to obtaining government approvals, establishing stations, introductory advertising, aircraft and equipment deposits, office and hangar space deposits or rentals, insurance, training, and salaries earned prior to start-up. These submissions would ensure that an applicant has factored into its funding estimates these often overlooked cost categories and that the cost estimates are reasonable for the proposed operations. The existing § 204.5(t)(3) is limited only to those carriers not currently operating commercial flights. We propose to remove this limitation so that all applicants must submit this information.

New § 204.3(t)(2) would also require forecast income statements to show the data broken down by quarter for the first year of operations. This information would enable us to examine the reasonableness and completeness of the applicant's expense estimates in light of the type and scope of air service proposed, and to ensure that the company has arranged for sufficient financial resources to carry it through the normally difficult early months of new operations.

Finally, we propose adding a new paragraph (v) to § 204.3 which would require all applicants to provide an express certification that the information contained in their application is truthful and accurate. The certification would state:

Pursuant to title 18 United States Code Section 1001, I [the individual signing the application], in my individual capacity and as the authorized representative of the applicant, have not in any manner knowingly and willfully falsified, concealed or covered up any material fact or made any false, fictitious, or fraudulent statement or knowingly used any documents which contain such statements in connection with the preparation, filing or prosecution of the application. I understand that an individual who is found to have violated the provisions of 18 U.S.C. 1001 shall be fined not more than $10,000 or imprisoned not more than five years, or both.

The rule would state that this certification must also be included in all subsequent written submissions filed by the applicant in connection with its application.

It should also be noted that the Department itself may undertake enforcement action against any person who asserts a false material fact or omits from the submission a required material fact, under the Program Fraud and Civil Penalties Act of 1986 (Pub.L. 99-509, 31 U.S.C. 3801-3812). The proposed certification would also encourage applicants to give more careful attention to statements made in their submissions, and perhaps reduce spurious filings.

As noted earlier, applicants for domestic all-cargo certificates under section 418 would be made subject to the fitness requirements of § 204.3. The domestic all-cargo carriers represent a small segment of all carriers holding authority from the Department. Presently, only four carriers hold section 418 certificates as their sole type of authority, and over the past three years, the Department has received only two applications for section 418 authority, one of which was subsequently withdrawn. We have reviewed the existing fitness data requirements for domestic all-cargo applicants contained in § 291.11. The majority of the requirements were the same as those in the existing part 204 requirements for passenger certificate authority. We propose to eliminate the requirements for information on the total number of employees (§ 291.11(b)(2)), description of ground facilities (§ 291.11(b)(6)), cash flow statements (§§ 291.11(b)(7)(iii) and (c)(2)), and payment of cargo losses or damage claims (§ 291.11(c)(4)). These elements are not required in the existing part 204 and we do not believe that they are necessary for every fitness evaluation. Of course, we may find it necessary to require such information on a case-by-case basis when it is pertinent to a specific fitness evaluation.

Two elements currently contained in § 291.11 for section 418 domestic all-cargo carriers would be incorporated in part 204. First, a brief chronological narrative of the applicant's history, currently required under § 291.11(b)(3), would now be required under § 204.3(r). Appropriate subjects to be included would be the applicant's predecessors, owners, date of formation, and the types of service performed.

Second, § 291.11(c)(5), which requires an applicant to provide the status of its application for any additional FAA authority needed to conduct its proposed operations, and to identify the FAA office and person responsible for processing the application, would be revised and incorporated into current § 204.5(u), which concerns any federal, state or foreign authority held by the applicant. (Section 204.5(u) would be redesignated § 204.3(s)). Since we routinely inquire of the appropriate FAA officials regarding applicants' need for and the status of any additional FAA authority, there is no need for the applicant to furnish such information. Therefore, the rule would be changed to require an applicant merely to identify the local FAA office and personnel responsible for processing the application.

As also noted earlier, commuter carriers would be covered by the data requirements of the new § 204.3. Applicants for commuter carrier authority currently must provide the evidence listed in § 204.7, which duplicates all of the requirements of § 204.5 except for the ownership and control information contained in §§ 204.5 (e)(5), (f), and (g), and the estimated cost and traffic data relative to the applicant's proposed service contained in § 204.5(t). Yet, these issues are as relevant to commuter carriers as they are to certificated carriers.

When part 204 was promulgated in 1980, commuter air carriers were, for the most part, small organizations which as a group did not constitute a significant segment of the airline industry. Many commuter airlines today are large organizations which annually transport many thousands of passengers throughout complex market networks, often in code-sharing relationships with major certificated carriers. In 1989, for example, commuter airlines enplaned 16 million passengers in scheduled service, which was 80 percent of the 20 million enplaned over the same period by medium regional certificated air carriers operating scheduled passenger service.[1]

[1] Computed from statistics compiled in U.S. Department of Transportation, Research and Special Programs Administration, Air Carrier

Continued

Also in 1989, the commuter air carrier segment surpassed the medium regional certificated carrier segment 2.89 billion to 2.24 billion in revenue passenger miles flown.[2]

The Department requires information on those who own and control a prospective commuter air carrier for the same reasons it requires such information for certificate applicants—to allow us to ascertain their citizenship, compliance history and financial ability to support the carrier's operations. Similarly, it is not a less important task of the Department to protect the consumers of commuter air service from unacceptable and preventable risks resulting from inadequate financing than it is to protect the customers of certificated carriers. Thus, we must have access to the cost and traffic forecasts of commuter applicants in order to assure that they have an adequate knowledge and understanding of the costs of providing the air transportation proposed.

Proposed § 204.4

The additional evidentiary requirements peculiar to carriers proposing to provide Essential Air Service (EAS), which are now included among the requirements of § 204.6, would be contained in a new § 204.4-Carriers proposing to provide essential air transportation.

Presently, § 204.6 divides carriers proposing to provide EAS into three categories, covered by §§ 204.6 (a), (b) and (c). Since all commuter carriers serving eligible points have now had their fitness determined, paragraph (a) is no longer needed and is being removed. The rule would now have two categories of carriers, those proposing to conduct unsubsidized EAS and those applying to provide subsidized EAS. Both types of applicants would be required to file the evidence presented in new § 204.3.

In addition, as evidence that they are capable of providing air service reliably, carriers applying to provide unsubsidized EAS would continue to be required to submit the data elements currently listed in §§ 204.6(a) (13), (14), (20), (21), (b)(3)(iii), (iv), and (4). We are also adding a requirement that such applicants submit a pro-forma income statement covering the first year of such operations to demonstrate their ability to maintain the service from an economic standpoint.

Carriers proposing to provide subsidized EAS would be required to file the same information required of applicants to provide unsubsidized EAS plus the necessary costing information currently contained in § 204.5(c) to establish the carrier's subsidy requirement. Applicants for subsidized EAS are already providing this information.

Finally, in order to minimize the filing burden on applicants, the introductory paragraph of new § 204.4 continues to advise applicants that, before submitting their evidence, they may contact the Department's staff to ascertain what information is already available to the Department and thus need not be resubmitted.

Proposed §§ 204.5 and 204.6

Section 401(r) of the Act states that all carriers subject to the initial fitness requirement (that is, carriers holding section 401 certificates, section 419 commuter carriers, and section 418 domestic all-cargo carriers) are also subject to the continuing fitness requirement. In practice, we have been monitoring changes in commuter carrier operations and all-cargo operations for some time, and have been undertaking reexamination of such carriers' fitness when appropriate. We are now proposing to amend our rules to reflect these practices. To accomplish this, we propose to redesignate § 204.5 as Certificated and commuter air carriers undergoing or proposing to undergo a substantial change in operations, ownership or management and § 204.6 as Certificated and commuter carriers proposing a change in operations, ownership, or management which is not substantial.

We are also proposing to clarify and give more examples of what constitutes a reportable substantial change based on our experience over the past few years in monitoring carrier fitness.

We note that, initially, carriers need only notify us of impending substantial changes. They may proceed to implement these changes pending our review. After reviewing these circumstances, the Department would then inform the carrier what additional information, if any, must be filed in support of its continuing fitness.

Currently, the term "substantial change" is defined in terms involving operations. In Department orders, we have held that substantial changes in ownership and management and changes from small to large aircraft operations require filings under the section.[3]

Reportable changes fall into three categories: substantial changes in ownership, substantial changes in management, and substantial changes in operations.

A substantial change in ownership would be defined as the acquisition by a new shareholder or the accumulation by an existing shareholder of beneficial control of 10 percent or more of the outstanding voting stock in the corporation.[4] The source of the 10 percent figure is the CAB's traditional holding that ownership of such an amount of voting stock represents at least the potential for significant influence on a carrier's operations. Before it expired on December 31, 1966, section 408(f) of the Act required in the context of merger approvals that any person beneficially owning 10 percent or more of the outstanding voting stock of an air carrier "shall be presumed to be in control of such air carrier unless the Board finds otherwise." Since parties in control of a carrier affect its compliance disposition, we need to be advised of changes in control to determine if further review of this fitness element is necessary.

The Department also has a statutory responsibility to ensure that companies holding air carrier authority from the Department are U.S. citizens. Section 101(16) of the Act contains the definition of U.S. citizenship:

(16) "Citizen of the United States" means (a) an individual who is a citizen of the United States or one of its possessions, or (b) a partnership of which each member is such an individual, or (c) a corporation or association created or organized under the laws of the United States or of any State, Territory, or possession of the United States, of which the president and two-thirds or more of the board of directors and other managing officers thereof are such individuals and in which at least 75 per centum of the voting interest is owned or

Industry Scheduled Service Traffic Statistics Quarterly, Fourth Quarter and Twelve Months Ended December 1989 and 1988. Center for Transportation Information, Cambridge, MA. Medium regional certificated carriers are those holding section 401 authority that earn less than $10 million in annual operating revenue or that operate small aircraft (60 seats or less or 18,000 pounds maximum payload or less). In this respect, small certificated carriers' operations are comparable to those of commuter air carriers.

[2] *Id.*

[3] See, for example, Orders 83-6-88 (Midway (Southwest) Airways Co. Fitness Investigation), 85-2-4 (Continuing Fitness Investigation of Golden West Airlines), 85-6-18 (Application of Trans World Airlines for Continuing Fitness Review), 89-9-60 (Fitness Determination of Air Cape, Inc.), 89-2-46 (Trans Continental Airlines, Inc., Fitness Determination), and 89-8-7 (Application of Mid Pacific Air Corporation).

[4] In complementary revisions, we are also proposing to change the definition of "substantial interest" currently in § 204.2(n) (new § 204.2(o)) to mean "beneficial control of 10 percent or more of the outstanding voting stock." Also, the requirement currently in § 204.5(e)(5) requiring identification of 5 percent or more of any voting stock held by an applicant's key personnel in any other aviation-related entity would be changed to 10 percent or more in new § 204.3(f)(5).

VOL 56 ISS 116 JE 17 1991 UMI

controlled by persons who are citizens of the United States or of one of its possessions.

The Department and the CAB before it have also interpreted section 101(16) to mean that, as a factual matter, the carrier must actually be controlled by U.S. citizens.

Our examination of a carrier's management, which is one of the three major categories of our fitness review, focuses on their qualifications and compliance record, but we must also make a determination that the composition of the management team enables the carrier to continue to meet the definition of U.S. citizenship. Since any significant change in this group of individuals has the potential for affecting the fitness or citizenship of the carrier, we propose that a carrier report to the Department a change in its president, chief executive officer or chief operating officer, and/or a change in at least half of its other key personnel within any 12-month period or since its latest fitness review, whichever is the more recent period.

New reportable substantial operational changes would include (1) a petition for protection from creditors under the federal bankruptcy laws or a filing of a plan of reorganization under Chapter 11 of the federal bankruptcy laws, or (2) for a carrier holding a section 401 or a section 418 certificate, a change from operations with small aircraft (those designed to hold 60 seats or less) to, or the addition of, operations with large aircraft.[8] Our initial fitness evaluation is based on the scope of operations proposed and the financial position of the company at the time the application is filed. Any of the circumstances listed above could materially affect the basis for our initial fitness determination. Thus, we would want to be notified of any change of these types so that we could assess whether a fitness reevaluation is warranted.

Information supporting continuing fitness. Once the Department has received a description of the change being proposed by an air carrier, it would determine what, if any, additional information is required in order to establish that the proposed change would not adversely affect the continuing fitness of the carrier. In cases where the carrier's fitness does not appear to be at issue or where the Department already has information sufficient to resolve the issue, the Department would advise the carrier that no additional information is required at that time. In situations where a proposed change appears to effect one or more areas of the carrier's fitness, the Department would instruct it to supply updated fitness information. Thus, a carrier would be relieved of the obligation to file automatically all of the evidence required by the rule to support its continuing fitness.

We are proposing to supplement the data elements (as currently listed in § 204.4) to be addressed when a carrier has undergone a substantial change. We reiterate that a carrier should notify us of the substantial change and, after reviewing the nature of the change, we would notify the carrier which information elements it should file. Furthermore, if the data satisfying any of those information requests have not changed or have been submitted in conjunction with another matter before the Department, the carrier may so indicate, with a reference to the date and place of any filings.

These added data elements are: (1) information on all persons having a substantial interest in the carrier, including name, address, citizenship, number of shares of applicant's voting stock held and percentage of the total issued and outstanding, citizenship and principal business of any person for whose account such interest is held, and interest in any other aviation-related entity; (2) a statement of citizenship for any new holders of a substantial interest who are non-US. citizens; (3) for carriers with corporate forms of organization, a statement from the carrier's state government affirming that the carrier is in good corporate standing with the state; (4) a list of the carrier's subsidiaries, the principal business of each and its relationship to the applicant; [9] (5) a list of the carrier's shares of stock in or control of any aviation-related entity; (6) a list of each action and outstanding judgment for more than $5,000; (7) the number of actions and outstanding judgments of less than $5,000; (8) a description of any aircraft accidents or incidents that occurred during the past year or that are currently under investigation; (9) a forecast income statement and itemization of pre-operating and start-up costs; (10) current financial statements, including footnotes; and (11) a description of its aircraft fleet and plans for acquisition of additional fleet.

Our case work over the past few years has highlighted the importance of obtaining updates of this information in assessing the continuing fitness of carriers. As a result, we find it advisable to put carriers on notice by our rules of the types of information they may be required to submit when undergoing a substantial change in operations.

Proposed § 204.6

We are also proposing to redesignate § 204.5—Certificated carriers proposing a change in operations which is not substantial as § 204.6 and to amend that section to cover commuter and domestic all-cargo carriers as well as certificated carriers under its provisions.

Proposed § 204.7 Pertaining to Dormancy

The dormancy provisions currently governing certificated passenger and commuter carriers and contained in § 204.8 would be redesignated as § 204.7. We are also proposing several administrative changes. First, consistent with our overall approach of making part 204 applicable to all air carriers, we would make domestic all-cargo carriers subject to the dormancy provisions of the new § 204.7 and eliminate the similar, existing dormancy provision that governs domestic all-cargo carriers (§ 291.15). Second, we propose to delete the language currently in § 204.8 which distinguishes between dormant carriers which had been found fit before the effective date of the amended rule (December 8, 1988), as this provision is now moot since more than one year has passed since the amendment was made effective. All dormant carriers, including carriers certificated under sections 401 or 418 and commuter carriers, would be referred to the evidentiary requirements of new § 204.3.

Finally, in order to resolve confusion expressed by some carriers, we are removing the term "automatically" at the end of § 204.6(a). The revocation for dormancy occurs only after the dormant carrier has been given two separate notifications that its authority will be revoked at the end of the one-year dormancy period if it does not commence or resume Operations by that time. Moreover, carriers are also notified that any such revocation will be without prejudice, and they may reapply for authority at any time. A dormant carrier may also request an exemption from the dormancy provisions for good cause.

[8] Commuter air carriers by definition (section 416(b)(4) of the Act, as modified by CAB Rule ER-1183, May 17, 1979) may conduct scheduled passenger operations only with aircraft of 60 seats or less. Therefore, if a commuter air carrier desired to engage in large aircraft operations, it would have to file an application for a certificate and disclose the details of its proposed change in operations.

[9] The classification "subsidiaries" is also being added to the types of entities defined as "relevant corporations" in new § 204.2(m). Information on a carrier's subsidiaries is necessary because of their potential for draining a carrier's funds and affecting its compliance disposition.

Proposed Changes in Procedural Rules

Part 201 contains the procedures to be followed by persons in preparing and filing applications for certificates of public convenience and necessity. We propose to apply these procedural requirements to all fitness applications filed under Part 204 rather than just to section 401 certificate applications. We also propose as an organizational matter to incorporate the existing portion of part 202 dealing with certificate terms, conditions, and limitations into part 201. We propose to retitle part 201 to read: Part 201—Air Carrier Authority under Title IV of the Federal Aviation Act, and to divide it into two subparts as follows: Subpart A—Application Procedures, and Subpart B-Certificate Terms. Conditions, and Limitations.

We propose to amend § 201.4—General provisions concerning contents to eliminate information pertaining to the applicant's fitness since that subject is covered in part 204. Thus, as amended, § 201.4 would address the form of the application, statements pertaining to the scope of the authority, and any additional information that the applicant wishes to submit.

Section 201.5—Operations other than between fixed points is to be removed because it is no longer applicable. Section 201.6 is being redesignated as § 201.5.

Under new Subpart B—Certificate Terms, Conditions, and Limitations, the first section would be new § 201.6—Applicability (currently § 202.1). We would revise this section to make it applicable to all certificate authority, including charter, scheduled and domestic all-cargo.

Current § 202.2—Failure to comply would be redesignated § 201.7—General certificate conditions and incorporate several certificate conditions currently contained in § 291.13, which pertains to domestic all-cargo carriers. Section 201.7(a) would contain the material currently in § 202.2. Section 201.7(b) dealing with reporting requirements is substantively similar to § 291.13(e), as proposed § 201.7(c) is similar to § 291.13(f). These paragraphs are applicable to all certificate authority, whereas the proposed § 201.7(d) would incorporate provisions of §§ 291.13 (c) and (d), which are applicable only to domestic all-cargo service. New § 201.7(e) would contain the provision currently in § 202.12—Filing requirements for adherence to Montreal Agreement. Section 202.11—Nonstop authorization is no longer necessary since certificates for domestic authority no longer contain routes and the points authorized in foreign scheduled air service and any applicable restrictions are contained in the certificates.

Therefore, with the relocation of the subject matter of §§ 202.1 and 202.2 to part 201 and the removal of §§ 202.11, part 202 is obviated, and we propose to remove it.

All-Cargo Carriers

Presently, the evidentiary filing requirements and the procedural rules applicable to filings for section 418 domestic all-cargo authority are contained in subpart S of part 291. We are now proposing to bring section 418 applications under the evidentiary regulations of part 204 and the procedural rules of newly titled Part 201—Air Carrier Authority under Title IV of the Federal Aviation Act, which refers applicants to the requirements set forth in Part 302—Rules of Practice in Proceedings. The latter two parts contain the procedures to be followed in processing applications for all other types of authority requiring initial fitness determinations. Thus, domestic all-cargo certificate applications would follow the same procedures as other certificate applications.

Under current part 291 rules, once the Department has determined that an application for all-cargo authority is complete, it prepares a summary of the application for publication in the **Federal Register**. Anyone wishing to file comments on the fitness of the applicant must do so within 15 days of publication. The applicant has 14 days to respond after receiving any such comments. Part 302 procedures govern in the case of opposed applications.

The proposed revision would substitute the "expedited" subpart Q, part 302 procedures for the part 291 rules. In most initial certificate application cases under subpart Q, once the application is deemed to be complete, the Department analyzes the available fitness evidence and issues an order to show cause containing its tentative findings with regard to the applicant's fitness. A summary of this order is then published in the **Federal Register**. Any person wishing to object to the findings must do so with 15 days; the applicant has 10 days to respond to any objections received. The use of show-cause procedures thus enables interested parties to have the benefit of a detailed presentation in the show-cause order of the applicant's qualifications and service proposal as well as the Department's analysis of the evidence submitted.

We also propose to remove § 291.13—Certificate conditions. All of these conditions are now covered or would be included under different provisions. Paragraph (a) of § 291.13 is found in section 101(16) of the Act and in § 291.22; paragraphs (b), (c), (d) and (f) are covered in § 201.7; paragraph (e) is found in § 291.50; and paragraph (g) is covered by section 401(h) of the Act.

Finally, since section 418 domestic all-cargo carriers would now be subject to the notification and fitness reexamination provisions of part 204, we would remove the requirement for notification of changes by these carriers currently in § 291.14.

Executive Order 12291, Federalism Assessment, Regulatory Flexibility Act Analysis and Paperwork Reduction Act of 1980

This proposed action has been reviewed under Executive Order 12291 and it has been determined that this is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. Furthermore, this proposed rule would not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, a preliminary regulatory impact analysis is not required. The proposed regulation amendments are not significant under the Department's Regulatory Policies and Procedures, dated February 26, 1979, because they do not involve important Departmental policies. The projected economic and regulatory impact of these amendments may be found in the Regulatory Evaluation contained in the public docket. A copy of that evaluation may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

The Department has considered the implications of this proposed action under the requirements of Executive Order 12612, Federalism, and has determined that the preparation of a Federalism Assessment is not warranted. The regulations herein would not have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibility among the various levels of government.

For purposes of its aviation economic regulations, Departmental policy categorizes air carriers operating small aircraft (60 seats or less or 18,000 pounds maximum payload or less) in

VOL
56

116
JE
17
1991
UMI

strictly domestic service as small entities for purposes of the Regulatory Flexibility Act. I certify that, if adopted, this rule would not have a significant economic impact on a substantial number of small entities. The ability of such entities to engage in air carrier operations essentially would be unaffected by the proposed regulation amendments.

The reporting and recordkeeping requirement associated with this rule is being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35 under *DOT No.:* 3492; *OMB No.:* 2106-0023; *Administration:* Department of Transportation, Office of the Secretary; *Title:* Procedures and Evidence Rules for Air Carrier Authority Applications; *Proposed Use of Information:* To determine whether carriers are "fit" to engage in their proposed air transportation operations; *Frequency:* On occasion; *Burden Estimate:* 8,046 hours; *Respondents:* U.S. air carriers; *Forms(s):* None; *Average Burden Hours per Respondent:* 39 hours and 46 minutes. For further information contact: The Information Requirements Division, M-34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-4735, or Edward Clarke or Wayne Brough, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, (202) 395-7340.

List of Subjects

14 CFR Parts 201, 202 and 204

Air carriers, Reporting and recordkeeping requirements.

14 CFR Part 291

Administrative practice and procedure, air carriers, Reporting and recordkeeping requirements.

14 CFR Part 302

Administrative practice and procedure, air carriers.

Proposed Rule

For the reasons set out in the preamble, title 14, chapter II of the Code of Federal Regulations is proposed to be revised as follows:

1. Part 201 is revised to read as follows:

PART 201—AIR CARRIER AUTHORITY UNDER TITLE IV OF THE FEDERAL AVIATION ACT

Subpart A—Application Procedures

Sec.
201.1 Formal requirements.
201.2 Amendments.
201.3 Incorporation by reference.
201.4 General provisions concerning contents.
201.5 Advertising and sales by applicants.

Subpart B—Certificate Terms, Conditions, and Limitations

201.6 Applicability.
201.7 General certificate conditions.

Authority: 49 U.S.C. 1324, 1371, 1372, 1373, 1377, 1381, 1388, 1389.

Subpart A—Application Procedures

§ 201.1 Formal requirements.

(a) Applications for certificates of public convenience and necessity under section 401 of the Federal Aviation Act and for domestic all-cargo air service certificates under section 418 of the Act, or amendments thereof, shall meet the requirements set forth in part 302 of this chapter as to general requirements, execution, number of copies, service, and formal specifications of papers.

(b) Any person desiring to provide air transportation as a commuter air carrier must comply with the registration provisions of part 298 of this chapter and submit data to support a fitness determination in accordance with part 204 of this chapter. An executed original plus two (2) true copies of the registration form and fitness data shall be filed with the Chief, Air Carrier Fitness Division.

(Secs. 416(b), 72 Stat. 771; 49 U.S.C. 1386; sec. 9(b), 80 Stat. 342; 5 U.S.C. 1002)

§ 201.2 Amendments.

If, after receipt of any application, the Department asks the applicant to supply additional information, such information shall be furnished in the form of a supplement to the original application.

§ 201.3 Incorporation by reference.

Incorporation by reference shall be avoided. However, where two or more applications are filed by a single carrier, lengthy exhibits or other documents attached to one may be incorporated in the others by reference if that procedure will substantially reduce the cost to the applicant.

§ 201.4 General provisions concerning contents.

(a) All pages of an application shall be consecutively numbered, and the application shall clearly describe and identify each exhibit by a separate number or symbol. All exhibits shall be deemed to constitute a part of the application to which they are attached.

(b) All amendments to applications shall be consecutively numbered and shall comply with the requirements of this part.

(c) Requests for authority to engage in interstate and overseas air transportation shall not be included in the same application with requests for authority to engage in foreign air transportation. Similarly, requests for authority to engage in scheduled air transportation under section 401 shall not be included in the same application with requests for authority to engage in charter air transportation under section 401 or with requests for authority to engage in domestic all-cargo air transportation under section 418.

(d) Each application shall specify the type or types of service (passengers, property or mail) to be rendered and whether such services are to be rendered on scheduled or charter operations.

(e) Each application for foreign scheduled Air transportation shall include an adequate identification of each route for which a certificate is desired, including the terminal and intermediate points to be included in the certificate for which application is made.

(f) Each application shall give full and adequate information with respect to each of the relevant filing requirements set forth in part 204 of this chapter. In addition, the application may contain such other information and data as the applicant shall deem necessary or appropriate in order to acquaint the Department fully with the particular circumstances of its case; however, the statements contained in an application shall be restricted to significant and relevant facts.

§ 201.5 Advertising and sales by applicants.

(a) An applicant for new or amended certificate or commuter air carrier authority shall not:

(1) Advertise, list schedules, or accept reservations for the air transportation covered by its application until the application has been approved by the Department; or

(2) Accept payment or issue tickets for the air transportation covered by its application until the authority or amended authority has become effective or the Department issues a notice authorizing sales.

(b) An applicant for new or amended certificate or commuter air carrier authority may not advertise or publish schedule listings for the air transportation covered by its application after the application has been approved by the Department (but before all DOT/FAA authority becomes effective) unless such advertising or schedule listings prominently state:

"This service is subject to receipt of government operating authority."

Subpart B—Certificate Terms Conditions, and Limitations

§ 201.6 Applicability.

Unless the certificate or the order authorizing its issuance shall otherwise provide, such terms, conditions and limitations as are set forth in this part, and as may from time to time be prescribed by the Department, shall apply to the exercise of the privileges granted by each certificate issued under section 401 or section 418 of the Act.

§ 201.7 General certificate conditions.

(a) It shall be a condition upon the holding of a certificate that any intentional failure by the holder to comply with any provision of title IV of the Act or any order, rule, or regulation issued thereunder or any term, condition, or limitation of such certificate shall be a failure to comply with the terms, conditions, and limitations of the certificate within the meaning of section 401(g) of the Act even though the failure to comply occured outside the territorial limits of the United States, except to the extent that such failure shall be necessitated by an obligation, duty, or liability imposed by a foreign country.

(b) Failure to file the reports required by parts 241, 291, or 298 of this chapter shall be sufficient grounds to revoke a certificate.

(c) The authority to transport U.S. mail under a certificate is permissive, unless the Department, by order or rule, directs a carrier or class of carriers to transport mail on demand of the U.S. Postal Service; such certificate confers no right to receive subsidy, for the carriage of mail or otherwise.

(d) An all-cargo air service certificate shall confer no right to carry passengers, other than cargo attendants accompanying a shipment, or to engage in any air transportation outside the geographical scope of domestic cargo transportation. Such certificate shall not, however, restrict the right of the holder to provide scheduled, charter, contract, or other transportation of cargo, by air, within that geographical scope.

(e) It shall be a condition upon the holding of a certificate that the holder have and maintain in effect and on file with the Department a signed counterpart of Agreement 18900 (OST Form 4523), and a tariff (for those carriers otherwise generally required to file tariffs) that includes its terms, and that the holder comply with all other requirements of part 203. OST Form 4523 may be obtained from the Office of Aviation Analysis, Regulatory Analysis Division.

PART 202—[REMOVED]

2. Part 202 is removed.

3. Part 204 is revised to read as follows:

PART 204—DATA TO SUPPORT FITNESS DETERMINATIONS

Subpart A—General Provisions

Sec.
204.1 Purpose.
204.2 Definitions.

Subpart B—Filing Requirements

204.3 Applicants for new certificate or commuter air carrier authority.
204.4 Carriers proposing to provide essential air transportation.
204.5 Certificated and commuter air carriers undergoing or proposing to undergo a substantial change in operations, ownership, or management.
204.6 Certificated and commuter air carriers proposing a change in operations, ownership, or management which is not substantial.
204.7 Revocation for dormancy.

Authority: 49 U.S.C. 1324, 1371, 1377, 1389.

Subpart A—General Provisions

§ 204.1 Purpose.

This part sets forth the fitness data that must be submitted by applicants for certificate authority, by applicants for authority to provide service as a commuter air carrier to an eligible point, by carriers proposing to provide essential air transportation, and by certificated air carriers and commuter air carriers proposing a substantial change in operations, ownership, or management. This part also contains the procedures and filing requirements applicable to carriers that hold dormant authority.

§ 204.2 Definitions.

As used in this part:

(a) *Act* means the Federal Aviation Act of 1958, as amended.

(b) *All-cargo air carrier or section 418 carrier* means an air carrier holding an all-cargo air service certificate issued under section 418 of the Act to provide domestic cargo transportation. *All-cargo air service* means domestic cargo transportation performed by any air carrier holding a certificate issued under section 418 of the Act.

(c) *Certificate authority* means authority to provide air transportation granted by the Department of Transportation or Civil Aeronautics Board in the form of a certificate of public convenience and necessity under section 401 of the Act or a certificate to perform all-cargo air service under section 418 of the Act. *Certificated carriers* are those that hold certificate authority.

(d) *Citizen of the United States* means:

(1) An individual who is a citizen of the United States or one of its possessions, or

(2) A partnership of which each member is such an individual, or

(3) A corporation or association created or organized under the laws of the United States or of any State, Territory, or possession of the United States, of which the president and two-thirds of the board of directors and other managing officers are such individuals and in which at least 75 percent of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions.

(e) *Commuter air carrier* means an air carrier holding or seeking authority under part 298 of this chapter that carries passengers on at least five round trips per week on at least one route between two or more points according to its published flight schedules that specify the times, days of the week, and places between which those flights are performed.

(f) *Domestic cargo transportation* means the carriage by aircraft in interstate or overseas air transportation of property or mail, or both.

(g) *Eligible point* is one that was on a certificated carrier's authorized route as of October 24, 1978 (Type A point), or was deleted from a certificate between July 1, 1968, and October 24, 1978, and has been designated as "eligible" (Type B point).

(h) *Essential air transportation* is that transportation which the Department has found to be essential under section 419 of the Act.

(i) *FAA* means the Federal Aviation Administration, U.S. Department of Transportation.

(j) *Fit* means fit, willing and able to perform the air transportation in question properly and to conform to the provisions of the Act and the rules, regulations and requirements issued under the Act.

(k) *Key personnel* include the directors, president, all vice presidents, the directors or supervisors of operations, maintenance, and finance, and the chief pilot of the applicant or air carrier, as well as any part-time or full-time advisors or consultants to the management of the applicant or air carrier.

(l) *Normalized operations* are those which are relatively free of start-up costs and temporary barriers to full-

VOL 56 ISS 116 JE 17 1991 UMI

scale operations posed by the carrier's limited experience.

(m) *Relevant corporations* are the applicant or air carrier, any subsidiary thereof, any predecessor thereof (*i.e.*, any air carrier in which any directors, principal officers or persons having a substantial interest have or once had a substantial interest), and any company (including a sole proprietorship or partnership) which has a significant financial or managerial influence on the applicant or air carrier. The latter includes:

(1) Any company (including a sole proprietorship or partnership) holding more than 50 percent of the outstanding voting stock of the applicant or air carrier; and

(2) Any company (including a sole proprietorship or partnership) holding between 20 percent and 50 percent of the outstanding voting stock of the applicant or air carrier and which has significant influence over the applicant or air carrier as indicated by 25 percent representation on the board of directors, participation in policy-making processes, substantial inter-company transactions, or managerial personnel with common responsibilities in both companies.

(n) *Substantial change in operations, ownership, or management* includes, but is not limited to, the following events:

(1) Changes in operations from charter to scheduled service, cargo to passenger service, short-haul to long-haul service, or (for a certificated air carrier) small-aircraft to large-aircraft operations;

(2) A petition for protection from creditors under the federal bankruptcy laws or a filing of a plan of reorganization under Chapter 11 of the federal bankruptcy laws;

(3) The acquisition by a new shareholder or the accumulation by an existing shareholder of beneficial control of 10 percent or more of the outstanding voting stock in the corporation; and

(4) A change in the president, chief executive officer or chief operating officer, and/or a change in at least half of the other key personnel within any 12-month period or since its latest fitness review, whichever is the more recent period.

(o) *Substantial interest* means beneficial control of 10 percent or more of the outstanding voting stock.

Subpart B—Filing Requirements

§ 204.3 Applicants for new certificate or commuter air carrier authority.

An applicant for a type of certificate authority it does not currently hold or for commuter air carrier authority shall file the data set forth in this section. However, if the applicant has previously formally filed any of the required data with the Department or with another Federal agency and they are available to the Department, and those data continue to reflect the current state of the carrier's fitness, the applicant may instead identify the data and provide a citation for the date(s) and place(s) of filing. Prior to filing any data, the applicant may contact the Department's staff to ascertain what data required by this section are already available to the Department and need not be included in the filing.

Note: If the applicant intends to use as evidence data it has previously filed pursuant to part 241 reporting requirements and those data contain errors, the applicant must first file corrected reports in accordance with § 241.22(g).

The Department may require a carrier to provide additional data if necessary to reach an informed judgment about its fitness.

(a) The name, address, and telephone number of the applicant.

(b) The form of the applicant's organization.

(c) The State law(s) under which the applicant is organized.

(d) If the applicant is a corporation, a statement provided by the Office of the Secretary of State, or other agent of the State in which the applicant is incorporated, certifying that the applicant corporation is in good standing.

(e) A sworn affidavit stating that the applicant is a citizen of the United States.

(f) The identity of the key personnel who would be employed by the applicant, including:

(1) Their names and addresses;

(2) The experience, expertise, and responsibilities of each;

(3) The number of shares of the applicant's voting stock held by each and the percentage of the total number of such shares issued and outstanding, and the citizenship and principal business of any person for whose account, if other than the holder, such interest is held;

(4) The citizenship of each; and

(5) A description of the officerships, directorships, shares of stock (if 10 percent or more of total voting stock outstanding), and other interests each holds or has held in any air carrier, foreign air carrier, common carrier, person substantially engaged in the business of aeronautics or persons whose principal business (in purpose or fact) is the holding of stock in or control of any air carrier, common carrier or person substantially engaged in the business of aeronautics.

(g) A list of all persons having a substantial interest in the applicant. Such list shall include:

(1) Each person's name, address and citizenship;

(2) The number of shares of the applicant's voting stock held by each such person and the corresponding percentage of the total number of such shares issued and outstanding, and the citizenship and principal business of any person for whose account, if other than the holder, such interest is held;

(3) If any two or more persons holding a substantial interest in the applicant are related by blood or marriage, such relationship(s) shall be included in the list; and

(4) If any person or subsidiary of a person having a substantial interest in the applicant is or has ever been

(i) an air carrier, a foreign air carrier, a common carrier, or

(ii) substantially engaged in the business of aeronautics, or

(iii) an officer or director of any such entity, or

(iv) a holder of 10 percent or more of total outstanding voting stock of any such entity, the list shall describe such relationship(s).

(h) A list of the applicant's subsidiaries, if any, including a description of each subsidiary's principal business and relationship to the applicant.

(i) A list of the applicant's shares of stock in, or control of, any air carrier, foreign air carrier, common carrier, or person substantially engaged in the business of aeronautics.

(j) To the extent any relevant corporation has been engaged in any business prior to the filing of the application, each applicant shall provide:

(1) Copies of the 10K Annual Reports filed in the past 3 years by any relevant corporation required to file such reports with the Securities and Exchange Commission, and

(2) Copies of recently filed 10Q Quarterly Reports, as necessary, in order to show the financial condition and results of operations of the enterprise current to within 3 months of the date of the filing of the application.

(k) If 10K Reports are not filed with the Securities and Exchange Commission, the following, for the 3 most recent calendar or fiscal years, reflecting the financial condition and results of operations of the enterprise current to within 3 months of the date of the filing of the application:

(1) The Balance Sheet of each relevant corporation;

(2) The Income Statement of each relevant corporation;

(3) All footnotes applicable to the financial statements, including:

(i) A statement as to whether the documents were prepared in accordance with Generally Accepted Accounting Principles, and

(ii) A description of the significant accounting policies of each relevant corporation, such as for depreciation, amortization of intangibles, overhauls, unearned revenues, and cost capitalization;

(4) A statement of significant events occurring subsequent to the most recent Balance Sheet date for each relevant corporation; and

(5) A statement identifying the person who has prepared the financial statements, his or her accounting qualifications, and any affiliation he or she has with the applicant;

(l) A list of all actions and outstanding judgments for more than $5,000 against any relevant corporation, key personnel employed (or to be employed) by any relevant corporation, or person having a substantial interest in any relevant corporation, including the amount of each judgment, the party to whom it is payable, and how long it has been outstanding.

(m) The number of actions and outstanding judgments of less than $5,000 against each relevant corporation, key personnel employed (or to be employed) by any relevant corporation, or person having a substantial interest in any relevant corporation, and the total amount owed by each on such judgments.

(n) A description of the applicant's fleet of aircraft, including:

(1) The number of each type of aircraft owned, leased and to be purchased or leased;

(2) Applicant's plans, including financing plans, for the purchase or lease of additional aircraft; and

(3) A sworn affidavit stating that each aircraft owned or leased has been certified by the FAA and currently complies with all FAA safety standards.

(o) A description of the current status of all pending investigations, enforcement actions, and formal complaints filed by the Department, including the FAA, involving the applicant or any relevant corporation, any personnel employed (or to be employed) by any relevant corporation or person having a substantial interest in any relevant corporation, regarding compliance with the Act or orders, rules, regulations, or requirements issued pursuant to the Act, and any corrective actions taken. (If an applicant has a compliance history that warrants it, additional information may be required.)

(p) A description of all charges of unfair or deceptive or anticompetitive business practices, or of fraud, felony or antitrust violation, brought against any relevant corporation or person having a substantial interest in any relevant corporation, or member of the key personnel employed (or to be employed) by any relevant corporation in the past 10 years. Such descriptions shall include the disposition or current status of each such proceeding.

(q) A description of any aircraft accidents or incidents (as defined in the National Transportation Safety Board Regulations, 49 CFR 830.2) experienced by the applicant, its personnel, or any relevant corporation, which occurred either during the year preceding the date of application or at any time in the past and which remain under investigation by the FAA, the NTSB, or by the company itself, including:

(1) The date of the occurrence;

(2) The type of flight;

(3) The number of passengers and crew on board and an enumeration of any injuries or fatalities;

(4) A description of any damage to the aircraft;

(5) The FAA and NTSB file numbers and the status of the investigations, including any enforcement actions initiated against the carrier or any of its personnel; and

(6) Positive actions taken to prevent recurrence. (If an applicant's history of accidents or incidents warrants it, additional information may be required.)

(r) A brief narrative history of the applicant.

(s) A description of all Federal, State and foreign authority under which the applicant has conducted or is conducting transportation operations, and the identity of the local FAA office and personnel responsible for processing an application for any additional FAA authority needed to conduct the proposed operations.

(t) A description of the service to be operated if the application is granted, including:

(1) A forecast Balance Sheet for the first normal year ending after the initially proposed operations have been incorporated, along with the assumptions underlying the accounts and amounts shown; and

(2) A forecast Income Statement, broken down by quarters, for the first year ending after the initially proposed operations are normalized, and an itemization of all pre-operating and startup costs associated with the initiation of the proposed service. Such Income Statement shall include estimated revenue block hours (or airborne hours, for charter operators), number of passengers and number of tons of mail and cargo to be carried, transport revenues and an estimate of the traffic which would be generated in each market receiving the proposed service. Such statements shall also include a statement as to whether the statements were prepared on the accrual or cash basis, an explanation of how the estimated costs and revenues were developed, a description of the manner in which costs and revenues are allocated, how the underlying traffic forecasts were made, and what load factor has been assumed for the average and peak month. Pre-operating and start-up costs should include, but are not limited to, the following: Obtaining necessary government approval; establishing stations; introductory advertising; aircraft, equipment and space facility deposits and rent; training; and salaries earned prior to start-up.

(u) A signed counterpart of Agreement 18900 (OST Form 4523) as required by part 203 of this chapter.

(v) The following certification, which shall accompany the application and all subsequent written submissions filed by the applicant in connection with its application:

Pursuant to title 18 United States Code 1001, I [the individual signing the application], in my individual capacity and as the authorized representative of the applicant, have not in any manner knowingly and willfully falsified, concealed or covered up any material fact or made any false, fictitious, or fraudulent statement or knowingly used any documents which contain such statements in connection with the preparation, filing or prosecution of the application. I understand that an individual who is found to have violated the provisions of 18 U.S.C. 1001 shall be fined not more than $10,000 or imprisoned not more than five years, or both.

§ 204.4 Carriers proposing to provide essential air transportation.

Applicants proposing to provide essential air transportation have been divided into two categories, and are subject to differing data submission requirements as set forth in paragraphs (a) and (b) of this section. However, if a carrier has previously filed any of the required data with the Department or other Federal agency and they are available to the Department, and these data continue to reflect the current state of the carrier's fitness, the carrier may instead identify the data and provide a citation for the date and place of filing. All carriers may contact the Department to ascertain what information is already

VOL 56 ISS 116 16 JE 17 1991 UMI

available to the Department and thus may not need to be resubmitted.

(a) Carriers who propose to begin or expand non-subsidized essential air service when the incumbent leaves the market must file the following information:

(1) All of the information required under § 204.3 of this part.

(2) A description of the back-up aircraft available to the applicant, including:

(i) The number of each type of such aircraft;

(ii) The conditions under which such aircraft will be available to the carrier;

(iii) The carrier's plans for financing the acquisition or lease of such additional aircraft; and

(iv) A sworn affidavit stating that all such aircraft have been certified by the FAA and currently comply with all FAA safety standards.

(3) A description of the fuel available to perform the proposed essential air services and the carrier's contracts with fuel suppliers.

(4) The carrier's systemwide on-time and completion record for the preceding year and, if applicable, in the subject market(s).

(5) A list of the markets the carrier serves and the number of weekly round trips it provides in each.

(6) A description of the average number of block hours each type of aircraft is currently flown per day.

(7) An estimate of the impact the proposed essential air service would have on the carrier's utilization of its aircraft fleet.

(8) A detailed schedule of the service to be provided, including times of arrivals and departures, the aircraft to be used for each flight, and the fares to be charged.

(9) A pro-forma income statement for the proposed operation for the first annual period.

(b) Carriers filing proposals to provide subsidized service in response to an order inviting proposals shall file:

(1) All of the information required under § 204.3 of this part.

(2) All of the information required under paragraph (a) of this section.

(3) A forecast Income Statement covering the operations conducted in essential air service for the first year following the initiation of the proposed essential services. Such statement shall include:

(i) Subsidy needed;

(ii) Estimated block hours and revenue miles by type of aircraft;

(iii) Total projected revenue including volumes of passengers and freight by essential air service market and the associated fares and rates;

(iv) An explanation of the derivation of estimates of operating expenses; and

(v) A description of the manner in which costs and revenues are allocated.

(4) A traffic forecast including a load factor analysis on all segments between the small community and the hub; and an estimate of the number of seats available to and from the eligible point each day.

§ 204.6 Certificated and commuter air carriers undergoing or proposing to undergo a substantial change in operations, ownership, or management.

(a) A certificated or commuter air carrier proposing a substantial change in operations, ownership or management shall file the data set forth in § 204.3. These data must be submitted in cases where:

(1) The proposed change requires new or amended authority, and

(2) Although the carrier's existing certificate or commuter authority is adequate for the performance of its planned services, the change substantially alters the factors upon which its latest fitness finding is based. Information which a carrier has previously formally filed with the Department, or with another Federal agency where they are available to the Department, which continues to reflect the current state of the carrier's fitness may be omitted. The carrier instead should identify the data and provide a citation for the date(s) and place(s) of filing. Prior to filing any data, the carrier may contact the Department (Air Carrier Fitness Division) to ascertain what data required by this section, if any, are already available to the Department or are not applicable to the substantial change in question and need not be included in the filing.

(b) Information filings pursuant to this section made to support an application for new or amended certificate authority shall be filed with the application and addressed to the Documentary Services Division, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Information filed in support of a certificated or commuter air carrier's continuing fitness to operate under its existing authority in light of substantial changes in its operations, ownership or management shall be addressed to the Chief, Air Carrier Fitness Division, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590.

§ 204.8 Certificated and commuter air carriers proposing a change in operations, ownership, or management which is not substantial.

Carriers proposing to make a change which would not substantially affect their operations, management, or ownership, such as certificated carriers applying for additional authority which would not substantially change their operations, will be presumed to be fit and need not file any information relating to their fitness at time of the change. However, if the Department concludes, from its own analysis or based on information submitted by third parties, that such change may bring the carrier's fitness into question, the Department may require the applicant carrier to file additional information.

§ 204.7 Revocation for dormancy.

(a) An air carrier that has not commenced any type of air transportation operations for which it was found fit, willing, and able within one year of the date of that finding, or an air carrier that, for any period of one year after the date of such a finding, has not provided any type of air transportation for which that kind of finding is required, is deemed no longer to continue to be fit to provide the air transportation for which it was found fit and, accordingly, its authority to provide such air transportation shall be revoked.

(b) An air carrier found fit which commences operations within one year after being found fit but then ceases operations, shall not resume operations without first filing all of the data required by § 204.3 at least 45 days before it intends to provide any such air transportation. Such filings shall be addressed to the Documentary Services Division, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. The Department will entertain requests for exemption from this 45-day advance filing requirement for good cause shown. If there has been no change in fitness data previously formally filed with the Department, the carrier shall file a statement to that effect signed by one of its officers. The carrier may contact the Department (Air Carrier Fitness Division) to ascertain which data are already available to the Department and need not be refiled. A carrier to which this paragraph applies shall not provide any air transportation for which it is required to be found fit, willing, and able until the Department decides that the carrier continues to be fit, willing, and able to perform such air transportation. During the pendency of the Department's consideration of a data submission under this paragraph, the expiration period set out in paragraph (a) of this section shall be stayed. If the decision or finding by the Department on the issue of the carrier's fitness is favorable, the date of that decision or finding shall be the date considered in applying paragraph (a) of this section.

(c) For purposes of this section, the date of a Department decision or finding shall be the service date of the Department's order containing such decision or finding, or, in cases where the Department's decision or finding is made by letter, the date of such letter.

(d) For purposes of this section, references to operations and to the providing of air transportation shall refer only to the actual performance of flight operations under an operating certificate issued to the carrier by the FAA.

PART 291—DOMESTIC CARGO TRANSPORTATION

4. The authority citation for part 291 continues to read as follows:

Authority: Secs. 101, 102, 204, 401, 407, 406, 416, 418, Pub. L. 85–726, as amended, 72 Stat. 740, 743, 766, 767; 49 U.S.C. 1301, 1302, 1324, 1371, 1377, 1378, 1386, 1388.

5. Subpart B of part 291 would be revised to read as follows:

Subpart B—All-Cargo Air Service Certificates

Sec.
291.10 Applications.

Subpart B—All-Cargo Air Service Certificates

§ 291.10 Applications.

Applications for all-cargo air service certificates shall comply with the provisions of part 201 and subpart Q of part 302 of this chapter with regard to filing procedures, and with the provisions of part 204 of this chapter with regard to evidentiary requirements.

6. Subparts C, D, E, and F would be amended as follows:

§§ 291.20, 291.23, 291.24, 291.34, 291.50 [Amended]

(a) In §§ 291.20, 291.23(b), 291.24, 291.34, and 291.50, remove the word "Board" and add, in its place, the word "Department".

291.42 [Amended]

(b) In § 291.42(a)(2), remove the words "Office of the Comptroller, Information Management Division, B–46a, Civil Aeronautics Board, Washington, DC 20428" and add, in their place, the words "Data Administration Division, DAI–20, room 4125, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001".

PART 302—[AMENDED]

7. The authority citation for part 302 continues to read as follows:

Authority: Secs. 101, 203, 204, 401, 402, 403, 404, 406, 412, 416, 901, 1001, 1002, 1005, Pub. L. 85–726, as amended, 72 Stat. 737, 742, 743, 754, 757, 758, 760, 765, 770, 783, 788, 794, 49 U.S.C. 1301, 1323, 1324, 1371, 1372, 1373, 1374, 1376, 1382, 1471, 1481, 1482, 1485; Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989; E.O. 11514, Pub. L. 91–90 (42 U.S.C. 4321); 84 Stat. 772, 39 U.S.C. 5402, unless otherwise noted; 49 U.S.C. Subtitle I; Administrative Procedure Act (5 U.S.C. 551 et seq.).

8. In § 302.1701 of subpart Q, paragraph (d) would be added to read as follows:

§ 302.1701 Applicability.

* * * * *

(d) Applications for all-cargo air service certificates, and renewals, alterations, amendments, modifications, suspensions, and transfers of such certificates under section 418 of the Act.

Issued in Washington, DC, on June 7, 1991.

Jeffrey N. Shane,
Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[INTL–939–86]

RIN 1545–AJ70

Insurance Income of a Controlled Foreign Corporation for Taxable Years Beginning After December 31, 1986

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking; Correction.

SUMMARY: This document contains corrections to proposed income tax regulations relating to the definition and computation of the insurance income of a controlled foreign corporation.

FOR FURTHER INFORMATION CONTACT: David R. Cooper at 202–566–6645 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains corrections to proposed amendments to the Income Tax Regulations (26 CFR part 1) under sections 953, 954, 964, 1248, and 6046 of the Internal Revenue Code of 1986.

Need for Correction

As published, the proposed regulations contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication on April 17, 1991, of the proposed rulemaking, which was the subject of FR Doc. 91–8694, is corrected as follows:

Paragraph 1. On page 15540, third line down from the top of the second column, the language "26 CFR Parts 1 and 602" should be corrected to read "26 CFR Part 1".

§ 1.953–3 [Corrected]

Par. 2. On page 15552, in the third column, in § 1.953–3, line 10 of paragraph (a), the language "recharacterized premiums even though" is corrected to read "recharacterized as non RPII premiums even though".

§ 1.953–4 [Corrected]

Par. 3. On page 15555, in the third column, in § 1.953–4, line 8 of *Example 1* of paragraph (a)(2)(ii), the language "under § 1.953–5(c)(3)(iii)(A), is appropriated" is corrected to read "under § 1.953–5(c)(3)(iii)(A), is apportioned".

§ 1.953–5 [Corrected]

Par. 4. On page 15557, in the second column, in § 1.953–5, in the first line of paragraph (b)(2)(ii)(B)(*3*), the word "decrease" is corrected to read "increase".

§ 1.953–6 [Corrected]

Par. 5. On page 15562, in the second column, § 1.953–6, the eleventh line of paragraph (g)(1)(i), the language "to income that is not insurance under" is corrected to read "to income that is not insurance income under".

Par. 6. On page 15563, in the third column, in § 1.953–6, in paragraph (h)(4) *Example 3* (i), a new line containing the language "*Pro rata amount*" is added immediately following the line "Lesser of:".

Par. 7. On page 15563, in the third column, in § 1.953–6, in the eighth line of the flush material following paragraph (h)(4) *Example 3* (iii), the language "pro rata income of $875) and subpart F" is corrected to read "pro rata amount of $875) and subpart F".

Par. 8. On page 15563, in the third column, in § 1.953–6, in the tenth line of paragraph (h)(5)(i), the language "which the foreign corporation, computed" is corrected to read "which the foreign corporation was a controlled foreign corporation, computed".

Par. 9. On page 15564, in the first column, § 1.953–6, in lines fourteen through sixteen of the *Example* in paragraph (h)(6)(ii), the language "$1,000

VOL 56 ISS 116 16 JE 17 1991 UMI

is related person insurance income of which $1,000 is related person insurance income. X also had earings and profits for the" is corrected to read "$1,000 is related person insurance income. X also had earnings and profits for the".

Par. 18. On page 15564, in the second column, in § 1.953–6, the word "or" should be added as a new line immediately following the fourth line of the *Example* (ii) in paragraph (h)(6)(ii).

§ 1.953–7 [Corrected]

Par. 11. On page 15565, in the first column, in § 1.953–7, the twentieth line of *Example 1* of paragraph (a)(2), the language "(25% × 80%). The insurance income" is corrected to read "(25% × 60%). The insurance income".

Par. 12. On page 15565, in the first column, in § 1.953–7, the section heading immediately following *Example 2* which reads "(2) *Election to treat income as effectively connected*—" is corrected to read "(c) *Election to treat income as effectively connected*—".

§ 1.6046–1 [Corrected]

Par. 13. On page 15570, in the first column, in § 1.6046–1, the sixth line of paragraph (a)(2)(*a*) which reads "on January 1, 1963, if on that date he".

PART 602—[Corrected]

Par. 14. On page 15570, in the second column, the heading "**PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT**" and instructional paragraphs 9 and 10 are removed.

Par. 15. On page 15570, in the second column, at the end of the document, the following name and title of the official signing the document should have appeared as follows:

"**Fred T. Goldberg, Jr.,**
Commissioner of Internal Revenue".

Dale D. Goode,
Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Virginia Regulatory Program; Regulatory Reform Review III and Incidental Coal Extraction Exemption

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule; reopening; correction.

SUMMARY: OSM is correcting an error on the proposed rule reopening and extending the comment period on a proposed amendment to the Virginia permanent program which was published on May 23, 1991 (56 FR 23664–23666). The correction will revise the subject of the proposed rule.

FOR FURTHER INFORMATION CONTACT: Mr. Robert A. Penn, Office of Surface Mining Reclamation and Enforcement, Big Stone Gap Field Office, P.O. Drawer 1216, Powell Valley Square Shopping Center, room 220, Route 23, Big Stone Gap, Virginia 24219, Telephone (703) 523–4303.

SUPPLEMENTARY INFORMATION: The following correction is made to Virginia Regulatory Program amendment reopening which was published on Thursday, May 23, 1991 (56 FR 23664–23666): on page 23664, the subject of the proposed rule is changed from Virginia Regulatory Program; Coal Surface Mining Reclamation Fund to Virginia Regulatory Program; Regulatory Reform Review III and Incidental Coal Extraction Exemption.

Dated: June 6, 1991.

Carl C. Close,
Assistant Director, Eastern Support Center.

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–91–43]

Drawbridge Operating Regulations; Atlantic Intracoastal Waterway, FL

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: This proposed amendment would revoke the regulations for the Sunrise Boulevard (SR 838) drawbridge, mile 1062.6, at Fort Lauderdale because the low-level drawbridge that warranted the existing special regulations has been replaced by a higher and wider bascule bridge providing improved highway traffic flow and less drawbridge openings required by vessels. This proposal is being made to ease the burden on navigation since special operating restrictions are no longer needed to accommodate the needs of vehicular traffic.

DATES: Comments must be received on or before August 1, 1991.

ADDRESSES: Comments regarding this proposed change should be mailed to Commander (oan), Seventh Coast Guard District, 909 Southeast 1st Avenue, Miami, FL 33131–3050. Any comments received will be available for inspection and copying at Brickell Plaza Federal Building, room 406, 909 Southeast 1st Avenue, Miami, FL. Documents and comments concerning this regulation may be inspected Monday through Friday between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Brodie Rich, (305) 536–4103.

SUPPLEMENTARY INFORMATION: Interested parties submitting written views, comments, data, or arguments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Mr. Brodie Rich, project officer, and Lt. Genelle Tanos, project attorney.

Discussion of Proposed Regulations

The Sunrise Boulevard drawbridge presently opens on the quarter-hour and three quarter hour from 7:15 a.m. to 6:15 p.m. from November 15 through May 15. This amendment revokes the regulations that are no longer needed since the new drawbridge opened for service on August 13, 1990. The new high-level drawbridge replacement was permitted by the Coast Guard with the understanding that the existing special operating regulations would be revoked once the new bridge was completed.

Economic Assessment and Certification

This action is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034, February 26, 1979). Since there is no economic impact, a full regulatory evaluation is unnecessary. This action will not have a significant economic impact on a substantial number of small entities. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, the Coast Guard proposes to amend part 117 to title 33, Code of Federal Regulations, the read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

§ 117.261 [Amended]

2. In § 117.261 paragraph (gg) is removed and reserved.

Dated: May 30, 1991.

Robert E. Kramek,
Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

45 CFR Part 205

RIN: 0970–AA82

Aid to Families with Dependent Children and Adult Public Assistance; Revised Quality Control System

AGENCY: Family Support Administration (FSA), HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would establish a revised quality control system for the Aid to Families with Dependent Children (AFDC) and the Adult assistance programs beginning in fiscal year 1991. Under the new system, (1) Disallowances in AFDC matching funds (Federal financial participation) would be imposed on those States whose assistance payment error rates are above the national average; (2) both overpayments and underpayments made to AFDC recipients would be taken into account; (3) there would be incentives for States to improve their overpayment recoveries and their child support collections; (4) there would be a Departmental Quality Control Review Panel to provide a review of differences between State and Federal AFDC review findings; (5) the Departmental Appeals Board would review all other quality control disallowance issues in dispute between the States and Federal government; and (6) some of the policies and procedures contained in sections 2 and 3 of the Department's Quality Control (QC) Manual would be incorporated.

DATES: Interested persons and agencies are invited to submit written comments concerning these regulations no later than August 16, 1991.

ADDRESSES: Comments should be submitted in writing to the Assistant Secretary for Family Support, Attention: Mr. Sean Hurley, Director, Division of Quality Control, Office of Family Assistance, room 559a, 370 L'Enfant Promenade, SW., Washington, DC 20447, or delivered to the Office of Family Assistance between 8:00 a.m. and 4:30 p.m. during regular business days. Comments received may be inspected during the same hours by making arrangements with the contact person identified below.

FOR FURTHER INFORMATION CONTACT: Mr. Sean Hurley, Office of Family Assistance, Division of Quality Control, room 559a, 370 L'Enfant Promenade, SW., Washington, DC 20447 telephone (202) 401–9296.

SUPPLEMENTARY INFORMATION:

Background

This notice of proposed rulemaking (NPRM) would provide rules governing the revised Quality Control (QC) System for the Aid to Families with Dependent Children (AFDC) program established by section 406 of the Social Security Act, as added by section 8004 of the Omnibus Budget Reconciliation Act of 1989 (Pub. L. No. 101–239), as well as revised program rules governing quality control for the Adult assistance programs. The QC system is the major management tool for measuring the accuracy of payments and the level of Federal funding under the AFDC and Adult assistance programs, and for obtaining the data needed to analyze and improve performance in paying benefits. These two objectives are accomplished by a continuous review of statistically valid and reliable State samples of AFDC and Adult assistance cases and Federal samples of AFDC assistance cases. To the extent that Medicaid eligibility is based on AFDC eligibility, these regulations also affect the Medicaid program.

Under the current AFDC regulations, all States are subject to a reduction of Federal financial participation (FFP) for incorrect payments that exceed the national error rate tolerance of 3 percent (4 percent for Guam, Puerto Rico, and the Virgin Islands) based on the QC sample data during an annual review period of October 1 through September 30. If a State fails to meet the prescribed error rate tolerance, it is subject to a loss in FFP unless it can demonstrate it made a good faith effort to comply.

Following the legislative mandate in section 406(h) of the Social Security Act, we have consulted with representatives of the National Governors' Association, the American Public Welfare Association and the States in developing the regulations in the following areas: Sampling methodology; sample size and selection procedures; time frames for sample completion and reporting of QC data; resolution of differences between State and Federal review findings; notification of error rates; and disallowances.

We have also included in the proposed regulations certain basic procedures currently contained in the QC Manual which were previously incorporated only by reference in the regulations. (The QC Manual is intended to contain operating instructions and procedures implementing the Federal policy set forth in the regulations. Thus, for example, the policy of requiring minimum verification and documentation standards for each element of eligibility and payment amount is included in the proposed regulations at § 205.42(c)(2). However, implementing specific verification and documentation requirements are set forth in the QC Manual.)

Further, we have also included in the proposed regulations, the existing regulatory requirements for the review of: (1) AFDC negative case actions in the States and in Guam, Puerto Rico, and the Virgin Islands, and (2) active cases and negative case actions of the Adult assistance programs in Guam, Puerto Rico, and the Virgin Islands, under titles I, X, XIV, and XVI (AABD) of the Social Security Act. While section 406 does not require a change in the policies governing negative case actions and the Adult assistance programs, we are changing these policies, where appropriate, to be consistent with the AFDC active case requirements. However, section 406 requires the Department to conduct a study of the AFDC negative case action system and make recommendations to Congress on the future design and use of the negative case action QC system by October 1, 1992.

VOL
56
ISS
116
JE
17
1991
UMI

The Adult assistance programs exist only in Guam, Puerto Rico, and the Virgin Islands. The Department's authority for requiring a QC system in these programs derives from the requirement that Federal matching funds be provided for proper assistance payments (sections 3, 1603, 1403, and 1603 of the Social Security Act) and from the authority in section 1102 of the Act to issue rules for proper and efficient administration. However, for the purpose of uniformity and consistency, we are proposing to apply, except as indicated, the same sampling and review requirements contained in §§ 205.40, 205.41, and 205.42 (a) through (f) to both the AFDC and the Adult assistance programs. Sections 205.42 (g), (h), (i) and 205.43 do not apply to the Adult assistance programs since the Federal rereview and the calculation of the regressed error rates for these programs are not utilized.

We are proposing to revise §§ 205.40, 205.42 and 205.43, add § 205.41, and remove and reserve § 205.44.

Major Provisions of the Statute

The Omnibus Budget Reconciliation Act of 1989 (OBRA 1989), which became law on December 19, 1989, provides for a revised QC system for AFDC beginning in fiscal year 1991. While Congress made changes from the current to the revised QC system in the error rate tolerance and method for calculating disallowances, the basic design and features of the system remain unchanged. The major provisions of the legislation include:

1. Waiver of all pending or potential QC disallowances for fiscal years 1981 through 1990, estimated at $2.4 billion;
2. Establishment of a new error rate tolerance set at the national average error rate each year, or at 4 percent, whichever is higher;
3. Exclusion of certain types of errors in computing a State's payment error rate;
4. Calculation of disallowances based on a sliding scale which reflect the degree to which a State's error rate exceeds the national average;
5. Adjustment of disallowances based on good performance in achieving other program goals (i.e., low underpayment rate relative to the national underpaymentrate, child support collections and overpayment recoveries); and
6. Establishment of a Departmental QC Review Panel to review differences between State and Federal QC findings.

Discussion of the Proposed Regulations

The discussion of the proposed rules is divided into four parts. The first addresses sampling issues; the second discusses all issues involving the QC review; the third describes the error rate and disallowance calculations and notification procedures; and the fourth discusses data management.

Sampling Issues

Sampling Plan Requirements and Submittal Dates

The proposed regulations at § 205.41(d) specify the content of the State QC sampling plan. However, except as noted below under "Sampling methodology," this does not represent a change in sample plan requirements from those applicable to the current QC system as set forth in the QC Manual, section 2 (Sampling and Statistical Methods), which is applicable to both the AFDC and Adult assistance programs. The plan must be in effect for the entire annual sample period and must include the population to be sampled, a description of the lists from which the sample is selected, the sample size, the sample selection procedure, the option to drop or complete cases for which a review was completed within the last six months, and the procedure to correct for oversampling or undersampling.

The proposed regulations at § 205.41(c) would require States to submit a reliability waiver statement (for active AFDC only), by the first day of the annual sample period. This is a change from 60 calendar days prior to the selection of the October sample, as set forth in the QC Manual.

We have also incorporated in these proposed rules submittal dates for universe estimates, sample intervals, monthly lists of selected sample cases, computer-generated random start numbers and seed numbers, and reserve pool cases (if applicable). The proposed rules would require the universe estimates and sample intervals to be submitted within 30 calendar days prior to the selection of the October sample and the remaining information to be submitted within 10 calendar days of the sample selection date specified in the State's approved sampling plan. Although these time frames do not represent a change to current procedure as set forth in the QC Manual, we have explicitly incorporated these requirements in the regulations as required by section 406(h) of the Social Security Act.

Sample Selection

In order to ensure (1) that all cases, including cases added to the rolls during the review month are subject to sampling, and (2) that all payments, including adjustments to sample cases, are included in the QC review, we had considered changing our policy to require that sample selection would be made after the end of the review month. Under current policy, States are required to select their review month samples from lists of active cases with payments authorized prior to sample selection and paid by the end of the review month. States are permitted to use regular first-of-the-month payroll listings as the frame for selection of sample cases, extend that frame at the end of the review month, and continue sampling all the cases added to the AFDC rolls during the review month that were not on the regular payroll listing. In recent years, however, an increasing number of cases have received payments and payment adjustments during the review month but after the sample has been selected. These added cases and payment adjustments are not being included in the QC review process.

Although more than half of the States are either sampling at the end of, or after, the sample month, we are not making any change to the current policy at this time for two reasons. First, some States integrate their AFDC samples with the Food Stamp and/or Medicaid QC samples which permit sampling at the beginning of the sample month, and second, we are proposing in § 205.42(e) to reduce the sample disposition and data submission time frames which are measured from the end of the sample month. However, we plan to continue studying this policy to ensure the validity of the sample and invite comments on this issue to assist us in formulating policy.

Sample size

As requested by the State representatives, the NPRM at § 205.41(d)(3) retains the current active AFDC and Adult assistance sample sizes specified in QC Manual, sections 2 and 3, with an option for States to reduce their standard sample size. States may not reduce their standard sample sizes below the minimum sizes specified in the QC Manual. The regulations would also retain the requirement that a State provide the Department with a reliability waiver statement as an addendum to its sampling plan, if the State elects the option to reduce its sample for completed AFDC active case reviews below the standard size. When a State opts for a reduced AFDC active sample, the reliability waiver statement ensures that the risk of reduced precision in the error rate estimate will be shared by the State and Federal government.

The negative case action sample size requirements are the same for both the AFDC and the Adult assistance programs. Before October 1990, larger AFDC negative case action samples were required for Guam, Puerto Rico, and the Virgin Islands in order to have adequate data to make six-month incentive payment determinations under section 403(j) of the Social Security Act. Since section 406(b) repealed section 403(j), effective October 1, 1990, we have reduced the AFDC negative case action sample requirements for Guam, Puerto Rico, and the Virgin Islands. However, the proposed regulations retain the current negative case action sample requirements in the Adult assistance programs for Guam, Puerto Rico, and the Virgin Islands.

We believe these sample sizes are sufficient to provide both valid and reliable estimates of States' error rates and adequate information for States to identify problem areas for corrective action purposes. For purposes of uniformity and consistency, the sample sizes are included in the proposed regulations for AFDC and the Adult assistance programs, although the statute requires the Department to regulate in this area only for the AFDC program.

Sampling Methodology

Under § 205.41(d)(4) of the proposed regulations, States would select their samples using the systematic random sampling method. This has always been the preferred method for selection of the State samples. The method conforms to principles of probability sampling, is easily implemented, and can easily be duplicated to provide Federal oversight with an audit trail. Currently, 46 States are using this method. States may continue to stratify their samples in accordance with procedures specified in the QC Manual, section 2, and may continue to integrate their AFDC active case samples with Food Stamps and Medicaid QC samples.

QC Review Issues

Treatment of State Plan Provisions

The QC review is conducted against the substantive conditions of eligibility and amount of assistance payment provisions as reflected in State operating policies that are consistent with the State plan. The State plan is a statement of the conditions to which a State commits itself in the operation of its program. Since 1982, for AFDC, States have utilized the State plan preprint, entitled "Streamlined State Plan For Title IV–A of the Social Security Act: Financial Assistance *Aid to Families with Dependent Children*", as the vehicle for submitting State plans and State plan amendments. For the Adult assistance programs, Guam, Puerto Rico, and the Virgin Islands use non-streamlined operational "State" plans. To receive Federal matching funds, each State agrees to administer its AFDC program "in accordance with title IV–A of the Act" and "all other applicable Federal laws and regulations * * *". Under current regulations at § 205.40, if an approved State plan provision, or a pending plan amendment submitted to but not acted upon by the Department, is determined to be inconsistent with Federal law or regulations, the QC review is conducted against the provision in the existing State plan until a revised plan amendment is submitted or the pending plan amendment is finally disapproved. Under these circumstances, a State could avoid QC errors by simply not submitting a plan amendment that adheres to the statute or regulations.

Section 402(c)(2)(A) addresses this problem. It generally provides that, if an approved State plan provision is determined to be inconsistent with Federal law or regulation, and the State has been notified of the inconsistency, the QC review will be governed by the provision of Federal law or regulation. We recognize that a State will need some lead time after notification of a plan inconsistency to submit an amendment to the State plan and revise its operating procedures. We are, therefore, proposing in § 205.42(b)(1)(i) to provide States with a period of 60 calendar days after receipt of notification of the inconsistency to submit an amendment to the State plan removing the inconsistency. Unless an amendment has been submitted, sample cases selected for the review month after the 60-day period will be reviewed against applicable Federal law and regulations. We believe that this time period is consistent with the intent of the notification process in the statute. If an amendment is submitted timely, we will review against its provisions until disapproval by the Department becomes final. Once disapproval by the Department becomes final, we will begin reviewing against applicable provisions of Federal law and regulations with sample cases selected for the review month immediately following the date that disapproval becomes final. The review will continue on this basis until the State has received approval of a plan amendment. We believe it is reasonable to conduct the review against the provisions of applicable Federal law and regulations, once a State plan amendment designed to remove an inconsistency has been submitted and disapproved. Otherwise, it is possible that a series of unapprovable plan amendments may be submitted, thus effectively forestalling implementation of the applicable Federal law and regulations.

Section 402(c)(2)(A) is silent on the appropriate treatment of a pending plan amendment which is inconsistent with Federal law or regulations. If a State implements a plan amendment submitted to but not acted upon by the Department, the QC review will continue to be conducted against the pending plan amendment until final disapproval by the Department. Once the plan amendment is finally disapproved, sample cases selected for the review month immediately following the date that disapproval becomes final will be reviewed against the existing approved plan, if the plan is consistent with Federal law and regulations. Where the approved plan is inconsistent with Federal law and regulations, we will begin reviewing against Federal law and regulations until the date of approval of a revised plan amendment. Since a State would have had advance notice of the inconsistency during the disapproval process, we believe that additional notification would not be necessary.

Section 402(c)(2)(B)(ii) requires the Secretary to grant a State a reasonable time period to make the State plan consistent with Federal law and regulations if it is necessary for the State to enact a new law. As indicated in the proposed regulations at § 205.42(b)(1)(iii), if a new law needs to be enacted, the State shall immediately, after receipt of notification of the inconsistency between the State plan and Federal law and regulations, advise the Department. We are not proposing a specific time period for requiring the State to enact new laws and amend its State plan. Since we anticipate these would be unique in nature and infrequent in occurrence, time frames for their resolution should be addressed on a case-by-case basis by the Department.

We believe these time frames afford the States a reasonable time period to change identified inconsistencies in their State plans and, thus, conforms to the intent of Congress that the QC reviews be conducted against the substantive conditions of eligibility and amount of payment.

Treatment of Court Orders

Section 402(c)(2)(B)(ii) provides that, for error rate determination purposes, the QC review will be conducted in

VOL 56 ISS 116 JE 17 1991 UMI

accordance with the applicable court orders. Therefore, a QC sample case paid in compliance with a court order issued by a Federal, State or local court will be considered correctly paid if all other eligibility and payment conditions not affected by the court order are met. The proposed QC regulation reflects this review criterion at § 205.42(b)(2).

Current regulations at § 205.10(b)(3) provide that Federal matching is available for "Payments of assistance within the scope of the Federally aided public assistance programs made in accordance with a court order." Since the QC system is the legislatively prescribed vehicle for assessing disallowances of assistance payments under the AFDC program, Federal matching is available for all payments to AFDC assistance units subject to QC sampling, made in accordance with a court order without regard to the "scope" of program limitation noted above.

We are not, however, proposing to amend § 205.10(b)(3). The regulations at § 205.10(b)(3) continue to be applicable since court order matching specifications still apply to AFDC assistance units not included in the QC sample universe (e.g., emergency assistance and presumptive eligibility).

While QC will review to the conditions of all court orders under the proposed regulations, it continues to be important for States to defend against any legal challenge to Federal AFDC law, regulation or policy. In order to assist the States in meeting these legal challenges, it is essential that the Department is immediately advised when law suits that challenge substantive Federal AFDC eligibility and payment rules are filed against the State, or its political subdivisions. This is especially true when the law suit affects payments of assistance units subject to QC sampling.

Treatment of Changes in Federal Law

Section 408(c)(3)(A) provides for excluding QC payment errors resulting solely from a State's failure to properly implement changes in Federal statute within six months after the effective date of the changes or the issuance of final regulations, where such regulations are necessary to construe or apply the Federal statutory changes, whichever is later. This means, for example, that if statutory changes are effective as of October 1 of a given year and that necessary final (or interim final) regulations are issued on January 1 of the following year, a State will have until July 1 of that year to implement such changes before any payment error resulting solely from such changes will be counted in the computation of a State error rate. The QC review will be conducted in accordance with permissible State practice after the end of the six-month period, i.e., July 1 in our example. We plan to notify the States when the six-month procedures will apply. Although payment errors will not be counted in the error rate computation during the six-month period, we plan to collect this information for management purposes. Proposed regulations are set forth at § 205.42(d)(2)(i).

Detrimental Reliance

Sections 408(c)(3) (B) and (C) provide for excluding from consideration as an erroneous payment, a payment that is in error solely by reason of "the State's reliance upon and correct use of erroneous information provided by the Secretary about matters of fact" and a payment that is in error solely by reason of "the State's reliance upon and correct use of written statements of Federal policy provided to the State by the Secretary." The proposed regulations at § 205.42(d)(2)(ii), therefore, specify that an assistance payment made by a State shall not be considered an erroneous payment if the payment is in error solely because of the State's reliance upon and correct use of incorrect factual information or incorrect written policy statements provided by the Department.

"Reliance upon and correct use of incorrect factual information" in the proposed rules means that the State depended on the written factual information to make payment decisions, had reasonable expectation that the information was timely and accurate, and followed procedures for access and use of the information. State exemption from a payment error as a result of incorrect factual information will be made on a case-by-case basis. For example, the Department supplies States with Social Security benefit information via the Beneficiary and Earnings Data Exchange system (BENDEX). In order to get appropriate information from BENDEX, it is necessary for a State to provide specific information about potential beneficiaries. Failure to do so can result in incorrect information being supplied to the State. In this instance, the State would have failed to follow procedures for access to BENDEX data. The resulting error would not be excluded from the error rate.

"Incorrect written statements of Federal policy by Department officials" in the proposed rules means written policy from a Federal official in the Department responsible for dissemination of such policy in the AFDC program (i.e., from the Assistant Secretary for Family Support, a FSA Regional Administrator, or the Director of the Office of Family Assistance). This provision applies to situations where the State's eligibility and payment policy correctly reflects the policy directive provided by the Department official, but the directive is subsequently determined to be incorrect. A change in circumstances (i.e., a change that may affect the eligibility and payment amount of the assistance unit) would occur on the date that the Assistant Secretary for Family Support, a FSA Regional Administrator, or the Director of the Office of Family Assistance notifies the State of the correct policy or, if applicable, the effective date. Payment errors will be cited beginning with the second month following the month of notification or, if applicable, with the effective date pursuant to § 205.42(d)(1) as a change in circumstances.

Declaration of State of Emergency or Disaster

Section 408(c)(3)(D) provides that an assistance payment issued by a State shall not be considered an erroneous payment if the payment is in error solely because of the occurrence of an event in the State that results in a declaration of a state of emergency or major disaster by the President or the Governor of the State. The state of emergency or major disaster must be declared pursuant to Federal or State statute and the event must directly affect the State's ability to make correct payments. The proposed regulations would add this as one of the types of payment errors which will not be counted in the determination of a State's error rate.

We have specified in the proposed regulations at § 205.42(d)(2)(iii) that the State must provide adequate documentation of the event and its impact on the State's eligibility and payment determination process for consideration by the Department. Request for error exclusion under this provision must be submitted in writing to the Department as soon as possible after a state of emergency or disaster is declared. The request must include: A copy of the declaration; a detailed explanation of the circumstances; identification of the affected jurisdictions; the reason(s) why the State's ability to make correct payments has been or will be impaired; the length of time required to overcome the effects of the emergency or disaster; and the actions the State is taking to minimize the magnitude and duration of the negative effect. The Department will consider the appropriateness of each request and notify the State accordingly. The State will be required to continue to cite errors in accordance with permissible State practice until a decision on its request has been made. If the request is appropriate, errors due solely to the effects of the emergency or disaster will be excluded in the determination of the State's error rate beginning with the date of the emergency or disaster.

Monthly Reporting

Section 408(c)(3)(E) excludes, for QC purposes, errors which result from "the failure of a family to submit monthly reports to the State pursuant to section 402(a)(14), if the failure did not affect the amount of the payment." Under section 402(a)(14), as amended by section 5081 of the Omnibus Budget Reconciliation Act of 1990, failure to submit a monthly report where required under a State plan option, results in an assistance unit becoming ineligible for assistance payments. We interpret "did not affect the amount of the payment" to exclude the ineligibility of the assistance unit which results from a failure to submit the monthly report where required by the State. Otherwise, the failure to submit a monthly report would always affect the amount of payment, since it is a condition of eligibility, and section 408(c)(3)(E) would have no effect. Based on this interpretation, we will no longer cite as an error failure to file a monthly report where required. However, information that should have been reported on the monthly report will continue to be evaluated for its effect on the accuracy of the payment and errors will be cited as appropriate.

Payments Considered Erroneous

Section 408(c)(4) identifies two types of payment error which occur solely as the result of the failure on the part of AFDC recipients to meet statutory conditions of eligibility and which count in the computation of a State's error rate. These conditions are the failure to assign child support rights without good cause and the failure to apply for or provide a Social Security number for each member of the assistance unit.

It has been suggested by State representatives that since only errors for failure to meet these two requirements are expressly identified in the statute, errors for other statutory eligibility conditions should also not count as part of the QC error rate. We disagree. Since section 408 does not address other factors of eligibility, including such factors as income and resource limits, we believe Congress intended that adherence to all other statutory eligibility factors would continue under the revised QC system. We believe that these two requirements were included in section 408 to affirm the congressional view of their importance. Moreover, section 408 did not repeal basic statutory requirements of the AFDC program, but clarified how QC must review certain eligibility factors for the purpose of calculating the error rate.

All statutory conditions of eligibility are important, serve program objectives and must be met for an individual to be eligible for assistance. The continued QC review of assignment of child support rights and enumeration requirements emphasize payment accuracy, effective management objectives, and provide information to improve verification capability to reduce the need for assistance by identifying means for support other than AFDC assistance.

Since section 406(c)(4)(B) specifies that the enumeration requirement is met if an application for a Social Security number is made within 30 days after the date of application, we have included this requirement in the proposed regulations at § 205.42(d)(2)(v). Payments made during the 30-day period to recipients who have not met the enumeration requirement will be considered as correct payments provided all other factors of eligibility are met.

Treatment of Fair Hearing Decisions

We have incorporated in these proposed regulations at § 205.42(d)(2)(vi) the current QC policy regarding the impact of fair hearing decisions on QC payment errors. A change to a QC identified payment error as a result of a fair hearing decision is permitted, provided the State had defended the adverse action during the hearing process, and the decision was based only on the facts of the case at the time of the QC review. In addition to the above criteria, we are proposing to establish a time limit of eleven months, after the end of the annual sample period to which the error rates would apply, for States to submit requests for such changes, e.g., September 1, 1992 for fiscal year 1991 error rates. We believe that this addition to the criteria is both necessary and reasonable given the clear congressional concern about the timely release of the error rates, and the prompt notification to States of potential disallowances.

In the proposed regulations at § 205.42(d), we have established one year after the end of the annual sample period, or within 30 calendar days of the last decision of the QC Review Panel, whichever is later, as the target date for the release of the error rates. Since the national average error rate achieved in a year constitutes the error rate tolerance level that will be used to measure State performance for the same year, it is essential that once the State error rates are released, no further error rate adjustments be considered. The 30-day period between the submittal deadline for requests for changes due to fair hearing decisions and the expected error rate release date is necessary in order for the Department to evaluate the circumstances of the request and make any necessary adjustment in the error rates. Such requests will not be considered after that time. Since these will not be difference cases, we can give States this much time and still issue final error rates 12 months after the end of the fiscal year. Should a State be subject to a disallowance, the State is afforded the opportunity to challenge the disallowance before the Departmental Appeals Board.

Sample Disposition and Data Submission Time Frames

Current regulations at § 205.40(b)(2)(ii) require States to dispose of and report findings on 99 percent, or all but five cases of the active and negative cases selected each month within 75 days after the end of the sample month; 95 percent, or all but five cases of the cases selected each month within 95 days of the end of the sample month; and 100 percent of the active and negative case samples within 120 days of the sample month. After consultation with State representatives, who recommended a single monthly 120 day deadline with no interim deadlines, we are proposing in § 205.42(e) the following changes to the disposition and reporting time frames: 75 percent of the active and negative cases selected each month within 75 days of the end of the sample month and 100 percent within 95 days after the end of the sample month. We intend to use similar disposition time frames for the Federal subsample as those imposed on the States.

We are proposing in § 205.42(f)(1) to waive the "75 percent in 75 days" disposition standard where the Department has approved an alternate sample disposition plan based on permanent or recurring events in the State at certain times of the year. In § 205.42(e)(1)(iii), unless the Department has approved a temporary alternate sample disposition plan for a particular annual sample period because of an unforeseen event in that year (as indicated in § 205.42(f)(2)), we propose that States immediately submit a report on cases that remain pending 95 days after the end of the sample month explaining why each case was not disposed of and the date by which it will

VOL

JE
17
1991
UMI

be. The Department may grant an extension to the sample disposition time frame for individual cases that exceed the 95-day deadline if sufficient justification for each overdue case is provided. However, at § 205.42(h)(2), in the event of a significant failure on the part of a State to dispose of the required number of monthly AFDC sample cases within the proposed time frames, or time frames approved under a temporary alternate disposition plan, the Department may initiate action to establish the State's error rate.

The 95-day disposition deadline for all cases selected each month is necessary to ensure that the proposed time frames for establishing and issuing the State error rates are met. Tracking data for fiscal year 1988 on State dispositions indicate that 43 States met the existing "95 percent in 95 days" disposition standard. We believe that the proposed 95-day deadline standard, while somewhat more rigorous, is reasonable, particularly in light of the availability of alternate disposition plans. We also believe the proposed changes in the milestone and deadline dates provide flexibility for timely processing of sample cases while ensuring an even flow of work at both the State and Federal level.

The proposed standard to dispose of 100 percent of the sample selected each month within 95 days after the end of the sample month is the same standard that exists in the Food Stamp QC program. While the Food Stamp QC program requires 90 percent of the sample to be disposed of in 75 days, we are proposing a rate of only 75 percent in 75 days. This difference in interim standards is based on State concerns about the need for any interim standard and the fact that many States do not meet the existing AFDC 75-day standard.

The provision for an alternate sample disposition plan exists under current regulations at § 205.40(b)(3). The extension to the time frames for individual cases where an alternate disposition plan has not been submitted or approved is new.

Failure To Complete Sample

Pursuant to section 408(b)(1)(B), if a State fails to provide the Department with information necessary to determine the State's AFDC error rate, the Department, directly or through contractual or other arrangements as determined appropriate, shall establish the error rate for the State on the basis of the best data reasonably available to the Department and in accordance with the statistical methods that would apply if the reviews were conducted by the State.

We interpret section 408(b)(1)(B) to mean that the State must complete a proper sample, that the results of this sample must be reported timely, and that payment and eligibility records must be provided promptly upon request for the Federal rereview. By "proper sample", we mean that the State has completed a sample in accordance with federally prescribed instructions as set forth in QC Manual, section 2. Thus, if a State does not follow the federally prescribed instructions, or if the State does not select the sample in accordance with its approved sampling plan, the sample will be considered invalid, unreliable, or both. Similarly, if a State does not complete the federally prescribed minimum number of reviews and submit the review data in a timely manner, the available sample findings will be considered to be unreliable. State records must be timely supplied for the Federal rereview to enable the Department to meet the proposed time frames for establishing and issuing the State error rates.

We have interpreted the statutory language that the Department shall use the best data "reasonably" available as authorizing the Department to determine the method(s) to be used to establish the State's error rate. Thus, the actual method used will depend on the particular circumstances involved. Some of the circumstances we will consider include the timing and extent of a State's non-cooperation, and the time and resources available to the Department. For example, from the beginning of the annual sample period a State completed a valid but less reliable sample because the sample contained fewer than the prescribed number of AFDC active case reviews. We may combine this State sample with the Federal subsample of this State sample and add an additional Federal sample (de novo review) to determine the State's error rate. However, if we have reason to question the State's findings, we may conduct an audit directly or through a contractual agreement with a third party.

Similarly, if we have reason to question the validity of the reviews being conducted by the State because the State does not conduct its reviews and verification in accordance with federally prescribed procedures or improperly excludes cases from its sample, and the State fails to timely take the remedial action that is indicated, it may become necessary for us to complete these reviews.

In any case in which it is necessary for the Department to determine a State AFDC error rate because the State failed either to complete the prescribed number of case reviews or to cooperate by providing in a timely manner the required valid and reliable information which is necessary to compute its error rate, the proposed regulations provide that the full costs incurred by the Department in making the determination shall be passed on to the State by reducing the amount of administrative costs that would otherwise be payable to the State.

We interpret section 408(b)(1)(B)(ii) to require that the full costs incurred by the Department shall be passed on to the State. These costs are separate from any reductions in FFP for erroneous assistance payments that may be required because a State's error rate is in excess of the national standard. The recoupment of costs will be accomplished by reducing the amount that would otherwise be payable to the State for administrative expenses, generally no later than the second quarter following the quarter in which the costs of compiling the data for determining the State's error rate are available.

The costs assessed to a State will include such items as contract costs, Federal salaries and overtime if appropriate, and travel, as well as any other expenditures incurred by the Department in completing a proper sample. Proposed regulations are set forth at § 205.42(h).

Differences Between State and Federal Review Findings

Section 408(b)(3), in describing the process for resolving differences between State and Federal AFDC review findings, indicates that a "difference case" is a case in which the Department finds the case erroneously paid, and the State review determined it correctly paid. We believe that a somewhat broader concept is appropriate in order to address other types of inconsistencies between Federal and State findings, e.g., in situations where the State finds a case incorrectly paid and the Federal review finds the case correctly paid.

In the proposed regulations at § 205.42(i), we define a difference case as a disagreement between State and Federal review findings that may affect the State's official payment error rate. This definition incorporates our current operational definition in QC Manual, section 3. Specifically, a difference case would be a Federal rereview case where there is a disagreement between (1) a State review and Federal rereview finding of a correct payment, overpayment, or a payment to an ineligible case, or (2) a State finding of a correct payment, overpayment, underpayment, or a payment to an ineligible case and a Federal finding that the sample case should be dropped from the QC review.

Quality Control Review Panel

Under current procedures, there is a two-step administrative appeal process for resolving differences between State and Federal active AFDC review findings within the FSA regional office. Section 408(b)(4) requires the establishment of a Quality Control Review Panel (Panel) to review differences cases. After consultation with State representatives, we have decided to retain one appeal level within FSA, the appeal to the FSA Regional Administrator (RA), to ensure the accuracy of the Federal difference decision before involving the Panel. We have also decided to retain the existing 28-day time frame for States to request a review by the RA. In the proposed regulations, at § 205.42(i)(2), we have defined the 28 calendar days in terms of the receipt date of the difference notification and the postmarked date of the appeal letter. This is consistent with the request by the State representatives for a change in how the time frame should be measured.

Given the congressional desire for timely release of error rates, we are proposing that States have 28 calendar days from the receipt of the RA's decision to sustain a difference case to submit an appeal of the difference to the Panel. (We plan to send difference notifications and RAs' appeal decisions via telefax or certified mail to ensure uniform measurement of a State's receipt date.) The appeal request will include all supporting documentation. The proposed regulations do not limit the kinds of documentation a State may submit to substantiate its position. However, the appeal can only be based on issues that were raised in the initial appeal to the RA. In addition, the State will be required to send an informational copy of its appeal request to the RA concurrent with the submittal of the request to the Panel.

We are proposing a target 60-day time period be established for the Panel to render a decision after receipt of a State's appeal request. The 60 days is viewed as a goal since a complex issue requiring supplemental information from the State, or the RA, could delay the decision. Sections 408(b)(5) (C) and (D) provide that the decisions of the Panel in difference cases shall constitute those of the Secretary and that such decisions are not appealable. We interpret this to mean that the Secretary may delegate these decisions to the Panel unless he chooses to review individual difference cases. If a State appeals a disallowance for an error rate in excess of the national standard to the Departmental Appeals Board, the decision of the Panel, or of the Secretary, in difference cases will not be reviewable by the Board.

We believe that the two-level appeal process and the specified time periods for submittal and consideration of an appeal request provides for extensive and appropriate review of the merits of each difference case.

Error Rate and Disallowance Calculations

Error Rate Calculation

The conference report, in describing the purpose and basis for the revised AFDC QC system, states "[t]he conferees assume that the Secretary will use the same statistical methods to estimate errors as have been used under the current quality control system" (Congressional Record, H 9591, November 21, 1989). Therefore, the current methodology for determining a State's payment error rate (i.e., the point estimate from the regression estimator and the double sampling procedure described in QC Manual, section 2) is unchanged by the proposed regulation.

To conform to standard statistical practice, we are proposing to modify the weighting procedure used in determining the national overpayment and underpayment rates. Currently, the national overpayment (or underpayment) rate is the sum, over all States, of the product of each State's regressed overpayment (or underpayment) rate and the ratio of the State's total amount of assistance payments to the total amount of assistance payments of all States in the fiscal year. In the new method, the national overpayment (or underpayment) rate would be the ratio of the sum, over all States, of the product of each State's average monthly caseload and regressed average monthly erroneous assistance payment (or average monthly assistance payment that should have been but was erroneously not made) per case, to the sum, over all States, of the product of each State's average monthly caseload and average monthly payment per case for the fiscal year.

As long as sample sizes are sufficiently large, the current weighting procedure is a valid estimation procedure to use for computing the national payment error rates. However, since more States are electing to reduce their samples to their minimum required size, we are proposing to change this procedure. The new method is less subject to bias associated with smaller sample sizes than our current method and comports with the error rate definitions in the proposed regulations at § 205.43(b)(3) and (5).

The current weighting procedure for computing the payment error rate for States that use disproportionate stratified sampling are the same as the weighting procedure for computing the national overpayment and underpayment rates, except the procedure applied to each State is applied to each stratum. We also propose to use the new weighting procedure for such States.

Error Rate Notification

The current regulation does not specify a time frame for notifying a State of its error rate for a fiscal year. Under the proposed regulations at § 205.43(d), the Department's target for notifying each State of its overpayment and underpayment rates and the national overpayment and underpayment rates will be one year after the end of the annual sample period to which the error rates apply. While we would expect to release the error rates as close to the one-year target date as possible, we are not establishing a fixed date in the regulations for the following reasons: (1) Final national error rates can not be calculated until all sample cases are completed and all differences are resolved; (2) if a State failed to complete a valid and reliable sample, we would need to establish the error rate for the State on the basis of the best data reasonably available and the calculation and release of error rates would likely be delayed; (3) the same would be true if an unforeseen event occurred and we approved an alternate dispostiion plan which provided for the completion of the State sample beyond the prescribed time frames; (4) a delay in the timely adjudication of appeals by the Panel due to the complexity of appeal issues could also delay the release of the error rates.

Calculation of Disallowances

Under current regulations at § 205.44(f), if a State's payment error rate exceeds the 3 percent national standard (4 percent for Guam, Puerto Rico, and the Virgin Islands) the disallowance is computed as the product of the difference between the State's payment error rate and the national standard times the Federal share of the total amount of assistance paid under

VOL
56
ISS
116
JE
17
1991
UMI

the State plan. However, OBRA 1989 eliminates all past QC disallowances and changes the method of determining such disallowances for the future. In section 408(m)(1), the national standard is set as the national overpayment rate for the fiscal year or four percent, whichever is higher. If a State's overpayment rate exceeds the national standard for a fiscal year, FFP would be reduced.

Several adjustments are made before the amount of disallowance is determined. If the State's underpayment rate is less than the national underpayment rate for the fiscal year, the State's overpayment rate would be reduced by the amount by which the national underpayment rate exceeds the State's underpayment rate. Section 408(d)(3) provides that at the request of the State, the underpayment reduction may be applied to either of the two following fiscal years instead of to the year to which the reduction would otherwise apply. We interpret this to mean that a State may use the underpayment reduction earned in a fiscal year one time only, either in the year in which it is earned or in one of the following two years. Only one underpayment reduction would be applied to any given year.

We believe Congress provided States flexibility in the application of the underpayment adjustment in recognition that, in any given year, a significant number of States would be below the national standard. In order to encourage States to maintain low underpayment rates, even in a year when their payment error rates were below the national standard, the statute allows for the adjustment to be applied in one of the three years. The one time and non-cumulative application of the underpayment adjustment, as specified in the proposed regulations at § 205.43(a)(1)(i), is consistent with the adjustments to the disallowance for overpayment recoveries and child support collections, as provided in sections 408 (f)(2) and (f)(3) of the Social Security Act. For example, overpayment recoveries collected in a single year are used to offset the disallowances for that year.

We are proposing to provide those States whose unadjusted overpayment rates exceeds the national standard, 30 calendar days from the date of receipt of notification of their error rates to advise us of their decision, where applicable, on the application of the underpayment adjustment. If the State does not notify us in writing within this time period, we will use the adjustment that would otherwise apply for the fiscal year.

A State's basic disallowance for a fiscal year is the product of (1) the Federal share of the total amount of assistance paid under the State plan, (2) the difference between the State's adjusted payment error rate and the national standard, and (3) the ratio of the difference between the State's adjusted error rate and the national standard to the national standard. A State's basic disallowance for a fiscal year shall be reduced by its overpayment recoveries and by its improvement in its child support collection rate. The amount of reduction for overpayment recoveries is the product of the Federal share of payments recovered in the fiscal year and the proportion of the State's adjusted payment error rate in excess of the national standard.

The proposed regulations follow the detail defined by the statute on how the child support collection rate will be used to reduce the basic disallowance for the State. If a State's child support collection rate is greater than the national child support collection rate for the fiscal year, or is greater than the average of the State's child support collection rate for the three preceding fiscal years, the State's basic disallowance is further reduced. The amount of reduction will be the larger of the proportions by which the State's collection rate exceeds the national collection rate or exceeds the State's average collection rate for the preceding three years. (The smaller collection rate will produce the larger proportion and, thus, a larger disallowance reduction.) We will use the information on Forms FSA–231 and OCSE–156 and 156 to make the adjustments for the Federal share of overpayments recovered and child support collection rates respectively. AFDC arrears only cases will be included in the calculation of the child support collection rates. See § 205.43(e)(5) of the proposed regulations for a detailed example of the disallowance calculation.

Disallowance Notification

The current regulations do not specify a time frame for notification to States that are disallowance liable. Under the proposed regulations at § 205.43(f), the Department's target for notifying States with overpayment rates above the national standard of their disallowance will be within 60 calendar days after the release of the error rates for the fiscal year. As indicated earlier, the 60 days include 30 days for States to decide on the application of the underpayment adjustment to their overpayment rate, where applicable. We view these time frames as consistent with the congressional intent to expeditiously determine error rates and collect the Federal share of erroneous assistance payments above the national standard.

Data Management

The QC system, as a management information system, provides ongoing data on the frequency, magnitude and source of error to guide States in payment accuracy improvement initiatives. Previously, States were not only required to provide the Department with the results of the individual QC case reviews via a computer, but also with a detailed annual corrective action plan. The plan was required to contain the State's identification and analysis of error concentration, a determination of the causes of errors, specific proposed corrective actions, including implementation steps, and an analysis of the impact on the error rate of previously implemented corrective actions.

We are proposing to eliminate this annual reporting requirement. This proposed action should not be viewed as an indication of diminished interest by the Department in the corrective action process nor in the States' responsibility to take appropriate action to reduce the incidence of incorrect payments. States continue to be required, under the proposed rules at § 205.40(d)(4), to analyze the QC data and take necessary corrective action. At current error rate levels, over one billion dollars in State and Federal assistance payment funds are misspent each year. Continued and renewed corrective action efforts are necessary to reduce the level of these erroneous payments, even for States with error rates below the national standard. While we no longer will require States to document these efforts on an ongoing basis via submittal of an annual corrective action plan, we expect States to carry out these activities and furnish data on corrective action activities upon request. We will continue to assess and monitor State error rate performance and provide the States with detailed national error rate and characteristic data for comparative purposes.

Regulatory Procedures

Executive Order 12291

These regulations do not meet any of the criteria for a major regulation. Further, although Federal matching may be reduced, the reduction results from legislation and not from the terms of these regulations. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

These proposed regulations impose no new reporting or recordkeeping requirements pursuant to the Paperwork Reduction Act of 1980 (Pub.L. No. 96–511).

Regulatory Flexibility Act

We certify that these proposed regulations will not, if promulgated, have significant economic impact on a substantial number of small entities because the rules involve minor changes in State agency procedures. These regulations revise the existing Federal quality control system as it applies to the States' use of Federal funds in administering the AFDC program. A regulatory flexibility analysis is not required because the Federal government will only be recouping monies that were incorrectly paid by the States.

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for part 205 is revised to read as follows:

Authority: Secs. 402, 403, 406, 1102, and 1108(a), Social Security Act (42 U.S.C. 602, 603, 606, 1302, and 1308(a)); sec. 9101, Pub.L. 99–509, 100 Stat. 1972; sec. 202, Pub.L. 100–485, 102 Stat. 2377; sec. 8006, Pub.L. 101–239, 103 Stat. 2454.

2. Sections 205.40, 205.42 and 205.43 are revised; § 205.41 is added; and § 205.44 is removed and reserved.

§ 205.40 Quality control system.

(a) *Scope.* Sections 205.40 through 205.43 set forth requirements—

(1) For a quality control (QC) system for the Aid to Families With Dependent Children (AFDC) program (and for the Adult assistance programs in Guam, Puerto Rico, and the Virgin Islands) designed to reduce incorrect expenditures by identifying the nature, magnitude and causes of all errors and to improve the accuracy of payments to recipients of the AFDC and Adult assistance programs;

(2) For obtaining data on the correctness of negative case actions and reducing the incidence of incorrect denials for and terminations of assistance;

(3) For determining the amount of any disallowance required to be repaid to the Department due to excess erroneous assistance payments made by the State under the AFDC program.

(b) *Definitions.* For purposes of §§ 205.40 through 205.43:

(1) *Assistance unit,* or *case,* means all individuals whose needs, income, and resources are considered in determining eligibility for, and the amount of, a payment for which Federal financial participation is claimed under this chapter.

(2) *Department* means the U.S. Department of Health and Human Services.

(3) *Disallowance* means the amount of reduction in Federal financial participation.

(4) *Disposed of case* means that a decision was made on the eligibility and payment status of a case under review, or that the case was dropped or listed in error.

(5) *Erroneous payments* means the sum of overpayments made to eligible assistance units and payments to ineligible assistance units.

(6) *Fiscal year,* or *annual sample period,* means the 12-month period, October 1 through September 30.

(7) *Negative case action* means an action to deny an application for assistance or to otherwise dispose of that application without a determination of eligibility (for instance, because the application was withdrawn or abandoned), or to terminate assistance.

(8) *Overpayment* means a financial assistance payment received by or for an assistance unit for the review month, which exceeds by at least $5.00 the amount for which that unit was eligible under permissible State practice in effect on the first day of the review month.

(9) *Payment* means a single payment or multiple payments received for a specific calendar or fiscal month.

(10) *Payment to ineligibles* means a financial assistance payment received by or for an assistance unit for the review month, when that assistance unit was not eligible for any part of the payment under permissible State practice in effect on the first day of the review month, even though the State agency had not made a finding of ineligibility under § 206.10(a)(5) of this chapter.

(11) *Permissible State practice* means written rules and policies relating to eligibility and payment that are in accordance with the State plan provisions or proposed plan amendments submitted to but not acted upon by the Department. Where the plan provision does not conform to Federal regulations or law, permissible State practice means the Federal regulations or law, except as noted in § 205.42(b)(1).

(12) *Quality Control Manual* means the "AFDC Quality Control Manual" that is issued by the Family Support Administration of the Department of Health and Human Services.

(13) *Review month,* or *sample month,* means the specific calendar or fiscal month for which the assistance payment under review is received.

(14) *Secretary* means the Secretary of Health and Human Services.

(15) *State* means the several States, the District of Columbia, Guam, Puerto Rico, the Virgin Islands and American Samoa.

(16) *Underpayment* means a financial assistance payment received by or for an assistance unit for the review month which is at least $5.00 less than the amount for which that assistance unit was eligible under permissible State practice in effect on the first day of the review month.

(c) *State plan requirements.* A State plan under title IV–A, and in Guam, Puerto Rico, and the Virgin Islands under titles I, X, XIV or XVI (AABD), shall provide a continuing QC system for assuring that assistance is furnished in accordance with permissible State practice as defined in paragraph (b) of this section.

(d) *Basic elements of the quality control system*—(1) *General requirements.* The State shall operate the QC system in accordance with §§ 205.40 through 205.43, other applicable regulations of this chapter, and the implementing procedures in the QC Manual.

(2) *Sampling requirements.* The State shall carry out sampling in accordance with the requirements specified in § 205.41, and with the implementing procedures in the QC Manual, section 2.

(3) *Review requirements.* The State shall conduct QC reviews in accordance with the requirements specified in § 205.42, and with the implementing procedures in the QC Manual, section 3.

(4) *Data management requirements.* The State shall provide the resources and methods necessary to analyze the findings of the system and shall take appropriate corrective action on the causes of improperly authorized or denied assistance. The State shall

VOL 56 ISS 116 JE 17 1991 UMI

provide access to and/or furnish the Department information or data on this activity upon request.

§ 205.41 Sampling plan and procedures.

(a) *Purpose.* This section provides the sampling plan, sample size requirements, and procedures for the AFDC and Adult assistance programs.

(b) *Definitions.* In addition to the definitions in § 205.40(b), the following definitions apply to this section.

(1) *Completed active case review* means a case that has been subject to QC review and a finding of correctly paid, overpaid, underpaid or ineligible has been made.

(2) *Completed negative case action review* means a negative case action that has been subject to QC review and a finding that the action to deny or to terminate assistance is correct or incorrect has been made.

(c) *Plan approval and submittal dates.* The State shall submit to the Department for approval a QC sampling plan (or revisions to a current plan), that meets the requirements of this section at least 60 calendar days before the beginning of the annual sample period in which it is to be implemented. The State is not required to resubmit the plan if it is unchanged from a previous sample period. Universe estimates (i.e., average monthly caseload and total number of negative case actions) and sample intervals for the annual period are required 30 calendar days prior to the selection of the October sample. The reliability waiver statements for AFDC active cases, as described below in paragraph (d)(3)(ii) of this section, are required by the first day of the annual sample period. The monthly list of selected sample cases, computer-generated random start and seed numbers, and reserve pool cases (if applicable) are to be submitted within 10 calendar days of the date of sample selection specified in the State sampling plan.

(d) *Plan requirements.* The State shall have an approved sampling plan in effect for the full annual sample period that includes the following:

(1) *Population to be sampled;*

(2) *List(s) from which the sample is selected,* describing the following characteristics:

(i) Sources;

(ii) Components;

(iii) Accuracy and completeness of the list(s) in relation to the population of interest. The list of active cases shall be an unduplicated list of all assistance units for which either a full or partial payment was made for the review month by the end of that month. The list of negative case actions shall be a list of all unduplicated completed actions taken by the State to deny or terminate financial assistance for the review month, except for those assistance units that are on the active case list for the same review month;

(iv) Form and structure of the list (e.g., all or part is automated; supplemental lists are added; code definitions are used);

(v) Frequency of updating the list or its sources;

(vi) Estimated proportion of cases for which a review may not be completed; and

(vii) Methods of deleting listed-in-error cases from the list.

(3) *Sample size* (the number to be completed). The AFDC and the Adult assistance sample sizes for the annual sample period shall be determined in accordance with the requirements in this section. The active case samples shall be based on the estimated average monthly caseload for the annual sample period. The negative case action samples shall be based on the estimated total number of negative case actions for the annual sample period.

(i) *AFDC active cases—standard sample size.* The required standard sample sizes for AFDC completed active case reviews for specified estimated average monthly caseloads shall be as follows:

Average monthly caseload (N)	Completed annual sample size (n)
60,000 and over	2,400
10,000–59,999	[1]
Under 10,000	300

n=300+0.042 (N−10,000)

[1] Use equation below.

(ii) *AFDC active cases—minimum sample size.* A State may choose to reduce its sample size for AFDC completed active case reviews below the standard size only before the beginning of the annual sample period. For each annual period where the State chooses to reduce its standard sample size, the State shall provide the Department with a statement (see Appendix to this section) as an addendum to the sampling plan, accepting the reliability of the payment error rate and waiving the right to challenge the resulting AFDC (and Medicaid) error rates based on the reduced sample size. The required minimum sample sizes for AFDC completed active case reviews for specified estimated average monthly caseloads shall be as follows:

Average monthly caseload (N)	Completed annual sample size (n)
60,000 and over	1,800
10,000–59,999	[1]
Under 10,000	300

n=300+0.018 (N−10,000)

[1] Use equation below

(iii) *AFDC negative case action sample size.* The required negative case action sample sizes for AFDC completed negative case action reviews for specified estimated total number of negative case actions shall be as follows:

Total number of negative case actions (N)	Completed annual sample size (n)
180,000 and over	800
14,000 to 179,999	Use equation below
700 to 13,999	175
Under 700	100 or ½ (N), whichever is less.

n=175+0.00376 (N−14,000)

(iv) *Adult active cases—standard sample size.* The standard annual sample sizes required for completed active Adult assistance case reviews shall be as follows:

Guam and the Virgin Islands.....150
Puerto Rico.....use formula below
300+0.02628 (N−10,000)
where N is the estimated average monthly caseload.

(v) *Adult active cases—minimum sample size.* The minimum annual sample sizes required for completed active Adult assistance case reviews shall be as follows:

Guam and the Virgin Islands.....75
Puerto Rico.....use formula below
300+0.01125 (N−10,000)
where N is the estimated average monthly caseload.

(vi) *Adult negative case action sample size.* The required annual sample size for completed Adult assistance negative case action reviews shall be the same as specified for AFDC negative case action cases in paragraph (d)(3)(iii) of this section.

(4) *Sample selection procedure.* The procedure for sample selection shall conform to principles of probability sampling. Approximately one-twelfth of the annual sample shall be selected each month. A separate sample shall be selected for active cases and negative case actions. The active case sample shall be selected from a list of all active cases with payments authorized prior to sample selection and paid by the end of the month for which it is reviewed. The negative case action sample shall be selected from a list of all negative actions taken to deny or terminate assistance with effective dates in the review month, except for those cases that were reinstated with a full or partial payment during that month. Systematic random sampling shall be used in making the selection.

(5) *Option to drop or complete certain cases.* The State shall specify in its sampling plan whether it chooses to drop or complete a sample case for which less than six months have elapsed since it was last selected and reviewed, regardless of annual sample period.

(6) *Procedure to correct for over- or undersampling.* States shall evaluate their caseload estimates during the annual sample period to ensure that the required number of case reviews is completed. A change in the caseload estimate may require an adjustment to the sample size. Undersampling shall be corrected during the annual sampling period. Oversampling may be corrected at the State's option and, if exercised, shall be coordinated with the Federal regional office. When correcting for over- or undersampling, the State shall follow the procedures described in QC Manual, section 2.

(e) *Review of State sampling procedures.* In order for the Department to carry out its responsibilities under § 201.10 of this chapter, the State shall fully document and make available for review by the Department all sampling procedures, including construction and content of the universe and sample lists.

Appendix—State Reliability Waiver Statement

I (We), _____
State Official Name(s)
the _____
Position(s)
certify that I/we have the authority to enter into binding agreements on behalf of the (State) AFDC and Medicaid programs. Pursuant to 45 CFR 205.41(d)(3)(ii), I/we, acting in my/our official capacity(ies), elect on behalf of the State to exercise the option to reduce the standard AFDC–QC active sample size of _____ completed case reviews to _____ completed case reviews based on an estimated average monthly caseload of _____ for the annual sample period, October 1, 19____ through September 30, 19____. If the reduced sample size specified herein does not meet the required sample size as determined by the actual average monthly caseload for this annual sample period pursuant to the formula specified in QC Manual, section 2, the State agrees to increase this reduced sample size to the required minimum. In so doing, I/we recognize that by electing this option the AFDC and Medicaid payment error rates based on this reduced sample size may have less precision than the error rates produced by the standard sample size. Because of this possible effect, the State waives the right to challenge the precision of the resulting AFDC error rate based on the reduced sample size. The State also waives the right to challenge the precision of the Medicaid error rate based on this reduced AFDC sample size.

§ 205.42 Case review and management requirements.

(a) *Purpose.* Except for §§ 205.42(g), (h) and (i) which apply only to AFDC, this section establishes the rules and procedures for the conduct of QC case reviews, completion of QC sample cases and the determination of whether an error exists in a sample case in the AFDC and Adult assistance programs.

(b) *Review basis.* The review shall be conducted against permissible State practice, except as follows:

(1) (i) Where an approved State plan is inconsistent with Federal law or regulations, the review shall be conducted against the approved State plan until either an amendment to remove the inconsistency is submitted or 60 calendar days have elapsed since the State has been notified of the inconsistency, whichever occurs earlier. If the plan amendment is submitted timely, the review shall be conducted against the submitted plan amendment. If the plan amendment is not approved by the Department or is not submitted timely, sample cases selected for the review month immediately following the date that disapproval becomes final or the 60-day period, whichever occurs earlier, shall be reviewed against applicable Federal law and regulations until the State has a revised approved plan.

(ii) Where a State implements a pending plan amendment which is subsequently disapproved by the Department, the review shall be conducted against the pending plan amendment until disapproval becomes final. Sample cases selected for the review month immediately following the date that disapproval becomes final shall be reviewed against the approved plan if the plan is consistent with Federal law and regulations. If the approved plan is inconsistent with Federal law and regulations, the review shall be conducted against applicable Federal law and regulations until the State has a revised approved plan amendment.

(iii) If it is necessary for the State to enact a law in order to remove the inconsistency, the State shall immediately notify the Department. The Department shall establish a reasonable period of time, on a case-by-case basis, for the State to enact the law and amend its State plan. The review shall continue to be conducted against the State's original plan during this time period.

(2) Where the State makes payment in compliance with a court order, the review shall be conducted against the provisions of the court order.

(c) *Case review requirements.* (1) The State shall review all cases selected in the active and negative case samples as prescribed in § 205.41, and reach a review finding as required on each case.

(2) The review shall include: The examination and analysis of the case record; the conduct of a field investigation with a face-to-face interview in all cases in the active case sample and, as necessary, in the negative case action sample; the verification and documentation of all required review elements through contacts with appropriate collateral sources of information; the securing of specified primary or secondary evidence; the determination of the correctness of the eligibility and payment decisions; and, where required, the transmission of the coded findings to a designated host computer.

(3) The State shall use the forms and schedules set forth in the QC Manual and otherwise prescribed by the Department to document all review findings.

(d) *Special provisions applicable to error determination.* The following provisions modify what constitutes a payment error under permissible State practice.

(1) *Changes in circumstances.* For purposes of this paragraph, a change in circumstances means a change occurring after the date of authorization of the initial payment which may affect the assistance unit's eligibility and/or payment amount. Multiple changes in circumstances shall be individually evaluated to assess their impact on the final payment error determination. A change in policy or a hearing decision shall be considered a change in circumstances.

(i) A change in circumstances shall not be counted as a payment error if the change occurred in the review month or the month immediately preceding the review month or, if the review month's

VOL 56 ISS 116 JE 17 1991 UMI

payment continues unadjusted because a hearing was requested.

(ii) A change in circumstances shall be counted as a payment error if the change was incorrectly reflected in the review month's payment or, if the change occurred in or before the second prior month to the review month and was not reflected in the review month's payment.

(2) *Other types of payment error not to be counted.* The following types of payment error shall not be counted as errors.

(i) Payment errors which result solely from failure on the part of the State to properly implement changes in Federal law for a period of six months after the effective date of the legislation or implementing regulations, whichever is later;

(ii) Payment errors which result solely from a State's reliance on, and correct use of, incorrect written factual information provided by the Department about matters of fact or from incorrect written statements of Federal policy by Department officials;

(iii) Payment errors which result from a declaration by the President or the State Governor, pursuant to Federal or State statute, of a state of emergency or major disaster and which directly affect the State's ability to make correct payments, if adequate documentation of the event and its impact are provided. The information shall include: a copy of the declaration; a detailed explanation of the circumstances; identification of the affected jurisdictions; the reason(s) why the State's ability to make correct payments has been or will be impaired; the length of time required to overcome the effects of the emergency or disaster; and the actions the State is taking to minimize the magnitude and duration of the negative effect;

(iv) Payment errors which result solely from failure of the assistance unit to submit a monthly report;

(v) Payment errors which result when a recipient does not have a social security number, but has filed an application for a number within 30 calendar days after the date of application for assistance; and

(vi) Payment errors which are inconsistent with fair hearing decisions under § 205.10 when the hearing decision meets the following criteria:

(A) The decision is based only on the facts of the case at the time of the QC review;

(B) The State defended the adverse action during the hearing process; and

(C) The request for adjustment is made within eleven months after the end of the annual sample period to which the adjustment would apply.

(e) *Sample disposition and data submission time frames.* (1) The State shall input review findings for disposed of active and negative sample cases into the computer terminal provided by the Federal government and transmit the edited data to a designated host computer. For States that cannot transmit the data due to lack of equipment or telecommunication linkage, the State shall submit the review findings in a format specified by the Department. The State shall dispose of and submit review findings in accordance with the following time frames:

(i) Seventy-five percent of the cases selected in both the active and negative case samples each month, within 75 calendar days after the end of each sample month;

(ii) One hundred percent of the cases selected in both the active and negative case samples each month, within 95 calendar days after the end of each sample month;

(iii) For each monthly sample case that remains pending after 95 days, unless an alternate disposition plan has been approved under paragraph (f)(2) of this section, the State shall immediately submit a report on why the case has not been disposed of and the date of expected disposition. If the Department finds there is insufficient justification for the delay, the Department may initiate action to establish the State's error rate under the procedures specified in paragraph (h) of this section.

(2) The State shall submit the review findings for disposed of sample cases promptly (i.e., at least on a monthly basis).

(f) *Alternate disposition plan.* (1) The State may submit an alternate disposition plan for the Department's approval if the State is unable to meet the requirements of paragraph (e)(1)(i) of this section, either as a result of circumstances of a permanent or recurring nature, or as a result of the occurrence of an unforeseen event during the annual sample period. Until the Department approves the alternate disposition plan, the State shall continue to comply with the requirements in paragraph (e)(1)(i) of this section. The alternate disposition plan may be approved when—

(i) The State's sample population is dispersed over such great distances that conducting the number of field interviews needed to meet the requirements of paragraph (e)(1)(i) of this section is cost prohibitive; or the State's usual weather conditions or geography make significant numbers of the sample population inaccessible or difficult to contact during certain times of the year, making it a hardship for the State to comply with the requirements of paragraph (e)(1)(i) of this section.

(ii) The State's request contains evidence and data to justify the need for an alternate disposition plan, including a description of the State's population dispersal or inaccessibility, and the reason(s) why the State cannot comply with the requirements in paragraph (e)(1)(i) of this section.

(iii) The request contains detail on the State's proposed disposition schedule for sample cases, including the annual sample period(s) to be covered, the revised disposition dates and percentages, and the revised schedule for the transmission of the edited review findings of the sample cases; and

(iv) The request is submitted at least 60 calendar days before the beginning of the first annual sample period covered by the alternate disposition plan.

(2) The Department may approve a temporary alternate disposition plan for a particular annual sample period based on unforeseen events and allow the State to submit the edited review findings of its sample cases at later dates than those specified in paragraph (e)(1) of this section, when—

(i) Unforeseen events occur (e.g., floods, earthquakes, computer breakdowns, snow-storms and labor disputes) which temporarily prevent the State from meeting the requirements in paragraph (e) of this section; and

(ii) The State's request contains a description of the circumstances of the unforeseen event, the period to be covered by the alternate disposition plan, the revised disposition dates and percentages, and the revised schedule for the transmission of the edited review findings of the sample cases.

(g) *Data requirements for Federal re-review of State sample cases.* As part of the Federal monitoring of State QC programs, the Department conducts a re-review of a subsample of each State's AFDC active case sample.

(1) The State shall provide the original case record and State QC file for each subsample case, by mail or delivery service, within 10 calendar days of the request to the State for such information.

(2) The information provided shall include records relating to public assistance, recipients and third parties, including information available under § 205.55 of this chapter.

(3) The Department may grant exceptions to these requirements in unusual circumstances.

(h) *Effects of failure to complete the sample.* This paragraph provides the procedures that the Department shall follow if a State fails to complete a valid and reliable AFDC active case sample in accordance with prescribed QC procedures and deadlines which include obtaining and using information available under § 205.55.

(1) The Department shall notify the State of its failure to complete its sample and provide the State the opportunity to negotiate a solution for the completion of the sample.

(2) Pursuant to section 408(b)(1)(B)(i) of the Social Security Act, when a State is unable to negotiate a solution or fails to carry out a negotiated solution, the Department shall, directly or through contractural or other such arrangement as appropriate, conduct the review and establish the fiscal year error rate for the State on the basis of the best data reasonably available to the Department, in accordance with statistical methods that would apply if the reviews were completed by the State.

(3) Notwithstanding any other provision of this chapter, total payments to a State under section 403(a)(3)(D) for the proper and efficient administration of the State plan shall be reduced by the costs incurred by the Federal government to complete the State's sample pursuant to section 408(b)(1)(B)(ii).

(i) *Difference resolution process.* A "difference" is a disagreement between State and Federal review findings that affect the State's official AFDC payment error rate (i.e., a disparity between a State review and Federal rereview finding pertaining to a correct payment, overpayment, or a payment to an ineligible case), or a State finding of a correct payment, overpayment, underpayment, or a payment to an ineligible case versus a finding that the sample case should be dropped from the QC review. The process for resolving the difference shall be as follows:

(1) The State shall be notified in writing of the disagreement and afforded an opportunity to request a review of the difference by the Regional Administrator, Family Support Administration.

(2) The State shall respond to the difference notification within 28 calendar days of receipt of such notification agreeing, or indicating reasons for disagreeing, with the Federal finding. Responses postmarked by the 28th calendar day after the date of the receipt of the difference letter shall be deemed to have met the time frame. If the deadline is a Saturday, Sunday, legal holiday, or an office closing, the deadline shall be extended to the next business day. If the State fails to respond within the 28-day time frame, the Federal finding shall be the final decision of the Department.

(3) The Regional Administrator shall respond to the State within 21 calendar days of receipt of the reconsideration request. The response shall either be a decision on the State's request, or an indication that the decision will be delayed pending further review of applicable laws, regulations, or policies.

(4) If the State disagrees with the Regional Administrator's decision, it may seek review with the Quality Control Review Panel. The appeal request shall be postmarked by the 28th calendar day after the receipt of the Regional Administrator's decision, or the Regional Administrator's decision shall be the final decision of the Department. If the deadline is a Saturday, Sunday, legal holiday, or an office closing, the deadline shall be extended to the next business day. The State shall forward an informational copy of its appeal request to the Department's regional office concurrent with submittal of its request to the Review Panel. The State may submit to the Panel any documentation appropriate to substantiate its position as part of its appeal request. However, the appeal to the Panel can only be based on issue(s) raised during the initial appeal to the Regional Administrator.

(5) The Quality Control Review Panel shall evaluate all of the pertinent evidence submitted and shall notify the State of its decision (with a target date of 60 calendar days following the receipt of the State's appeal request). Unless the Secretary chooses to review individual difference cases, decisions of the Panel shall be made on the record and shall constitute the findings of the Secretary for establishing a State's payment error rate for the fiscal year.

§ 205.43 Determination of payment error rates and disallowances of federal financial participation for erroneous payments.

(a) *Purpose.* This section sets forth the rules and procedures for calculating State AFDC error rates and for disallowing Federal financial participation (FFP) to the States with erroneous payments in excess of the national standard for a fiscal year.

(b) *Definitions.* In addition to the definitions in §§ 205.40(b) and 205.41(b), the following definitions apply to this section.

(1) *Child support collection rate* means the ratio of—

(i) The sum of the number of AFDC cases reported by the State IV–D agency for each quarter in the fiscal year for which an assignment was made under section 402(a)(26) of the Social Security Act and a collection was made, to

(ii) The sum of the number of AFDC cases with such assignments reported by the State IV–D agency for each quarter in the fiscal year.

(2) *National child support collection rate* for a fiscal year means the ratio of the sum of the number of cases (including AFDC arrears only cases) described in paragraph (b)(1)(i) of this section reported by all States for quarters in the fiscal year, to the sum of the number of cases described in paragraph (b)(1)(ii) of this section reported by all States for quarters in the fiscal year.

(3) *National overpayment rate* means the ratio of the total amount of erroneous assistance payments made by all States to the total amount of assistance paid by all States for the fiscal year. (This is equivalent to the ratio of the average monthly erroneous assistance payment per case to the average monthly assistance payment per case for all States.) The rate shall be computed as the ratio of the sum, over all States, of the product of each State's average monthly caseload and regressed average monthly erroneous assistance payment per case, to the sum, over all States, of the product of each State's average monthly caseload and average monthly assistance payment per case for the fiscal year.

(4) *National standard* means the national overpayment rate for the fiscal year or four percent, whichever is larger.

(5) *National underpayment rate* means the ratio of the total amount of assistance that should have been but was erroneously not paid for the fiscal year, to the total amount of assistance paid by all States. (This is equivalent to the ratio of the average monthly amount of assistance payment per case that should have been but was erroneously not made to the average monthly assistance payment per case for all States.) The rate shall be computed as the ratio of the sum, over all States, of the product of each State's average monthly caseload and regressed average monthly amount of assistance payment per case that should have been but was erroneously not made, to the sum, over all States, of the product of each State's average monthly caseload and average monthly assistance payment per case for the fiscal year.

(6) *Overpayment rate* means the ratio of the total amount of erroneous assistance payments made by a State for the fiscal year, to the total amount of assistance payments made. (This is equivalent to the ratio of the average monthly erroneous assistance payment

VOL
56
ISS
116
JE
17
1991
UMI

per case to the average monthly assistance payment per case in a State for the fiscal year). The rate shall be computed as the ratio of the State's regressed average monthly erroneous assistance payment per case to the State's average monthly assistance payment per case for the fiscal year. (For States that use disproportionate stratified sampling, the procedure shall be the same as the procedure in paragraph (b)(3) of this section, except "stratum" shall be substituted for "State".)

(7) *Underpayment rate* means the ratio of the total amount of assistance payments that should have been but was erroneously not made by a State for the fiscal year, to the total amount of assistance payment made. (This is equivalent to the ratio of the average monthly assistance payment per case that should have been but was erroneously not made by a State to the State's average monthly assistance payment per case for the fiscal year.) The rate shall be computed as the ratio of the regressed average monthly assistance payment per case that should have been but was erroneously not made by a State to the State's average monthly assistance payment per case for the fiscal year. (For State's that use disproportionate stratified sampling, the procedure shall be the same as the procedure in paragraph (b)(5) of this section, except "stratum" shall be substituted for "State".)

(c) *General.* All error rates for a State shall be based on a double sampling methodology which includes a statistically valid State sample of cases selected each month during the fiscal year, followed by a statistically valid Federal subsample of cases selected from the State completed samples. The State error rate shall be the point estimate of the regression estimator as set forth in the QC Manual.

(d) *Error rate notification.* The target date for the Department of notify each State of its overpayment and underpayment rates and the national overpayment and underpayment rates shall be one year after the end of the annual sample period or within 30 calendar days of the resolution by the Quality Control Review Panel of all differences, pursuant to § 205.42(i)(5), whichever is later.

(e) *Determination of disallowances in Federal matching funds.* If a State's overpayment rate for a fiscal year exceeds the national standard, Federal matching funds to the State shall be reduced. The procedure for determining the disallowance for a fiscal year shall be as follows:

(1) *State adjusted overpayment rate.* A State with an underpayment rate below the national underpayment rate in a fiscal year shall have its overpayment rate reduced by the amount by which the national underpayment rate exceeds the State's underpayment rate.

(i) A State shall use the underpayment reduction earned in a fiscal year one time only, either in the year in which it was earned, or in one of the following two years. Only one underpayment reduction shall be applied in any one year. A reduction earned in one year shall not be used to reduce an overpayment rate of a prior year.

Example: The State was disallowance liable in 1992 and 1993 and had earned reductions for low underpayments in 1991, 1992 and 1993. The State can apply either the 1991 or 1992 reduction to the 1992 overpayment rate. If the 1991 reduction is applied to the 1992 error rate, the State can then apply either the 1992 or 1993 reduction to the 1993 error rate. If in 1992, the State applied the 1992 reduction, then either the 1991 or the 1993 reduction can be applied to the 1993 error rate. If in 1993, however, the State applied the 1993 reduction, then the 1991 reduction can no longer be used since it was not used in the year it was earned or one of the following two years.

(ii) At the request of a State, the Department shall apply the reduction, described in paragraph (e)(1)(i) of this section in determining the State's overpayment rate for either of the two following years instead of in determining the State's error rate for the fiscal year to which the reduction would otherwise apply. The request shall be made in writing within 30 calendar days from the date of receipt of notification described in paragraph (d) of this section.

(2) *Basic disallowance amount.* If a State's overpayment rate for a fiscal year, adjusted as described in paragraph (e)(1) of this section, exceeds the national standard for the fiscal year, the amount of the basic disallowance shall be the product of—

(i) The Federal share of the State's total AFDC payments for the fiscal year;

(ii) The difference between the State's adjusted overpayment rate and the national standard for the fiscal year; and

(iii) The ratio of the amount obtained in paragraph (e)(2)(ii) of this section, to the national standard.

(3) *Reduction of the basic disallowance amount for overpayment recoveries.* A State's basic disallowance amount for a fiscal year shall be reduced to reflect AFDC overpayment recoveries by the State. The amount of the reduction shall be the product of—

(i) The Federal share of payments recovered in the fiscal year; and

(ii) The ratio of the amount obtained in paragraph (e)(2)(ii) of this section, to the State's adjusted overpayment rate.

(4) *Reduction for improvement in child support collections.* If a State's child support collection rate is greater than the national child support collection rate for the fiscal year, or is greater than the average of the State's child support collection rates for the three preceding fiscal years, the State's disallowance amount shall be further reduced. The amount of the reduction shall be the product of—

(i) The amount of the basic disallowance calculated in paragraph (e)(2) of this section minus the amount of the reduction calculated in paragraph (e)(3) of this section, and

(ii) The larger of—

(A) The ratio of the difference between the State and the national child support collection rate, to the national child support collection rate for the fiscal year; or

(B) The ratio of the difference between the State's child support collection rate for the fiscal year and the State's average child support collection rate for the preceding three fiscal years, to the State's average child support collection rate for the preceding three fiscal years.

(5) *Final disallowance amount.* The amount of disallowance imposed on the State by the Secretary shall be the amount of the disallowance calculated in paragraph (e)(2) of this section minus the sum of the amounts of reductions calculated in paragraphs (e)(3) and (e)(4) of this section.

Example: All references are to paragraph (e) of this section.

Fiscal year	State	National
Overpayment rate	8.0%	6.0%
Underpayment rate	2.8%	3.0%
Federal share of—		
Total AFDC payments	$5,000,000	(*)
Total AFDC overpayment recoveries	5,000	(*)
AFDC child support collection rate	16.0%	12.0%
Average AFDC child support collection rate for preceding 3 years	14.0%	(*)

Calculation:
1. State adjusted overpayment rate, paragraph—
   (e)(1) = 8.0 − (3.0 − 2.8) = 7.8%
2. Basic disallowance amount, paragraph—
   (e)(2)(i) = $5,000,000
   (e)(2)(ii) = 7.8 − 6.0 = 1.8%
   (e)(2)(iii) = 1.8/6.0 = 0.30
   Amount = $5,000,000 × 1.8% × 0.30 = $27,000
3. Reduction for overpayment recoveries, paragraph—
   (e)(3)(i) = $5,000
   (e)(3)(ii) = 1.8/7.8 = 0.231
   Amount = $5,000 × 0.231 = $1,155
4. Reduction for improvement in child support collections, paragraph—
   (e)(4)(i) = $27,000 − $1,155 = $25,845
   (e)(4)(ii)(A) = (16.0 − 12.0)/12.0 = 0.333
   (e)(4)(ii)(B) = (16.0 − 14.0)/14.0 = 0.143
   Since 0.333 is larger than 0.143, then the—
   Amount = $25,845 × 0.333 = $8,606
5. Final disallowance, paragraph—
   (e)(5) = $27,000 − ($1,155 + $8,606) = $17,239

(f) *Disallowance notification and payment schedule.* The Department shall notify the States with overpayment rates above the national standard of their imposed disallowances (with a target date of 60 calendar days after the release of the error rates for the fiscal year).

(1) A State subject to a disallowance shall pay the amount of its disallowance within 45 calendar days of the date of the notification, or negotiate an agreement with the Department to repay the disallowance with interest in calendar quarterly installments over a period not to exceed 30 months beginning not later than the first calendar quarter after the date of the receipt of the notification.

(2) If a State fails to pay the amount of the imposed disallowance as specified in paragraph (f)(1) of this section, the Department shall reduce the Federal matching funds otherwise payable to the State under the Social Security Act by amounts sufficient to recover the amount of disallowance with interest.

(3) Interest on the unpaid amount of the State's disallowance shall accrue at the overpayment rate established under section 6621(a)(1) of the Internal Revenue Code of 1986 beginning 45 calendar days after the date the State receives notice of the disallowance. If a subsequent appeal by the State is decided in the State's favor, the Department shall repay to the State all payments made with interest from the date payment is received at the same accrued rate applicable to unpaid disallowances.

(g) *Administrative review of disallowances.* A State may appeal the imposition of the disallowance to the Departmental Appeals Board in writing within 60 calendar days after the receipt of the notification described in paragraph (f). The Board shall consider the State's appeal in accordance with 45 CFR part 16.

(1) The Board shall not review, but shall incorporate by reference in its disallowance determination, the decisions on difference cases made by the Quality Control Review Panel or the Secretary.

(2) If the Board does not decide an appeal within 90 calendar days after the date on the State's notice of appeal, interest on the unpaid disallowance amount shall be suspended beginning with the 90th calendar days and ending on the date of the Board's final decision, except to the extent of that the Board finds that the State caused or requested the delay.

(h) *Judicial review of disallowances.* A State may appeal a decision by the Departmental Appeals Board, including a decision incorporated by the Board on a difference case, to the Federal district court within 90 calendar days after the date of the decision by the Board. Court review shall be on the record established in the Departmental Appeals Board review and shall be in accordance with the standards of review prescribed by title 5, U.S.C., section 706(2), subparagraphs (A) through (E).

BILLING CODE 4150-04-M

Office of Child Support Enforcement

45 CFR Part 304

RIN 0970-AA86

Child Support Enforcement Program; Prohibition of Federal Funding for Costs of Guardians Ad Litem

AGENCY: Office of Child Support Enforcement (OCSE)/HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would amend Federal regulations to prohibit Federal funding under the Child Support Enforcement (IV–D) program for costs of guardians ad litem appointed to represent minors in IV–D actions. This change would made clear in regulation OCSE policy that costs of guardians ad litem are general State costs and are, therefore, not eligible for Federal financial participation (FFP).

DATES: Consideration will be given to comments received by August 16, 1991.

ADDRESSES: Send comments to Director, Office of Child Support Enforcement, Family Support Administration, 370 L'Enfant Promenade, SW., 4th floor, Washington, DC 20447. Attention: Director, Policy and Planning Division, Mail Stop: OCSE/PPD. Comments will be available for public inspection Monday through Friday, 8:30 a.m. to 5 p.m. on the 4th floor of the Department's offices at the above address.

FOR FURTHER INFORMATION CONTACT: Marilyn R. Cohen at (202) 401–5366.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation contains no information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Statutory Authority

This regulation is proposed under the authority granted to the Secretary by section 1102 of the Social Security Act (the Act). Section 1102 of the Act requires the Secretary to publish regulations that may be necessary for the efficient administration of the functions for which he is responsible under the Act.

Background

The Child Support Enforcement Program was established under Title IV–D of the Act for the purpose of establishing paternity and obtaining and enforcing the support obligations owed by absent parents. Each State must have in effect an approved State IV–D plan which complies with the Federal standards incorporated in the Act and in OCSE regulations. Federal funding at the applicable matching rate is available for services and activities made pursuant to an approved Title IV–D State plan which are determined by the Secretary to be necessary expenditures.

Federal regulations at § 304.10 provide that as a condition for FFP, the provisions of 45 CFR part 74 which establish uniform administrative requirements and cost principles shall apply to all grants made to States under the IV–D program. Guidance for determining which services and activities meet the necessary expenditure test is provided by the Office of Management and Budget's (OMB) Circular A–87, "Cost Principles for State and Local Governments". Section C.1.a. made applicable here by 45 CFR 74–.171, provides that allowable costs must "(b)e necessary and reasonable for proper and efficient administration of the grant programs, be allowable thereto under these principles, and except as specifically provided herein, not be a general expense required to carry out the overall

VOL 56 ISS 116 JE 17 1991 UMI

responsibilities of State [or] local * * * governments."

If the context of the IV–D program, expenditures are considered general State expenses if they are incurred as a result of general State requirements which are neither dependent on nor confined to the IV–D program. Therefore, any costs which result from services and activities which were not instituted solely for IV–D child support enforcement purposes would not be reimbursed. In the past, requests for reimbursement of costs for legislative expenditures, certain judicial costs, and costs for incarceration of delinquent obligors were denied because these costs are general State expenses.

Recently, States have requested FFP for costs of guardians ad litem to represent minors in IV–D litigation. For the most part, these States have general State laws which require that guardians ad litem must be appointed in any actions brought against a minor, including a minor defendant (e.g., putative father). The generally understood purpose of a guardian ad litem is to provide legal counsel. Black's Law Dictionary defines a guardian ad litem as a person "appointed by the court to prosecute or defend, in behalf of an infant or incompetent, a suit to which he is a party, and such guardian is considered an officer of the court to represent the interests of the infant or incompetent in the litigation." Although we agree that there may be a necessary duty to be performed by a guardian ad litem in the general sense, the primary issue to consider in the context of IV–D funding is whether the costs of guardians ad litem are appropriately the responsibility of the IV–D program or a general State expense required to carry out the overall responsibilities of State and local governments. As discussed in more detail below, we do not believe that the costs of guardians ad litem are necessary and reasonable costs associated with the proper and efficient administration of the Title IV–D program. This regulation proposes to add these costs to the list of expenditures for which FFP is not available.

Regulatory Provisions

Examples of circumstances in which a court may appoint a guardian ad litem include actions in which a child sues his parent, such as for injuries sustained due to the parent's negligent operations of a motor vehicle; or cases involving sterilization of a mentally retarded minor on a parent's petition. If a parent or general guardian is unavailable or is in conflict with the child, the court may appoint, in accordance with common law practice, someone to represent the interests of the infant in the grievance or cause of action. For example, in child custody disputes between parents, most States, either by statute or case law, afford the court discretion to appoint a guardian ad litem to represent the children, who, although not named parties, may have a substantial stake in the outcome of the case.

Other common examples of when courts typically appoint guardians ad litem are when a minor child has an interest in an insurance policy, an inheritance, a workers' compensation claim, or the ownership of a bank account. Additionally, courts have appointed guardians ad litem to protect the interests of children called as witnesses in their parents' divorce action.

In nearly every State, child abuse and neglect that a guardian ad litem be appointed for the child in all civil judicial proceedings arising from a report of abuse or neglect. Hence, juvenile and family courts, before whom these issues are adjudicated, routinely appoint guardian ad litem to represent the minor children involved.

These examples illustrate that the use of guardian ad litem is not restricted to IV–D purposes. In fact, States customarily engage guardians ad litem on a routine basis in a variety of contexts where the interests of children may be affected by the actions taken or results accomplished. These are general state expenses which arise from a basic recognition that the child's interests in many actions may differ from those of its parents or the State. As a result, laws provide that children are entitled to legal counsel when a vital interest of theirs is being litigated. Therefore, the costs of guardians ad litem would be incurred in the absence of the IV–D program. We believe these costs are a generally responsibility of State or local governments.

Accordingly, we propose to amend 45 CFR 304.23 by adding a new paragraph (k) which would prohibit Federal funding for costs of guardians ad litem appointed to represent minors in IV–D actions.

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this proposed rule does not constitute a "major" rule for the following reasons:

(1) The annual effect on the economy would be less than $100 million;

(2) This rule would not result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and

(3) This rule would not result in significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Although this proposed rule prohibits Federal funding for certain costs, we expect the additional costs to States to be less than $100 million.

Regulatory Flexibility Analysis

The Secretary certifies, under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this proposed regulation will not result in a significant impact on a substantial number of small entities. The primary impact is on State governments which are not considered small entities under the Act.

List of Subjects in 45 CFR Part 304

Child support, grant programs/social programs.

(Catalog of Federal Domestic Assistance Programs No. 93.023, Child Support Enforcement Program)

Dated: March 13, 1991.

Jo Anne B. Barnhart,

Director, Office of Child Support Enforcement.

Dated: May 10, 1991.

Louis W. Sullivan,

Secretary.

PART 304—[AMENDED]

For the reasons discussed above, we propose to amend 45 CFR part 304 as follows:

1. The authority citation for part 304 continues to read as follows:

Authority: 42 U.S.C. 651 through 655, 657, 1302, 1306a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), 1396(k).

2. 45 CFR 304.23 is amended by republishing the introductory text and by adding a new paragraph (k) to read as follows:

§ 304.23 Expenditures for which Federal financial participation is not available.

Federal financial participation at the applicable matching rate is not available for:

* * * * * *

(k) The costs of guardians ad litem appointed to represent minors in IV–D actions.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89–532; RM–7010]

Radio Broadcasting Services; Brawley and El Centro, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal of.

SUMMARY: This document dismisses a petition filed on behalf of Brawley Broadcasting Company, license of Station KWST(FM), Brawley, California, based upon the lack of an expression of interest in pursuing the proposal by the petitioner. See 54 FR 50003, December 4, 1989. With this action, the proceeding is terminated.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89–532, adopted May 31, 1991, and released June 12, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st Street NW., Washington, DC 20036.

47 CFR Part 73

[MM Docket No. 89–597, RM–7116 and RM–7321]

Radio Broadcasting Services; Wiggins and D'Iberville, MS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document is a Request for Supplemental Information from John F. White ("petitioner"), permittee of Station WOTC, Channel 250C2, Wiggins, Mississippi, on his proposal to change the community of license for Channel 250C2 from Wiggins to D'Iberville, Mississippi, and modify his construction permit accordingly. See 55 FR 320, January 4, 1990. Petitioner is requested to provide information to show whether D'Iberville is deserving of a first local service or whether it should be credited with all of the aural services licensed to the Biloxi-Gulfport, Mississippi Urbanized Area. No additional counterproposals may be submitted since an opportunity for filing counterproposals has been provided.

DATES: Comments must be filed on or before August 5, 1991.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: David D. Oxenford, Lisa C. Wilson, Fisher, Wayland, Cooper & Leader, 1255—23rd Street NW., suite 800, Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Request for Supplemental Information, MM Docket No. 89–597, adopted May 30, 1991, and released June 12, 1991.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1714 21st Street NW., Washington, DC 20036, (202) 452–1422.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Borsari, Borsari & Kump, 900 Seventeenth Street NW., suite 900, Washington, DC 20036 (Counsel for State Line Broadcasting).

Jack W. Ivy, Rt. 1, Box 419, Belmont, Mississippi 38827.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 91–152, adopted May 30, 1991, and released June 12, 1991. The full text of this Commission decision is available

VOL 56 ISS 116 JE 17 1991 UMI

for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1714 21st Street NW., Washington, DC 20036, (202) 452-1422.

Tupelo Communications, Inc., licensee of Station WSEL(FM), has requested the substitution of Channel 244C1 for Channel 244A at Pontotoc, Mississippi, and modification of the license for Station WSEL(FM) to specify Channel 244C1. There is a site restriction 17.7 kilometers northeast of the community at coordinates 34-23-00 and 88-53-40. To accommodate Channel 244C1 at Pontotoc, we shall propose the substitution of Channel 264A for 244A at Bolivar, Tennessee, Station WMOD, at coordinates 35-15-00 and 88-53-28, and the substitution of Channel 230A for 244A at Winona, Mississippi, Station WONA(FM) at coordinates 33-29-34 and 89-45-17. Middleton Broadcasters has proposed the allotment of Channel 264C3 to Middleton, Tennessee, as that community's first local service. There is a site restriction 6.3 kilometers northeast, at coordinates 35-06-37 and 88-50-43. Slatton Quick Company, Inc., requests the substitution of Channel 264A for 288A at Selmer, Tennessee, and modification of the license for Station WXOQ to specify Channel 264A at coordinates 35-13-11 and 88-40-23. State Line Broadcasting proposes the allotment of Channel 264C3 to Ramer, Tennessee, as that community's first FM broadcast service. There is a site restriction 2.2 kilometers northwest, at coordinates 35-05-00 and 88-38-24. Coffeeville Broadcasters, LTD., proposes the allotment of Channel 236A to Coffeeville, Mississippi, as that community's first local service. The coordinates for Channel 236A are 33-58-36 and 89-40-30. Jack W. Ivy proposes the allotment of Channel 267A to Rienzi, Mississippi, as that community's first local service. The coordinates for Channel 267A are 34-46-00 and 88-51-42. In accordance with § 1.420(g) of the Commission's Rules, we will not accept expressions of interest or require the petitioners to state the availability of alternate channels for the Pontotoc substitution.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 91-076]

Availability of Environmental Assessment and Finding of No Significant Impact for Field Testing of a New Recombinant Derived Live Pseudorabies Virus Vaccine

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document provides notice that an environmental assessment and finding of no significant impact has been prepared by the Animal and Plant Health Inspection Service concerning its authorization given to SyntroVet, Inc., to conduct limited field trials of a veterinary biological product, for a new recombinant derived live pseudorabies vaccine. The assessment indicates that the field testing of the live recombinant derived pseudorabies vaccine will not have a significant impact on the environment. Based upon this finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

DATES: June 17, 1991.

ADDRESSES: Copies of the environmental assessment and findings of no significant impact are available for public inspection at Veterinary Biologics, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 829, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Copies of the environmental assessment are also available upon request at this same address.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Deputy Director, Veterinary Biologics, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 838, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8245.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment and finding of no significant impact relative to its authorization to conduct limited field trials of a new recombinant derived live pseudorabies vaccine under the Virus-Serum-Toxin Act (VSTA) (21 U.S.C. 151 *et seq.*) produced by SyntroVet, Inc.

Under the VSTA, before a veterinary biological product can be licensed, it must be shown to be pure, safe, potent, and efficacious. Field testing is necessary in order to satisfy vaccine safety requirements as a prerequisite to licensing of the live virus vaccine under the VSTA. In the course of reviewing the testing protocol for the recombinant derived pseudorabies vaccine, APHIS assessed the impact on the environment of authorizing the manufacturer to conduct field testing of the product in six States as set forth in the environmental assessment.

The environmental assessment and finding of no significant impact provides the public with documentation of APHIS' review and analysis of environmental effects which may be associated with the gathering of information in these limited field trials.

The facts supporting APHIS' finding of no significant impact are summarized below and are contained in the environmental assessment.

1. The new SyntroVet pseudorabies vaccine is attenuated. Genetic engineering procedures were used to produce four gene deletions in the genome of the Iowa strain. One deletion destroyed the viral thymidine kinase (TK) gene, the function of which is required for viral replication in host nervous system tissue and pathogenic effects. In addition, the second deletion removed portions of the internal and terminal repeat regions, also producing an attenuating effect. These deletions reduced toxicity of the virus in comparison with the wild type virus.

Animals vaccinated with the new SyntroVet pseudorabies vaccine can be differentiated serologically from animals infected with wild type virus. Two additional deletions in the new vaccine destroyed genes coding for viral glycoprotein X (gpX or gpG) and glycoprotein 1 (gp1 or gpE). Destruction of these genes eliminated the potential for host antibody production to these two glycoproteins in vaccinated animals. Antibodies reactive to these proteins, however, were detected after challenge with wild type virus in both previously vaccinated and control animals. This provides a serological method for differentiation between vaccinated and infected hosts, a capability which will facilitate epidemiological studies.

2. The new SyntroVet pseudorabies vaccine is both safe and efficacious. The vaccine virus was shown to be avirulent in pigs and other susceptible species and yet fully capable of eliciting protective immunity against challenge with wild type pseudorabies vaccine in swine vaccinated at three days of age.

3. The new SyntroVet pseudorabies virus is stable. Reversion to virulence was not observed in backcross studies during three sequential passages of the new SyntroVet pseudorabies virus isolated from the respiratory tract of susceptible infected piglets. In addition, backpassages of virus was successful only when virus was expanded in cell culture, but not when actual respiratory secretions were used as inoculum.

4. The new SyntroVet pseudorabies vaccine is non-pathogenic to man. This conclusion is based on the fact that wild type parent virus is not pathogenic to man. Since the genome of the new SyntroVet pseudorabies virus in deficient (four gene deletions) in comparison with wild type virus, it is reasonable to conclude that the new SyntroVet pseudorabies virus is also nonpathogenic to man.

5. The new SyntroVet pseudorabies virus is not oncogenic. It is genetically deficient in comparison to the parental wild type virus, which is widely distributed in nature and contains no known oncogene or cancer-causing substance.

6. The new SyntroVet pseudorabies vaccine is derived from the same parental strain closely related to a licensed pseudorabies vaccine construct which has been safely used since 1987. Ten million doses of this vaccine have been distributed, and to date, no adverse findings have been reported.

VOL 56 ISS 116 JE 17 1991 UMI

Based on the foregoing, APHIS has determined that the field testing of the new recombinant derived live pseudorabies vaccine would have no significant impact on the human environment.

The environmental assessment and finding of no significant impact has been prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4331 *et seq.*); (2) Regulations of the Council for Environmental Quality for implementing the Procedural Provisions of NEPA (40 CFR Parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part lb); and (4) APHIS guidelines implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done in Washington, DC, this 12th day of June 1991.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–M

Forest Service

Supplement to Final Environmental Impact Statement Siuslaw National Forest Land and Resource Management Plan for Oregon Dunes National Recreation Area, OR

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Notice is hereby given that the Forest Service, USDA, will prepare a Supplement to the 1990 Final Environmental Impact Statement (EIS) for the Siuslaw National Forest Land and Resource Management Plan (The Plan). THe EIS Supplement will consider a range of alternatives for managing the Oregon Dunes National Recreation Area (ODNRA), a part of the Siuslaw National Forest. Current management direction for the ODNRA is contained in a ODNRA plan issued in May of 1979 which was incorporated unchanged into The Plan. Any change in management direction for the ODNRA will result in amending The Plan. The Record of Decision for The Plan specifies that the ODNRA management direction revision is to be completed by March 1993.

Alternatives considered will include a no-action alternative which would continue current management direction. Other alternatives will consider differing levels and mixes of management activities and programs. They will be based on issues identified in preliminary scoping with interested publics, agency employees, and other federal, state and local entities. The ODNRA is located on the central Oregon coast between the communities of Florence and Coos Bay/North Bend within Lane, Douglas, and Coos counties.

The agency invites written comments on the scope of this project. In addition, the agency gives notice of this analysis so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope and implementation of this proposal must be received by July 17, 1991.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis to Ranotta McNair, Area Ranger, Oregon Dunes National Recreation Area, Reedsport OR.

FOR FURTHER INFORMATION CONTACT: Questions and comments about this Supplement should be directed to Mike Harvey, Project Leader, Oregon Dunes National Recreation Area, 855 Highway Avenue, Reedsport, OR 97467; phone (503) 271–3611.

SUPPLEMENTARY INFORMATION: Congress established the Oregon Dunes National Recreation Area on March 23, 1972 to provide for:

the public outdoor recreation use and enjoyment of certain ocean shorelines and dunes, forested areas, fresh water lakes, and recreational facilities in the State of Oregon by present and future generations and the conservation of scenic, scientific, historic, and other values contributing to public enjoyment of such lands and waters . . .

The ODNRA is comprised of 32,185 acres, of which approximately 26,000 acres are within the National Forest lands system; the remaining acres are a mix of state, county and private lands. The ODNRA includes 36 miles of ocean beach, with about 14,000 acres of non-vegetated sand. The ODNRA hosts approximately two million visitors each year and accommodates a wide variety of outdoor recreation activities. It features unique sand dunes ecosystems as well as a wide variety of other ecosystem types within the relatively small land base. Water resources include 32 freshwater lakes, two major rivers (Siuslaw and Umpqua) and three smaller streams (Siltcoos, Tahkenitch, and Tenmile). Facilities include 14 fee campgrounds, 21 day use or staging areas, approximately 25 miles of trails and the ODNRA headquarters in Reedsport.

Public participation will be especially important in the planning process. The Forest Service will be seeking information, comments, and assistance from Federal, state, and local agencies, and other individuals or organizations who may be interested in or affected by the proposed actions. This information will be used in preparation of the EIS Supplement. The participation will start with scoping which includes:

1. Identifying potential issues;
2. Identifying issues to be analyzed in depth;
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental process;
4. Identifying project information needs;
5. Exploring additional alternatives;
6. Identifying potential environmental effects of the proposed action and alternatives (i.e. direct, indirect, and cumulative effects and connected actions); and
7. Determining potential cooperating agencies and task assignments.

The public will be asked to assist in review of alternatives and environmental consequences in the draft Supplement to the EIS. Public comments on the draft Supplement will be used to develop the final Supplement.

The draft Supplement is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review July 1992. Copies of the draft Supplement will be distributed to interested and affected agencies, organizations, and members of the public for their review and comment.

EPA will publish a notice of availability of the draft Supplement in the **Federal Register**. The comment period on the draft Supplement will be 90 days from the date the EPA notice appears in the **Federal Register**. It is very important that those interested in the management of the ODNRA participate at that time.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft Supplement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft Supplement. Comments may also address the adequacy of the draft Supplement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1508.3 in addressing these points).

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of a draft Supplement must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environment objections that could be raised at the draft Supplement stage but that are not raised until after completion of the final Supplement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 f.2d 1016, 1022 (9th Cir, 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final Supplement. To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comment on the draft Supplement should be as specific as possible.

The final Supplement is scheduled to be completed March 1993. In the final Supplement, The Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the draft Supplement and applicable laws, regulations, and policies considered in making the decision regarding this proposal. John F. Butruille, Regional Forester, Pacific Northwest Region, is the responsible official. As the responsible official he will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service appeal regulations (36 CFR 217).

Dated: June 7, 1991.

Charles F. Krebs,

Acting Regional Forester.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Antarctic Marine Living Resources Conservation and Management Measures.

Form Number: NOAA Forms 88–211, 88–211A, 88–211B, and 88–211–C; OMB–0648–0194.

Type of Request: REquest for revision of a currently approved collection.

Burden: 4 respondents; 48 reporting hours; average hours per response—12 hours.

Needs and Uses: The requirements are pursuant to Antarctic Marine Living Resources Act (1984) regulating harvesting in and importing from the Antarctic. Forms/Logbooks will be used to collect information from an anticipated four respondents for the conservation/management of resources and to meet treaty obligations of the Convention on the Conservation of Antarctic Marine Living Resources.

Affected Public: Individuals, business or other for-profit.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Ronald Minsk, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230. Written comments and recommendations for the proposed information collection should be sent to Ronald Minsk, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: June 11, 1991.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–M

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Travel and Tourism Administration (USTTA).

Title: Industry Survey.

Form Number: Agency-none; OMB.

Type of Request: New.

Burden: 2500 respondents; 834 burden hours. Average minutes per response is 20.

Needs and Uses: This survey is being conducted to have the travel and tourism industry evaluate the programs and services provided by USTTA. Results will allow USTTA to determine the value of programs/services and where improvements can be made. OMB will receive input on how the industry feels USTTA should be funded.

Affected Public: The travel and tourism industry.

Frequency: One time only.

Respondent's Obligations: Voluntary.

OMB Desk Officer: Marshall Mills, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Marshall Mills, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: June 12, 1991.

International Trade Administration

[A-570-814]

Initiation of Antidumping Duty Investigation: Certain Carbon Steel Butt-Weld Pipe Fittings From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: David C. Smith, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-3798.

Initiation

The Petition

On May 22, 1991, U.S. Fittings Group, an ad hoc trade association, filed with the Department of Commerce (the Department) an antidumping duty petition on behalf of the United States industry producing certain carbon steel butt-weld pipe fittings (butt-weld pipe fittings). In accordance with 19 CFR 353.12, the petitioner alleges that imports of butt-weld pipe fittings from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States as less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports are materially injuring, or threaten material injury to, a U.S. industry. U.S. Fittings Group supplemented its petition on June 7, 1991.

The petitioner has stated that it has standing to file the petition because it is an interested party, as defined in 19 CFR 353.2(k), and because it has filed the petition on behalf of the U.S. industry producing butt-weld pipe fittings. If any interested party, as described in 19 CFR 353.2(k) (3), (4), (5), or (6), wishes to register support for, or opposition to, this investigation, please file written notification with the Assistant Secretary for Import Administration.

United States Price and Foreign Market Value

Petitioner based United States price (USP) on November 1990 price quotations for butt-weld pipe fittings produced in the PRC, which were obtained from a representative of a trading company. The prices petitioner obtained were quoted CIF West Coast of the United States. Petitioner reduced USP for ocean freight, marine insurance, and brokerage based on the difference between customs value and CIF value, as reported in the Department's IM-145 statistics for 1990.

Petitioner, alleging that the PRC is a nonmarket economy (NME) country within the meaning of section 773(c) of the Act, based foreign market value (FMV) on three methodologies. Method (1) bases FMV on the factors of production of one of the petitioning firms and values those factors in Thailand and, where surrogate information was not reasonably available for overhead and packing, in the United States. Method (2) employs the factors of production of one of the petitioning firms and values those factors in India and, where surrogate information was not reasonably available for overhead and packing, in the United States. Petitioner also included the statutory minimums of ten percent for general expenses and eight percent for profit in methods (1) and (2). Method (3) bases FMV on Thai export prices to the United States.

The Department has not accepted methods (1) and (3) contained in the petition as the basis for FMV because in recent cases India has been found to be more comparable to the PRC than Thailand, pursuant to section 773(c)(1)(B). We have accepted methods (2) for purposes of this initiation. Based on this method, petitioner alleges dumping margins ranging from 30.8 to 182.9 percent.

Initiation of Investigation

Under 19 CFR 353.13(a), the Department must determine, within 20 days after a petition is filed, whether the petition properly alleges the basis on which an antidumping duty may be imposed under section 731 of the Act, and whether the petition contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on butt-weld pipe fittings from the PRC and find that it meets the requirements of 19 CFR 353.13(a). Therefore, we are initiating an antidumping duty investigation to determine whether imports of butt-weld pipe fittings from the PRC are being, or are likely to be, sold in the United States at less than fair value.

In accordance with 19 CFR 353.13(b) we are notifying the International Trade Commission (ITC) of this action.

Any producer or reseller seeking exclusion from a potential antidumping duty order must submit its request for exclusion within 30 days of the date of the publication of this notice. The procedures and requirements regarding the filing of such requests are contained in 19 CFR 353.14.

Pursuant to section 771(18) of the Act and based on prior investigations, the PRC is an NME. Parties will have the opportunity to comment on this issue and whether foreign market value should be based on prices or costs in the NME in the course of this investigation. The Department further presumes, based on the extent of central control in an NME, that a single antidumping duty margin is appropriate for all exporters. Only if NME exporters can demonstrate an absence of central government control with respect to the pricing of exports, both in law and in fact, will they be entitled to separate, company-specific margins. (See, Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China (56 FR 20588, May 6, 1991) for a discussion of the information the Department considers in this regard).

In accordance with section 773(c), FMV in NME cases is based on NME producers' factors of production (valued in a market economy country). Absent evidence that the PRC government has selected which factories produce for the United States, for purposes of the investigation we intend to base FMV only on those factories in the PRC which produce butt-weld pipe fittings for export to the United States.

Scope of Investigation

The products covered by this investigation are carbon steel butt-weld pipe fittings, having an inside diameter of less than 360 millimeters (14 inches), imported in either finished or unfinished form. Unfinished butt-weld pipe fittings that are not machined, not tooled and not otherwise processed after forging are not inlcuded in the scope of this investigation. These formed or forged pipe fittings are used to join sections in piping systems where conditions require permanent, welded connections, as distinguished from fittings based on other fastening methods (e.g., threaded, grooved, or bolted fittings). Carbon steel butt-weld pipe fittings are currently classified under subheading 7307.93.30 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Preliminary Determination by ITC

The ITC will determine by July 8, 1991, whether there is a reasonable indication that imports of butt-weld pipe fittings from the PRC are materially injuring, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated. If affirmative, the Department will make its preliminary determination on or before October 29, 1991, unless the investigation is terminated pursuant to 19 CFR 353.17 or the preliminary determination is extended pursuant to 19 CFR 353.15.

This notice is published pursuant to section 732(c)(2) of the Act and 19 CFR 353.13(b).

Dated: June 11, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Industrial Belts and Components and Parts From Italy; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by the petitioner, the Department of Commerce has conducted an administrative review of the antidumping duty order on industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from Italy. The review covers one manufacturer and exporter of this merchandise to the United States, and the period February 1, 1989 through May 31, 1990. As a result of the review, the Department has preliminarily determined that a dumping margin exists.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Megan Pilaroscia or Jeffrey Laxague, Office of Agreements Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-3793.

SUPPLEMENTARY INFORMATION:

Background

On June 14, 1989, the Department of Commerce ("the Department") published in the **Federal Register** (54 FR 25313) the antidumping duty order on industrial belts from Italy. On June 29, 1990, the petitioner requested that we conduct an administrative review of the February 1, 1989 through May 31, 1990 period. We published a notice of initiation of the antidumping administrative review on July 26, 1990 (55 FR 30480). The Department has now conducted this administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act") (19 U.S.C. 1675).

Scope of the Review

Imports covered by the review are shipments of industrial belts and components and parts thereof, whether cured or uncured, from Italy. The covered merchandise consists of V-belts and synchronous industrial belts used for power transmission. These include V-belts and synchronous belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loops) belts, or in belting in lengths or links.

This review excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

During the period of review, the merchandise was classifiable under Harmonized Tariff System ("HTS") subheadings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7326.20.00. The HTS subheadings are provided for convenience and Customs purposes. The written description remain dispositive.

The review covers the shipments of one manufacturer and exporter of industrial belts from Italy to the United States and the first review period, beginning on February 1, 1989 and ending on May 31, 1990.

United States Price

In calculating the United States price, the Department used purchase price or exporter's sales price ("ESP"), both as defined in section 772 of the Tariff Act, as appropriate. United States price was based on the packed f.o.b., c.i.f., or ex works price to unrelated purchasers in, or for exportation to, the United States.

We made adjustments of ESP sales for ocean freight, foreign inland and marine insurance, U.S. and foreign inland freight, U.S. and foreign brokerage and handling charges, U.S. import duties, cash discounts, commissions, repacking in the United States, warranties, credit expenses, inventory carrying expenses, and indirect selling expenses. No adjustments were made to purchase price sales.

Foreign Market Value

In calculating foreign market value, the Department used home market price as defined in section 773 of the Tariff Act since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based on the packed c.i.f. or f.o.b. price to unrelated purchasers in the home market. We made adjustments, where appropriated, for inland freight and insurance, rebates, cash discounts, technical service expenses, inspection, quality control and testing expenses, credit expenses, and other direct selling expenses, differences in cost attributable to differences in physical characteristics of the merchandise, and difference in packing. We made further adjustments, where applicable, for indirect selling expenses to offset U.S. commissions and U.S. selling expenses deducted in ESP calculations, but not exceeding the amount of those U.S. commissions or indirect selling expenses. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margin exists:

Period of review	Margin (percent)
2/1/89-5/31/90	80.47

Parties to the proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested parties may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication of this notice or the first workday thereafter.

Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in the case briefs and comments, may be filed not later than 37 days after the date of publication. The Department will publish final results of this administative review, including the results of its analysis of issues raised in any such written comments or at a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individuals differences between United States price and foreign market

VOL 56 ISS 116 JE 17 1991 UMI

value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided by section 751(a)(1) (19 U.S.C. 1675 (a)(1)) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margin shall be required. The cash deposit rate for all other exporters/producers shall be 80.47 percent for shipments of industrial belts covered by this review. This deposit requirement, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.22 of the Commerce regulations (19 CFR 353.22(c)(5).

Dated: June 11, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration

Postponement of Final Antidumping Duty Determinations: Oscillating Fans and Ceiling Fans From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Steven Lim, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW, Washington, DC 20230, at (202) 377-4087.

POSTPONEMENT: On June 3 and June 4, 1991, respectively, Durable Electrical Metal Factory Ltd./Parawind Ltd./Paragon Industries (Durable), a respondent in the oscillating fans investigation accounting for a significant proportion of exports of the subject merchandise, and CEC Electrical Manufacturing (International) Co., Ltd./CEC Industries (Shenzhen) Ltd./CEC (USA) Texas Group, Inc. (CEC), and Wing Tat Electric Manufacturing Co., Ltd./Chime Miles Co., Ltd. (Wing Tat), respondents in the ceiling fans investigation accounting for a significant proportion of exports of the subject merchandise, requested that the Department postpone the final determinations in accordance with section 735(a)(2) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)). Accordingly, we are postponing the date of the final determinations until not later than October 18, 1991.

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary no later than September 9, 1991, and rebuttal briefs no later than September 16, 1991. In accordance with 19 CFR 353.38(b), we will hold public hearings, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the oscillating fans and ceiling fans hearings will be held on September 19, 1991, at 9 a.m. and 1:30 p.m., respectively, at the U.S. Department of Commerce, Room 4830, 14th Street and Constitution Avenue NW, Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearings 48 hours before the scheduled time.

This notice is published pursuant to section 735(d) of the Act and 19 CFR 353.20(b)(2).

Dated: June 11, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Portable Electric Typewriters From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration/International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On April 5, 1991, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on portable electric typewriters from Japan. The review covers one manufacturer/exporter of this merchandise to the United States, Canon, Inc., and the period May 1, 1987 through April 30, 1988.

We gave interested parties an opportunity to comment on our preliminary results. No comments were received.

The final margin for Canon, Inc., is 88.65 percent.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Tom Prosser or Maureen Flannery, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On April 5, 1991, the Department of Commerce (the Department) published in the Federal Register (56 FR 14060) the preliminary results of its administrative review of the antidumping duty order on portable electric typewriters (PETs) from Japan (45 FR 30618, May 9, 1980). We have now completed this administrative review, in accordance with section 751 of the Tariff Act of 1930 (the Tariff Act).

Scope of the Review

Imports covered by the review are shipments of non-automatic PETs from Japan that do not incorporate a calculating mechanism. The merchandise is currently classified under Harmonized Tariff System (HTS) item numbers 8469.21.00 and 8469.29.00. During the review period, this merchandise was classifiable under Tariff Schedules of the United States Annotated (TSUSA) item number 676.0510 and, in some cases, under TSUSA item number 676.0540. HTS and TSUSA numbers are provided for convenience and Customs purposes. The written description remains dispositive.

This review covers one manufacturer/exporter of Japanese PETs to the United States, Canon, Inc. (Canon), and the period May 1, 1987 through April 30, 1988.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. No comments were received.

Final Results of the Review

Canon declined to respond to the Department's questionnaire for the May 1, 1987–April 30, 1988, period. In a letter to the Department, Canon acknowledged that, as a result, the Department could use the best information otherwise available (BIA) for Canon for this period. We have used as BIA the highest rate for a responding firm for this period. (See Portable Electric Typewriters from Japan, Final Results of Antidumping Duty Administrative Review (56 FR 14072, April 5, 1991).) We have determined the final margin to be:

Manufacturer	Period of review	Margin (percent)
Canon	05/01/87-04/30/88	88.65

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

As provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margin will be required for Canon, Inc. For any shipments of this merchandise manufactured or exported by any of the remaining known manufacturers/exporters not covered in this review, the cash deposit will continue to be at the rates published in the final results of the last administrative review for each of those firms. For any future entries of this merchandise from a new exporter, whose first shipments occurred after April 30, 1988, and who is unrelated to any reviewed firm or any previously reviewed firm, a cash deposit of estimated antidumping duties of 88.65 percent shall be required. These deposit requirements are effective for all shipments of portable electric typewriters (including automatic portable electric typewriters and portable electric typewriters with calculating mechanisms) entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until the publication of the final results of the next administrative review.

This administrative review and notice is in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: June 4, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

[FR Doc. 91-14359 Filed 6-14-91; 8:45 am]

BILLING CODE 3510-DS-M

[A-549-807]

Initiation of Antidumping Duty Investigation: Certain Carbon Steel Butt-Weld Pipe Fittings From Thailand

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Michelle A. Frederick, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-0656.

Initiation

The Petition

On May 22, 1991, U.S. Fittings Group, an ad hoc trade association filed with the Department of Commerce (the Department) an antidumping duty petition on behalf of the United States industry producing certain carbon steel butt-weld pipe fittings (butt-weld pipe fittings). In accordance with 19 CFR 353.12, the petitioner alleges that imports of butt-weld pipe fittings from Thailand are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports are materially injuring, or threaten material injury to, a U.S. industry. U.S. Fittings Group supplemented its petition on June 7, 1991.

The petitioner has stated that it has standing to file the petition because it is an interested party, as defined in 19 CFR 353.2(k), and because it has filed the petition on behalf of the U.S. industry producing butt-weld pipe fittings. If any interested party, as described in 19 CFR 353.2(k) (3), (4), (5), or (6), wishes to register support for, or opposition to, this investigation, please file written notification with the Assistant Secretary for Import Administration.

United States Price and Foreign Market Value

Petitioner based United States Price (USP) on price quotations supplied in an affidavit by one of the U.S. producers. The affidavit states prices at which a Thai producer sold the subject merchandise for export to the United States in September, November, and December 1990. These prices are CIF, duty paid, and include importer's mark-up. Petitioner reduced USP for ocean freight, marine insurance, and brokerage based on the percentage difference between customs value and CIF value, as reported in the Department's IM-145 statistics for 1990. Petitioner has no information on the amount of the importer's mark-up and thus made no downward adjustment to USP. Petitioner also reduced USP for customs duties in accordance with section 772(d)(2)(A) of the Act.

Petitioner states that it had no reasonable means of obtaining home market or third country prices. Therefore, petitioner based foreign market value (FMV) on constructed value (CV), in accordance with section 773(e) of the Act. Petitioner's estimate of FMV is based on one of the petitioning firm's costs of manufacture, adjusted to reflect Thai costs for seamless steel pipe, electricity, labor, and fringe benefits. Petitioner valued overhead and packing on actual U.S. costs, as these were the only costs reasonably available to it. Furthermore, petitioner added the statutory minimums of ten percent for general expenses and eight percent for profit.

Petitioner alleges dumping margins ranging from zero to 52.6 percent.

Initiation of Investigation

Under 19 CFR 353.13(a), the Department must determine, within 20 days after a petition is filed, whether the petition properly alleges the basis on which an antidumping duty may be imposed under section 731 of the Act, and whether the petition contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on butt-weld pipe fittings from Thailand and find that it meets the requirements of 19 CFR 353.13(a). Therefore, we are initiating an antidumping duty investigation to determine whether imports of butt-weld pipe fittings from Thailand are being, or are likely to be, sold in the United States at less than fair value.

In accordance with 19 CFR 353.13(b) we are notifying the International Trade Commission (ITC) of this action.

Any producer or reseller seeking exclusion from a potential antidumping duty order must submit its request for exclusion within 30 days of the date of the publication of this notice. The procedures and requirements regarding the filing of such requests are contained in 19 CFR 353.14.

Scope of Investigation

The products covered by this investigation are carbon steel butt-weld pipe fittings, having an inside diameter of less than 360 millimeters (14 inches), imported in either finished or unfinished form. Unfinished butt-weld pipe fittings that are not machined, not tooled and not otherwise processed after forging are not included in the scope of this investigation. These formed or forged pipe fittings are used to join sections in piping systems where conditions require permanent, welded connections, as distinguished from fittings based on other fastening methods (e.g., threaded, grooved, or bolted fittings). Carbon steel butt-weld pipe fittings are currently classified under subheading 7307.93.30 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

VOL 56 ISS 116 JE 17 1991 UMI

Preliminary Determination by ITC

The ITC will determine by July 8, 1991, whether there is a reasonable indication that imports of butt-weld pipe fittings from Thailand are materially injuring, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated. If affirmative, the Department will make its preliminary determination on or before October 28, 1991, unless the investigation is terminated pursuant to 19 CFR 353.17 or the preliminary determination is extended pursuant to 19 CFR 353.15.

This notice is published pursuant to section 732(c)(2) of the Act and 19 CFR 353.13(b).

Dated: June 11, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 91-14267 Filed 6-14-91; 8:45 am]

BILLING CODE 3510-DS-M

Short-Supply Review: Certain Large Diameter Pipe

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice of Short-Supply Review and Request for Comments: Certain Large Diameter Pipe.

SUMMARY: The Secretary of Commerce ("Secretary") hereby announces a review and request for comments on a short-supply request for 11,200 net tons of certain large diameter pipe for the third quarter of 1991 under Paragraph 8 of the U.S.-Japan steel arrangement.

SHORT SUPPLY REVIEW NUMBER: 53.

SUPPLEMENTARY INFORMATION: Pursuant to section 4(b)(3)(E) of the Steel Trade Liberalization Program Implementation Act, Public Law No. 101-221, 103 Stat. 1886 (1989) ("the Act"), and section 357.104(b) of the Department of Commerce's Short-Supply Procedures, 19 CFR § 357.104(b) ("Commerce's Short-Supply Procedures"), the Secretary hereby announces that a short-supply request is under review with respect to certain large diameter pipe ("LDP"). On June 10, 1991, the Secretary received an adequate petition from Enron Corporation ("Enron") requesting a short-supply allowance under Paragraph 8 of the Arrangement Between the Government of Japan and the Government of the United States of America Concerning Trade in Certain Steel Products for 11,200 net tons of American Petroleum Institute grade X-70 submerged arc welded steel pipe, 30 inches in diameter, and with a wall thickness of 0.30 inch. This pipe is for the construction of the Transwestern Pipeline Expansion and must be imported during the third quarter of 1991. Enron is requesting a short-supply allowance for this material because domestic manufacturers of LDP are unable to meet Enron's needs for this pipe during the requested period, and its potential foreign supplier has no regular export licenses available during this period.

Section 4(b)(4)(B)(ii) of the Act and § 357.106(b)(2) of Commerce's Short-Supply Procedures require the Secretary to make a determination with respect to a short-supply petition not later than the 30th day after the petition is filed, unless the Secretary finds that one of the following conditions exist: 1) The raw steelmaking capacity utilization in the United States equals or exceeds 90 percent; 2) the importation of additional quantities of the requested steel product was authorized by the Secretary during each of the two immediately preceding years; or 3) the requested steel product is not produced in the United States. The Secretary finds that none of these conditions exists with respect to the requested product, and therefore, the Secretary will determine whether this product is in short supply not later than July 10, 1991.

COMMENTS: Interested parties wishing to comment upon this review must send written comments not later than June 24, 1991 to the Secretary of Commerce, Attention: Import Administration, Room 7866, U.S. Department of Commerce, Pennsylvania Avenue and 14th Street, NW., Washington, DC 20230. Interested parties may file replies to any comments submitted. All replies must be filed not later than 5 days after June 24, 1991. All documents submitted to the Secretary shall be accompanied by four copies. Interested parties shall certify that the factual information contained in any submission they make is accurate and complete to the best of their knowledge.

Any person who submits information in connection with a short-supply review may designate that information, or any part thereof, as proprietary, thereby requesting that the Secretary treat that information as proprietary. Information that the Secretary designates as proprietary will not be disclosed to any person (other than officers or employees of the United States Government who are directly concerned with the short-supply determination) without the consent of the submitter unless disclosure is ordered by a court of competent jurisdiction. Each submission of proprietary information shall be accompanied by a full public summary or approximated presentation of all proprietary information which will be placed in the public record. All comments concerning this review must reference the above noted short-supply number.

FOR FURTHER INFORMATION CONTACT: Mark B. Brecht of Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, Pennsylvania Avenue and 14th Street NW., Washington, DC 20230, (202) 377-1166 or (202) 377-0159.

Dated: June 12, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 91-14429 Filed 6-14-91; 8:45 am]

BILLING CODE 3510-DS-M

Technology Administration

National Medal of Technology Nomination; Deadline Extension

AGENCY: Office of Technology Commercialization; Technology Administration, Commerce.

ACTION: Notice of extended deadline.

SUMMARY: This notice announces an extended deadline to accommodate nominations of individuals and/or companies for the National Medal of Technology. Nominations closed September 30, 1991 but will now be extended until October 30, 1991.

FOR FURTHER INFORMATION OR NOMINATION PACKAGES, CONTACT: Dr. Paul Braden, Manager, National Medal of Technology Nomination Evaluation Committee, U.S. Department of Commerce, 14th and Constitution Avenue NW., Herbert C. Hoover Building, Room 4418, Washington, DC 20230 (202) 377-5572.

SUPPLEMENTAL INFORMATION: A nominee for the National Medal of Technology must be a U.S. Citizen; consist of up to four U.S. citizens who share an award jointly; or be a U.S.-owned company, defined as a partnership or corporation which carries out a commercial or industrial enterprise, and which is substantially owned by citizens of the U.S.

Nominations are solicited in two separate areas—contributions to the promotion of technology or contributions to the promotion of technological manpower. Selections for the promotion of technology will be focussed on:

- Technology transfer from public organizations;
- Promotion of advanced manufacturing technology;
- Companies best embodying technology management principles; and
- General product and process innovations.

Selections for the promotion of technological manpower will be for strengthening a technologically competent workforce through:

- Alleviation of technical workforce shortages; and
- Motivation and improved performance of the existing workforce.

Dated: June 10, 1991.

Deborah L. Wince-Smith,

Assistant Secretary for Technology Policy.

[FR Doc. 91-14361 Filed 6-14-91; 8:45 am]

BILLING CODE 3510-18-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Base Closure and Realignment Commission

ACTION: Announcement of Public Deliberation Meetings of the Defense Base Closure and Realignment Commission.

SUMMARY: Additional open public meetings of the Defense Base Closure and Realignment Commission will be held in Washington, DC and other locations in accordance with the following dates and times, and at specific meeting locations as shown, or to be determined and published subsequently in the Federal Register: Washington, DC: Monday, June 17, 9:30 a.m., room 334, Cannon House Office Building, First Street and Independence Ave., to receive congressional testimony and have public hearings on bases/installations newly added to the base closure and realignment list as follows: Staten Island Naval Station, Corps of Engineers, Fort Totten, Fort Hamilton, Fort Pickett, Fort A.P. Hill, Fort Buchanan, Indiantown Gap, Fort McCoy and MacDill Air Force Base; Monday, June 17, 1:30 p.m., Marines Recruit Training Depot, San Diego, CA, to receive testimony on the proposed realignment or closure of the Naval Training Center, San Diego, Marine Training Depot, San Diego, Long Beach Naval Shipyard, and Naval Station Treasure Island; Tuesday, June 18, 2:30 p.m., City Auditorium, San Angelo, Texas, to receive testimony on the proposed closure or realignment of Goodfellow Air Force Base; Thursday, June 20, 1 p.m., Plattsburgh Air Force Base, N.Y., to receive testimony on the proposed closure or realignment of Plattsburgh Air Force Base; Friday, June 21, 3 p.m., Temple Theater, 8th Street and 24th Ave., Meridian, MS, to receive testimony on the proposed closure or realignment of Naval Air Station, Meridian; Friday, June 21, 9 a.m., Naval Air Station, Kingsville, to receive testimony on the proposed closure or realignment of Naval Air Station, Kingsville, Friday, Saturday and Sunday, June 28, 29 and 30, 9:30 a.m., Washington, DC, specific location to be determined, to conduct deliberations on base closures and realignments.

Less than 15 days notice is being given in some instances due to the inclusion on June 7 of additional installations and/or organizations for possible closure and realignment and the decision to hold public hearings on these additions prior to the statutorily mandated deadline.

FOR FURTHER INFORMATION: Defense Base Closure and Realignment Commission, Mr. Cary Walker, Director of Communications and Public Affairs, 202-653-0823.

Dated: June 13, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Forms EIA-1, 3, 4, 5, 6, 7A, and 20 (Coal Program Package)

AGENCY: Energy Information Administration, Department of Energy.

ACTION: Notice of the proposed extension of the EIA-1, 3, 4, 5, 6, 7A, and 20 (Coal Program Package) and solicitation of comments concerning proposed changes to the Coal Survey Forms.

SUMMARY: The Energy Information Administration (EIA), as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Pub. L. No. 96-511, 44 U.S.C. 3501 et seq.), conducts a pre-survey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, EIA is soliciting comments concerning the proposed revisions and a three year extension of approval for its coal forms. These forms include: EIA-1, "Weekly Coal Monitoring Report—General Industries and Blast Furnaces;" EIA-3, "Quarterly Coal Consumption Report—Manufacturing Plant;" EIA-4 "Weekly Coal Monitoring Report—Coke Plants;" EIA-5, "Coke Plant Report—Quarterly;" EIA-6, "Coal Distribution Report;" EIA-7A, "Coal Production Report;" and EIA-20, "Weekly Telephone Survey of Coal Burning Utilities.".

DATES: Written comments must be submitted within 30 days of the publication of the notice. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below of your intention to do so as soon as possible.

ADDRESSES: Send comments to John G. Colligan, Energy Information Administration, EI-521, Forrestal Building, U.S. Department of Energy, Washington, DC 20585, (telephone number: 202-254-5465.

FOR FURTHER INFORMATION OR TO OBTAIN COPIES OF THE PROPOSED FORMS AND INSTRUCTIONS: Requests for additional information or copies of the forms and instructions should be directed to John G. Colligan at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Request for comments

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. No. 93-275) and the Department of Energy Organization Act (Pub. L. No. 95-91), the Energy Information Administration is obliged to carry out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze, and disseminate data and information related to energy resource reserves, production, demand, and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs. To meet this responsibility, as well as internal DOE requirements that are dependent on accurate data, the EIA conducts statistical surveys that encompass each significant coal supply,

VOL 56 ISS 116 JE 17 1991 UMI

distribution and consumption activity in the United States.

II. Current Actions

EIA proposes an extension with changes to its existing collections. These changes will have little impact on respondent burden, better reflect current industry operations and respond to congressional, Federal and public data users' requirements. The proposed changes are summarized below:

1. EIA–3

a. Previous quarter's ending coal stockpile balance for verification will be pre-printed.

b. A question regarding the plant's capability to generate one megawatt or more of electricity to allow for the identification and removal of duplicate data occurring on the Forms EIA–3 and EIA–867, and to provide updates to the frame for the EIA–867, "Annual Nonutility Power Producer Report" will be added.

2. EIA–5

a. Previous quarter's ending coal stockpile balance for verification will be pre-printed.

b. A question regarding the plant's capability to generate one megawatt or more of electricity to allow for the identification and removal of duplicate data occurring on the Forms EIA–5 and EIA–867, and to provide updates to the frame for the EIA–867 will be added.

c. Questions on quantities of coal and coke purchased/transferred, and the amount of breeze used in the carbonization process will be added. This information is needed to clarify the reporting of coke production and coal consumption for coke production.

3. EIA–6

a. Change the coal usage category from Electric Utilities to Electric Generation, to include nonutility coal-fired power producers. The new data will more accurately reflect the amount of coal used in the United States to produce electricity.

4. EIA–7A

a. Section IV (Coal Quality) to ask for the Btu, ash, sulfur, and moisture content of the coal reported in section II.C Production Quantity and Value was added. The responder is given the option to complete Section IV directly on the form, or submit a copy of a proximate analysis report for a representative coal sample. The purpose of collecting these data is to obtain basic coal quality information needed in supply analyses and modeling in support of the National Energy Strategy, Clean Air Act, and related policy and legislative programs.

b. Section III Productivity delete Part A. Employment and Part C. Coal Preparation. The following data elements will no longer be collected:

Part A

- Total Direct Labor Hours;
- Total Number of Production Days Worked;
- Average Number of Employees per Shift;
- Average Number of Shifts per day;
- Average Length of Production Shift;

Part B

- Percentage of coal prepared from underground mines;
- Percentage of coal prepared from surface mines;
- Total direct hours worked at preparation plant.

Employment and direct labor hours will be published using data collected by the Mine Safety and Health Administration under the "Quarterly Mine Employment and Coal Production Report", Form 7000–2.

III. Request for Comments

Prospective respondents and other interested parties should comment on the proposed extension and revisions. The following general guidelines are provided to assist in the preparation of responses. Please indicate to which form or forms your comments apply.

As a potential respondent:

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarification?

B. Can the data be submitted using the definitions included in the instructions?

C. Can data be submitted in accordance with the response time specified in the instructions?

D. Public reporting burden (hours per response) for each of the following forms is shown below:

EIA–1=*1.0* hrs.; EIA–3=*0.5* hrs.; EIA–4=*1.0* hrs.;
EIA–5=*1.0* hrs.; EIA–6=*1.5* hrs.; EIA–7A=*1.21* hrs.; and EIA–20=*1.0* hrs.

How much time, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information, do you estimate it will require you to complete and submit the required form(s)?

E. What is the estimated cost of completing these form(s), including the direct and indirect costs associated with the data collections? Direct costs should include all costs, such as administrative costs, directly attributable to providing this information.

F. How can the form(s) be improved?

G. Do you know of any other Federal, State, or local agency that collects similar data? If you do, please specify the agency, the data element(s), and the means of collection.

As a potential user:

A. Can you use data at the levels of detail indicated on the form(s)?

B. For what purpose would you use the data? Be specific.

C. How could the form(s) be improved to better meet your specific needs?

D. Are there alternate sources of data and do you use them? What are their deficiencies and/or strengths?

EIA is also interested in receiving comments from persons regarding their views on the need for the information contained in the Coal Program Package.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form(s); they also will become a matter of public record.

Statutory Authorities: Sections 5(a), 5(b), 13(b), and 52 of Pub. L. No. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. §§ 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC June 11, 1991.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

[FR Doc. 91–14352 Filed 6–14–91; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER91–390–000, et al.]

Idaho Power Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

June 7, 1991.

Take notice that the following filings have been made with the Commission:

1. Idaho Power Company

[Docket No. ER91–390–000]

Take notice that on May 22, 1991, Idaho Power Company (Idaho) tendered for filing an amendment to its original filing dated April 19, 1991.

Comment date: June 21, 1991, in accordance with Standard Paragraph E at the end of this notice.

2. Public Service Company of Oklahoma

[Docket No. ER91–477–000]

Take notice that on June 4, 1991, Public Service Company of Oklahoma (PSO) tendered for filing amendments to its Facilities Agreement and its Transmission Service Agreement with Western Farmers Electric Cooperative (WFEC), providing for changes in the various points at which PSO provides service to WFEC under the two Agreements.

PSO requests an effective date of June 27, 1966 and, accordingly, seeks waiver of the Commission's notice requirements. Copies of the filing were served upon WFEC and the Oklahoma Corporation Commission.

Comment date: June 21, 1991, in accordance with Standard Paragraph E at the end of this notice.

3. Wisconsin Public Service Corporation

[Docket No. ER91–472–000]

Take notice that on June 3, 1991, Wisconsin Public Service Corporation (WPSC) tendered for filing an extension of its Limited Term Capacity Agreement with Manitowoc Public Utilities (MPU), City of Manitowoc, Manitowoc County, Wisconsin. WPSC and MPU have also agreed to amend the agreement to reduce the capacity MPU will purchase and to vary the demand charge under the contract.

WPSC requests that the Commission waive its advance filing requirements to allow the extension to take effect on June 1, 1991.

Comment date: June 21, 1991, in accordance with Standard Paragraph E at the end of this notice.

4. Northern Indiana Public Service Company

[Docket No. ER91–220–000]

Take notice that on June 3, 1991, Northern Indiana Public Service Company (Northern Indiana) tendered for filing an amendment to its original filing as initial rate schedules, Service Schedule L and Service Schedule M and tendered for filing as an amendment to its Rate Schedules, the Ninth Supplemental Agreement to the Interconnection Agreement with the Wabash Valley Power Association, Inc. (Wabash Valley).

Service Schedule L—Provides for the supply of Intermediate-term Capacity and Energy Northern Indiana to Wabash Valley; Service Schedule M—provides for the Unit Peaking Capacity and Energy Northern Indiana to Wabash Valley.

The proposed effective date of the service under Service Schedule L is January 1, 1990, the date from and after which Wabash Valley requested service thereunder. The proposed effective date of service under Service Schedule M is January 1, 1992.

Northern Indiana's filing requests waiver of Commission requirements as may be required to permit the proposed rate schedule filings to become effective pursuant to a mutual agreement of the two parties. Wabash Valley concurs in Northern Indiana's requests.

Copies of this filing have been served upon Wabash Valley and the Indiana Utility Regulatory Commission.

Comment date: June 21, 1991, in accordance with Standard Paragraph E at the end of this notice.

5. Montaup Electric Company

[Docket No. ER91–475–000]

Take notice that on June 3, 1991 Montaup Electric Company (Montaup or Company) filed its Conservation and Load Management Annual Report required under the provisions of its Conservation and Load Management (CLM) Adjuster Mechanism as authorized under the terms of a Settlement Agreement approved by the Commission on January 23, 1991 in FERC Docket No. ER90–247.

The Conservation and Load Management Annual Report provides detailed information concerning: The operation of the C&LM adjuster mechanism during fiscal-year 1 (May 1, 1990 through April 30, 1991); describes the procedures Montaup implemented to ensure interested parties had an opportunity to work with the Company in the development of its C&LM programs through a cooperative process; presents detailed information on the current and proposed C&LM program offerings; proposes a C&LM Surcharge resulting from the reconciliation of the first twelve-month period under the C&LM adjuster mechanism and associated monthly billing amounts; and, presents a proposed C&LM Revenue Requirement for the second twelve-month period under the C&LM adjuster mechanism and associated monthly billing amounts.

During the first twelve-month period under the C&LM adjuster mechanism, Montaup provided C&LM service to the Blackstone Valley Electric Company and the Eastern Edison Company. Starting with the second twelve-month period, Montaup will also provide C&LM service to the Newport Electric Corporation.

Based upon the information contained in the Company's filing, the C&LM Revenue Requirement is projected to increase from its current level of $8,986,000 to $13,678,500. The allocation formula contained within the C&LM tariff provisions apportions the C&LM revenue requirement as follows: Blackstone Valley Electric Company $4,069,176; Eastern Edison Company $8,049,530; Newport Electric Corporation $1,759,794. The reconciliation of the first twelve-month period under the C&LM adjuster mechanism produces a revenue deficiency, including interest, of $1,813,336 and results in the following proposed surcharge amounts: Blackstone Valley Electric Company $592,017; Eastern Edison Company $1,221,319. Montaup proposes that the above amounts be approved for billings effective for the period May 1, 1991 through April 30, 1992.

The filing has been served on the state and Attorney General in Massachusetts and Rhode Island, on Montaup's M-Rate customers and the Conservation Law Foundation of New England, Inc.

Comment date: June 21, 1991, in accordance with Standard Paragraph E at the end of this notice.

6. Exxon Chemical Company and Exxon Company, U.S.A.

[Docket No. QF89–41–001]

On May 30, 1991, Exxon Chemical Company at P.O. Box 100, Baytown, Texas 77522–0100, and Exxon Company, U.S.A., at P.O. Box 3950, Baytown, Texas 77522–3950 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Baytown, Texas and will include twelve gas turbine generators, and four steam turbine generators and supplementary fired heat recovery boilers. Thermal energy recovered from the facility will be utilized in Exxon's Olefins Plant and Exxon's refienery.

The original certification was issued on April 19, 1989 (47 FERC 62,047). The instant recertification is requested due to transfer of ownership and leaseback of the facility.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

7. Kanawha Valley Power Company

[Docket NO. ER91–306–000]

Take notice that Kanawha Valley Power Company, on June 5, 1991, submitted for filing supplemental data supporting the return on common equity requested in its March 8, 1991, filing in this docket.

Kanawha states that a copy of the filing has been provided to the Public Service Commission of West Virginia, the Virginia State Corporate Commission and Appalachian Power Company.

Comment date: June 21, 1991, in accordance with Standard Paragraph E end of this notice.

VOL 56 ISS 116 JE 17 1991 UMI

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP89-480-001, CP90-1375-000]

Pacific and Altamont Gas Transmission Companies; Availability of an Errata to the Final Environmental Impact Statement for the PGT/PG&E Expansion—Altamont Natural Gas Pipeline Projects

June 7, 1991.

Notice is hereby given that the staff of the Federal Energy Regulatory Commission (FERC) has made available an errata to the final environmental impact statement (FEIS) on the natural gas pipeline facilities proposed in the above-referenced dockets, which was issued on May 24, 1991.

The errata contains two letters of comment on the draft environmental impact statement, and the staff's responses, which should have been published as part of the FEIS. One comment letter, from Mr. Tom Bell, was inadvertently excluded from the "Groups and Individuals" portion of the Comments/Responses Volume. The other letter, from the U.S. Environmental Protection Agency, was partially published and responded to in the "Federal Agencies" portion of the Comments/Responses Volume. This letter is being republished in its entirety.

The errata to the FEIS is available for public inspection in the FERC's Division of Public Information, room 3104, 941 North Capitol Street, NE., Washington, DC 20426. Copies have been mailed to all agencies, groups and individuals who received the FEIS.

Copies of the errata are also available from Mr. Mark C. Kalpin, PGT/PG&E Expansion Project Manager, or Mr. Laurence J. Sauter, Jr., Altamont Project Manager. Messrs. Kalpin and Sauter can be reached either at (202) 208-0916 or (202) 208-0205.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP91-2162-000, et al.]

Colorado Interstate Gas Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Colorado Interstate Gas Company

[Docket No. CP91-2162-000]

June 6, 1991.

Take notice that on June 3, 1991, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, CO, 80944, filed in Docket No. CP91-2162-000, a request pursuant to §§ 157.205 and 157.216(b) of the Commission's regulations under the Natural Gas Act, to abandon a 150-foot portion of a 4-inch pipeline used to effectuate the sale and delivery of natural gas to several customers, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, CIG states that the 150-foot portion of the 4-inch line along with an existing parallel line is used for the delivery of gas to the Public Service Company of Colorado (PSCO), the City of Fort Morgan, Colorado (Fort Morgan), and Western Sugar Company (Western Sugar) in Morgan County, Colorado. PSCO, Fort Morgan and Western Sugar have consented to the proposed abandonment, as each will continue to receive service from the parrell line.

Comment date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

2. Northern Natural Gas Company Division of Enron Corp.

[Docket No. CP91-2165-000]

June 6, 1991.

Take Notice that on June 3, 1991, Northern Natural Gas Company, Division of Enron Corp., (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP91-2165-000 a request pursuant to § 157.205 of the Commission's regulations under the Natural Gas Act (18 CFR 157.205) for authorization to install and operate one new delivery point as a jurisdictional sales facility to accommodate natural gas deliveries to Interstate Power Company (Interstate Power), under Northern's blanket certificate issued in Docket No. CP82-401-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is said that the sales through this delivery point would be under Northern's CD-1, SS-1, and PS-1 rate schedules to Interstate Power for resale to a community in the vicinity of Conger, Minnesota. It is further said that Interstate Power has requested installation of the delivery point due to the expansion of its delivery system into new areas.

Northern states that the proposed deliveries to Interstate Power at Conger would be served from the total firm entitlements currently assigned to the community of Albert Lea, Minnesota. Northern states further that Interstate Power has not requested that any firm entitlements be assigned to Conger.

Comment date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

3. Trunkline Gas Company

[Docket No. CP91-2155-000]

June 7, 1991.

Take notice that on May 31, 1991, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP91-2155-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service provided by Trunkline for Northern Natural Gas Company (Northern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Trunkline states that it was authorized by Commission orders issued in Docket Nos. CP77-92 and CP77-417, as amended, to transport natural gas purchased by Northern from producers in the West Cameron area, offshore Louisiana, to various interconnections with United Gas Pile Line Company in St. Mary and LaSalle Parishes, Louisiana. Trunkline asserts that it also has the right to purchase up to 20 percent of the gas transported. Trunkline provides the transportation service pursuant to transportation and sales agreements dated October 27, 1976, as amended, and September 23, 1976, as amended which are on file with the Commission as Trunkline's Rate Schedules T-15 and T-17, respectively.

Trunkline further states that in accordance with the termination provisions of the two agreements,

Northern has requested by letter dated January 10, 1991, that Rate Schedule T-15 be terminated effective January 10, 1992, and by letter dated February 7, 1991, that Rate Schedule T-17 be terminated effective February 7, 1992.

Comment date: June 28, 1991, in accordance with Standard Paragraph F at the end of the notice.

4. Colorado Interstate Gas Company; Tennessee Gas Pipeline Company

[Docket No.'s CP91-2163-000; CP91-2166-000]

June 7, 1991.

Take notice that on June 3, 1991, Colorado Interstate Gas Company, P.O. Box 1087, Colorado Springs, Colorado 80944, and Tennessee Gas Pipeline Company, P.O. Box 2511, Houston, Texas 77252 (Applicants), filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of shippers under the blanket certificates issued in Docket No. CP86-589, *et al.* and Docket No. CP87-115-000, respectively, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[1]

[1] These prior notice requests are not consolidated.

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under § 284.223 of the Commission's regulations, has been provided by Applicants and is summarized in the attached appendix.

Comment date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

Docket No. (date filed)	Shipper name (type)	Peak day, average day, annual Dth	Receipt points	Delivery points	Contract date, rate schedule, service type	Related docket, start up date

[1] CIG's quantities are in Mcf.

5. Tennessee Gas Pipeline Company

[Docket No. CP91-2137-000]

June 7, 1991.

Take notice that on May 31, 1991, Tennessee Gas Pipeline Company, (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP91-2137-000 an application with the Commission, pursuant to section 7(b) of the Natural Gas Act (NGA), for permission and approval to abandon its interruptible natural gas transportation service for Texas Eastern Transmission Corporation (Texas Eastern), all as more fully set forth in the application which is open to public inspection.

Tennessee states that it provides Texas Eastern, *inter alia.*, a daily interruptible transportation service of up to 7,500 Mcf of natural gas under Tennessee's FERC Rate Schedule T-99, as authorized in Docket No. CP79-477, 10 FERC ¶61,068 (1989). Texas Eastern notified Tennessee on December 13, 1988, that it wished to terminate their transportation agreement, since the five-year primary term of the agreement had already expired. Tennessee also states that it has not delivered any natural gas under Rate Schedule T-99 to Texas Eastern since sometime prior to the December 13, 1988, termination letter. Tennessee, however, does not request a retroactive effective date for its proposed abandonment of interruptible transportation service for Texas Eastern. No facilities are proposed to be abandoned.

Comment date: June 28, 1991, in accordance with Standard Paragraph F at the end of this notice.

6. Paiute Pipeline Company

[Docket No. CP91-2103-000]

June 7, 1991.

Take notice that on May 23, 1991, Paiute Pipeline Company (Paiute), P.O. Box 94197, Las Vegas, Nevada 89193-4197, filed in Docket No. CP91-2103-000, an application pursuant to sections 7(b) and 7(c) of the Commission's Regulations, for a certificate of public convenience and necessity authorizing the construction and operation of certain pressure, regulating, and measurement facilities along Paiute's northern Nevada jurisdictional transmission system and to abandon certain facilities, all as more fully set forth in the request, which is on file with the Commission.

Paiute contends that this proposal would enhance the design of certain segments of it's system to avoid operational difficulties experienced during the 1990-91 heating season and to meet existing design day high priority requirements of Paiute's customers for natural gas. Paiute asserts that it has recently conducted an evaluation of the daily design capacity of it's northern Nevada transmission system and has determined that due to high priority customer load growth and the deterioration of some facilities, the design of facilities at four city gate locations on its system should be upgraded. Paiute alleges that upgrading the four city gate sales taps is required to insure delivery of existing contract volumes in the upcoming 1991-92 winter heating season.

Specifically Paiute proposes to rebuild measuring and regulating equipment facilities at four existing city gate locations on its interstate pipeline transmission as described below:

(1) Paiute's would upgrade by rebuilding it's South Tahoe Lateral measuring and regulating tap equipment serving CP National, near Tahoe Village, Nevada;

(2) Replace Paiute's existing Reno lateral regulating equipment at Paiute's Reno City Gate Nos. 2 and 3 serving Sierra Pacific Power, located in Washoe County, Nevada;

(3) On its Elko lateral, Paiute proposes to relocate its Elko city gate delivery point to Southwest Gas Corporation (Southwest) in Elko County, Nevada from its existing location to the location of the primary pressure regulating station approximately 3½ miles upstream on the lateral. Paiute proposes to install new upgraded mesurement equipment at the new location and rebuild and upgrade the regulating equipment at the primary regulating station.

VOL 56 ISS 116 JE 17 1991 UMI

(4) In conjunction with relocating the Elko city gate delivery point, Paiute proposes to abandon by sale to Southwest, at the net book value, 3.40 miles of 6-inch pipeline between the present Elko city gate delivery point and the proposed new delivery point at the location of the primary pressure regulating station and the present Elko city gate. The pipeline to be abandoned is located between milepost 137.20 and milepost 140.60 on the Elko lateral.

Paiute contends that the abandonment by sale to Southwest would not result in any reduction of service to Southwest or its customers. Paiute alleges that the proposed rebuilding and upgrading of the measurement and regulating facilities at the delivery point, would enhance Paiute's ability to deliver gas through the delivery point to Southwest.

The total cost of the proposed construction activities is estimated by Paiute to be $437,870. Paiute contends that the proposed construction activities would be financed through treasury funds. The abandonment by sale to Southwest would be at a selling price of approximately $67,000 which is the net book value of the facilities.

Paiute requests expeditious approval of the proposal in order to ensure that the necessary facilities can be constructed and placed into operation to meet design day requirements for the upcoming winter heating season.

Comment date: June 28, 1991, in accordance with Standard Paragraph F at the end of this notice.

7. Texas Eastern Transmission Corporation, Transcontinental Gas Pipe Line Corporation, Tennessee Gas Pipeline Company

[Docket No.'s CP91-2188-000, CP91-2190-000, CP91-2191-000]

June 7, 1991.

Take notice that on June 5, 1991, Applicants filed prior notice requests with the Commission in the above-referenced dockets pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to transport natural gas on behalf of various shippers under the blanket certificates issued to Applicants pursuant to section 7 of the NGA, all as more fully set forth in the requests which are open to public inspection.[1]

[1] These prior notice requests are not consolidated.

Information applicable to each transaction, including the shipper's identity; the type of transportation service; the appropriate transportation rate schedule; the peak day, average day, and annual volumes; the service initiation date; and related ST docket number of the 120-day transaction under § 284.223 of the Commission's Regulations, has been provided by Applicants, as summarized in appendix A. Applicants' addresses and transportation blanket certificates are shown in appendix B.

Texas Eastern Transmission Corporation (Texas Eastern) also states that it would construct and operate, pursuant to its blanket certificate issued in Docket No. CP82-535-000 (21 FERC ¶ 62,199), a metering facility on its 24-inch mainline in Butler County, Ohio, in order to deliver natural gas to the City of Hamilton, Ohio. Texas Eastern also states that the City of Hamilton would construct nonjurisdictional facilities consisting of 8,700 feet of 6-inch gas main distribution to connect to the proposed delivery point.

Comment Date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

8. Natural Gas Pipeline Company of America

Docket No.'s [CP91-2177-000,[1] CP91-2178-000, CP91-2179-000, CP91-2180-000, CP91-2181-000, CP91-2182-000, CP91-2183-000]

Take notice that on June 4, 1991, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under Natural's blanket certificate issued in Docket No. CP86-582-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's regulations has been provided by Natural and is included in the attached appendix.

Natural also states that it would provide the service for each shipper under an executed transportation agreement, and that Natural would charge rates and abide by the terms and conditions of the referenced transportation rate schedule(s).

Comment date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

9. Ozark Gas Transmission System

[Docket No. CP91-2187-000]

June 7, 1991.

Take notice that on June 4, 1991, Ozark Gas Transmission System (Ozark), 1700 Pacific Avenue, Dallas, Texas 75201, filed a request with the Commission in Docket No. CP91-2187-000 pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to add delivery point facilities near Searcy, White County, Arkansas, under its blanket certificate issued in Docket No. CP85-134-000, pursuant to section 7 of the NGA, all as more fully set forth in the application which is open to public inspection.

Ozark proposes to construct and operate additional delivery point facilities at the eastern terminus of its pipeline near Searcy, White County, Arkansas, in order to facilitate its natural gas deliveries to Columbia Gas Transmission Corporation (Columbia) and Tennessee Gas Pipeline Company (Tennessee) via new facilities to be built by Arkla Energy Resources. Ozark states that it would replace existing pipe with 500 feet of 24-inch pipe and install additional metering equipment at an estimated cost of $500,000. Ozark does not propose any volumetric changes in its service for Columbia and Tennessee, as authorized in Opinion Nos. 125 and 125-A, 16 FERC ¶61,099 and 17 FERC ¶61,024, respectively. Ozark also states that its tariff does allow such changes in delivery facilities.

Comment date: July 22, 1991, in accordance with Standard Paragraph G at the end of this notice.

10. Western Gas Interstate Company

[Docket Nos. CP91-2126-000, CP91-2127-000, CP91-2128-000, CP91-2129-000 (Not Consolidated)]

June 7, 1991.

Take notice that on May 30, 1991, Western Gas Interstate Company (Western), 9130 Jollyville Road, suite 150, Austin, Texas 78759-7273, filed applications in Docket Nos. CP91-2126-000, CP91-2127-000, CP91-2128-000 and CP91-2129-000, pursuant to section 3 of the Natural Gas Act and § 153.1 through 153.8 of the Commission's Regulations, and Executive Order Nos. 10485 and 12038 and §§ 153.10 through 153.12 of the Commission's Regulations. The applications seek authorization to construct, operate and maintain facilities located near El Paso, Texas for the exportation of gas to Juarez, Mexico, all as more fully set forth in the applications on file with the Commission and which are open for public inspection.

Western, a wholly-owned subsidiary of Southern Union Company, seeks approval to operate, maintain and connect certain gas transmission facilities which connect to three separate export points located in the City of El Paso, Texas, described by Western as:

(1) Del Norte #1—Measuring Station near Ascarate Park;
(2) Del Norte #2—Measuring Station near Delta Street; and
(3) Del Norte #3—Measuring Station near Stanton Street and Santa Fe.

Western says that these facilities were previously subject to a Presidential Permit issued by the Federal Power Commission in 1969 in Docket No. CP69-236. Western also says that it intends to modify these measurement and regulating stations near the international boundary. Western says that the facilities are essential in order to deliver the gas to the United States/Mexico border.

Western says that a review of a previously issued Presidential Permit for the same facilities was limited to a certain expired transaction, and does not encompass the transactions described in these current applications. Western says that new section 3 authorizations and a new Presidential Permit must be issued authorizing the operation of the facilities in order for Western says that new section 3 authorizations and a new Presidential Permit must be issued authorizing the operation of the facilities in order for Western to render exportation services for CMEX Energy, Inc. (CMEX) and Texas International Gas & Oil Company (Texas International).

VOL 56 ISS 116 JE 17 1991 UMI

Western, in Docket No. CP91-2128-000 (section 2) and Docket No. CP91-2128-000 (Presidential Permit), says that it has contracted with CMEX to transport up to 30,000 MMBtu per day of natural gas on a firm basis and up to 30,000 MMbtu per day on an interruptible basis for delivery to facilities owned by Gas Natural de Juarez S.A. and Juarez Gas Co. S.A. de C.V. (Juarez Facilities). Western will receive gas from El Paso Natural Gas Company (EPNGC) on behalf of CMEX for redelivery by Western at the international border to the Juarez Facilities. Western says that the gas delivered by Western will be purchased from CMEX by P.M.I. Commercial International S.A. de C.V., (PMI) a wholly owned subsidiary of Petroleos Mexicanos (PEMEX), for initial use in an electric generating plant. Western says that the export/transportation services for CMEX will be pursuant to two Service Agreements, dated May 7, 1991, which are filed as Exhibit D to Docket No. CP91-2128-000.

Western, in Docket No. CP91-2129-000 (section 3) and Docket No. CP91-2127-000 (Presidential Permit), says that it has entered into an agreement with Texas International providing for transportation of up to 30,000 Mcf per day of natural gas on an interruptible basis for delivery to the Juarez Facilities. Western would receive gas from EPNGC on behalf of Texas International for redelivery by Western at the international border to the Juarez Facilities. Western's understanding is the gas delivered by it will be purchased from Texas International by PMI. Western says that the export/transportation services for Texas International will be pursuant to a Precedent Agreement, dated October 27, 1989, which is filed as Exhibit D to Docket No. CP91-2129-000.

Western has requested that expedited action be taken on its applications so that service can begin by July 1, 1991, because the use of natural gas in the electric generation plant, in place of the use of No. 6 fuel oil, will aid in reducing atmospheric pollution, which may affect the quality of the air on both sides of the border.

Comment date: June 28, 1991, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

11. Northern Natural Gas Company

[Docket No. CP91-2364-000]

June 7, 1991.

Take notice that on June 3, 1991, Northern Natural Gas Company (Northern Natural), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP91-2184-000 a request pursuant to §§ 157.205 and 157.212 of the Regulations under the Natural Gas Act for authorization to install and operate a new delivery point and appurtenant facilities as jurisdictional sales and transport facilities to accommodate jurisdictional natural gas deliveries to Great Plains Natural Gas Company (Great Plains), under the certificate issued in Docket No. CP82-401-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request with the Commission and open to public inspection.

Specifically, Northern requests authority to construct and operate a new delivery point for Great Plains to accommodate jurisdictional natural gas sales and transportation under Northern's CD-1, SS-1, FT-1 and IT-1 rate schedules for redelivery to Minnesota Corn Processors and the Marshall Minnesota Industrial Park. Nothern states that Great Plains has requested installation of the delivery point to accommodate a load growth due to a large industrial user expanding their facilities. Northern also indicates that Great Plains will receive approximately 1.5 Bcf annually through the proposed delivery point, and that the volumes proposed to be delivered to Great Plains for Minnesota Corn Processors and the Marshall Minnesota Industrial Park will initially be interruptible transportation volumes.

Comment date: June 28, 1991, in accordance with Standard Paragraph G at the end of this notice.

12. Panhandle Eastern Pipe Line Company

[Docket No. CP91-2167-000]

June 7, 1991.

Take notice that on June 3, 1991, Panhandle Eastern Pipe Line Company (Panhandle), Post Office Box 1642, Houston, Texas 77001, filed in Docket No. CP91-2167-000 an application pursuant to section 7(b) of the Natural Gas Act, for permission and approval to abandon a gas exchange agreement between Panhandle El Paso Natural Gas Company (El Paso) and K N Energy, Inc. (K N), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle proposes to abandon a gas exchange agreement dated June 17, 1974, as amended, with El Paso and K N. It is stated that the exchange service was authorized by the Commission in Docket Nos. CP75-314 (Panhandle), CP75-1 (El Paso), and CP75-27 (K N). It is indicated that the exchange is performed under Panhandle's Rate Schedule E-4, El Paso's Rate Schedule X-94, and K N's Rate Schedule X-2. Panhandle states that El Paso and K N provided notice to Panhandle by letters dated January 4, 1991, and December 7, 1990, respectively, of their desire to terminate the exchange agreement. Panhandle further indicates that upon approval of the abandonment proposed herein, it would make the appropriate corresponding changes to its FERC Gas Tariff, Original Volume No. 2, to reflect the abandonment of Rate Schedule E-4.

Panhandle states that K N has requested permission and approval for the abandonment of this exchange service in Docket No. CP91-1732-000, filed April 8, 1991. It is also stated that El Paso has or will soon file to abandon this exchange service.

Comment date: June 28, 1991, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ91-3-1-001]

Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

June 11, 1991.

Take notice that on June 6, 1991, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet:

Substitute Twenty Sixth Revised Sheet No. 4

The tariff sheet is proposed to become effective July 1, 1991. Alabama-Tennessee states that the purpose of this filing is to adjust its rates to conform to the rates of its suppliers and to substitute corrected information to its quarterly PGA filing originally tendered on May 31, 1991.

Alabama-Tennessee has also requested a limited waiver on a continuing basis of § 154.22 of the Commission's Regulations with regard to the filing of its quarterly PGA. Alabama-Tennessee proposes that it be permitted to file revisions to its quarterly PGA filing three days after the filing of the revised quarterly PGA of its upstream gas supplier, Tennessee Gas Pipeline Company ("Tennessee"), and that its filing become effective on less than thirty days' notice, on the same effective date as that of Tennessee's revised PGA.

Alabama-Tennessee has requested any necessary waivers of the Commission's regulations in order to permit the tariff sheets to become effective as proposed.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP88-161-000, RP89-172-000, CP91-687-000 and CP90-2275-000]

ANR Pipeline Co., Rescheduled Informal Settlement Conference

June 7, 1991.

Take notice that an informal settlement conference will be convened in this proceeding on June 24, 1991, at 1 p.m., at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC, continuing through June 25, for the purpose of exploring the possible settlement of the above-referenced dockets. The informal settlement conference scheduled for June 11 and 12, 1991, has been cancelled.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined in 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, contact Michael D. Cotleur at (202) 208-1076 or James A. Pederson at (202) 208-2158.

BILLING CODE 6717-01-M

[Docket No. RP91-170-000]

Gas Research Institute; Annual Application

June 10, 1991.

Take notice that on June 3, 1991, Gas Research Institute (GRI) filed an application requesting advance approval of its 1992-1996 Five-Year Research and Development (R&D) Plan, 1992 R&D Program, and the funding of its R&D activities for 1992, pursuant to the Natural Gas Act and the Commission's Regulations, particularly 18 CFR 154.38(d)(5) (1990).

In its application, GRI proposes to increase its contract obligations (debt) from $202 million in 1991 to $213 million in 1992, and cash outlays (debt retirement) from $195 million in 1991 to $200 million in 1992. GRI's application seeks to collect $187,383,000 through jurisdictional rates and charges during the 12 months ending December 31, 1992. This $187.4 million, along with a draw-down of GRI's cash balance during 1992, from $28.4 million to $16.1 million, will provide the necessary cash to fund the 1992 R&D program.

GRI's proposed unit cost of its 1992 R&D Program is 1.46 cents per Dth (i.e., 1.51 cents per Mcf). This Annual R&D Funding Unit is proposed to be applied to the services included in GRI's Program Funding Services in 1991, which include jurisdictional, direct sale and intrastate volumes of GRI's members, estimated tototal 12,813,160 MDth.

In addition, GRI requests approval of funding for two "Class 3" end use R&D projects—Natural Gas Vehicles and Emissions Controls (Class 3 projects are those that would create a new use for natural gas in markets currently served predominantly by alternative fuels). A decision of the U.S. Court of Appeals for the District of Columbia Circuit, issued on April 19, 1991, *Process Gas Consumers Group* v. *FERC*, Case No. 89-1739 ("*PGC*"), vacated and remanded the portion of previous Commission orders that approved the funding of these projects, finding that the Commission's analysis was unreasonable and inconsistent with the standards established in *Process Gas Consumers Group* v. *FERC*, 866 F 2d 470 (D.C. Cir. 1989). GRI provides additional rationale and statistics purporting to support the net benefits of these projects to existing ratepayers.

GRI also suggests that new government initiatives for clean air and an expanded role for natural gas should lead the Commission to reassess its policy on a stabilized GRI program. GRI claims that an expansion of the gas

VOL 56 ISS 116 JE 17 1991 UMI

industry R&D program may be required and requests new funding guidelines from the Commission.

The Commission Staff will analyze GRI's application and prepare a Commission Staff Report. This Staff Report will be served on all parties and filed with the Commission as a public document on July 31, 1991. Comments on the Staff Report and GRI's application by all parties, except GRI, must be filed with the Commission on or before August 16, 1991. GRI's reply comments must be filed on or before August 30, 1991.

Any person desiring to be heard or to protest GRI's application, except for GRI members and state regulatory commissions, who are automatically permitted to participate in the instant proceedings as intervenors, should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's rules and regulations. All such motions or protests should be filed on or before June 28, 1991. All comments and protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to this proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ91-9-4-000]

Granite State Gas Transmission, Inc.; Changes in Rates

June 10, 1991.

Take notice that on June 5, 1991, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway Westborough, Massachusetts 01581-5039, filed First Revised Second Substitute Sixth Revised Sheet No. 21 in its FERC Gas Tariff, Second Revised Volume No. 1, containing changes in rates for effectiveness on July 1, 1991.

According to Granite State, the filing comprises its regular quarterly purchased gas cost adjustment based on projected gas costs and sales for the third quarter of 1991.

Granite State further states that the revised rates are applicable to its wholesale sales to its affiliated distribution company customers: Bay State Gas Company and Northern Utilities, Inc.

Granite State states that copies of its filing were served upon its customers and the regulatory commissions of the states of Maine, New Hampshire and Massachusetts.

Any person desiring to be heard or to make and protest with reference to said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedures (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 24, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP84-13-007]

Michigan Consolidated Gas Co.; Refund Report

June 7, 1991.

Take notice that Michigan Consolidated Gas Company (MichCon), on May 30, 1991, tendered for filing with the Federal Energy Regulatory Commission its annual refund report filed in compliance with the Stipulation and Agreement in Docket No. RP84-13, which was approved by the Commission's order dated January 11, 1985.

MichCon states that the report consists of a summary page and nine supporting schedules which set forth the amounts refunded, by customer, including interest calculated as required under § 154.67(c) of the Commission's regulations. MichCon states that refunds were made on May 30, 1991.

MichCon states that copies of the refund report are being sent to each of ISD's custsomers and to the Michigan Public Service Commission.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 14, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP88-2-011]

Northern Natural Gas. Co., Division of Enron Corp.; Sale of Natural Gas

June 7, 1991.

Take notice that on May 9, 1991, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, submitted the following information regarding the sale of natural gas to be made to an affiliate under Northern's Rate Schedule ISS-1, pursuant to the authorization granted by order in Docket No. CP88-2-000 issued March 11, 1988 (42 FERC 61,303).

(1) Name of Buyer: Enron Industrial Gas Company.

(2) Location of Buyer: Houston, Texas.

(3) Affiliation between Northern and Buyer: Enron Industrial Gas Company is a subsidiary of Enron Corporation; Northern Natural Gas Company is a subsidiary of Enron Corporation.

(4) Term of Sale: May 15, 1991, through April 30 1992, and month to month thereafter.

(5) Estimated Total and Maximum Daily Quantities: Daily Quantity : 300,000 MMBtu. *Estimated Total:* 9 Bcf per month.

(6) Maximum sales rate: $2.34 per MMBtu. *Minimum sales rate:* $1.20 per MMBtu. *Rate to be charged during billing period:* (A) Field area—$1.20-$1.45; (B) Market area—$1.45-$1.95.

Any interested party desiring to make any protest with reference to this sale of natural gas should file with the Federal Energy Regulatory Commission, Washington, DC 20426, within 30 days after issuance of the instant notice by the Commission, pursuant to the order of March 11, 1988. If no protest is filed within that time or the Commission denies the protest, the proposed sale may continue until the underlying contract expires. If a protest is filed, Northern may sell gas for 120 days from the date of commencement of service or until a termination order is issued, whichever is earlier.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP89-252-013]

Panhandle Eastern Pipe Line Company; Proposed Changes in FERC Gas Tariff

June 10, 1991.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on June 5, 1991 tendered for filing the revised tariff sheets listed on appendix A attached to the filing.

Panhandle states that on December 4, 1990, as clarified by the Commission's May 21, 1991 Order in the above-referenced proceedings, the Federal Energy Regulatory Commission (Commission) issued an order modifying and approving the partial uncontested Stipulation and Agreement and approving tariff sheets authorizing Panhandle to perform modified services for its Rate Schedule SG Customers and authorizing a transporation Rate Schedule SCT and a sales Rate Schedule SSS.

Panhandle further states that the revised tariff sheets are being submitted to comply with Ordering Paragraph (C) of the December 4, 1990 Order and the Commission's May 21, 1991 Order on rehearing.

Panhandle states that it is proposing a July 1, 1991 effective date for the revised tariff sheets.

Panhandle states that copies of its filing have been served on all jurisidictional sales customers, state commissions, and shippers. Copies also have been provided to the parties to the settelement referenced above.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such protests should be filed on or before June 24, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. MT88-36-003]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

June 10, 1991.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on June 7, 1991 tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, six (6) copies of the following tariff sheets:

Fourth Revised Sheet No. 32-AM
First Revised Sheet No. 32-AQA
Third Revised Sheet No. 32-BQ
First Revised Sheet No. 32-BU.A

Panhandle states that these revised tariff sheets are being filed to comply with the Commission's Order on Order Nos. 497 and 497-A Compliance Filings dated May 23, 1991 in Docket No. MT88-36-000, 001 and 002, *inter alia.*

The proposed effective date of the tariff sheets listed above is June 7, 1991.

Panhandle states that copies of its filing were served on Panhandle's jurisdictional sales and transportation customers, state commissions and parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. MT88-3-004]

Questar Pipeline Co.; Tariff Filing

June 10, 1991.

Take notice that Questar Pipeline Company, on June 7, 1991 tendered for filing and acceptance First Revised Sheet No. 63 and Original Sheet No. 63A to Original Volume No. 1-A of its FERC Gas Tariff.

Questar states that this filing is made pursuant to 18 CFR 154.63(a)(1) and in compliance with the Commission's May 23, 1991, order in Docket No. MT88-3-000, 001, 002 and 003.

Questar requests an effective date of July 7, 1991, for the proposed tariff sheets.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP91-173-000]

South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff

June 10, 1991.

Take notice that on June 5, 1991, South Georgia Natural Gas Company ("South Georgia") tendered for filing the following tariff sheets to its FERC Gas Tariff. First Revised Volume No. 1, to be effective July 5, 1991:

Third Revised Sheet No. 16K
Third Revised Sheet No. 16N
Second Revised Sheet No. 16O
Second Revised Sheet No. 16CC.01
Second Revised Sheet No. 16DD
First Revised Sheet No. 16FF
First Revised Sheet No. 34H
Second Revised Sheet No. 34Q
Second Revised Sheet No. 34R
Fourth Revised Sheet No. 34U
Second Revised Sheet No. 34Y
First Revised Sheet No. 34Z
First Revised Sheet No. 42A
Second Revised Sheet No. 42C
First Revised Sheet No. 42J
Second Revised Sheet No. 42K
First Revised Sheet No. 42M
Second Revised Sheet No. 42O
First Revised Sheet No. 42V
Second Revised Sheet No. 42W

VOL 56 ISS 116 JE 17 1991 UMI

South Georgia states that the purpose of this filing is to make certain revisions to its transportation tariff (1) to delete all references to take-or-pay crediting as required by the Commission's Order No. 500–K issued in Docket Nos. RM87–34–065, *et al.* on April 4, 1991, (2) to revise the "on behalf of" certification for section 311 transportation services, (3) to require a prepayment to be submitted with requests for firm transportation service, and (4) to make certain other changes for operational and administrative efficiencies. Accordingly, South Georgia has submitted the revised tariff sheets listed above and has requested that the Commission make these sheets effective July 5, 1991.

South Georgia states that copies of the filing will be served upon its jurisdictional purchasers, shippers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before June 17, 1991. Protests will be considered by the Commission in determining the parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–14284 Filed 6–14–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP91–171–000]

Southern Natural Gas Co.; Proposed Refund Plan

June 11, 1991.

Take notice that on May 30, 1991, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, in Docket No. RP91–171–000, requested the Commission to approve a proposed refund plan. Southern filed the plan as a result of a March 29, 1991 Order of the Office of the Chief Accountant (Docket No. FA89–48–000) which directed Southern to analyze its Account No. 253, Other Deferred Credits, and to file a refund plan since most of the refunds have been in Southern's Account No. 253 since 1983 awaiting Commission action.

Southern proposes to flow through to its customers refunds of $2,805,395 in principal and interest from Southern's Account No. 253 by crediting its Account No. 191, Deferred Purchased Gas Cost. Southern states that it deferred flow through of the majority of these refunds awaiting a decision from the Commission regarding their proper accounting.

Additionally, Southern requests authorization to make direct refunds to two customers (Florida Gas Transmission Company and South Georgia Natural Gas Company) of $185,675 in principal and interest from its Account No. 253.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214 (1989). All such protests should be filed on or before July 1, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP91–172–000]

Southern Natural Gas Co., Proposed Changes to FERC Gas Tariff

June 10, 1991

Take notice that on June 5, 1991, Southern Natural Gas Company ("Southern") tendered for filing the following tariff sheets to its FERC Gas Tariff, Sixth Revised Volume No. 1, to be effective July 5, 1991.

Fifth Revised Sheet No. 30O
Third Revised Sheet No. 30W
First Revised Sheet No. 30W.1
Third Revised Sheet No. 30Z
First Revised Sheet No. 30Z.02
First Revised Sheet No. 30Z.09
First Revised Sheet No. 30Z.16
First Revised Sheet No. 30Z.19
First Revised Sheet No. 30Z.22
First Revised Sheet No. 30Z.24
Fifth Revised Sheet No. 31
First Revised Sheet No. 45R.01
Fourth Revised Sheet No. 45R.20
Fifth Revised Sheet No. 45R.23
Fourth Revised Sheet No. 45R.24
Third Revised Sheet No. 45R.27
Second Revised Sheet No. 45R.28
Third Revised Sheet No. 53I.40
Third Revised Sheet No. 53I.56

Southern states that the purpose of this filing is to take certain revisions primarily to its transportation tariff (1) to delete all references to take-or-pay crediting as required by the Commission's Order No. 500–K issued in Docket Nos. RM87–34–065, *et al.* on April 4, 1991, (2) to revised the "on behalf of" certification for section 311 transportation services, (3) to require a prepayment to be submitted with requests for firm transportation service, and (4) to make certain other changes for operational and administrative efficiencies. Accordingly, Southern has submitted the revised tariff sheets listed above and has requested that the Commission make these sheets effective July 5, 1991.

Southern states that copies of the filing will be served upon its jurisdictional purchasers, shippers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before June 17, 1991. Protests will be considered by the Commission in determining the parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing due on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–14363 Filed 6–14–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. MT88–9–003]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 10, 1991.

Take notice that on June 7, 1991, Texas Eastern Transmission Corporation (Texas Eastern) in compliance with the Commission's order issued May 23, 1991, in Docket Nos. MT88–9–000, 001 and 002, (May 23 Order) herewith submits for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheets:

Fourth Revised Sheet No. 305A
Third Revised Sheet No. 330A
Sixth Revised Sheet No. 502
Sixth Revised Sheet No. 505
Seventh Revised Sheet No. 520

Texas Eastern states that it is filing the above listed tariff sheets in compliance with Ordering Paragraph (B)(5) of the May 23 Order, which requires Texas Eastern to file revised tariff sheets containing the names and titles of operating personnel shared with Pan National Gas Sales, Inc., (Pan National) if any. Separately, Texas Eastern intends to seek rehearing of the referenced order as well as the companion order issued concurrently in Texas Eastern's Docket No. MG88–26–000, *et al.*, to the extent, among other things, that such orders hold Pan National to be a "marketing affiliate" of Texas Eastern when Texas Eastern does not conduct any "transportation transactions" with Pan National. Other than telephone equipment and mainframe computer system, Texas Eastern does not share any facilities or operating personnel with any of its marketing affiliates.

Texas Eastern states that ordering Paragraph (B)(15) of the May 23 Order requires Texas Eastern to include in its transportation request form the item required by § 250.16(b)(2)(xi) of the Commission's regulations. This item requires the shipper to list on its request form the state of the ultimate end user of the gas. Texas Eastern already has incorporated this requirement into the transportation request forms filed by Texas Eastern on October 31, 1990, which revised tariff sheets were approved to be effective December 1, 1990, by Commission order issued November 30, 1990 in Docket No. RP90–119–004.

Texas Eastern states that this filing is submitted without prejudice to Texas Eastern's rights on rehearing or in any judicial review proceeding or its position in this proceeding.

The proposed effective date of the tariff sheets listed above is June 7, 1991.

Texas Eastern states that copies of the filing were served on Texas Eastern's jurisdictional customers, interested state commissions, all parties in Docket Nos. MT88–9–000, 001, 002, MG88–26–000, *et al.*, and all Rate Schedule IT–1 shippers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–14278 Filed 6–14–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. RP91–109–002]

Transwestern Pipeline Co.; Compliance Filing

June 7, 1991

Take notice that Transwestern Pipeline Company (Transwestern) on May 30, 1991 tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective July 1, 1991

65th Revised Sheet No. 5
9th Revised Sheet No. 38
5th Revised Sheet No. 40
6th Revised Sheet No. 73
73rd Revised Sheet No. 74
9th Revised Sheet No. 75
3rd Revised Sheet No. 75A
11th Revised Sheet No. 76
5th Revised Sheet No. 76A
6th Revised Sheet No. 76B
6th Revised Sheet No. 76C
3rd Revised Sheet No. 76D
2nd Revised Sheet No. 76E
1st Revised Sheet Nos. 83–86A
9th Revised Sheet No. 133

Transwestern states that the above-referenced tariff sheets are being filed by Transwestern to comply with the April 30, 1991, Commission "Order Accepting and Suspending Alternate Tariff Sheets Subject to Conditions, Rejecting Primary Tariff Sheets, Amending Certificate Retroactively, Granting Abandonment, Denying Rehearing and Consolidating Proceedings" (Order). Transwestern notes that the filing also accepts the condition imposed by the Commission relating to the IS–1 sales program.

Transwestern requests that the Commission grant any and all waivers of its rules, regulations and orders as may be necessary, specifically § 154.63 of its regulations, so as to permit the above listed tariff sheets to become effective July 1, 1991.

Transwestern asserts that copies of the filing were served on all parties entitled to service under rule 2010 of the Commission's rules of practice and procedures.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 14, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Trunkline Gas Company; Proposed Changes in FERC Gas Tariff

[Docket No. MT88–22–004]

June 10, 1991.

Take notice that Trunkline Gas Company (Trunkline) on June 7, 1991 tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, six (6) copies of the following tariff sheets:

First Revised Sheet No. 9–CC.1
First Revised Sheet No. 9–DG.2

Trunkline states that these revised tariff sheets are being filed to comply with the Commission's Order on Order Nos. 497 and 497–A Compliance Filings dated May 23, 1991 in Docket Nos. MT88–22–000, 001, 002 and 003, *inter alia.*

The proposed effective date of the tariff sheets listed above is June 7, 1991.

Trunkline states that copies of its filings were served on Trunkline's jurisdictional sales and transportation customers, state commissions and parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. MT90-07-001]

Trunkline LNG Co.; Proposed Changes in FERC Gas Tariff

June 10, 1991.

Take notice that Trunkline LNG Company (TLC) on June 7, 1991 tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, six (6) copies of the following tariff sheets:

First Revised Sheet No. 79.1
First Revised Sheet No. 79.2

TLC states that these revised tariff sheets are being filed to comply with the Commission's Order on Order Nos. 497 and 497-A Compliance Filings dated May 23, 1991 in Docket Nos. MT90-07-000, *inter alia*.

The proposed effective date of the tariff sheets listed above is June 7, 1991.

TLC states that copies of its filing were served on TLC's jurisdictional customers, and parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 18, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-225-002]

Valero Interstate Transmission Co.; Refund Report

June 7, 1991.

Take notice that Valero Interstate Transmission Company (Vitco), on May 31, 1991, tendered for filing with the Federal Energy Regulatory Commission its refund report setting forth the computations of refunds including interest made to each customer.

Vitco states that it has calculated the refund applicable to each customer for the period October 1, 1989 through April 30, 1991 based on the rates charged during this period and the rates approved by the Commission letter order dated May 2, 1991.

Vitco states that a copy of the filing has been served upon the parties in the above captioned proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 14, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-51764; FRL 3931-1]

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of 34 such PMNs and provides a summary of each.

Public Water Supply Supervision Program Revision for Florida

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of Florida is revising its approved State Public Water Supply Supervision Primacy Program. Florida has adopted drinking water regulations for treatment of surface water and the regulation of total coliforms. EPA has determined that these sets of State program revisions are no less stringent than the correspanding federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties may request a public hearing. A request for a public hearing must be submitted July 17, 1991 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made July 17, 1991, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become final and effective thirty (30) days after publication in the **Federal Register**.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; (3) The signature of the individual making the requests, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Florida Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400.

Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365.

Public Water Supply Supervision Program Revision for Georgia

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of Georgia is revising its approved State Public Water Supply Supervision Primacy Program. Georgia has adopted drinking water regulations for treatment of surface water and the regulation of total coliforms. EPA has determined that these sets of State program revisions are no less stringent than the corresponding federal regulations. Therefore, EPA has tentatively decided to conditionally approve these State program revisions, in accordance with the conditions set forth in the May 9, 1991 letter from the U.S. EPA to the State of Georgia. This letter states that the State commits to amend the Georgia Rules at the first available opportunity by amending its proposed definition 391-3-5-.02 (ii) and by amending 391-3-5-.32 (Public Notification) to include a more specific reference to 40 CFR 141.32. The May 9, 1991 letter also states that the State commits to correct two typographical errors as soon as possible, as follows. First, the words "and after" should be inserted between "on" and "June 29, 1993" in GA 391-3-5-.20 (SWTR-MCL for Turbidity). The intent of the Georgia Rule is to maintain the current MCL for turbidity until June 28, 1993. This correction will serve to clarify the State's intent to enforce the federal date. Second, the words "Until June 28, 1993" should replace the words "On or before June 28, 1993" in GA 391-3-5-.18 (3). Once this correction has been made, the intent of this regulation should be clear.

All interested parties may request a public hearing. A request for a public hearing must be submitted July 17, 1991 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made (July 17, 1991), a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become final and effective thirty (30) days after publication in the **Federal Register**.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; (3) The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Georgia Department of Natural Resources, Floyd Towers East, Suite 1066, 205 Butler Street SE., Atlanta, Georgia 30334.

Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Wayne Aronson, EPA, Region IV Drinking Water Section at the Atlanta address given above (telephone (404) 347-2913, (FTS) 257-2913).

Authority: Sec. 1413 of the Safe Drinking Water Act, as amended (1986), and 40 CFR 142.10 of the National Primary Drinking Water Regulations.

Dated: May 31, 1991.

Patrick M. Tobin,

Acting Regional Administrator EPA, Region IV.

Public Water Supply Supervision Program Revision for North Carolina

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of North Carolina is revising its approved State Public Water Supply Supervision Primacy Program. North Carolina has adopted drinking water regulations for treatment of surface water and the regulation of total coliforms. EPA has determined that these sets of State program revisions are no less stringent than the corresponding federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties may request a public hearing. A request for a public hearing must be submitted (July 17, 1991) to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made (July 17, 1991), a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become final and effective thirty (30) days after publication in the **Federal Register**.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; (3) The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

North Carolina Division of Environmental Health, Department of Environment, Health and Natural Resources, P.O. Box 27687, Raleigh, North Carolina 27611-7687.

EXPORT-IMPORT BANK OF THE UNITED STATES

Open Meeting of the Advisory Committee of the Export-Import Bank of the United States

SUMMARY: The Advisory Committee was established by Public Law 98-181, November 30, 1983, to advise the Export-Import Bank on its programs and to provide comments for inclusion in the reports of the Export-Import Bank to the United States Congress.

TIME AND PLACE: Tuesday, July 2, 1991, from 9:30 a.m. to 12 noon. The meeting will be held at Eximbank in room 1143, 811 Vermont Avenue, NW., Washington, DC 20571.

AGENDA: The meeting agenda will include a discussion of the following topics: Financial and Budget Status Report, Congressional Report, Arrangement/Tied Aid Credit Report, Competitiveness Report, Project Finance, Subcommittee Status Reports: (Emerging Trade Finance—Small Business-Banking), Next Steps, and other topics.

PUBLIC PARTICIPATION: The meeting will be open to public participation; and the last 15 minutes will be set aside for oral questions or comments. Members of the public may also file written statement(s) before or after the meeting. In order to permit the Export-Import Bank to arrange suitable accommodations, members of the public who plan to attend the meeting should notify Joan P Harris, room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566-8871, not later than June 28, 1991. If any person wishes auxiliary aids (such as a sign language interpreter) or other special accommodations, please contact, prior to June 27, 1991, the Office of the Secretary, room 935, 811 Vermont Avenue, NW., Washington, DC 20571, Voice: (202) 566-8871 or TDD: (202) 535-3913.

FURTHER INFORMATION: For further information, contact Joan P. Harris, Room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566-8871.

Joan P. Harris,

Corporate Secretary.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 212-009848-025.

Title: U.S. Gulf Ports/Brazil Agreement.

Parties:

Companhia de Navegacao Lloyd Brasileiro

Companhia Maritima Nacional

American Transport Lines, Inc.

Synopsis: The proposed amendment would delete provisions of the Agreement which conflict with the Commission's rules concerning the notice and waiting period required prior to the effectiveness of agreement modifications.

Dated: June 11, 1991.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

1st Brookfield, Inc. Employee Stock Ownership Plan and Trust Agreement, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act [12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than July 5, 1991.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. 1st Brookfield, Inc. Employee Stock Ownership Plan and Trust Agreement, Brookfield, Illinois; to become a bank holding company by acquiring 30 percent of the voting shares of 1st Brookfield, Inc., Brookfield, Illinois, and thereby indirectly acquire First National Bank of Brookfield, Brookfield, Illinois.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. First Commercial Corporation, Little Rock, Arkansas; to acquire at least 80 percent of the voting shares of Farmers and Merchant Bank, Rogers, Arkansas.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Flower Mound Bancshares, Inc., Flower Mound, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Security Bank, Flower Mound, Texas.

2. HMS Holdings, Inc., San Antonio, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Castle Hills National Bank, San Antonio, Texas.

Board of Governors of the Federal Reserve System, June 11, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Banc One Corporation; Acquisition of Company Engaged in Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a) or (f) of the Board's Regulation Y (12 CFR 225.23(a) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 5, 1991.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Banc One Corporation, Columbus, Ohio; to engage through its subsidiary, Banc One Capital Corporation, Columbus, Ohio, in underwriting and dealing, to a limited extent, in all types of debt securities, including, without limitation, sovereign debt securities, corporate debt, debt securities convertible into equity securities, and securities issued by a trust or other vehicle secured by or representing interests in debt obligations; and all types of equity securities, including, without limitation, common stock, preferred stock, American Depositary Receipts, and direct and indirect ownership interest in corporations and other entities. *Banc One Corporation,* 76 Federal Reserve Bulletin 756 (1990); *J.P. Morgan & Co. Inc.,* 75 Federal Reserve Bulletin 192 (1989). *See Modifications to Section 20 Orders,* 75 Federal Reserve Bulletin 751 (1989).

Board of Governors of the Federal Reserve System, June 11, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

VOL 56 ISS 116 JE 17 1991 UMI

Bankers Trust New York Corporation; Application to Engage De Novo in Providing Investment Advice on Futures Contracts and Options on Futures Contracts on Stock and Bond Indexes

Bankers Trust New York Corporation, New York, New York ("Bankers Trust"), has applied pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a) of the Board's Regulation Y (12 CFR 225.23(a)), through its wholly owned subsidiary, BT Asset Management, Inc., New York, New York ("Company"), to engage *de novo* in the provision of investment advice as a commodity trading advisor ("CTA") with respect to the purchase and sale of financial futures contracts and options on such futures contracts on certain broad-based stock and bond index products traded on major commodity exchanges. This activity would be conducted on a worldwide basis.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity "which the Board, after due notice and opportunity for hearing, has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." Bankers Trust believes that these proposed activities are "so closely related to banking or managing or controlling banks as to be a proper incident thereto."

The Board has previously approved the provision of investment advice as a futures commission merchant or CTA with respect to all of the specified stock and bond index futures contracts and options thereon in Bankers Trust's application. *See, e.g., The Sanwa Bank, Limited*, 77 Federal Reserve Bulletin 64 (1991); *Chemical Banking Corporation*, 76 Federal Reserve Bulletin 660 (1990); *The Hongkong and Shanghai Banking Corporation*, 76 Federal Reserve Bulletin 770 (1990); *The Long-Term Credit Bank of Japan, Limited*, 74 Federal Reserve Bulletin 573 (1988). Bankers Trust proposes that Company comply with the conditions set forth in § 225.25(b)(19) of Regulation Y previously considered by the Board in approving this activity.

Bankers Trust takes the position that the proposed activity will benefit the public. Bankers Trust believes that it will promote competition and provided added convenience to customers of Company. Moreover, Bankers Trust believes that the provision of investment advisory services relating to financial futures contracts on stock and bond indexes and options thereon through Company will not give rise to any substantial risks of conflicts of interest, unsound banking practices or other subtle hazards given the framework of laws and regulations within which Company will conduct its activities.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than July 12, 1991. Any request for a hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors of the Federal Reserve Board or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, June 11, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

First Union Corporation; Acquisition of Company Engaged in Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a) or (f) of the Board's Regulation Y (12 CFR 225.23(a) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 5, 1991.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. First Union Corporation, Charlotte, North Carolina; to engage *de novo* through its subsidiary, First Union Securities, Inc., Charlotte, North Carolina, in buying and selling all types of securities on the order of investors as a "riskless principal" subject to certain limitations and restrictions as stipulated in *Bankers Trust New York Corporation*, 75 Federal Reserve Bulletin 829 (1989) and *J.P. Morgan & Co., Incorporated*, 76 Federal Reserve Bulletin 26 (1990), and § 225.25(b)(15) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 11, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Synovus Financial Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

CORRECTION

This notice corrects a previous **Federal Register** notice (FR Doc. 91-11145) published at page 21680 of the issue for Friday, May 10, 1991.

Under the Federal Reserve Bank of Atlanta, the entry for Synovus Financial Corporation is amended to read as follows:

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Synvous Financial Corporation, Columbus, Georgia, and TB&C Bancshares, Inc., Columbus, Georgia; to acquire 100 percent of the voting shares of Athens Federal Savings Bank, Athens, Georgia. Athens Federal Savings Bank is currently a federally-chartered stock savings bank, and, immediately prior to acquisition by Synovus Financial Corporation, will convert from a federally-chartered stock savings bank into a state-chartered commercial bank and trust company to be called Athens First Bank and Trust Company.

Athens Federal Savings Bank engages in the sale of title insurance through a wholly-owned subsidiary, Athena Service Corporation. Contemporaneously with the conversion of Athens Federal Savings Bank into Athens First Bank and Trust Company, ownership of Athena Service Corporation will pass from Athens Federal Savings Bank to Athens First Bank and Trust Company. Upon consummation of this transaction, threfore, Synovus Financial Corporation also proposes to engage indirectly in the sale of title insurance through Athena Service Corporation.

Comments on this application must be received by July 1, 1991.

Board of Governors of the Federal Reserve System, June 11, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

Information Collection Activities Under Office of Management and Budget Review

AGENCY: Office of the Administrator (AKC), GSA.

SUMMARY: The GSA hereby gives notice under the Paperwork Reduction Act of 1980 that it is requesting the Office of Management and Budget (OMB) to renew expiring information collection 3090-0228, Nondiscrimination in Federal Financial Assistance Program. This information is needed to ensure that recipients of Federal financial assistance distribute Federal surplus property in a nondiscriminatory manner.

ADDRESSES: Send comments to Bruce McConnell, GSA Desk Officer, Room 3235, NEOB, Washington, DC, 20503, and to Mary L. Cunningham, GSA Clearance Officer, General Services Administration (CAIR), 18th & F Street NW, Washington, DC 20405.

Annual Reporting Burden: *Respondents:* 228; *annual responses:* 1.0; *average hours per response:* 16.0000; *burden hours:* 3648.

FOR FURTHER INFORMATION CONTACT: Thomas E. Henderson, (202) 501-1633.

Copy of Proposal: May be obtained from the Information Collection Management Branch (CAIR), Room 7102, GSA Building, 18th & F St. NW, Washington, DC 20405, by telephoning (202) 501-0666, or by faxing your request to (202) 501-2727.

Dated: June 5, 1991.

Emily C. Karam,

Director, Information Management Division.

BILLING CODE 6820-BR-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[Announcement Number 126]

Surveillance of Hazardous Substance Emergency Events

Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces that cooperative agreement applications will be accepted to conduct surveillance of hazardous substance emergency events. The Public Health Services (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of Surveillance and Data Systems and Environmental Health. (For ordering a copy of Healthy People 2000, see Section WHERE TO OBTAIN ADDITIONAL INFORMATION.)

Authority

This program is authorized in sections 104(i) (9) and (15) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) (42 U.S.C. 9604 (i) (9) and (15)).

Eligible Applicants

Eligible applicants are the official public health departments of the states and the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Federated States of Micronesia, the Republic of the Marshall Islands, the Republic of Palau, the Northern Marina Islands, and American Samoa and federally-recognized Indian Tribes.

Availability of Funds

Approximately $450,000 is available in Fiscal Year 1991 to fund up to 9 awards (approximately 5 non-competing continuations totaling $250,000 and 2 to 4 new competing awards totaling $200,000). Awards are expected to be approximately $50,000 per award for the first year. It is anticipated that awards will be for a 12-month budget period with a proposed project period of 3 years. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

Purpose

The primary purpose of this cooperative agreement is to develop, implement, and maintain a state-based surveillance system for hazardous substance emergency events. This surveillance system will allow the state health department to better understand

VOL
56
ISS
116
JE
17
1991
UMI

the public health impact of hazardous substance emergencies by developing, implementing, and evaluating a state-based surveillance system.

The objectives of the surveillance system are to 1) describe the distribution of hazardous substance emergencies within individual states as well as nationally, 2) describe the type and cause of morbidity and mortality experienced by employees, first responders, and the general public as a result of selected hazardous substance emergencies, 3) analyze and describe risk factors associated with the morbidity and mortality, and 4) develop and propose strategies to reduce subsequent morbidity and mortality when comparable events occur in the future.

Program Requirements

All hazardous substance emergency event surveillance (HSEES) will be performed in accordance with the methodology provided in the HSEES protocol. The protocol was developed to meet the objectives outlined under PURPOSE. A copy of the protocol will be provided in the application kit. The following criteria define an emergency event:

A. An uncontrolled or illegal release or threatened release of a hazardous substance as defined by Sections 101(14) and 104(i)(18), 42 U.S.C. 9601(14) and 9604(i)(18); and include:

1. The 200 substances identified by ATSDR to be the most hazardous substances found at Superfund sites, as published in the Federal Register on October 20, 1988 (53 FR 41280), and

2. all insecticides, pesticides, and herbicides, not limited to those listed in ATSDR's announcement (e.g., parathion, dieldrin/aldrin, heptachlor), and

3. chlorine, hydrochloric acid, sodium hydroxide, nitric acid, phosphoric acid, acrylic acid, hydrofluoric acid; and

B. The amount of product released, or that might be released, needs (or would need) to be removed, cleaned up, or neutralized according to Federal, state, or local law.

Note: Events meeting Criteria A and B include releases and threatened releases of specified chemicals, i.e., if it is thought that a tanker will explode containing phosphoric acid and the area is evacuated and no explosion occurs, the event should be included.

In conducting activities to achieve the purpose of this program, the recipient shall be responsible for conducting activities under A. below and ATSDR will be responsible for conducting activities under B. below. The surveillance process will generally consist of the following activities:

A. Recipient Activities

1. Develop a mechanism for state health department notification of events in a timely fashion. This should include developing formal or informal agreements with all agencies within the states that are notified of hazardous substance emergencies. These agencies may include, but are not limited to, state police and fire departments, environmental agencies, and various offices of emergency government. These agreements should allow the participating state health departments to be notified of hazardous substance emergencies meeting the ATSDR case definition at the time, or shortly after, the event occurs.

2. Investigate the emergency event by gathering and analyzing the information gathered from various sources. Sources may include but are not limited to those agencies mentioned in Number 1. and other relevant Federal, state, local, and private agencies in keeping with the surveillance protocol.

3. Establish and maintain an appropriate and a timely schedule of gathering, entering, and transferring information to ATSDR in keeping with the HSEES Protocol.

B. ATSDR Activities

1. Collaborate with recipients in acquiring appropriate information for performance of HSEES; assist recipient in evaluating completeness and quality of relevant information.

2. Provide prototype information gathering instrument.

3. Assist recipients in establishing and maintaining appropriate and timely schedules for the HSEES surveillance process.

4. Assist recipients in assuring appropriate training for maintaining the surveillance system.

5. Analyze environmental and/or biological results for specific situations in which ATSDR has unique capabilities.

6. Evaluate the overall performance of recipient's adherence to the surveillance protocol.

Evaluation Criteria

A. Review Procedures

Applications will be reviewed and evaluated according to the following criteria:

1. Scientific and technical merit review criteria for states new to HSEES.

a. Appropriateness and Knowledge of Surveillance System (25 percent)—The extent to which the applicant demonstrates a need for such a surveillance system within their state. Additionally, the applicant should demonstrate an understanding of the needs, limitations, and experience with surveillance systems as a means of assessing the impact of hazardous substances on public health.

b. Proposed Methodology (25 percent)—The extent to which the applicant demonstrates experience in, or an ability to develop, implement, and evaluate surveillance systems in accordance with the HSEES Protocol.

c. Capability and Coordination Efforts (20 percent)—The extent to which the applicant demonstrates the ability to develop, maintain, or expand a formal or an informal working relationship with agencies outside of the state health departments that receive notifications of hazardous substance emergencies. This is necessary to assure that state health departments are notified of all hazardous substance emergencies.

d. Quality of Information Collection (20 percent)—The extent to which the applicant describes experience in collaborative projects where it was responsible for collecting information in a consistent format. Examples can include surveillance projects, surveys, and prospective or retrospective hypothesis testing studies. Of critical importance to the success of the surveillance project is the timely submission of information for analysis. The applicant must demonstrate experience in, or the proposed ability to collect, enter, and transfer information on a scheduled basis.

e. Program Personnel (10 percent)—The extent to which the proposed program staff are qualified and appropriate, and the time allocated for them to accomplish program activities is adequate. With limited funds available, the applicant must demonstrate that an infrastructure exists within the health department that will allow for full participation in the surveillance system with partial ATSDR financial support. such in-kind support can include existing support staff, technical staff (e.g., epidemiologists, data management staff, environmental health scientists, emergency response personnel), and computer hardware.

f. Program Budget (Not scored)—The extent to which the budget is reasonable, clearly justified, and consistent with intended use of cooperative agreement funds.

2. Scientific and technical merit review criteria for states with existing HSEES.

a. Appropriateness and knowledge of surveillance system (25 percent)—The extent to which the applicant demonstrates experience in collecting emergency event surveillance information within the state. This should include, but is not limited to, an assessment of the extent of hazardous substance emergencies and/or the morbidity and mortality associated with these events. Additionally, the applicant should demonstrate an understanding of the needs, limitations, and experience with surveillance systems as a means of assessing the impact of hazardous substances on public health.

b. Proposed methodology (25 percent)—The extent to which the applicant demonstrates experience in HSEES. This should include the development, implementation, and evaluation of an HSEES system in accordance with the surveillance protocol.

c. Capability and coordination efforts (20 percent)—The extent to which the applicant demonstrates the ability to develop, maintain, or expand a formal or an informal working relationship with agencies outside of the state health departments that receive notifications of hazardous substance emergencies. This is necessary to assure that state health departments are notified of all hazardous substance emergencies.

d. Quality of information collection (20 percent)—The extent to which the applicant describes experience in HSEES systems for which the organization was responsible for collecting information in a consistent format. Of critical importance to the success of the surveillance project is the timely submission of data for analysis. The applicant must demonstrate experience in collecting, entering, and transferring information on a scheduled basis.

e. Program personnel (10 percent)—The extent to which the proposed program staff is qualified and appropriate, and the time allocated for them to accomplish program activities is adequate. With limited funds available, the applicant must demonstrate that an infrastructure exists within the health department that will allow for full participation in the surveillance system with partial ATSDR financial support. Such in-kind support can include existing support staff, technical staff (e.g., epidemiologists, data management staff, environmental health scientists, emergency response personnel), and computer hardware.

f. Program budget (not scored)—The extent to which the budget is reasonable, clearly justified, and consistent with intended use of cooperative agreement funds.

B. Review of Continuation Applications

Continuation awards within the project period will be made on the basis of the following criteria:

1. Satisfactory progress has been made in meeting project objectives;

2. Objectives for the new budget period are realistic, specific, and measurable;

3. Proposed changes in described long-term objectives, methods of operation, need for cooperative agreement support, and/or evaluation procedures will lead to achievement of project objectives; and

4. The budget request is clearly justified and consistent with the intended use of cooperative agreement funds.

Funding Priorities

Renewal applicants and new HSEES applicants must demonstrate the abilities described earlier in this announcement, and established project shall neither be preferentially rewarded or penalized for previous ATSDR collaboration. Priority will be given for the following:

A. Geographic representation of the entire United States;

B. Representation from both agricultural and industrial states.

Other Requirements

Paperwork Reduction Act

Projects that involve collection of information from 10 or more individuals and funded by cooperative agreement will be subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Executive Order 12372 Review

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. E.O. 12372 sets up a system for state and local government review of proposed Federal assistance applications. Applicants (other than federally-recognized Indian tribal governments) should contact their state Single Point of Contact (SPOC) as early as possible to alert them to the prospective applications and receive any necessary instructions on the state process. For proposed projects serving more than one state, the applicant is advised to contact the SPOC of each affected state. A current list of SPOCs including their names, addresses, and telephone numbers is included in the application kit. The due date for state process recommendations is 60 days after the application deadline date for new and competing continuation awards. The granting agency does not guarantee to "accommodate or explain" for state process recommendations it receives after that date.

The following states and territories have elected not to participate in the "Intergovernmental Review of Federal Programs": Alaska, Idaho, Kansas, Minnesota, Nebraska, Virginia, American Samoa, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number is 93.161, Health Programs for Agency for Toxic Substances and Disease Registry.

Application Submission Deadline

The original and two copies of the application (Form PHS 5161–1) should be submitted to Henry S. Cassell, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Mail Stop E–14, Atlanta, Georgia 30305, on or before July 26, 1991. By formal agreement, the CDC Procurement and Grants Office will act on behalf of and for ATSDR on this matter.

A. *Deadline*

Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date; or

2. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

B. *Late Applications*

Applications that do not meet the criteria in 1. or 2. above are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where to Obtain Additional Information

If you are interested in obtaining additional information on application procedures, copies of application forms.

VOL 56 ISS 116 JE 17 1991 UMI

and other material, please contact the following CDC/ATSDR personnel.

Business Management Technical Assistance: Van Malone, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Mail Stop E-14, Atlanta, Georgia 30305; telephone: (404) 842-6630 or FTS 236-6630.

Programmatic Technical Assistance: Dr. Wendy Kaye, Chief, Epidemiology and Surveillance Branch, Division of Health Studies, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE., Mail Stop E-31, Atlanta, Georgia 30333; telephone: (404) 639-0555 or FTS 236-0555.

Please refer to announcement number 128 when requesting information and submitting an application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report, Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Dated: June 10, 1991.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

BILLING CODE 4160-70-M

[Announcement Number 132]

Areas Closed or Restricted to the Public Because of Toxic Substance Contamination

Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the availability of funds in Fiscal Year 1991 for a cooperative agreement with the National Governors' Association (NGA) to maintain a complete listing of areas closed to the public or otherwise restricted in use because of toxic substance contamination; to establish and maintain an inventory of state-based literature, research, and studies on the health effects of toxic substances; and to assist NGA in developing additional projects in response to emerging environmental health issues that facilitate state information exchange and policy development. The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Environmental Health. (For ordering a copy of Healthy People 2000, see the Section WHERE TO OBTAIN ADDITIONAL INFORMATION.)

Authority

This program is authorized under sections 104(i)(1) (B) and (C), 104(i)(14), and 104(i)(15) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, (42 U.S.C. 9604(i)(1) (B) and (C), (14), and (15)). Section 104(i)(14) states, in part, " * * * "the administrator of ATSDR shall assemble, develop as necessary, and distribute to the states, and upon request to medical colleges, physicians, and other health professionals, appropriate educational material (including short courses) on the medical surveillance, screening and methods of diagnosis and treatment of injury or disease related to exposure to hazardous substances * * *."

Section 104(i)(15) states: The activities of the Administrator of ATSDR described in this subsection * * * "shall be carried out by the Administrator of ATSDR, either directly or through cooperative agreements with the states (or political subdivisions thereof) which the Administrator of ATSDR determines are capable of carrying out such activities."

Eligible Applicant

Assistance will be provided only to the National Governors' Association (NGA). No other applications are solicited or will be accepted. The National Governors' Association is a unique institution for collecting and maintaining the information mandated under the Sections of CERCLA cited above, because of its special relationship with the states, commonwealths, and territories of the United States. NGA has developed, with ATSDR, the methodology and protocol for the data collection and maintenance, as well as convening a Task Force of senior state environmental health, natural resource, and policy officials to assist in the development, progress, and final presentation of the data. In addition, this Task Force provides assistance and guidance to NGA and ATSDR, as needed, on emerging environmental health issues that facilitate state information exchange and policy development.

Availability of Funds

Approximately $150,000 will be available in Fiscal Year 1991. It is expected that the award will begin on or about July 1, 1991, for a 12-month budget period within a 5-year project period. Continuation awards within the project period are made on the basis of satisfactory progress and availability of funds. The funding estimate outlined above may vary and is subject to change.

Purpose

The cooperative agreement purposes are: (1) To assist the National Governors' Association (NGA) in updating the data contained in the biennially prepared document "Restrictions Imposed on Contaminated Sites: A Status of State Actions"; (2) to assist in cataloging various state efforts being used to avoid public exposure to hazardous sites and analyzing their site-specific responses; and (3) to develop a descriptive directory of state agencies and officials that have authority to close or restrict areas to public use because of toxic contamination. NGA will undertake additional projects in response to emerging state environmental health issues. These projects may include an analysis of how public health agencies can most effectively address public concerns about environmental health hazards. This information will assist state Governors in managing their hazardous substance cleanup programs.

Program Requirements

In conducting the activities to achieve the purpose of this program, the recipient shall be responsible for conducting activities under A. below and ATSDR will be responsible for conducting activities under B. below.

A. NGA Activities

1. In cooperation with ATSDR and the individual states and territories, develop the methodology and protocol to update the data contained in the biennially prepared document "Restrictions Imposed on Contaminated Sites: A Status of State Actions."

2. Gather information about state authorities and activities for closing and restricting areas to the public.

3. Analyze the collected information and comment on trends found in the data.

4. Prepare and publish a biennial listing of sites closed or restricted because of toxic contamination.

5. Conduct workshops and publish memoranda and reports, as needed, in response to emerging environmental health issues.

B. ATSDR Activities

1. Assist in updating the information contained in the biennially prepared document "Restrictions Imposed on Contaminated Sites: A Status of State Actions."

2. Participate in defining the scope and implementing the project and the preparation and publication of the study results.

3. Provide NGA with the Office of Management and Budget (OMB) Approval Number (0923-0001, "Update Survey of Areas Closed or Otherwise Restricted Because of Toxic Contamination," Expiration Date 11/93) for collecting the data for the listing of sites closed or restricted because of toxic contamination.

4. Assist NGA in developing additional projects in response to emerging environmental health issues that facilitate state information exchange and policy development.

Evaluation Criteria

The application will be reviewed and evaluated according to the following criteria:

1. The applicant's understanding of the need or problem to be addressed and the purpose of this cooperative agreement. (15 points)

2. The ability to provide the staff, knowledge, financial and other resources required to perform the applicant's responsibilities in this project, and describe the approach to be used in carrying out responsibilities. (15 points)

3. The extent to which the applicant understands the objectives of the project; the steps to be taken in planning and implementing this project, and the respective responsibilities of the applicant, ATSDR and any other entities for carrying out those steps. (15 points)

4. The proposed schedule for accomplishing each of the activities to be carried out in this project, and a method for evaluating the accomplishment, are clearly defined. (15 points)

5. The qualifications and appropriateness of proposed program staff, and time allocated for them to accomplish program activities; the support staff available for the performance of this project; and the facilities, space and equipment available for performance of this project. (15 points)

6. The proposed plan for administering this project, and the name, qualifications, time allocations of the individual whom the applicant proposes to make responsible for its administration. (15 points)

7. The detailed budget which should indicate (1) anticipated costs for personnel, travel, communications and postage, equipment, and supplies and (2) the sources of funds to meet those needs will be reviewed for its reasonableness in relation to the proposed program. (10 points)

Executive Order 12372 Review

The application is not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs (45 CFR 100).

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance Number is 93.161, Health Programs for Toxic Substances and Disease Registry.

Application Submission and Deadline

The original and two copies of the application Form PHS 5161-1 shall be submitted to Henry S. Cassell, III, Grants Management Officer, CDC Procurement and Grants Office, 255 East Paces Ferry Road NE., room 300, Atlanta, Georgia 30305, on or before June 19, 1991. By formal agreement, the CDC Procurement and Grants Office will act on behalf of and for ATSDR on this matter.

Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please reference ANNOUNCEMENT NUMBER 132, AREAS CLOSED OR RESTRICTED TO THE PUBLIC BECAUSE OF TOXIC SUBSTANCE CONTAMINATION, and contact the following:

Business Management Technical Assistance: Van Malone, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Mailstop E-14, Atlanta, Georgia 30305, or by calling (404) 842-6630 or FTS 236-6630.

Programmatic Technical Assistance: Jim Carpenter, MA, Division of Health Education, Agency for Toxic Substances and Disease Registry, (404) 236-0736 or FTS 236-0736.

A copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report, Stock No. 017-001-00473-1) referenced in the Introduction may be obtained through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Dated: June 10, 1991.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

BILLING CODE 4160-20-M

Centers for Disease Control

[Program Announcement Number 912]

Grants for Injury Prevention and Control Research; Availability of Funds for Fiscal Year 1992

Introduction

The Centers for Disease Control (CDC) announces that applications are being accepted for Injury Prevention and Control Research Grants. The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of Violent and Abusive Behavior and Unintentional Injuries. (For ordering a copy of Healthy People 2000, see the

VOL 56 ISS 116 JE 17 1991 UMI

section WHERE TO OBTAIN ADDITIONAL INFORMATION.)

Authority

This program is authorized under sections 301 and 391 of the Public Health Service Act (42 U.S.C. 241 and 280b). Program regulations are set forth in title 42 of the Code of Federal Regulations, part 52.

Eligible Applicants

Eligible applicants include all non-profit and for-profit organizations. Thus State and local health departments and other State and local governmental agencies, universities, colleges, research institutions, and other public and private organizations, including small, minority and/or women-owned businesses are eligible for these research grants. Current holders of CDC injury control research projects are eligible to apply.

Availability of Funds

Approximately $3.5 million may be available in Fiscal Year 1992 to fund approximately 14 to 20 grants for periods of up to three years. The amount of funding actually available may vary and is subject to change. it is expected that the average new award will be $150,000, the range being $60,000 to $225,000 (including both direct and indirect costs). Research grant supplements will generally be no more than $50,000 (including both direct and indirect costs). Beginning award dates for each submission deadline are shown in the "Receipt and Review Schedule" section of this announcement. Continuation awards within the project period will be made on the basis of satisfactory progress, including the achievement of workplan milestones, and the availability of federal funds.

Purpose

The purposes of this program are:

A. To support injury prevention and control research on priority issues as delineated in Injury in America, Injury Prevention: Meeting the Challenge, Cost of Injury, and Healthy People 2000. (To receive information on these reports call (404) 332–4561 listed in the section WHERE TO OBTAIN ADDITIONAL INFORMATION.)

B. To encourage professionals from a wide spectrum of disciplines, such as engineering, medicine, health care, public health, criminal justice, behavioral and social sciences, and others, to undertake research to prevent and control injuries.

C. To rigorously evaluate current and new intervention methods and strategies for the prevention and control of injuries.

Program Requirements

The following are applicant requirements:

A. A director who has specific authority and responsibility to carry out the project.

B. Demonstrated experience in successfully conducting, evaluating, and publishing injury-related research.

C. Effective and well-defined working relationships within the performing organization and with outside entities which will ensure implementation of the proposed activities.

D. An explanation of how research findings will lead to the development of injury control interventions within 3–5 years of project start-up. Furthermore, how the research findings might be disseminated and implemented through organizations (such as public health agencies) or systems, both public and private.

Grant funds will not be made available to support the provision of direct care services. Studies may be supported which evaluate methods of care and rehabilitation for potential reductions in injury effects and costs. Studies may be supported which evaluate the effect of pre-hospital, hospital, and rehabilitative care and independent living systems on injury outcomes and costs.

Eligible applicants may enter into contracts, including consortia agreements (as set forth in the PHS Grants Policy Statement) as necessary to meet the requirements of the program and strengthen the overall application.

Programmatic Interests

The focus of grants should reflect the broad-based need to control injury morbidity, mortality, disability, and costs. Special consideration may be given to applications requesting one or two years of funding. One-year pilot projects are encouraged.

The three phases of injury prevention and control are defined as prevention, acute care, and rehabilitation. The disciplines of biomechanics and epidemiology may be of importance in addressing each of these phases.

In prevention, there is specific interest in research which evaluates the effectiveness of interventions in preventing injuries of reducing their impact. This research might evaluate one or more different approaches to implementing a specific intervention strategy (e.g. increasing the use of bicycle helmets among children) and compare the effectiveness of several different countermeasures (e.g. environmental, educational, and legal) applied simultaneously in a particular setting. Interventions chosen for evaluation should have a significant potential for reduction in injury morbidity, mortality, disability, or cost. The development, application and evaluation of promising, innovative interventions applicable to intentional injury, (e.g. the prevention of youth violence in minority communities and youth suicide) is also of interest. Special consideration will be given to grants which target populations at high risk for injury and injury consequences, including children, minorities, the elderly, rural residents, and farm families.

In acute care, there is programmatic interest in identifying optimal methods of diagnosing and treating patients who have sustained major trauma, including central nervous system injuries, burns, and multiple organ system injuries. Research needs encompass the full spectrum of acute care of the trauma patient, from triage decisions in the pre-hospital setting to management of postoperative complications such as multiple organ failure syndrome. There is also special interest in the design and evaluation of trauma registries, and regional trauma care systems.

In rehabilitation, there is programmatic interest in research directed towards minimizing the secondary complications of injury including pressure sores, contractures, muscular atrophy, skeletal deformity and other definable conditions. Likewise, research is needed to evaluate the effectiveness of rehabilitation methods and practices, identifying those which minimize long-term adverse effects and those which lead to optimal functional recovery. Finally, there is interest in the evaluation of integrated systems for rehabilitation and in applying findings from such studies to the development of regional and/or statewide systems of rehabilitation.

In biomechanics, there is special programmatic interest in brain and spinal cord injury, and outcomes from multiple trauma. This interest includes the biomechanical evaluation of intervention concepts and strategies; development of models to elucidate injury physiology and pharmacologic, surgical and other interventions; defining human tolerance limits for Injury among children, women, the chronically ill and older persons; improvements in injury assessment technology; and understanding impact injury mechanisms and quantifying injury-related biomechanical responses for critical areas of the human body. Consideration will also be given to the biomechanics of thoracic and abdominal viscera, joints, and musculature.

In epidemiology, there is programmatic interest in analytic research that identifies mechanisms, causes, or risks of injury which might lead to new or more effective interventions. Also of interest is epidemiologic research having as its focus the development of improved methods and the evaluation and improvement of injury surveillance systems. Research is needed that more accurately defines the cost of injury and the cost effectiveness of interventions.

Evaluation Criteria

Applications will be evaluated by a dual review process. Awards will be made based on priority score ranking by Injury Research Grants Review Committee (IRGRC), merit and program review by senior Federal staff, and the availability of funds.

A. The first review will be a peer review to be conducted on all applications. Factors to be considered will include:

1. The degree to which the applicant possesses requirements described under the section PROGRAM REQUIREMENTS.

2. The overall match between the applicant's proposed theme and research objectives, and the program priorities as described in Injury In America, Injury Prevention: Meeting the Challenge, Cost of Injury, and Healthy People 2000.

3. The merit, significance, and originality, from a scientific or a technical standpoint, of the goals of the proposed research, including the adequacy of the theoretical and conceptual framework for the research.

4. Evidence of familiarity with relevant research literature.

5. The adequacy of the proposed research design, approaches, and methodology to carry out the research, including quality assurance procedures, plan for data management, and statistical analysis plan.

6. The extent to which the evaluation plan will allow for the measurement of progress toward the achievement of the stated objectives.

7. Qualifications, adequacy, and appropriateness of personnel to accomplish the proposed activities.

8. The degree of commitment and cooperation of other interested parties (as evidenced by letters detailing the nature and extent of the involvement).

9. The reasonableness of the proposed budget to the proposed research and demonstration program.

10. Adequacy of existing and proposed facilities and resources.

11. For competitive renewal applications, the progress made during the prior project period. Annual work-in-progress workshops will be utilized to help assess completed project period work.

B. The second review will be conducted by senior Federal staff. The factors to be considered will include:

1. The results of the peer review.

2. The signficance of the proposed activities in relation to the objectives stated in Injury In America, Injury Prevention: Meeting the Challenge, Cost of Injury, and Healthy People 2000.

3. National needs and geographic balance.

4. Overall distribution among:

- The three phases of injury control: prevention, acute care, and rehabilitation;
- The major disciplines of injury control: biomechanics and epidemiology;
- Traffic and motor vehicle injury research and other research;
- Intentional and unintentional injury;
- Populations addressed (for example, minorities, the elderly, children, urban, rural, etc); and

5. Budgetary considerations (e.g., preference may be given to applicants who submit proposals requesting funding for research projects of one to two year's duration).

C. Continued Funding. Continuation awards made after FY 1992, but within the project period, will be made on the basis of the availability of funds and the following criteria:

1. The accomplishments reflected in the progress report of the continuation application indicate that the applicant is meeting previously stated objectives or milestones contained in the project's annual workplan and satisfactory progress has been demonstrated at the annual work-in-progress workshops;

2. The objectives for the new budget period are realistic, specific, and measurable;

3. The methods described will clearly lead to achievement of these objectives;

4. The evaluation plan will allow management to monitor whether the methods are effective; and

5. The budget request is clearly explained, adequately justified, reasonable and consistent with the intended use of grant funds.

D. Supplementary Funding. Competing Supplemental grant awards may be made when funds are available, to support research work or activities not previously approved by the IRGRC. Applications should be clearly labelled to denote their status as requesting supplemental funding support. These applications will be reviewed by the IRGRC and the secondary review group.

Executive Order 12372 Review

Applications are not subject to the review requirements of Executive Order 12372, entitled Intergovernmental Review of Federal Programs.

Catalog of Federal Domestic Assistance Number (CFDA)

The Catalog of Federal Domestic Assistance number is 93.136.

Application Submission and Deadlines

A. Preapplication Letter of Intent

Although not a prerequisite of application, a non-binding letter of intent-to-apply is requested from potential applicants. The letter should be submitted to the Grants Management Officer (whose address is reflected in section B, "Applications"). It should be postmarked no later than two months prior to the planned submission deadline, (e.g., August 1 for October 1 submission). The letter should identify the announcement number being responded to, indicate the intended submission deadline, name the principal investigator, and specify the injury control phase addressed by the proposed project (e.g., prevention, acute care, or rehabilitation). The letter of intent does not influence review or funding decisions, but it will enable CDC to plan the review more efficiently, and will ensure that each applicant receives relevant information prior to application submission.

B. Applications

Applicants should use Form PHS–398 and adhere to the Errata Instruction Sheet for Form PHS–398 contained in the Grant Application Kit. States and local government may use PHS–5161–1, however, PHS–398 is preferred. If the applicant is using PHS–398, submit an original and six copies, if the applicant is using PHS–5161–1, submit an original and two copies on or before one of the receipt deadlines mentioned in section (D) below to: Henry S. Cassell III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., room 300, Atlanta, Georgia 30305.

C. Deadlines

Applications shall be considered as meeting a deadline if they are received at the above address on or before the deadline date. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly

VOL 56 ISS 116 JE 17 1991 UMI

dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailings. Applications which do not meet the criteria above are considered late applications and will be returned to the applicant.

D. Receipt and Review Schedule

This is a continuous announcement, consequently, the receipt date will be on-going until further notice. The proposed timetable for receiving applications and awarding grants is as follows:

Receipt of new/revised/supplementary/competitive renewal applications	Initial review	Secondary review	Earliest award date
Oct. 1, 1991.	Jan./Feb...	Apr./May..	June 1, 1992.

Future dates for this announcement submission are as follows:

Receipt of new/revised/supplementary/competitive renewal applications	Initial review	Secondary review	Earliest award date
Oct. 1.....	Jan./Feb.	Apr./May..	June 1.

Where to Obtain Additional Information

To receive additional written information call (404) 332–4561. You will be asked to leave your name, address and phone number, and will need to refer to Announcement Number 912. You will receive a complete program description, information on application procedures, and an application package containing addresses and phone numbers for the contact personnel. Lisa Tamaroff, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Mailstop E–14, Atlanta, GA 30305 will provide the business management technical assistance, and programmatic technical assistance will be provided by Ted Jones, Project Officer, Division of Injury Control, Center for Environmental Health and Injury Control, Centers for Disease Control, 1600 Clifton Road NE., Mailstop F–36, Atlanta, GA 30333.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report, Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC. 20402–9325 (Telephone (202) 783–3238).

Dated: June 10, 1991.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control

BILLING CODE 4160–18–M

[Program Announcement Number 913]

Grants for Injury Control Research Centers and Injury Control Research Program Project Grants; Availability of Funds for Fiscal Year 1992

Introduction

The Centers for Disease Control (CDC) announces that grant applications are being accepted for Injury Control Research Centers (ICRCs) and Injury Control Research Program Project Grants (RPPGs). The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of Violent and Abusive Behavior and Unintentional Injuries. (For ordering a copy of Healthy People 2000, see the Section **WHERE TO OBTAIN ADDITIONAL INFORMATION.**)

Authority

This program is authorized under sections 301 and 391 of the Public Health Service Act (42 U.S.C. 241 and 280b). Program regulations are set forth in title 42 of the Code of Federal Regulations, part 52.

Eligible Applicant

Eligible applicants include all nonprofit and for-profit organizations. Thus, universities, colleges, research institutions, hospitals, and other public and private organizations, State and local health departments and small, minority and/or women-owned businesses are eligible for these grants. Current holders of CDC injury prevention research center grants and injury control research program project grants are eligible to apply.

Availability of Funds

Approximately $2.2 million may be available in Fiscal Year 1992 to fund approximately two to four center awards and/or research program project awards for up to five years. The amount of funding actually available may vary and is subject to change. Beginning award dates for each submission are shown in the receipt and review section of this announcement. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds. New center grant awards will not exceed $500,000 per year (including both direct and indirect costs), new research program project awards will not exceed $350,000 per year (including both direct and indirect costs) and supplemental funding awards will not exceed $225,000 per year (including both direct and indirect costs).

Purpose

The purposes of this program are:

A. To support injury prevention and control research on priority issues as delineated in: Healthy People 2000, Injury in America, Injury Prevention: Meeting the Challenge, and Cost of Injury, a Report to the Congress; (To receive information on these reports call (404) 332–4561 listed in the section entitled **WHERE TO OBTAIN ADDITIONAL INFORMATION**);

B. To integrate the disciplines of engineering, medicine, health care, public health, criminal justice, behavioral and social sciences, and others, in order to prevent and control injuries more effectively;

C. To identify and rigorously evaluate current and new interventions for the prevention and control of injuries;

D. To support ICRCs which will develop an in-depth approach to injury control research and training;

E. To bring the knowledge and expertise of ICRCs to bear on the development of effective public-and private-sector programs for injury prevention and control;

F. To help make available the expertise of academic institutions for the evaluation and improvement of injury prevention, surveillance, and control programs instituted and carried out by Federal, State or local government and private-sector organizations;

G. To support RPPGs which will focus several interdisciplinary research projects on a particular phase of injury, a cause of injury, or a population segment affected by injury.

Program Requirments

A. Essential Requirements for ICRCs

1. New applicants should initially show expertise in at least one of the three phases of injury control (prevention, acute care, or rehabilitation) and provide specific, time-framed plans to support research in all three phases by the second or third year of the applicant's project period.

2. New applicants should describe ongoing injury-related research projects or control activities currently supported by other sources of funding.

3. New applicants should provide a director who has specific authority and responsibility to carry out the project. The director should report to an appropriate institution official, e.g. dean of a school or vice president of a university.

4. New applicants should demonstrate experience in successfully conducting, evaluating, and publishing injury-related research and/or designing, implementing, and evaluating injury control programs.

5. New applicants should have effective and well-defined working relationships with outside agencies and other entities which will ensure implementation of the proposed activities.

6. New applicants should provide evidence of involvement of specialists or expertise is medicine, health care, engineering, epidemiology, behavioral and social sciences, and public health, with a specific, time-framed plan of expansion to include biomechanics and health policy and management. These will be considered the core disciplines and fields for ICRCs.

7. New applicants should have an established curricula and graduate training programs in disciplines relevant to injury control (for example, epidemiology, biomechanics, safety engineering, traffic safety behavioral sciences, and economics).

8. New applicants should have mechanisms for disseminating the injury control research findings, translating them into interventions, and evaluating their effectiveness.

9. New applicants should have an established relationship, demonstrated by letters of agreement, with injury prevention and control programs or injury surveillance programs being carried out in the state in which the ICRC is located. Cooperation with governmental programs is required; cooperation with private-sector programs is encouraged. Special emphasis should also be given to establishing cooperative relationships with any adjacent states having CDC-funded injury control capacity-building, incentive, or surveillance grants and other state and local health departments who may not currently have CDC support for injury activities.

B. Essential Requirements for RPPGs

1. New applicants should show expertise in the phases or disciplines of injury control which the research program addresses. RPPG applicants should also provide specific time-framed objectives for their research, covering all years of the proposed project.

2. The director must have specific authority and responsibility to carry out the project and must report to an appropriate level university official, e.g. dean of a school or department chairperson.

3. The investigators must have demonstrated experience in successfully conducting, evaluating, and publishing injury-related research, and/or designing, implementing, and evaluating injury control programs.

4. The applicant must describe effective and will-defined working relationships with outside agencies and other entities which can ensure implementation of proposed activities.

5. The applicant must specify mechanisms for linking the injury control research findings with public health (i.e. state and local health departments) and other intervention efforts to facilitate rapid translation, dessemination, and application of research findings.

6. Applicants should clearly describe and be able to demonstrate how several proposed multiple research projects interrelate and complement each other. Outcome objectives of the research should be stated such that accomplishments clearly reflect elements of each individual project within the RPPG.

7. The applicant must specify how each individual project and the program as a whole will be evaluated.

Grant funds will not be made available to support the provision of direct care. Studies may be supported which evaluate methods of care and rehabilitation for potential reductions in injury effects and costs. Studies can be supported which identify the effect on injury outcomes and cost of systems for pre-hospital, hospital, and rehabilitative care and independent living. Eligible applicants may enter into contracts, including consortia agreements (as set forth in the PHS Grants Policy Statement, dated October 1, 1990, as amended), as necessary to meet the requirements of the program and strengthen the overall application. In general, consortia agreements would be carried out with entities located in the same state, and adjacent state, or the same regional grouping of states.

Evaluation Criteria

Applications will be evaluated by a dual review process. The first review will be a peer evaluation of the scientific and technical merit of the application. The second review will be conducted by senior Federal staff, who will consider the results of the first review together with program need and relevance. Awards will be made based on merit and priority score ranking by the Injury Research Grants Review Committee (IRGRC), program review by senior Federal staff, and the availability of funds.

A. Review by the Injury Research Grants Review Committee (IRGRC)

Peer review of ICRC grant applications will be conducted by the IRGRC, which may recommend approval as an ICRC, approval as an RPPG or disapproval based on the intent of the application. Site visits may be a part of this process.

Factors to be considered by IRGRC include:

1. The degree to which the applicant possesses the requirement described in the section PROGRAM REQUIREMENTS.

2. The overall match between the applicant's research and, where applicable, training objectives and those listed in national program priorities as referenced in the Background section of this announcement.

3. The scientific and technical merit of the overall application.

4. The adequacy of the methods for coordinating the overall program and its component parts.

5. The extent to which the evaluation plan will allow for the quantitative measurement of progress toward the achievement of stated objectives.

6. Qualifications, adequacy, and appropriateness of personnel to accomplish the proposed activities.

7. The degree of commitment measured in terms of injury control personnel, facilities, and activities supported by other funding sources and the likelihood that this commitment will be sustained or expanded in future years.

8. The degree of commitment and cooperation of other interested parties as evidenced by letters detailing the nature and extent of this commitment and cooperation. Specific letters of support or understanding from appropriate governmental bodies must be provided with the application.

VOL 56 ISS 116 JE 17 1991 UMI

9. The reasonableness of the proposed budget for the proposed program.

10. Progress thus far made, if the applicant is submitting a competitive renewal application. Special consideration may be given to existing ICRCs who have documented success against the workplan developed during the previous project periods, who are recompeting and where the applicant ICRC or RPPG has an appropriate organizational, and reporting relationship within the applicant institution.

11. Plans to become self-sustaining.

B. Review by Senior Federal Staff

Further review will be conducted by Senior Federal staff. Factors to be considered will be:

1. The results of the peer review.

2. The significance of the proposed activities as they relate to the achievement of national objectives.

3. National needs and geographic balance. Because no ICRCs were funded during fiscal year 1989 and 1990 in Federal regions II, V, VI, VII, approved ICRC or RPPG proposals from states in these regions may be accorded special consideration.

4. Overall distribution of the thematic focus of competing applications, the overall balance of the program in addressing the three phases of injury control (prevention, acute care and rehabilitation), the control of injury among populations who are at increased risk, including minority groups, the elderly and children; the major causes of intentional and unintentional injury; and major disciplines of injury control (such as biomechanics and epidemiology).

5. Budgetary considerations.

6. Plans to become self-sustaining.

C. Applications for Supplemental Funding

Competing Supplemental grant awards may be made when funds are available, to support research work or activities not previously approved by the IRGRC. Supplementary funding may be sought for either injury research grants, or Injury Control Research Center (ICRC) grants and Research Program projects (RPPG) grants. Applications should be clearly labelled to denote their status as requesting supplemental funding support. These applications will be reviewed by the IRGRC and the secondary review group.

D. Continued Funding

Continuation awards within the project period will be made on the basis of the availability of funds and the following criteria:

1. The accomplishments of the current budget period show that the applicant's objectives as prescribed if the yearly workplans are being met;

2. The objectives for the new budget period are realistic, specific, and measurable;

3. The methods described will clearly lead to achievement of these objectives;

4. The evaluation plan allows management to monitor whether the methods are effective by having clearly defined process, impact, and outcome objectives, and the applicant demonstrates progress in implementing the evaluation plan;

5. The budget request is clearly explained, adequately justified, reasonable, and consistent with the intended use of grant funds; and

6. Progress has been made in developing cooperative and collaborative relationships with injury surveillance and control programs implemented by state and local governments and private sector organizations.

E.O. 12371 Review

Applications are not subject to the review requirements of Executive Order 12372, entitled Inter-Governmental Review of Federal Programs.

Catalog of Federal Domestic Assistance Number (CFDA)

The Catalog of Federal Domestic Assistance Number is 93.136.

Application Submission and Deadlines

A. Preapplication Letter of Intent

Although it is not a prerequisite to apply, potential applicants are encouraged to submit a nonbinding letter of intent to apply to the Grants Management Officer (whose address is given in this section Item B). It should be postmarked no later than two months prior to the submission deadline (December 1, 1991 for February 1, 1992 submission deadline). The letter should identify the announcement number being responded to, indicate the submission deadline which will be met, indicate whether the application is for an ICRC or an RPPG, name the principal investigator, and specify the injury control theme of the proposed center or program (e.g. acute care, biomechanics, epidemiology, prevention, intentional injury or rehabilitation). The letter of intent does not influence review or funding decisions, but it will enable CDC to plan the review more efficiently.

B. Applications

Applicants from academic institutions and the private sector should use Form PHS-398 and adhere to the ERRATA Instruction Sheet for PHS-398 contained in the Grant Application Kit. State and local government applicants may use PHS-5161-1, however PHS 398 is preferred. The narrative section for *each* project within an ICRC or an RPPG should not exceed 20 typewritten pages. Refer to section 1, page 12, of PHS-398 instruction for description of specifications for font type and size. Applications not adhering to these specifications may be returned to applicant. Applicants using form PHS-398 should submit an original and six copies and applicants using form PHS-5161-1 should submit an original and two copies of the application to Henry S. Cassell III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., room 300, Mailstop E-14, Atlanta, Georgia 30305.

C. Deadlines

Applications shall be considered as meeting the deadline above if they are either:

1. Received on or before the deadline date; or

2. Sent on or before the deadline date and received in time for submission to the peer review committee. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.

Applications which do not meet the criteria in C1. or C2. above are considered late applications and will be returned to the applicant.

D. Receipt and Review Schedule

This is a continuous announcement consequently, these receipt dates will be ongoing until further notice. The proposed timetables for receiving applications and awarding grants is as follows:

Receipt of new/revised/supplementary/competitive renewal applications	Initial review	Secondary review	Earliest award date
Feb. 1, 1992.	May	July	Dec. 1, 1992

Future receipt dates are as follows:

Receipt of new/revised/supplementary/competitive renewal applications	Initial review	Secondary review	Earliest award date
February 1	May	July	December.

Where to Obtain Additional Information

To receive additional written information call (404) 332-4561. You will be asked to leave your name, address and phone number, and will need to refer to Announcement Number 913, You will receive a complete program description, information on application procedures, and an application package containing addresses and phone numbers for the contact personnel. Lisa Tamaroff, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Mailstop E-14, Atlanta, GA 30305 will provide the business management technical assistance, and programmatic technical assistance will be provided by Howard Hill, Project Officer, Center for Environmental Health and Injury Control, Centers for Disease Control, 1600 Clifton Road NE., Mailstop F-36, Atlanta, GA 30333.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Dated: June 10, 1991.

Robert L. Foster,

Acting Director Office of Program Support Centers for Disease Control

[FR Doc. 91-14293 Filed 6-14-91; 8:45 am]

BILLING CODE 4160-18-M

Health Resources and Services Administration

Availability of Funds for the National Health Service Corps; Loan Repayment Program and Grants for State Loan Repayment Programs

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) announces that approximately $48.8 million will be available in Fiscal Year (FY) 1991 for: (1) Awards for educational loan repayment under the National Health Service Corps (NHSC) Loan Repayment Program (Section 338B of the Public Health Service (PHS) Act); (2) grants to States to operate loan repayment programs (section 338I of the PHS Act); and (3) awards under the NHSC Scholarship Program (section 338A of the PHS Act).

The HRSA, through this notice, invites health professionals to apply for participation in the NHSC Loan Repayment Program and invites States to apply for grants to operate State Loan Repayment Programs. The HRSA estimates that approximately 300 Loan Repayment awards totaling $20 million may be made to primary care physicians, dentists, or nurse midwives, physician assistants, and nurse practitioners who are certified or eligible to sit for the certifying examination in their profession. Up to 25 grants averaging $140,000 each and totaling approximately $3.5 million may be awarded to States for State Loan Repayment Programs for one year budget periods and up to three year project periods.

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. These programs will contribute to the Healthy People 2000 objectives by improving access to primary health care services through coordinated systems of care for medically underserved populations in both rural and urban areas. Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-01) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (telephone 202-783-3238).

Part A of this notice contains specific information concerning the NHSC Loan Repayment Program, and Part B contains specific information concerning grants for State Loan Repayment Programs.

Part A—NHSC Loan Repayment Program

DATES: To receive consideration for funding, health professionals must submit their applications by September 1, 1991. To assure early processing of the application and approval for site matching, individuals are encouraged to submit applications well ahead of the September 1 deadline.

Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date; or

2. Sent on or before the deadline and received in time for submission to the reviewing program official. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing).

Applications received after the announced closing date will not be considered for funding.

ADDRESSES: Application material may be obtained by calling or writing, and completed applications should be returned to, Director, Division of Health Services Scholarships, Bureau of Health Care Delivery and Assistance, HRSA, room 7-23, 5600 Fishers Lane, Rockville, Maryland 20857, (301-443-1650). The application has been approved under Office of Management and Budget (OMB) Number 0915-0127.

FOR FURTHER INFORMATION CONTACT: For further program information and assistance, please contact Mr. Clark Gordon, Branch Chief, NHSC Loan Repayment Program, at the above address and phone number.

SUPPLEMENTARY INFORMATION: Section 338B of the Public Health Service Act (42 U.S.C. 2541-1) authorizes the Secretary to establish the NHSC Loan Repayment Program, to help in assuring, with respect to the provision of primary health services, an adequate supply of trained primary care health professionals for the NHSC. The NHSC is used by the Secretary to provide primary health services in designated health professional shortage areas (HPSAs). Primary health services are services regarding family medicine, internal medicine, pediatrics, obstetrics and gynecology, dentistry, or mental health, that are provided by physicians or other health professionals.

Under the NHSC Loan Repayment Program, the Secretary will repay graduate and undergraduate educational loans incurred by health professionals. For the first two years at an approved site in a designated HPSA, the Secretary will repay up to $25,000 per year of the educational loans of such individual. For subsequent years of service the Secretary will repay up to $35,000 per year. The Secretary will provide tax liability payments in an amount equal to 39 percent of the total loan repayments made during that tax year to reimburse the Program participants for increased tax liability resulting from loan repayments received under this Program. The increase in the amount of

VOL

ISS
116
JE
17
1991
UMI

the tax liability payment made will apply only to contracts entered into after November 16, 1990. In addition to these amounts, NHSC Loan Repayment Program participants will receive a salary from a private nonprofit or public entity or, in some cases, the Federal Government during the term of their service.

The Secretary will identify annually those HPSA sites which will be available for service repayment under the NHSC Loan Repayment Program.

The Secretary will select applicants for consideration for participation in the NHSC Loan Repayment Program according to the following selection criteria:

(1) The extent to which an individual's training in a health profession or specialty is determined by the Secretary to be needed by the NHSC in providing primary care health services. From time to time, the Secretary will publish a notice detailing the professions and specialties most needed by the NHSC. Current professional and specialty priorities are outlined at the end of Part A of this notice.

(2) The extent to which an individual is determined by the Secretary to be committed to serve in a HPSA.

(3) The extent of an individual's demonstrated interest in providing primary health services.

(4) The immediacy of an individual's availability for service. Individuals who have a degree, have completed all necessary postgraduate training in their professions and specialties (i.e., in the case of physicians, are certified or eligible to sit for the certifying examinations of a specialty board), have a current and unrestricted valid license to practice their profession in a State, and are immediately available to serve, will receive highest consideration.

(5) The academic standing, prior professional experience in a HPSA, board certification, residency achievements, peer recommendations, and other criteria related to professional competence or conduct will also be considered.

(6) The length of the individual's proposed service obligation, with greatest consideration being given to persons who agree to serve for longer periods of time.

Among applicants, priority will be given to those applicants:

- Whose health profession or specialty is most needed by the NHSC;
- Who have and whose spouses, if any, have characteristics that increase the probability of their continuing to serve in a HPSA upon completion of their service obligations;
- Subject to the preceding paragraph, who are from disadvantaged backgrounds.

Eligible Applicants

To be eligible to participate in the NHSC Loan Repayment Program, an individual must: (a)(1) Have a degree and, if applicable, completed an approved graduate training program in allopathic or osteopathic medicine, dentistry, or other health profession, or be certified as a nurse midwife, nurse practitioner, or physician assistant, and have a current and valid license to practice such health profession in a State; (2) be enrolled in an approved graduate training program in allopathic or osteopathic medicine, dentistry, or other health profession; or (3) be enrolled as a full-time student at an accredited school in a State and in the final year of a course of study or program leading to a degree in allopathic or osteopathic medicine, dentistry, or other health profession; (b) be eligible for appointment as a commissioned officer in the Regular or Reserve Corps of the Public Health Service or be eligible for selection for civilian service in the NHSC; and (c) submit an application for a contract to participate in the NHSC Loan Repayment Program which describes the repayment of educational loans in return for the individual serving for an obligated period.

Any individual who previously incurred an obligation for health professional services to the Federal Government, a State Government, or other entity is ineligible to participate in the NHSC Loan Repayment Program unless such obligation will be completely satisfied prior to the beginning of service under this Program. Any individual who has breached an obligation for health professional service to the Federal Government, a State Government or other entity is ineligible to participate in the NHSC Loan Repayment Program. No loan repayments will be made for any professional practice performed prior to the effective date of the NHSC Loan Repayment Program contract.

Professions and Specialties Needed by the NHSC

At this time, the Secretary has determined that priority will be given to physicians who are certified or eligible to sit for the certifying examination in the specialty boards of family practice, osteopathic general practice, obstetrics/gynecology, internal medicine, and pediatrics. In addition, priority will be given to nurse midwives, physician assistants, and nurse practitioners who are certified or eligible to sit for the certifying examination in their profession.

Other Award Information

This program is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs, since Executive Order 12372 does not cover payments to individuals.

The OMB Catalog of Federal Domestic Assistance number for this program is 93.162.

Part B—Grants for State Loan Repayment Programs

DATES: Completed applications, to receive consideration, must be delivered by 5 p.m. on July 15, 1991, to the address below or postmarked by July 15, 1991, and delivered in time for orderly processing. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier. Private metered postmarks will not be acceptable as proof of timely mailing. Applications not submitted on time will be returned.

ADDRESSES: Application materials may be obtained by calling or writing, and completed applications should be returned to: Grants Management Branch, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, 12100 Parklawn Drive, Rockville, Maryland 20857, (301) 443-5902.

Application for these grants will be made on Form PHS-5161 with revised facesheet DHHS Form 424, as approved by the OMB under control number 0937-0189. Specific instructions for completing the application form for this program will be sent to any State requesting an application package.

FOR FURTHER INFORMATION CONTACT: For general program information and technical assistance, please contact Ms. Cheryl A. LaPointe, National Health Service Corps, Bureau of Health Care Delivery and Assistance, HRSA, 5600 Fishers Lane, room 7A-39, Rockville, MD 20857, (301) 443-1470.

SUPPLEMENTARY INFORMATION: Section 338I of the PHS Act (42 U.S.C. 254q-1) authorizes the Secretary, acting through the Administrator of the HRSA, to make grants to States for the purpose of assisting the States in operating programs as described in this notice for the repayment of educational loans of health professionals in return for their practice in HPSAs to increase the availability of primary health services in HPSAs.

State Loan Repayment Programs eligible for funding under this announcement must meet the following requirements:

(1) Be administered directly by a State agency.

(2) Pay all or part of the qualifying educational loans (including principal, interest and related educational loan expenses) of health professionals agreeing to provide service in HPSAs. "Qualifying loans" are government and commercial loans for actual costs paid for tuition, reasonable educational expenses, and reasonable living expenses relating to the graduate or undergraduate education of a health professional.

(3) Make assignment of participating health professionals only to public and nonprofit private entities located in and providing primary health services in HPSAs; and

(4) Have participant contracts which provide remedies for any breach of contract by participating health professionals.

Contracts provided by a State are not to be on terms that are more favorable to health professionals than the most favorable terms the Secretary is authorized to provide for contracts under the Federal NHSC Loan Repayment Program under section 338B of the PHS Act, including terms regarding:

(a) The annual amount of payments provided on behalf of the professionals regarding educational loans; and

(b) The availability of remedies for any breach of the contracts by the health professionals involved.

States are required to develop contracts that reflect a minimum of two years of obligated service. The annual amount of payments under a contract shall not exceed the maximum amount of $35,000 authorized in section 338B(g)(2)(A) unless (1) this excess amount is paid solely from non-Federal contributions, and (2) the health professional involved will satisfy the requirement of obligated service solely through the provision of primary health services in a high need HPSA authorized to receive the assignment of an NHSC Scholarship Program recipient.

No loan repayments may be made for any professional practice performed prior to the effective date of the health professional's State Loan Repayment Program contract, and no credit may be given for any practice done while the provider is in a professional school or graduate training program.

Applications must identify the State entity and key personnel who would administer the grant and describe the qualifications and experience of that entity and its personnel concerning the State's health service delivery system and health professional needs.

States seeking support under this notice for the cost of State Loan Repayment Programs must provide adequate assurances that:

(1) The State will make available (directly or through donations from public or private entities) non-Federal contributions in cash toward such costs in an amount equal to not less than $1 for each $1 of Federal funds provided in the grant. In determining the amount of non-Federal contributions in cash that a State has to provide, other Federal funds may not be used.

(2) The State will assign health professionals participating in the program only to public and nonprofit private entities located in and providing health services in HPSAs.

(3) The grant funds will not be expended to conduct activities for which Federal funds are awarded for State Primary Care Cooperative Agreements, State Primary Care Associations, and State Offices of Rural Health.

(4) Grant funds will be expended only for loan repayments to health professionals who have entered into contracts with States.

Future Support

The Secretary must determine that the State has complied with each of the agreements of the grant in order for funding to continue. Before making a grant for a subsequent year of State Loan Repayment Program support, the Secretary will, in the case of a State with 1 or more initial breaches by health professionals of the repayment contracts, reduce the amount of a grant to the State for the fiscal year involved by an amount equal to the sum of the expenditures of Federal funds made regarding the State Loan Repayment Programs contracts involved including interest on the amount of such expenditures, determined on the basis of the maximum legal rate prevailing for loans made during the time amounts were paid under the contract, as determined by the Treasurer of the United States. The Secretary may waive the reduction in the subsequent grant award if the Secretary determines that a health professional's breach was attributable solely to the professional having a serious illness.

Evaluation Criteria

The following criteria will be used to evaluate State applications to determine which States are to be supported under this notice: (a) The need of the State for health professionals consistent with the health professions and specialties identified in this notice; (b) the number and type of providers the State proposes to support through this program; (c) the appropriateness of the proposed placement of State Loan Repayment recipients (e.g., extent to which State Loan Repayment Programs propose to place individuals in HPSAs with the greatest shortages); (d) the adequacy of the qualifications and the administrative managerial ability and experience of the State staff to administer and carry out the proposed project; (e) the suitability of the applicant's approach and the degree to which the applicant's plan is coordinated with Federal, State and other programs for meeting the State's health professional needs and resources, including mechanisms for evaluation of the program's activities; (f) the source and plans for the use of the State match (including the degree to which the State's matching funds are used for loan repayment rather than the administrative costs and the degree to which the State match exceeds the minimum requirements or has increased over time and the amount of the match relative to the needs and resources of the State); and (g) the extent to which special consideration will be extended to medically underserved areas with large minority populations.

Professions and Specialties Needed

To be supported under this program, the State Loan Repayment Program must establish State priorities for the selection of health professionals, consistent with the NHSC Loan Repayment Program. At this time, the Secretary has determined that under the NHSC Loan Repayment Program priority will be given to physicians who are certified or eligible to sit for the certifying examination in the specialty boards of family practice, osteopathic general practice, obstetrics/gynecology, internal medicine, and pediatrics. In addition, priority will be given to nurse midwives, nurse practitioners, and physician assistants who are certified or eligible to sit for the certifying examination in their profession.

Other Award Information

This program is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs as implemented by 45 CFR part 100. Executive Order 12372 allows States and territories the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice will contain a listing of States which have chosen to set up a review system and

VOL
56
ISS
116
JE
17
1991
UMI

will provide a single point of contact (SPOC) in the States for that review.

Applicants (other than federally-recognized Indian tribal governments) should contact their State SPOC as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline for new and competing awards. The granting agency does not guarantee to "accommodate or explain" for State process recommendations it receives after that date. (See part 148, Intergovernmental Review of PHS Programs under Executive Order 12372 and 45 CFR part 100 for a description of the review process and requirements).

The OMB Catalog of Federal Domestic Assistance number for this program is 93.1165.

Dated: May 14, 1991.

Robert G. Harmon,

Administrator.

BILLING CODE 4160-15-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-91-3281]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Wendy Swire, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: June 11, 1991.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Single Family Mortgage Insurance on the Allegany Reservation of the Seneca Indians.
Office: Housing.
Description of the Need for the Information and its Proposed Use: This rule implements section 203(g) of the National Housing Act. The information is necessary to assure that borrowers fully realize their risks, and to document that remedies, other than assignment and foreclosure, have been exhausted.
Form Number: None.
Respondents: Individuals or Households, Businesses or Other For-Profit, and Small Businesses or Organizations.
Frequency of Submission: On Occasion.
Reporting Burden:

	Number of respondents	×	Frequency of Response	×	Hours per response	=	Burden hours
Assignment request	10		5		.55		27.5

Total Estimated Burden Hours: 27.5.
Status: Extension.
Contact: Joseph Bates, HUD, (202) 708-1672, Wendy Swire, OMB, (202) 395-6880.

Proposal: Competitive Bidding for section 202 Direct Loan Program for Elderly or Handicapped.
Office: Housing.
Description of the Need for the Information and its Proposed Use: Under section 202 of the Housing Act of 1959, competitive bidding on construction contracts is now mandatory except in certain specified instances. The procedures are similar to private competitive biddings rather than Government procurement as project owners are private entities. This information is needed to implement cost savings procedures for this direct loan program.

This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total nubmers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: June 10, 1991.

John T. Murphy,
Director Information Policy and Management Division.

Proposal: Public Housing—Contracting with Resident-Owned Businesses FR–2856.
Office: Public and Indian Housing.
Description of The Need for the Information and Its Proposed Use: Eligible resident-owned businesses must submit application information to Public Housing Agencies (PHAs) to be approved for noncompetitive contracting for work to be performed on public housing sites with an alternative to HUD's otherwise-required competitive procurement procedures.
Form Number: None.
Respondents: Individuals or Households, State or Local Governments, Non-Profit Institutions and Small Business or Organizations.
Frequency of Submission: One-Time.
Reporting Burden:

	Number of respondents	×	Frequency of response	×	House per response	=	Burden hours
Rule 963.10	500		1		16		8,000
Rule 963.12 (a)	500		2		2		2,000

Total Estimated Burden Hours: 10,000.
Status: New.
Contact: Paul Fletcher, HUD, (202) 708–4214, Landry Williams, HUD, (202) 708–4214, Wendy Swire, OMB, (202) 395–6880.

Dated: June 10, 1991.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM–921–01–4120–16;G–921–G1–210]

Establishment of Eastern Oklahoma Federal Coal Area Under Category 5

AGENCY: Bureau of Land Management, Interior.

ACTION: Notices and requests for information.

SUMMARY: This announcement gives notice that: (1) The lands within the nine (9) Oklahoma Counties of Atoka, Coal, Haskell, Latimer, LeFlore, McIntosh, Muskogee, Pittsburg, and Sequoyah have been designated by the New Mexico State Office of the Bureau of Land Management as a Federal Coal

VOL
56

1991
UMI

"Area", and that the State Director has, by his Decision, determined that said "Area" is now "Qualified" as eligible for "Category 5" royalty rate reductions in order to establish fair and competitive royalties, (2) the New Mexico State Office of the Bureau of Land Management, Minerals Division, is now accepting applications, or written notices of pending applications, for royalty reductions under "Category 5" for Federal Coal leased within the "Area", (3) the New Mexico State Office of the Bureau of Land Management is requesting that both private and Oklahoma coal industry sources apply data regarding the terms and royalties contained in private leases, (4) the New Mexico State Office of the Bureau of Land Management is calling for input from all sources regarding what the royalty rates for Federal Coal—mined by both surface and underground methods—should be, and (5) the approval date for BLM Manual 3485—Reports, Royalties, and Records, which contains the guidelines for "Category 5" Federal Coal royalty reductions, was December 17, 1990; therefore, all reduced royalties resulting from applications, or written notices of pending applications, received prior to the close of business on September 30, 1991, shall have an effective date for the reduced royalties retroactive to December 17, 1990.

DATES: Comments and/or information must be submitted, or postmarked, on or before July 17, 1991.

ADDRESSES: Comments and/or information may be mailed to the Bureau of Land Management, New Mexico State Office, Minerals Division (Mail Stop 924), P.O. Box 1449, Santa Fe, New Mexico 87504–1449.

FOR FURTHER INFORMATION CONTACT: Mr. Darwyn F. Pogue, Minerals Appraiser, Branch of Appraisals and Evaluations, Minerals Division, New Mexico State Office, Bureau of Land Management, P.O. Box 1449, Mail Stop 924, Santa Fe, New Mexico 87504–1449, Comm. Phone (505) 988–6186.

(1) Notice of the Decision by the BLM NM State Director of the Qualification for a Designated "Area" of Oklahoma Federal Coal for "Category 5" Royalty Rate Reductions, (2) Notice of Acceptance of Applications of Royalty Reduction Requests for "Category 5" Oklahoma Federal Coal, (3) Request for Data Input from Public and Industry Sources Regarding Private Coal Lease Terms and Royalties, (4) Request for Suggestions and Recommendations for Federal Coal Lease Royalties (Surface and Underground) within the Oklahoma "Area", and (5) Notice that the effective date of all approved "Category 5" royalty reductions resulting from applications, or written notices of pending applications, received no later than the close of business on September 30, 1991, shall have an effective date for the approved reduced royalty of December 17, 1990, the date of the approval of BLM Manual 3485—Reports, Royalties, and Records.

SUPPLEMENTARY INFORMATION: According to data contained in the latest Annual Report to the Governor of Oklahoma by the Oklahoma Mining Commission, Department of Mines, the nine (9) Oklahoma Counties of Atoka, Coal, Haskell, Latimer, LeFlore, McIntosh, Muskogee, Pittsburg, and Sequoyah contain approximately 80% of the known and identified coal resources of Oklahoma, as determined by the latest study of the Oklahoma Geological Survey. These same nine (9) counties also contain 100% of the known Federally owned and economically recoverable coal resources in Oklahoma. The Federally owned coal resources are "acquired minerals" contained within coal deposits that were purchased from the Choctaw and Chickasaw Native American Tribes in the late 1940's. Therefore, the New Mexico Bureau of Land Management State Director has concluded that the aforementioned nine (9) counties shall be designated as a Federal Coal Area, hereinafter referred to as the "Area", for the purposes of minerals management under the guidelines set forth in Bureau of Land Management (BLM) Manual 3485—Reports, Royalties, and Records, and in 43 CFR Part 3485.2, Royalties (Coal). BLM Manual 3485 sets forth five (5) Categories by which the holder and/or operator of a Federal Coal Lease may apply for a royalty that is less than the base royalty stated in the lease. Categories 1 through 4 refer to royalty reductions based mainly upon mining and financial criteria, or combinations thereof, that are specific to the mining operation requesting relief. Category 5, however, refers to royalty reductions granted within a designated State or Area that the BLM has concluded to have met all of the following criteria:

1. The Federal Government is not market dominant.

2. Federal royalty rates are above the current market royalty rates for non-Federal coal in the Area.

3. Federal coal would be bypassed or remain undeveloped due to royalty rate differentials.

4. The above conditions exist throughout the Area.

5. A royalty rate reduction under this Category is not likely to result in undue competitive advantages over neighboring areas.

As a result of a "Qualification Study" completed recently by the Minerals Division of the New Mexico BLM, the State Director has determined that the Area under discussion has successfully met all five (5) of the above criteria. Therefore, the State Director has issued his decision that said Area is now "Qualified" for the royalty reductions allowed under Category 5. This will allow operators and/or holders of Federal Coal leases within the Area the opportunity to obtain fair and competitive royalty rates.

Since the Area is now Qualified, the Mineral Division of the New Mexico BLM will now accept applications for royalty reduction requests under Category 5 for existing coal leases within the Area. Written notices of pending applications will also be accepted. All applications and notices of pending applications shall be directed to the New Mexico BLM Minerals Division in accordance with the guidelines set forth in BLM Manual 3485, and all required supporting documentation, etc., must be included. Any one anticipating that they will be making a royalty reduction request under Category 5 is urged to carefully read the 3485 Manual and request guidance from the Staff of the New Mexico BLM Minerals Division if there are any doubts or questions.

Now that there is an Area in Oklahoma that is Qualified for Category 5 royalty rate reductions, the New Mexico BLM Minerals' staff must now determine the proper minimum royalty rates for Federal Coal in the Area. Therefore, both the general public and those within the Oklahoma coal industry are now requested to come forth and provide information regarding the terms, conditions, and royalties that are contained in coal leases negotiated in the private coal leasing market in Oklahoma. All information received will be held as strictly confidential by the staff, and, upon request, will be returned to the provider without being copied or revealed to unauthorized persons. Actual copies of coal leases and/or contracts of surface owner agreements (in "split-estate" situations) will be the most helpful; however, any information will be welcomed. Although the information received will not be copied, etc., it will be cataloged as to terms, conditions, and royalties in such a manner as not to reveal any specific cases between specific parties. If information is available that will indicate that there are different parameters associated with single seam coal deposits than with multiple (two or more) seam coal deposits, such information will be greatly appreciated. If there is information that indicates that there are different terms, conditions, and royalties associated with coal minable by underground methods that are different from those associated with surface minable coal, this information will also be greatly appreciated.

If there are any data within the Area coal market that would tend to indicate what royalty rate, or rates, would be the most appropriate minimum rates to be assigned to Federal Coal, the New Mexico BLM is now calling for this to be made available. Again, data that indicates a difference, or lack of, between underground and surface minable coal, and single seam and multiple seam coal deposits will be welcomed.

Due to the delay in the processing of the necessary data for the preparation of the Qualification Statement, any, and all, applications, or written notices of pending applications, that are received, or post marked, prior to the close of business on September 30, 1991, that result in a royalty rate reduction shall carry the approved new royalty as if it were granted effective as of December 17, 1990, the date of approval of BLM Manual 3485, will the associated adjustments to royalties paid, if any, to be made by the Minerals Management Service.

There shall be a cut off date for when the above requested information will be considered as part of the Royalty Reduction Study of 30 days from the date of publication of this notice in the Federal Register.

All Oklahoma coal operators that are listed in the latest report of the Oklahoma Mining Commission, Department of Mines, have been mailed a copy of the above notice.

Dated: May 31, 1991.

Gil Lockwood,

Deputy State Director, Minerals Division.

Moab District Advisory Council Meeting

June 11,1991.

AGENCY: Bureau of Land Management, Interior.

ACTION: Moab District Advisory Council meeting.

SUMMARY: The Moab District Advisory Council will meet Tuesday and Wednesday, July 16 and 17, 1991. The business meeting will be held in the Conference Room of the BLM Moab District Office, 82 E. Dogwood, Moab, Utah beginning on the 16th at 10 a.m. and adjourning at 4:30 p.m., followed by a field trip on the 17th.

The agenda for the July 16 business meeting will be an orientation by program leaders and Area Managers for the newly appointed Council members, and election officers. The orientation will highlight the major program issues in the divisions of Planning and Environmental Coordination, Lands and Renewable Resources, and Minerals, and in the four Resource Areas. Also on the agenda are new business, opportunity for public comment, finalization of resolutions, and adjournment.

The July 17 field trip will depart from the Moab District Office at 8 a.m and will include a visit to areas near Moab proposed for oil and gas exploration and related issues concerning recreation, wildlife, environmental concerns, and nearness to State and National Parks. The public is welcome to tour with the group and to attend the business meeting, however, they would need to supply their own transportation and food.

All Advisory Council meetings are open to the public. Persons wishing to make a comment to the Council must notify the BLM by July 12. Depending on the number of people desiring to make a statement, a per-person time limit may be established so that all may be heard. For further information, contact: Mary Plumb, Public Affairs Officer, P.O. Box 970, Moab, Utah 84532. Phone (801) 259–6111.

Kenneth V. Rhea,

Acting District Manager.

Recreation Management Restrictions, Campbell Tract Anchorage, AK

AGENCY: Bureau of Land Management, Interior.

ACTION: Use Restriction on Public Lands.

SUMMARY: Notice is hereby given that effective July 15, 1991, animals brought into the Campbell Tract in Anchorage, Alaska must be leashed. Animals may be secured to a fixed object or under the control of a person or physically restricted. Legal descriptions and maps of the 730 acres of public land are available from the Anchorage District Office, Anchorage, Alaska.

EFFECTIVE DATES: The leash policy is effective July 15, 1991 and remains in effect indefinitely.

FOR FURTHER INFORMATION CONTACT: Jake Schlapfer, Outdoor Recreation Specialist, Anchorage District Office, 6881 Abbott Loop, Anchorage, Alaska 99507 (907) 267–1232.

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Charles McKay, Nashville, TN (PRT 756848).

The applicant requests a permit to import the sport-hunted trophy of a male bontebok (*Damaliscus dorcas dorcas*) culled from the captive herd of Michael Weinand, Longwood, Bedford, South Africa, for enhancement of propagation of the herd.

Applicant: Columbus Zoo, Powell, OH (PRT 756873).

The applicant requests a permit to import one wild-born female Asian elephant (*Elephas maximus*) from the Chipperfield Organization, Warminster, Wiltshire, England, for public display, education, and breeding purposes.

Applicant: USFWS, Regional Director, region 4, Atlanta, GA (PRT 667819).

The applicant requests amendment to their current permit to include take of no common name (*Schoepfia arenaria*), Schweinitz's sunflower (*Helianthus schweinitzii*), leafy prairie-clover (*Dalea foliosa*), silver rice rat (*Oryzomys palustris natator*), and Cumberland pigtoe (*Pleurobema gibberum*) for the purpose of scientific research and enhancement of propagation or survival of the species as prescribed by Service recovery documents.

Applicant: Gibbon & Gallinaceous Bird Center, Santa Clarita, CA (PRT 758783).

The applicant requests a permit to import three males and one female dark-handed gibbons (*Hylobates agilis unko*) from Wellington Zoological Garden, New Zealand, for captive breeding and scientific research. One male was removed from the wild, Malaysian peninsula, in 1975, the other two males and one female were captive-born.

Applicant: William Seagar, U.S. Army Chemical Research, Development & Engineering Center, Aberdeen Proving Ground, MD (PRT 675790).

The applicant requests renewal of their permit to take (capture for blood sampling, radio tagging, banding/marking, and salvage) American peregrine falcons (*Falco peregrinus anatum*) and Arctic peregrine falcons (*F. p. tundrius*) throughout the conterminous United States for the purpose of scientific research and enhancement of propagation and survival of these species.

Applicant: Robert L. Gelles, Fairfax Station, VA (PRT 758465).

The applicant requests a permit to import the sport-hunted trophy of a male bontebok (*Damaliscus dorcas dorcas*) culled from the captive herd maintained by H.v.Z. Kock, Verborgenfontein Game Ranch, Merriman, South Africa, for enhancement of propagation of the species.

Applicant: U.S. Fish and Wildlife Service, National Ecology Research Center, Fort Collins, CO (PRT 720136).

The applicant requests renewal of their permit to take (harass, anesthetize, capture, weight, measure, photograph, examine, radio-tag, and monitor) black-footed ferrets (*Mustela nigripes*) and salvage dead black-footed ferrets and parts thereof, for purposes of scientific research and enhancement of propagation and survival. Applicant has also requested amendment to release captive ferrets into the wild for the reintroduction program and may recapture released ferrets. Activities may be conducted in the following States: CO, KS, MT, NE, NM, ND, OK, WY, SD, TX, UT, & AZ.

Applicant: The Peregrine Fund, Inc., Boise, ID (PRT 756778).

The applicant requests a permit to import one wild-caught female Harpy eagle (*Harpia harpyja*) from The Propagation Center for Panamanian Endangered Species, Panama, for captive propagation purposes.

Applicant: The Peregrine Fund, Inc., Boise, ID (PRT 756017).

The applicant requests a permit to export up to 20 captive-hatched Mauritius kestrels (*Falco punctatus*) to Mauritius Wildlife Appeal Fund, Port Louis, Mauritius, for release purposes.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45–4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone (703/358–2104); FAX (703/358–2281).

Dated: June 11, 1991.

Maggie Tieger,

Acting Chief, Branch of Permits, Office of Management Authority.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31092]

American European Express, Inc.—Operation Exemption—Between Chicago, IL, and New York, NY; Exemption

American European Express, Inc. (AEE), filed a notice of exemption to operate as a Class III rail carrier of passengers over approximately 1,020 miles of track between Chicago, IL, and New York, NY, via Indianapolis, IN, White Sulphur Springs, WV, Washington, DC, Baltimore, MD, Wilmington, DE, and Philadelphia, PA.

Between Chicago and Washington, under an agreement between AEE and CSX Transportation, Inc. (CSX), AEE's passenger cars are to be pulled by engines operated by CSX over tracks it owns or is authorized to operate. Between Washington and New York, under an agreement between CSX and the National Railroad Passenger Corporation (Amtrak), AEE's cars are to be pulled attached to regularly scheduled Amtrak passenger trains. The transaction already has been consummated. AEE had previously operated as an adjunct of Amtrak. It has now expanded into operating its own trains, between certain points, not in conjunction with Amtrak or any other rail carrier.

Any comments must be filed with the Commission and served on: Robert E. Stigger, Portes, Sharp, Herbst & Fox, Ltd., 333 West Wacker Drive, suite 500, Chicago, IL 60606.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

Dated: June 11, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 91-14349 Filed 6-14-91; 8:45 am]

BILLING CODE 7035-01-M

[Finance Docket No. 31283 (Sub-No. 1)]

Norfolk Southern Railway Company—Trackage Rights Exemption—Norfolk and Western Railway Company; Exemption

Norfolk and Western Railway Company (NW) has agreed to grant unrestricted trackage rights to its wholly owned subsidiary, Norfolk Southern Railway Company (NS), formerly known as Southern Railway Company, over a 63-mile line of railroad between milepost H–63, at Front Royal, VA, and milepost H–0, at Hagerstown, MD. NW is a class I railroad controlled through stock ownership by Norfolk Southern Corporation (NSC), a non-carrier holding company. NS and its rail carrier subsidiaries operate a rail system extending throughout the Southeast and Midwest.

NW had previously granted NS overhead trackage rights on this line. See Finance Docket No. 31283, Southern Railway Company—Trackage Rights Exemption—Norfolk and Western Railway Company (not printed), served June 16, 1988, and published in the **Federal Register** (53 FR 24155) on June 27, 1988. The purpose of this exemption is to remove any restriction on the trackage rights granted to NS. The trackage rights became effective April 23, 1991.

This notice is filed under 49 CFR 1180.2(d) (3) and (7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Nancy S. Fleischman, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510–2191.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected pursuant to Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Dated: June 10, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

[Finance Docket No. 31875] [1]

Consolidated Rail Corp.—Merger—Monongahela Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision accepting application for consideration.

SUMMARY: The Commission is accepting for consideration the application filed May 17, 1991, by Consolidated Rail Corporation and Monongahela Railway Company (MGA) (collectively applicants). The application is filed under 49 U.S.C. 11343, *et seq.*, for MGA to merge into Conrail. The application also seeks approval: (1) In (Sub-No. 1) to assume MGA's position as lessee of the Waynesburg Southern Railway (WSRR) properties; and (2) in (Sub-No. 2) to assume MGA's position as lessee of a certain CSX Transportation rail line. The Commission finds this to be a minor transaction.

DATES: Written comments must be filed with the Interstate Commerce Commission no later than July 17, 1991, and concurrently served on applicants' representatives, the United States Secretary of Transportation, and the Attorney General of the United States. Comments from the Secretary of Transportation and Attorney General of the United States must be filed by August 1, 1991. The Commission will issue a service list shortly thereafter. Parties must serve comments on all parties of record within 10 days of the Commission's issuance of a service list. The parties must also file a certificate of service with the Commission, indicating that all designated individuals and organizations on the service list in this proceeding have been properly served. Applicants' reply is due August 26, 1991.

ADDRESSES: Send an original and 10 copies of all documents to: Office of the Secretary, Case Control Branch, Attn: Finance Docket No. 31875, Interstate Commerce Commission, Washington, DC 20423. In addition, concurrently send one copy of all documents to the United States Secretary of Transportation, the Attorney General of the United States, and applicants' representatives:

Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, room 8201, 400 Seventh Street, SW, Washington, DC 20590.

Attorney General of the United States, United States Department of Justice, 10th & Constitution Avenue, NW, Washington, DC 20530.

Constance L. Abrams, Anne E. Treadway, Consolidated Rail Corporation, 1138 Six Penn Center, Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 275-7245 [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Conrail and MGA filed an application on May 17, 1991, for MGA to merge into Conrail. The application in Finance Docket No. 31875 is filed under 49 U.S.C. 11343, *et seq.*. The application also seeks approval: (1) In Sub-No. 1 to assume MGA's position as lessee of the Waynesburg Southern Railway properties; and (2) in Sub-No. 2 to assume MGA's position as lessee of a certain CSX Transportation (CSXT) rail line. Applicants state that this is a minor transaction under 49 CFR 1180.2(c) and our decision in Finance Docket No. 31630, Consolidated Rail Corporation—Control—Monongahela Railway Company (not printed), served August 16, 1990 (*MGA Control*).

Conrail is a Class I rail carrier and MGA is a Class II rail carrier (revenues were $43.5 million in 1990). Conrail holds all of MGA's stock. Conrail obtained Commission authority to control MGA's stock in *MGA Control* where the Commission approved the acquisition of Pittsburgh & Lake Erie's (P&LE) and CSXT's MGA stock. As a result of transactions approved in that case, Conrail now holds 100 percent of the capital stock of MGA and is the sole guarantor of the WSRR bonds.

MGA operates 162 route miles in West Virginia and southwestern Pennsylvania and handles almost exclusively coal traffic. MGA consists of two branches that meet at Brownsville, PA. The West Division runs west from Brownsville across the Monongahela River to West Brownsville and then generally southwest, terminating 55 miles from Brownsville at Blackville, WV. Part of this division is Conrail-owned. The first 13.5 miles, from Brownsville to Besco, PA, is owned by Conrail but MGA operates on trackage rights under a 1927 agreement. (The agreement will terminate by virtue of merger.) The next 15.1 miles of track, from Besco to Waynesburg, are owned by MGA. The last 27 miles were formerly owned by the WSRR and are leased to MGA until 1998. The WSRR's assets were conveyed to Conrail in the Final System Plan. I United States Railway Association, Final System Plan 228 and n. 13 (1975).

The West Division also connects with the "Manor Spur," constructed and owned by Consol Pennsylvania Coal Company (CPCC) to reach its Bailey Mine. The MGA operates the Manor Spur under a contract with CPCC.

The other MGA branch, the East Division, runs from Brownsville, south along the Monongahela River, and terminates at Fairview (also called Loveridge), a length of 79 miles. CSXT owns the first 5.2 miles of a branch line from Catawba Junction to Grant Town on which MGA holds a 99 year lease. The segment from Grant Town to Loveridge is owned by MGA.

CSXT connects with MGA near the south end of the East Division at Rivesville, WV; Pittsburgh & Lake Erie (P&LE) connects with MGA at Brownsville Junction, PA, on the north end of the East Division; and Conrail connects with MGA on the north end of the West Division at West Brownsville, PA.

In the Sub-No. 1 proceeding, Conrail seeks to assume MGA's position as lessee under a lease between MGA and WSRR. The Waynesburg Southern Branch was the only line of the WSRR, a wholly-owned corporate subsidiary of Penn Central Company (PC). To finance construction, WSRR issued $20 million, 7¼ percent First Mortgage Bonds, due September 1, 1993. The bonds were guaranteed by the then-owners (PC, P&LE, and the Baltimore & Ohio Railroad [B&O]), and the WSRR line was leased to the MGA for a 30 year term to August 31, 1998.[2]

In the Sub-No. 2 proceeding, Conrail seeks to assume MGA's position as lessee for a 5.2 mile line from CSXT (formerly B&O). In 1927, MGA leased a new rail line from B&O between Catawba Junction and Grant Town, where a new mine was opened. The lease term is 99 years, with an MGA option to extend the lease for an indefinite number of 99 year terms.

Applicants contend that the proposed transaction will not substantially reduce competition, create a monopoly, or restrain trade in freight surface transportation in any region of the United States. According to applicants, they expect to gain significant operating efficiencies by merging. They anticipate they will accomplish these efficiencies by: (1) Removing the current MGA-Conrail interchange at West Brownsville on traffic to/from Conrail and moving the crew change point to Waynesburg to maximize the road train mileage; (2) consolidating maintenance-of-way and

[1] This proceeding also embraces Finance Docket No. 31875 (Sub-No. 1), Consolidated Rail Corporation—Lease Assumption—Waynesburg Southern Railway Properties (Sub-No. 1); and Finance Docket No. 31875 (Sub-No. 2), Consolidated Rail Corporation—Lease Assumption—CSX Transportation Rail Line (Sub-No. 2).

[2] Conrail is now the sole guarantor of the WSRR as a result of the approval in the MGA Control case.

clerical functions; (3) centralizing the train and crew dispatching functions; (4) modernizing the MGA's maintenance-of-way equipment; and (5) constructing or rehabilitating certain lines to improve capacity and speed operations.

Applicants allege that a merger will not lessen competition. Since MGA is almost exclusively a coal-hauling railroad with over 80 percent of its traffic interchanged to Conrail, applicants state that MGA and Conrail do not compete for traffic. Applicants submit that the remaining traffic is interchanged to P&LE and CSXT, which will continue to possess the same contractual interchange rights as they negotiated in their stock purchase agreements. Conrail's stock purchase agreement with P&LE provided that P&LE would continue to enjoy interchange rights with MGA on a nondiscriminatory basis. Applicants state that P&LE is protected since this provision was made a part of the MGA Control decision.

Applicants contend that CSXT is protected since, under Conrail's stock purchase agreement with CSXT, Conrail agreed to maintain its contract revenue needs at certain specified levels for eight years. After that, new levels will be established "which shall not preclude CSXT from competing, to the extent it otherwise could, in the markets for MGA coal * * *."

Applicants contend that the same competitive analysis found in MGA Control should apply here because there will be no net reduction in competition—the mines served by one carrier (MGA) will continue to be served by one carrier (Conrail). Applicants also state that no adverse consequences will befall MGA's connections, P&LE, or CSXT or their connections (such as Bessemer and Lake Erie) because those carriers will be protected to the same degree as when Conrail was acquiring control of MGA.

Applicants allege that merger will allow better customer service because customers can deal with one carrier, not two, and the customers can realize the benefits from cost reductions resulting from a more efficient system. Applicants contend that a merger will allow Conrail to compete with its coal-hauling competitors, Norfolk Southern Railway and CSXT.

Applicants state that about 50 positions (basic and seasonal) would be eliminated. If merger approval is granted, any employees affected by the transaction will be protected by the conditions set forth in *New York Dock Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979), *aff'd sub nom. New York Dock Ry.* v. *U.S.*, 609 F.2d 83 (2d Cir. 1979).

Under 49 CFR 1180.4(b)(2)(iv), we must determine whether a proposed transaction is major, significant, minor, or exempt. The proposal involves a Class I (Conrail) and a Class II (MGA) rail carrier. The proposal has no regional or national significance and will not result in a major market extension. As noted, *supra*, MGA interchanges more than 80 percent of its traffic with Conrail and the other connecting carriers are protected by commercial agreements. *See also MGA Control* decision served April 25, 1990. Accordingly, we find the proposal to be a minor transaction under 49 CFR 1180.2(c). Since the application substantially complies with the applicable regulations governing minor transactions, we are accepting it for consideration.

The application and exhibits are available for inspection in the Public Docket Room at the Offices of the Interstate Commerce Commission in Washington, DC. In addition, they may be obtained upon request from applicants' representatives named above.

Any interested persons, including government entities, may participate in this proceeding by submitting written comments. Any person who files timely written comments shall be considered a party of record if the person's comments so request. In this event, no petition for leave to intervene need be filed.

Consistent with 49 CFR 1180.4(d)(1)(iii), written comments must contain:

(a) The docket number and title of the proceeding;

(b) The name, address, and telephone number of the commenting party and its representative for service;

(c) The commenting party's position; *i.e.*, whether it supports or opposes the proposed transaction;

(d) A statement of whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

(e) If desired, a request for an oral hearing with reasons supporting this request; the request must indicate the disputed material facts that can only be resolved at a hearing; and

(f) A list of all information sought to be discovered from applicant carriers.

Because we have determined that this proposal is a minor transaction, no responsive applications will be permitted. The time limits for processing a minor transaction are set forth at 49 U.S.C. 11345(d).

Discovery may begin immediately. We admonish the parties to resolve all discovery matters expeditiously and amicably.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. The application in Finance Docket No. 31875 and Finance Docket No. 31875 (Sub-Nos. 1 and 2) is accepted for consideration as a minor transaction under 49 CFR 1180.2(c).

2. The parties shall comply with all provisions stated above.

3. This decision is effective on June 17, 1991.

Decided: June 11, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.,
Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Consent Judgment in Action to Enjoin Violations of the Clean Air Act; Hussmann Corp.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that in *United States* v. *Hussmann Corp.*, (E.D. Mo.), Civil Action No. 90-1174C(1) an Order and a Consent Decree was lodged with the United States District Court for the Eastern District of Missouri on April 10, 1991. The Order provides for interim compliance measures, an environmental audit, penalties, and a procedure for either a revision of the Missouri State Implementation Plan or a plant process change. The Consent Decree requires Hussmann Corp. to comply with the federally enforceable site specific Missouri State Implementation Plan ("SIP") for its Bridgeton facility.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the Order and/or the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States* v. *Hussmann Corporation*, D.O.J. Ref. No. 90-5-2-1-1255.

The proposed Consent Decree and the Order may be examined at the Offices of the United States Attorney, Eastern District of Missouri, 1114 Market Street, St. Louis, Missouri; at the Region VII Office of the Environmental Protection

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to CERCLA in United States v. Iowa Electric Light & Power Co.

In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act, as amended, 42 U.S.C. 9622(i) ("CERCLA"), and Departmental policy at 28 CFR 50.7, notice is hereby given that on May 24, 1991, a proposed Consent Decree in *United States* v. *Iowa Electric Light & Power Company*, Civil Action No. 4-91-80313 was lodged with the United States District Court for the Southern District of Iowa, Central Division.

The complaint in this action was filed on May 24, 1991, against Iowa Electric Light & Power Company under sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607, seeking injunctive relief and reimbursement of costs incurred by the United States in responding to the release or threat of release of hazardous substances from the Site, which consists of a Fairfield Coal Gasification Plant in Fairfield, Iowa. The proposed Consent Decree requires Iowa Electric Light & Power to finance and perform certain remedial action, maintenance and monitoring activities at the Site.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Iowa Electric Light & Power Company*, Department of Justice #90-11-2-631.

The proposed Consent Decree may be examined at the office of the United States Attorney, Southern District of Iowa, Central Division, 115 U.S. Courthouse, East First and Walnut Streets, Des Moines, Iowa 50309, and the United States Environmental Protection Agency, region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101. Copies of the proposed Consent Decree may be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004 (202-347-2072). A copy of the proposed Consent Decree can be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Box 1097, Washington, DC 20004. When requesting a copy, please refer to *United States* v. *Iowa Electric Light & Power Company*, DOJ #90-11-2-631, and enclose a check in the amount of $17.50 ($.25/page) payable to "Treasurer of the United States."

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on June 4, 1991, a proposed Consent Decree in *United States* v. *Peirce, et. al.*, No. 83-CV-1623, was lodged with the United States District Court for the Northern District of New York. The complaint in this action was filed pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9601 *et seq.*, to recover costs incurred by the Environmental Protection Agency ("EPA") in taking response actions at the York Oil Superfund Site located in Moira, Franklin County, New York ("Site").

The proposed Consent Decree embodies an agreement by defendant Aluminum Company of America ("Alcoa") to design and implement a phase I remedy selected by EPA for the cleanup of a hazardous waste lagoon area located on the Site. The cost of this remedial work is expected to be approximately $7 million. In addition, Alcoa has agreed to perform the subsequent operation and maintenance for this remedial work, which is estimated to cost approximately $500,000. Alcoa has also agreed to reimburse EPA for 30% of its periodic review and oversight costs up to a total of $175,000.

The Decree is a mixed funding decree, as it also contains an agreement by the EPA Hazardous Substances Superfund to contribute the lesser of $3,370,000 or 46% of the reasonable and necessary costs of the remedial work.

The Consent Decree also includes an agreement by certain federal facilities which contributed waste to the Site, the Department of the Army and the Department of the Air Force, to pay $1,875,000 into the York Oil Trust Fund, to be applied toward the cost of this cleanup.

With respect to the recovery of past costs, the Consent Decree requires Alcoa to reimburse EPA for $795,000 of the costs already incurred by EPA. The federal facilities have agreed to reimburse EPA in the amount of $636,846.98 for EPA's past costs. Thus, the settlors will reimburse EPA for $1,431,846.98, or approximately 50%, of EPA's approximately $2.9 million in past costs for the phase I work at the Site.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Peirce, et. al.*, D.O.J. Ref. 90-5-2-1-585.

The proposed Consent Decree may be examined at the region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York, 10278, at the office of the United States Attorney, Federal Building and Courthouse, 15 Henry Street, Binghamton, New York 19301, and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004 (202-347-2072).

A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Box 1097, Washington, DC 20004. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $47.75 (25 cents per page reproduction cost) for the Consent Decree and all attachments or in the amount of $18.50 for the Consent Decree without attachments.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act; Savage Enterprises et al.

In accordance with Departmental policy at 28 CFR 50.7, notice is hereby given that on May 30, 1991, a proposed consent decree in *United States* v. *Savage Enterprises, Inc. et al.*, Civil Action No. C89-1283Z, was lodged with the United States District Court for the Western District of Washington. The complaint, as amended, alleged violations by defendants Savage Enterprises, Inc., James Savage, and James Walsh of section 112 of the Clean Air Act, 42 U.S.C. 7412, and various work practice standards in the National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos, at 40 CFR part 61, subpart M. The complaint sought injunctive relief and civil penalties for past violations. The proposed consent decree settles the case with respect to Savage Enterprises, Inc. and James Savage by imposing a total civil penalty of $5,000 as well as certain injunctive relief. The case against defendant James Walsh is still ongoing since Mr. Walsh has declined to enter into the proposed consent decree.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Savage Enterprises, Inc. et al.*, Department of Justice reference number 90-5-2-1-1306.

The proposed consent decree may be examined at the office of the U.S. Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101 and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Washington DC 20004, (202) 347-2072. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $2.25 (25 cents per page reproduction costs) payable to "Consent Decree Library." When requesting a copy, please refer to *United States* v. *Savage Enterprises, Inc.*, Depatment of Justice 90-5-2-1-1306.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 91-14314 Filed 6-14-91; 8:45 am]

BILLING CODE 4410-10-M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act and the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on June 7, 1991, a proposed consent decree in *United States* v. *City of San Jose, California, and A.J. Raisch Paving Co.*, Civil Action No. C91-20337-JW, was lodged with the United States District Court for the Northern District of California. The Complaint filed by the United States alleges that the defendants arranged for the transportation or disposal of hazardous substances in the construction of a ring levee located in Alviso, California (the facility); that there have been releases of hazardous substances into the environment from the facility, which releases have caused the United States to incur response costs; and that there is or may be an imminent and substantial endangerment to the public health, welfare, or the environment because of the actual or threatened releases. The complaint seeks injunctive relief to require the defendants to abate and remedy the imminent and substantial endangerment and the effects of the actual or threatened releases from the facility. The complaint further seeks the reimbursement of past costs which were incurred by the United States in responding to the actual or threatened releases. The consent decree requires the defendants to implement fully the remedy selected by the Environmental Protection Agency as set forth in the Agency's Record of Decision, as amended, and to pay the United States $736,023.00 in reimbursement for past costs.

In addition, the complaint states a cause of action against the City of San Jose under Sections 301, 309, and 404 of the Clean Water Act, 33 U.S.C. 1301, 1309, and 1344, for constructing the ring levee in wetlands without a permit. The consent decree requires the City to perform work to restore wetlands and to mitigate for their temporal loss.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Chief, Environmental Enforcement Section, Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044-7611, and should refer to *United States* v. *City of San Jose and A.J. Raisch Paving Co.*, D.J. Ref. 90-11-2-353.

The proposed consent decree may be examined at the office of the United States Attorney, Northern District of California, 450 Golden Gate Avenue, San Francisco, California, and at the Region IX office of the Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California.

Copies of the proposed consent decree may also be examined at the Environmental Enforcement Section Document Center, 1333 F Street, NW., Suite 600, Washington, DC 20004, 202-347-7829. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $40.50 for the decree plus its attachments (25 cents per page reproduction costs) payable to Aspen Systems Corporation. When requesting a copy, please refer to *United States* v. *City of San Jose and A.J. Raisch Paving Co.*, D.J. Ref. 90-11-2-353.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Applications of Advanced Technologies; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Applications of Advanced Technologies, Education and Human Resources.

Date and Time: June 28 and 29, 1991, from 6 p.m. to 9 p.m. on Friday and from 8:30 a.m. to 4 p.m. on Saturday.

Place: State Plaza Hotel, 2117 E Street, NW., Ambassador Room Washington, DC 20037.

Type of Meeting: Closed.

Contact Person: Dr. Andrew R. Molnar, Program Director, Applications for Advanced Technologies, room 635, Washington, DC 20550, Phone (202) 357-7064.

Purpose of Meeting: To provide advice and recommendations concerning support for research.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b (c), Government in the Sunshine Act.

Dated: June 11, 1991.

M. Rebecca Winkler,
Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Application for License to Export a Utilization Facility

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following application for an export license. A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 2120 L Street, NW., Washington, DC.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the Federal Register. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

In its review of the application for a license to export a utilization facility as defined in 10 CFR part 110 and noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility to be exported. The information concerning this application follows.

NRC EXPORT LICENSE APPLICATION

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Cost Accounting Standard 412, Cost Accounting Standard for Composition and Measurement of Pension Cost

ACTION: Notice.

SUMMARY: The Office of Federal Procurement Policy, Cost Accounting Standards Board (CASB), invites public comments concerning a Staff Discussion Paper on the topic of accounting for unfunded pension costs.

DATES: Requests for copies of the Staff Discussion Paper should be received by August 16, 1991.

ADDRESSES: Requests for a copy of the staff discussion paper or comments upon its contents should be addressed to Mr. Robert Lynch, Project Director, Cost Accounting Standards Board, Office of Federal Procurement Policy, 725 17th Street, NW., room 9001, Washington, DC 20503. Attn: CASB Docket No. 91-02.

FOR FURTHER INFORMATION CONTACT: Robert Lynch, Project Director, Cost Accounting Standards Board (telephone: 202-395-3254).

SUPPLEMENTARY INFORMATION: The Office of Federal Procurement Policy, Cost Accounting Standards Board, is releasing a Staff Discussion Paper of a proposed revision to Cost Accounting Standard 412 with respect to the measurement and assignment of the costs of unfunded pension plans to Government contracts. Section 26(g)(1) of the Office of Federal Procurement Policy Act, 41 U.S.C. 422(g)(1), requires that the Board, prior to the promulgation of any new or revised Cost Accounting Standard, consult with interested persons concerning the advantages, disadvantages and improvements anticipated in the pricing and administration of Government contracts as a result of the adoption of a proposed Standard. The purpose of the Staff Discussion Paper is to solicit public views with respect to the Board's consideration of the topic of accounting for unfunded pension plans. The Staff Discussion Paper has not been formally approved by the Board. It reflects research accomplished to date by the staff in the respective subject areas.

Dated: May 28, 1991.

Allan V. Burman,
Administrator for Federal Procurement Policy and Chairman, Cost Accounting Standards Board.

BILLING CODE 3110-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-18186; 811-3419]

National Cash Reserves, Inc.; Application for Deregistration

June 7, 1991.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: National Cash Reserves, Inc. ("NCR").

RELEVANT 1940 ACT SECTIONS: Section 8(f) and rule 8f-1 thereunder.

SUMMARY OF APPLICATION: Applicant seeks and order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on March 28, 1991 and amended on May 22, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders as hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 1, 1991, and should be accompanied by proof of service on the Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who which to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, c/o Lisa Hurley, National Securities & Research Corporation, Two Pickwick Plaza, Greenwich, CT 06830.

FOR FURTHER INFORMATION CONTACT: Marc Duffy, Staff Attorney, (202) 272-2511, or Max Berueffy, Branch Chief, (202) 272-3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. NCR is a diversified open-end management company incorporated under the laws of Maryland. On March 16, 1982, NCR registered under the Act. On this same date, NCR filed a registration statement registering an indefinite number of shares. The registration statement became effective on April 27, 1982, and the initial public offering commenced immediately thereafter.

2. On September 13, 1990 the Board of Director of NCR approved an Agreement and Plan of Reorganization (the "Plan") under which all of the assets and liabilities of NCR would be transferred to the Prime Cash Series Portfolio (the "Portfolio") of the Cash Trust Series, a registered investment company (File No. 811-5843).

3. On January 18, 1991 NCR held a special meeting of shareholders (the "Special Meeting") to vote on the Plan. A majority of NCR's shareholders approved the Plan. Proxy materials relating to the Plan were mailed to shareholders on or about December 12, 1990 and filed with the SEC on or about December 17, 1990.

4. Pursuant to the Plan, on January 25, 1991, (the "Closing Date") NCR transferred to the Portfolio all of its assets. In return the Portfolio assumed all of the obligations and liabilities of NRC and delivered to NCR a number of full and fractional shares of beneficial interest of the Portfolio having an aggregate net asset value equal to the aggregate net asset value of the assets of NCR. NCR distributed the Portfolio shares received by it to its shareholders pro rata in complete liquidation of NCR.

5. As of December 6, 1990 (the record date for determined of shareholders entitled to vote at the Special Meeting), NCR had 43,361,600 shares outstanding, with an aggregate net asset value of $43,361,600 and a per share net asset value of $1.00.

6. Federated Advisers, the investment adviser for the Portfolio, assumed all the costs of the reorganization.

7. At the time of filing of the application, NCR had not shareholders, assets or liabilities. All of NRC's required N-SAR filings have been made. NCR its not a party to any litigation or administrative proceedings. NCR is not engaged, and does not propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,
Deputy Secretary.

[FR Doc. 91-14251 Filed 6-14-91; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 35-25329]

Filings Under the Public Utility Holding Company Act of 1935

June 7, 1991.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by July 1, 1991, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing,

VOL 56 ISS 116 JE 17 1991 UMI

if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Northeast Utilities, et al. (70-7767)

Northeast Utilities ("Northeast"), 174 Brush Hill Avenue, West Springfield, Massachusetts 01090-0010, a registered holding company, its service company subsidiary, Northeast Utilities Service Company ("NUSCO"), 107 Selden Street, Berlin, Connecticut 06037-0218, and its electric public-utility subsidiaries, Yankee Atomic Electric Company ("YAEC"), 580 Main Street, Bolton, Massachusetts 01740, and Connecticut Light & Power Company, 107 Selden Street, Berlin, Connecticut 06037-0218 (collectively, "Applicants"), have filed an application-declaration under sections 6(a), 7, 9(a), 10, 12(b), 13(b) and 13(f) of the Act and rules 45, 86 through 91, and 93 through 95 thereunder.

Northeast proposes to form and capitalize North Atlantic Energy Service Corporation ("NAESCO"), as a new, wholly owned electric utility company and service company subsidiary that will assume operating responsibility for the Seabrook Nuclear Power Plant ("Seabrook") on behalf of Seabrook's joint owners ("Joint Owners"), including CLAP.[1] NAESCO proposes to issue and sell, and Northeast proposes to acquire, up to 1,000 shares of NAESCO's authorized but unissued common stock, $1.00 par value per share, for an aggregated purchase price of $10,000.

NAESCO, acting as agent of the Joint Owners, will assume from PSNH its rights and obligations under various contracts entered into on behalf of the Joint Owners with respect to the management, operation and maintenance of Seabrook. NAESCO will provide such services to the Joint Owners under a Managing Agent Operating Agreement ("Managing Agent Agreement"), a Disbursing Agent Agreement ("Disbursing Agreement") and a presently existing Agreement for Joint Ownership, Construction and Operation of New Hampshire Nuclear Units ("Owners Agreement"). The principal terms of the Managing Agent Agreement and the Disbursing Agreement and certain proposed modifications to the present Owners Agreement are contained in a July 10, 1990 agreement ("July Agreement") among NUSCO, acting on behalf of NAESCO, and certain other Joint Owners, including CLAP and PSNH. The July Agreement grants NAESCO the authority to assume responsibility for operating Unit 1 and for supervising the disposition of Unit 2, once all necessary regulatory approvals are obtained, regardless of whether Northeast acquires PSNH.

Under the Disbursing Agreement, NAESCO will assume the duties performed by YAEC as disbursing agent for Seabrook, including maintaining an escrow account(s) for funds paid by the Joint Owners to NAESCO for its Seabrook expenses.

The July Agreement and the Managing Agent Agreement also give NAESCO the authority to appoint or retain a service company or agent with which it is affiliated to perform certain of its responsibilities under the Managing Agent Agreement and Owners Agreement, subject to the approval of at least three nonaffiliated Joint Owners with an aggregate ownership interest in Seabrook of at least sixty percent. NAESCO intends to enter into service contracts with: (1) NUSCO for certain administrative, general and technical services; (2) YAEC for engineering and technical functions it now provides under an existing contract with PSNH; and (3) PSNH, if and to the extent requested by NAESCO, for an initial term of up to two years, with certain limited services including accounting, computer, transmission and maintenance services, all such services to be performed at cost by NUSCO, YAEC and PSNH. Under the YAEC service contract, the Joint Owners, including CLAP, will be required to enter into certain indemnification agreements under the YAEC service contract.

The Applicants request authority to consummate the proposed transactions within one year from the date of the Commission's order approving such transactions.

The Columbia Gas System, Inc. (70-7854)

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, and Columbia Gas Development Corporation ("Development"), 777 South Post Oak Lane, suite 181, Houston, Texas 77057, Columbia Natural Resources, Inc. ("Resources"), 1700 MacCorkle Avenue SE., Charleston, West Virginia 25314, Columbia Gas Development of Canada, Ltd. ("Columbia Canada"), 1600 Standard Life Building, 639 Fifth Avenue SW., Calgary, Alberta, Canada T2P 0M9 (collectively, "Production Subsidiaries"), each a wholly-owned nonutility subsidiary company of Columbia, have filed an application-declaration under sections 6(a), 7, 9(a) and 10 of the Act and rule 50(a)(5) thereunder.

Columbia proposes to create a new subsidiary holding company ("Newco") through a tax-free exchange ("Exchange") of: (1) All the common stock of the Production Subsidiaries, then $10 par value per share,[2] owned by Columbia for up to 50 million shares of Newco common stock, $5 par value per share; and (2) installment promissory notes evidencing all the debt of Development and Resources owed to Columbia as of the date of the Exchange for up to $500 million of Newco installment promissory notes ("Notes"). The Notes will be unsecured, will be dated on the issuance date, will carry a thirty-year term, and will have similar provisions as the notes authorized to be issued by the Production Subsidiaries to Columbia by order dated on December 18, 1989 (HCAR No. 25001) (the "December 1989 Order"). The interest rate on the Notes will approximate the effective cost of money to Columbia with respect to its most recent issuance of long-term debt (currently 9.92%).

Columbia proposes to finance Newco through an initial public offering ("IPO") of approximately 25%, but in no event more than 11 million additional shares of Newco common stock outstanding after the IPO. The approximately $200 million in proceeds anticipated from the IPO will be used by Newco to finance the business of the Production Subsidiaries. Columbia requests that Newco's sale of up to 11 million additional shares of common stock to the public be excepted from the competitive bidding requirements of Rule 50 pursuant to subsection (a)(5) thereunder.

The Production Subsidiaries were granted authority by the December 1989 Order to issue common stock and debt aggregating $248,275,000 in proceeds prior to December 31, 1991. Columbia proposes that Newco be authorized to acquire all the common stock and notes issued by the Production Subsidiaries to Columbia as of the date of the Exchange and, to the extent authorization under the December 1989 Order remains unused, after the date of the Exchange but prior to December 31, 1991.

Additionally, to the extent that the IPO proceeds are insufficient to fund the needs of the Production Subsidiaries, Columbia proposes to provide additional funds to Newco to fund the post-Exchange needs of the Production Subsidiaries through December 31, 1991, in an amount not to exceed the current debt authorized to be issued by the Production Subsidiaries to Columbia by the December 1989 Order. Such borrowings will be evidenced by the issuance of notes by Newco to Columbia.

The Production Subsidiaries are currently authorized to issue notes prior to December 31, 1991 which, if issued, will bring total notes issued to approximately $344 million. The authorization for Newco to issue up to $500 million of debt in exchange for the Production Subsidiaries' debt assumes that the Production Subsidiaries will apply for, and be granted, further authorization to issue additional debt prior to June 30, 1993 in excess of the approximately $344 million currently authorized. The debt to be issued by Newco in exchange for Production Subsidiary debt will not exceed the outstanding debt of the Production Subsidiaries, as previously authorized or to be authorized by the Commission.

Columbia will derive funds necessary to purchase Newco common stock and notes through the issuance of medium-term notes, debentures and commercial paper, and through short-term borrowings or subordinated borrowings under various credit agreements, as previously authorized by the Commission.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-14252 Filed 6-14-91; 8:45 am]

BILLING CODE 8010-01-M

[1] Seabrook, a two unit nuclear facility ("Unit 1" and "Unit 2"), is operated by Public Service Company of New Hampshire ("PSNH"), a 35.6% Joint Owner of Seabrook. Northeast was authorized, in relevant part, to acquire PSNH, including its Seabrook interest. (HCAR Nos. 23821 and 25573 (Dec. 21, 1990 and Mar. 15, 1991, respectively). NAESCO will assume operating responsibility for Seabrook from PSNH but will not own Seabrook or be entitled to its capacity or energy. NAESCO's only associate company customers will be North Atlantic Energy Corporation, a to-be-formed electric utility subsidiary of Northeast that will own PSNH's Seabrook interest, and CLAP, an approximately 4% owner of Seabrook.

[2] Columbia states that, prior to the reorganization, it intends to recapitalize the Production Subsidiaries by reducing the par value of their authorized common stock from $25 to $10 per share.

DEPARTMENT OF STATE

[Public Notice 1413]

Shipping Coordinating Committee, Subcommittee on Safety of Navigation; Meeting

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:30 a.m. on Wednesday, July 3, 1991, in room 8334 at Department of Transportation Headquarters, 400 Seventh Street, SW., Washington, DC.

The purpose of the meeting is to prepare for the 37th session of the Subcommittee on Safety of Navigation of the International Maritime Organization (IMO) which is scheduled for September 23–27, 1991, at the IMO Headquarters in London.

Items of principal interest on the agenda are:

—Decisions of other IMO bodies.
—Routing of ships.
—Review of rules 23, 25, 26, and annex IV of the 1972 Collision Regulations.
—Navigational aids and related equipment:
1. World-wide navigation system.
2. Electronic chart display systems.
3. Guidelines on the use of transponders on ships for safety purposes.
4. Optimal methods of automatic radar plotting aids (ARPA) and radar display presentation.
5. International Telecommunications Union (ITU) matters, including International Radio Consultative Committee (CCIR) Study Group 8.
—Matters relating to fishing vessels:
1. Amendments to chapter X of the 1977 Torremolinos International Convention.
2. Fishing vessel watchkeeping requirements.
3. Marking of fishing gear.
—International Code of Signals.
—Officer of the navigational watch acting as the sole lookout in periods of darkness.
—Review of World Meteorological Organization (WMO) handbooks on navigation in areas of sea-ice.
—Revision of chapters 8 and 13 of the Code of Safety for Dynamically Supported Craft.
—Guidelines on the recruitment, qualifications, and training of vessel traffic service (VTS) operators.
—Review of resolution A.578(14).
—Bridge procedures.
—Work program.
—Election of Chairman and Vice-Chairman for 1992.

Members of the public may attend these meetings up to the seating capacity of the room. Interested persons may seek information by writing: Mr. Edward J. LaRue, Jr., U.S. Coast Guard (G-NSR-3), room 1416, 2100 Second Street SW., Washington, DC 20593-0001 or by calling (202) 267-0416.

Dated: June 6, 1991.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

[Public Notice 1414]

Shipping Coordinating Committee; Meeting

The U.S. Shipping Coordinating Committee (SHC) will conduct an open public meeting at 9:30 a.m. on Wednesday, July 24, 1991, in room 2415 of U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The purpose of this meeting is to report on the results of the 94th Session of the International Maritime Organization (IMO) Legal Committee conducted March 18–22, 1991, as well as to solicit public comment for the upcoming 95th Session scheduled to be held from September 30 until October 4, 1991.

The principal focus of the SHC public meeting will be to discuss the ongoing Legal Committee deliberations concerning the question of liability and compensation related to the maritime carriage of hazardous and noxious substances (HNS).

The views of the public, and particularly those of affected maritime commercial and environmental interests, are requested.

Members of the public are invited to attend the SHC meeting, up to the seating capacity of the room.

For further information or to submit views concerning any of the topics to be addressed at the SHC meeting, contact either Captain Jonathan Collom or Lieutenant Mark J. Yost, U.S. Coast Guard (G-LMI), 2100 Second Street, SW., Washington, DC 20593, telephone (202) 267-1527, telefax (202) 267-4163.

Dated: June 7, 1991.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Air Carrier Operations Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Air Carrier Operations Subcommittee of the Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on July 31, 1991, at 9 a.m.

VOL 56 ISS 116 JE 17 1991 UMI

ADDRESSES: The meeting will be held in room 8 ABC, 8th floor, 800 Independence Avenue, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Meg Mack, Office of Flight Standards Service (AFS-200), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-8166.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting of the Air Carrier Operations Subcommittee to be held on July 31, 1991, at the FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591. The agenda for this meeting will include progress reports from the Noise Abatement Takeoff Profile Working Group, Fuel Requirements Working Group, Wet Leasing Working Group, and Autopilot Engagement Requirements Working Group. Each Working Group Chair will report on the organization and composition of the working group, proposed scope, products, milestones, and progress thus far.

Attendance is open to the interested public but may be limited to the space available. The public must make arrangements in advance to present oral statements at the meeting or may present written statements to the committee at any time. Arrangements may be made by contacting the person listed under the heading **"FOR FURTHER INFORMATION CONTACT."**

Because of increased security in Federal buildings, members of the public who wish to attend are advised to arrive in sufficient time to be cleared through building security.

Issued in Washington, DC, on June 10, 1991.

David S. Potter,

Executive Director, Air Carrier Operations Subcommittee, Aviation Rulemaking Advisory Committee.

Sunshine Act Meetings

Federal Register
Vol. 56, No. 116
Monday, June 17, 1991

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Office of the Inspector General Oversight Committee

TIME AND DATE: A meeting of the Board of Directors Office of the Inspector General Oversight Committee will be held on June 24, 1991. The meeting will commence at 12:00 p.m.

PLACE: The Marriott Suites Hotel, 801 North St. Asaph Street, The Conference Room, Alexandria, VA 22314, (703) 836-4700.

STATUS OF MEETING: Open [A portion of the meeting may be closed, subject to a vote by a majority of the Board of Directors, to discuss personnel-related and personal matters as authorized by the relevant portions of the Government in the Sunshine Act [5 U.S.C. 552b(c) (2) and (6)], and the corresponding regulations of the Legal Services Corporation [45 C.F.R. Sections 1622.5 (a) and (e)]. A portion of the meeting may be closed to preserve the applicants' personal privacy and to discuss strictly internal personnel rules and practices. Specifically, the Committee will consider responses to questions posed to selected applicants being considered for the position of Inspector General of the Legal Services Corporation.]

MATTERS TO BE CONSIDERED:

1. Approval of Agenda.
2. Approval of Minutes of June 3, 1991 Meeting.
3. Consideration of Responses to Questionnaires Submitted by Applicants for the Position of Inspector General of the Legal Services Corporation.

CONTACT PERSON FOR INFORMATION: Patricia D. Batie, Executive Office, (202) 863-1839.

Date issued: June 13, 1991.

Correction

In rule document 91-10029 beginning on page 21418 in the issue of Wednesday, May 8, 1991, make the following corrections:

1. On page 21421, in the first column, in the eighth line from the bottom, "extension" should read "extensive".

2. On same page, in the third column, in sixth line, "§ 630.1198(d)" should read "§ 630.19(d)".

3. On page 21427, in the first column, in the seventh line from the bottom, "monoalen" should read "monovalent".

4. On page 21430, in the third column, in the seventh line from the bottom, after "neurovirulence" insert "and identity".

5. On page 21431, in first column, in the tenth line, "pods" should read "pools".

6. On same page, in the same column, in paragraph 33, in the fifth line, "manufacture" should read "manufacturer".

§ 630.12 [Corrected]

7. On page 21433, in the second column, in § 630.12(a)(3), in the second line "for" should read "from".

§ 630.18 [Corrected]

8. On page 21436, in the third column, in § 630.18(a)(3), in the eighth line from the bottom, "14 days" should read "14-day test".

§ 630.18 [Corrected]

9. On page 21437, in the first column, in § 630.18(a)(5), in the sixth line from the bottom, "14 years" should read "14 days".

BILLING CODE 1505-01-D

Uniform Rules of Practice and Procedure

AGENCIES: Office of the Comptroller of the Currency, Treasury; Board of Governors of the Federal Reserve System; Federal Deposit Insurance Corporation; Office of Thrift Supervision, Treasury; and National Credit Union Administration.

ACTION: Joint notice of proposed rulemaking.

SUMMARY: Section 916 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 requires that the Office of the Comptroller of the Currency ("OCC"), Board of Governors of the Federal Reserve System ("Board of Governors"), Federal Deposit Insurance Corporation ("FDIC"), Office of Thrift Supervision ("OTS"), and National Credit Union Administration ("NCUA") develop a set of uniform rules and procedures for administrative hearings ("Uniform Rules"). Section 916 further requires that the agencies promulgate provisions for summary judgment rulings where there are no disputes as to the material facts of a case.

This proposal is intended to make uniform those rules that pertain to the types of formal enforcement actions common to at least four of the listed agencies. In addition to these Uniform Rules, each agency proposes complementary "Local Rules" to address some or all of the following: formal enforcement actions not addressed in the Uniform Rules, informal actions which are not subject to the Administrative Procedure Act ("APA"), and procedures to supplement or facilitate the processing of administrative enforcement actions within each agency.

DATES: Comments on this joint proposed rule must be received by July 17, 1991.

ADDRESSES: Comments should be directed to:

OCC: Communications Division, 250 E Street SW., Washington, DC 20219, attention: Docket No. 91-4. Comments will be available for public inspection and photocopying at the same location.

Board of Governors: Mr. William Wiles, Secretary of the Board, Board of Governors of the Federal Reserve System, 20th and Constitution Avenue NW., Washington, DC 20551, attention: Docket No. R-0733 or delivered to room B-2223, Eccles Building, between 8:45 a.m. and 5:15 p.m. Comments may be inspected in room B-1122 between 9 a.m. and 5 p.m., except as provided in § 261.8 of the Board's Rules Regarding Availability of Information, 12 CFR 261.8.

FDIC: Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429. Comments may be hand delivered to room F-402, 1776 F Street NW., Washington, DC, on business days between 8:30 a.m. and 5 p.m. Comments may also be inspected in room F-402 between 8:30 a.m. and 5 p.m. on business days. [FAX number (202) 898-3838]

OTS: Director, Information Services Division, Office of Communications, Office of Thrift Supervision, 1700 G Street NW., Washington, DC 20552, attention: Docket No. 91-333. Comments will be available for inspection at 1735 I Street NW. 9th floor.

NCUA: Send comments to Becky Baker, Secretary, NCUA Board, 1776 G Street NW., Washington, DC 20456. Comments will be available for inspection at the same location.

FOR FURTHER INFORMATION CONTACT:

OOC: Barrett Aldemeyer, Senior Attorney, or Lee Walzer, Attorney, Legislative and Regulatory Analysis Division (202/874-5090), or Daniel Stipano, Assistant Director, Enforcement and Compliance Division (202/874-4800).

Board of Governors: Douglas Jordan, Senior Attorney, Legal Division (202/452-3787), or Ann Marie Kohlligian, Senior Counsel, Division of Banking Supervision and Regulation (202/452-3528). For the hearing impaired only, Telecommunication Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson (202/452-3544).

FDIC: Nancy Alper, Counsel, Compliance and Enforcement Section (202/898-3720) or Andrea Winkler, Counsel, Compliance and Enforcement Section (202/898-3764).

OTS: Dawn Causey, Attorney, Division of Enforcement (202/906-7157).

NCUA: Steven Widerman or Mary Rupp, Attorneys, Office of General Counsel (202/682-9630).

SUPPLEMENTARY INFORMATION:

A. Background

Section 916 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"), Public Law No. 101-73, 103 Stat. 183 (1989), requires that the OCC, Board of Governors, FDIC, OTS, and NCUA develop a set of uniform rules and procedures for administrative hearings. In addition, FIRREA requires the agencies to promulgate provisions for summary judgment rulings where there are no disputes as to the material facts of a case.

By including this provision in FIRREA, Congress intended that the listed agencies, by promulgating uniform procedures, would improve and expedite their administrative proceedings. The statutory provision is a reflection of "recent recommendations of the Administrative Conference of the United States and the House Government Operations Committee." H.R. Rep. No. 54, 101st Cong., 1st Sess., pt. 1, at 396. The Administrative Conference of the United States found in its December 30, 1987 recommendation that "(g)iven the similar statutory bases for these enforcement actions, the five agencies jointly should be able to develop substantially similar rules of procedure and practice for formal enforcement proceedings." 1 CFR 305.87-12.

B. Uniform Rules

As set forth below, there shall be at least two subparts to each listed agency's new rules of practice and procedure. The first subpart, designated "Uniform Rules," will set forth the uniform rules of practice and procedure for those formal enforcement actions which are required by statute to be determined on the record after an opportunity for an agency hearing and which are common to at least four of the agencies. Those enforcement actions include cease-and-desist proceedings under section 8(b) of the Federal Deposit Insurance Act ("FDIA") (12 U.S.C. 1818(b)) and section 206(e) of the Federal Credit Union Act ("FCUA") (12 U.S.C. 1786(e)); removal and prohibition proceedings under section 8(e) of the FDIA (12 U.S.C. 1818(e)) and section 206(g) of the FCUA (12 U.S.C. 1786(g)); change-in-control proceedings under section 7(j)(4) of the FDIA (12 U.S.C. 1817(j)(4)); proceedings under section 15C(c)(2) of the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78o-5); the assessment of civil money penalties, pursuant to various statutes, as cited in the Uniform Rules, for (1) violations of law or regulation; (2) violation of any final order or temporary order issued pursuant to section 8 of the FDIA (12 U.S.C. 1818(b)), or sections 202 and 206 of the FCUA (12 U.S.C. 1782 and 1786); (3) violation of any conditions imposed in writing by the appropriate Federal banking agency in connection with the grant of any application or other request by a regulated institution; (4) violations of any written agreement between such a regulated institution and such agency; (5) violations related to the failure to submit and publish accurate and complete regulatory reports; and (6) certain unsafe and unsound practices and breaches of fiduciary duty. The Uniform Rules will also apply to any other formal adjudications not specifically set forth in the Uniform Rules that are required by statute to be determined on the record after an opportunity for an agency hearing and are common to at least four of the five agencies.

C. Local Rules

The remainder of the proposed rules, designated "Local Rules," will be divided into five sections, one for each of the agencies. In these sections each agency will set forth its own rules to address some or all of the following topics: formal enforcement actions common to fewer than four of the five agencies, informal actions which are not subject to the APA, and procedures to supplement or facilitate the processing of administrative enforcement actions within each agency. The Local Rules will address the following proceedings:

OCC Proceedings. Removal, suspension, and prohibition proceedings under section 8(g) of the FDIA (12 U.S.C. 1818(g)); exemption hearings under sections 12 (h) and (i) of the Exchange Act (15 U.S.C. 78l (h) and (i)); disciplinary proceedings under sections 15B(c)(5), 15C(c)(2)(A), 17A(c)(3), and 17A(c)(4)(C) of the Exchange Act (15 U.S.C. 78o-4(c)(5), 78o-5(c)(2)(A), 78q-1(c)(3)(A), and 78q-1(c)(4)(C)); civil money penalty proceedings under section 21B of the Exchange Act (15 U.S.C. 78u-2) in proceedings under sections 15B, 15C, and 17A of the Exchange Act (15 U.S.C. 78o-4, 78o-5, and 78q-1); cease-and-desist proceedings under sections 12(i) and 21C of the Exchange Act (15 U.S.C. 78l(i) and 78u-3); and proceedings for the review of agency disapprovals in change-in-control proceedings under section 7(j) of the FDIA (12 U.S.C. 1817(j)).

Board of Governors Proceedings. Suspension of a member bank from use of Federal Reserve credit facilities under section 4 of the Federal Reserve Act ("FRA") (12 U.S.C. 301); termination of a bank's membership in the Federal Reserve System under section 9 of the FRA (12 U.S.C. 327); issuance of a cease and desist order under section 11 of the Clayton Act (15 U.S.C. 21); formal adjudication of bank merger applications under section 18(c) of the FDIA (12 U.S.C. 1828(c)); issuance of a divestiture order under section 5(e) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(e)); disciplinary proceedings under section 15B(c)(5) of the Exchange Act (15 U.S.C. 78o-4); procedures relating to the imposition of civil money penalties under specified statutes; procedures relating to the suspension, removal or prohibition of institution-affiliated parties under section 8(g) of the FDIA (12 U.S.C. 1818(g)); procedures for issuance and enforcement of capital directives under the International Lending Supervision Act of 1983; procedures for censure, suspension or debarment of practitioners before the Board of Governors; and procedures for actions under the Equal Access to Justice Act (5 U.S.C. 504).

FDIC Proceedings. Change in Bank Control proceedings under section 7(j) of the FDIA (12 U.S.C. 1817(j)); involuntary termination of insurance proceedings under section 8(a) of the FDIA (12 U.S.C. 1818(a)); proceedings relating to cease-and-desist orders under section 8(b) of the FDIA (12 U.S.C. 1818(b)); proceedings relating to the assessment of civil money penalties pursuant to sections 7(a), 8(i) and 18(j) of the FDIA (12 U.S.C. 1817(a), 1818(i) and 1828(j)); proceedings regarding sanctions against municipal securities dealers or persons associated with them and clearing agencies or transfer agents under section 15(b)(4), 17, or 17A of the Exchange Act (15 U.S.C. 78o, 78q and 78q-1); exemption hearings under section 12(h) of the Exchange Act (12 U.S.C. 78l(h)); investigations pursuant to section 10(c) of the FDIA (12 U.S.C. 1820(c)); proceedings relating to change in senior executive officers or directors under section 32 of the FDIA (12 U.S.C. 1831i); proceedings relating to unauthorized participation by convicted individuals under section 19 of the FDIA (12 U.S.C. 1829); proceedings relating to the assessment of liability against commonly-controlled depository institutions under section 5(e) of the FDIA (12 U.S.C. 1815(e)); proceedings relating to the recovery of fees and other expenses under the Equal Access to Justice Act, 5 U.S.C. 504.

OTS Proceedings. The OTS Local Rules augment the Uniform Rules by expanding the scope of the Uniform Rules to apply to particular savings and loan holding company and securities proceedings, adding deposition discovery, clarifying the time and method for filing motions before the Director, and civil money penalties. OTS's non-APA proceedings are not contained in its part 509. The non-APA proceedings may be found at part 508 (removals, suspensions, and prohibitions where a crime is charged or proven), part 512 (investigations), and part 513 (disciplinary proceedings).

NCUA Proceedings. The new subpart A replaces the existing subparts A [Rules of Practice and Procedure], C [Cease-and- desist Actions], D [Assessment of Civil Penalties] and E [Removal, Prohibition and Suspension Actions]. A new subpart B is reserved for local rules of practice and procedure, unique to the NCUA, which may be developed in the future. The existing subparts B, F, G, H, I, J, K and L remain unchanged in substance. To conform to the elimination of existing subparts C, D and E, however, these remaining subparts are redesignated subparts C, D, E, F, G, H, I and J, respectively, and the sections of each are renumbered sequentially. The new subparts B through J shall be known as the NCUA's Local Rules.

The Uniform Rules, as set forth in the subpart A, supplement the Local Rules and procedures set forth individually in new subparts C, E, F and G. (New subparts D, H, I and J concern proceedings which either are informal or non-adjudicative, and to which the Uniform Rules do not apply.) However, each of subparts C, E, F and G provides that its own provisions shall control in the event of an inconsistency with those of subpart A.

VOL 56 ISS 116 JE 17 1991 UMI

D. Section-by-Section Summary and Discussion of Uniform Rules

Section _____.1 Scope.

As a result of the statutory mandate contained in Section 916 of FIRREA, the Agencies are proposing a set of administrative hearing procedures that cover those proceedings that at least four of the five Agencies share in common and that require a formal hearing before an administrative law judge. These common proceedings include cease-and-desist actions, removal and prohibition actions and the assessment of civil money penalties. In addition, four of the five agencies share regulatory authority over the adjudication of change-in-control applications (12 U.S.C. 1817(j)(4)) and hearings to impose sanctions on government securities brokers and dealers (15 U.S.C. 78o–5). Proceedings such as the termination of insurance are common only to the FDIC and the NCUA, and as a consequence, are not included in this proposal. Procedures for such non-common proceedings may be found in the Local Rules of the particular Agency.

Section _____.2 Rules of construction.

This section makes clear that the use of any term in the Uniform Rules includes either its singular or plural form, as appropriate, and that the use of the masculine, feminine or neuter gender shall, if appropriate, be read to encompass all three. Because the Uniform Rules allow for non-attorney representation under certain circumstances, the Rules of Construction indicate that the term "counsel" includes non-attorney representatives. Finally, this section explicitly states that, unless otherwise indicated, any action required to be taken by a party to a proceeding may be taken by the party's counsel.

Section _____.3 Definitions.

This section sets forth definitions of the terms that will be common to the procedures used by the OCC, Board of Governors, FDIC, OTS, and NCUA. Definitions which do not pertain to procedures regarding formal enforcement actions common to at least four of these agencies, but which pertain instead to a particular agency's actions or procedures which are not covered by these Uniform Rules, are contained in that agency's Local Rules. The definitions contained in this section apply to the use of any such term in the Uniform and Local Rules, unless otherwise explicitly stated to the contrary.

An "administrative law judge" is defined in paragraph (a) as the one who presides at an administrative hearing, and who has the powers enumerated in the APA. The term "Office of Financial Institution Adjudication (OFIA)" means the executive body charged with overseeing the administration of administrative enforcement proceedings. These definitions reflect the mandate of FIRREA that the agencies establish a common pool of administrative law judges for their enforcement proceedings. OFIA is the executive body established to oversee the administration of such proceedings.

The definition of "adjudicatory proceeding" in paragraph (b) indicates that the rules apply only to formal administrative proceedings subject to the APA which result in a final order, and do not include rulemaking procedures.

"Final order" is defined in paragraph (g) to mean an order issued by an Agency with or without the consent of the affected institution or institution-affiliated party, that has become final. The finality of such an order is not affected by the pendency of any petition for reconsideration or review.

The definition of "Agency" in paragraph (c) sets forth the institutions over which the OCC, Board of Governors, FDIC, OTS, and NCUA have supervisory authority. The definition of "Agency Head" indicates the body or the individual that is the decision maker within each Agency.

The term "institution" includes any organization subject to the jurisdiction of the five agencies—banks, bank and savings association holding companies, nonbank subsidiaries of holding companies, Federal credit unions, insured state credit unions, savings associations, Edge Act companies, and branches and agencies of foreign banks.

The term "decisional employee" denotes those members of the Agency's or administrative law judge's staff who have not engaged in an investigative or prosecutorial role in an adjudicatory proceeding, and who may play a role in the proceeding's decisionmaking process. "Enforcement Counsel" are defined as individuals who file a notice of appearance as counsel on behalf of the Agency in an adjudicatory proceeding.

The term "person" is intended to be construed broadly, and encompasses an individual, sole proprietor, partnership, corporation, unincorporated association, trust, joint venture, pool, syndicate, agency or other entity or organization, including an institution as defined in paragraph (h). A "party" includes the Agency and any person named in the notice which commences a proceeding. "Institution-affiliated party" incorporates the definition of that term found in both the FDIA and the FCUA. A "respondent" is a party other than the Agency.

The term "violation", defined in paragraph (n), means any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

Section _____.4 Authority of Agency Head.

This section makes clear that the Agency Head may, at any time during a proceeding, perform, direct the performance of, or waive performance of, any act which may be done or ordered by the administrative law judge.

Section _____.5 Authority of administrative law judge.

This section enumerates powers granted to the administrative law judge subsequent to appointment. The list is not exhaustive. The administrative law judge is permitted to take any other action necessary and appropriate to discharge the duties of a presiding officer. All powers granted by this provision are intended to further the Agency's goal of an expeditious, fair, and impartial hearing process.

Section _____.6 Appearance and practice in adjudicatory proceedings.

This section sets forth the criteria for persons acting in a representative capacity for parties in an adjudicatory proceeding. A notice of appearance is required to be filed by an individual representing any party, including an individual representing the Agency, simultaneously with or before the submission of papers or other act of representation on behalf of a party. Any counsel filing a notice of appearance is deemed to represent that he or she agrees and is authorized to accept service on behalf of the represented party.

Section _____.7 Good faith certification.

This section requires that all filings or submissions be signed by at least one counsel of record or the party, if appearing on his or her own behalf. This section provides that, by signing a filing or submission, the counsel or party certifies and attests that the document has been read by the signer and, to the best of his or her knowledge, is well grounded in fact and is supported by existing law or a good faith argument for the extension or modification of the existing law. In addition, the certification attests that the filing or submission is not for purposes of unnecessary delay or any improper purpose. If the document is not signed, an opportunity to sign will be granted; however, if after such opportunity the document is still not signed, the administrative law judge is required to strike it from the record of the proceeding. Oral motions or arguments are also subject to the good faith certification: the act of making the oral motion or argument constitutes the required certification.

Section _____.8 Conflicts of interest.

In general, conflicts of interest in representing parties to adjudicatory proceedings are prohibited by the Uniform Rules. The administrative law judge is empowered to take corrective steps to eliminate such conflicts. If counsel represents more than one party to a proceeding, counsel is required to file at the time he or she files his or her notice of appearance a certification that: (1) The potential for possible conflicts of interest has been fully discussed with each such party; (2) the parties are aware of no existing or anticipated material conflict between their interests individually; and, (3) the parties individually waive any right to assert the conflicts of interest during the proceeding. This outlined approach follows the Model Code of Conduct for attorneys and the District of Columbia Ethics Rule.

Section _____.9 Ex parte communications.

This section adopts the rules and procedures set forth in the APA regarding ex parte communications. See 5 U.S.C. 551(14) and 557(d). Generally, any communications without notice to all other parties between parties or interested persons and those involved in the decisionmaking process is prohibited. This includes communications from a party, counsel for the party, or an interested person to the administrative law judge, the Agency Head, or a decisional employee assisting the administrative law judge or Agency Head. Similarly, administrative law judges, Agency Heads and their decisional employees are prohibited from making ex parte communications to a party, counsel for a party, or an interested person. Communications regarding the status of the proceeding are expressly excluded from the definition of ex parte communications.

If an ex parte communication does occur, the document itself, or if oral, a memorandum of the substance of the communication, must be placed in the record. All other parties to the proceeding may have the opportunity to respond to the prohibited communication, and such response may include a recommendation for sanctions. The administrative law judge or the Agency Head may determine whether sanctions are appropriate.

Section _____.10 Filing papers.

This section addresses the time and manner of filing by incorporating a "mailbox rule" to determine when a document is deemed filed, and applying it to all common methods of transmitting documents.

The provision for transmission by electronic media authorizes filing by facsimile, computer modem, or other electronic media, but only where such method is authorized by the recipient of the filing, *i.e.*, the Agency Head or administrative law judge, as the case may be. It is recognized that such filings will be the exception rather than the rule, will seldom be appropriate for filings longer than a few pages, and can only be used where appropriate facilities are available. Nevertheless, it is contemplated that electronic filings will be useful in certain circumstances, such as where rapid rulings on motions and responses are necessary. The recipient of the filing, *i.e.*, the Agency Head or the administrative law judge, is accorded the discretion to determine when such circumstances exist. A concurrent filing of a paper copy is required to ensure that the requirements as to form, such as an original signature, are observed in electronic filings just as they must be in other filings.

Section _____.11 Service of papers.

Where the person served has not made an appearance in the proceeding, the proposed Uniform Rules require that reasonable measures be taken to convey actual notice. The requirements regarding service upon a party that has made an appearance in a proceeding closely resembles the provision regarding filing. Service by electronic media is subject to mutual agreement among the parties; consequently, electronic service is not effective upon a party that has not consented to electronic service.

Section _____.12 Construction of time limits.

The general rule on construction of time limits provides common rules for computing time limits, taking into account the effect of weekends and holidays. The rules as to when papers are deemed filed or served incorporate a "mailbox rule" applicable to mail and commercial delivery services. The effective time for filing or service by electronic medium is to be specified by the person authorizing or agreeing to that means of filing or service. With regard to time limits for responsive pleadings, the rules incorporate a three-day extension for mail service, similar to the Federal Rules of Civil Procedure, and a one-day extension for overnight delivery, as contained in some agencies' existing rules. A one-day extension for service by electronic medium is proposed because experience shows that delays in actual receipt by the person served are peculiar to such media (*e.g.*, transmission after office hours, unattended facsimile machines, etc.)

Section _____.13 Change of time limits.

Except as otherwise provided by law, the time limits prescribed by the Uniform Rules may be extended by the administrative law judge for good cause, prior to certification of the case to the Agency Head, and by the Agency Head after such certification. Motions for extension of time are subject to the rules generally applicable to motions.

Section _____.14 Witness fees and expenses.

The provisions for witness fees and expenses implement the provisions of 12 U.S.C. 1818(n) and 12 U.S.C. 1786(p) that provide that fees and expenses for witnesses subpoenaed pursuant to these Uniform Rules shall be the same as for witnesses in United States district courts.

Section _____.15 Opportunity for informal settlement.

This section makes explicit that informal settlement proposals by respondents must be made only through Enforcement Counsel and that settlement discussions may not be used to delay proceedings.

Section _____.16 Agency's right to conduct examination.

This section states that nothing contained in the Uniform Rules shall be construed to limit the right of the Agency to conduct examinations or visitations of any institution or institution-affiliated party, or the right of the Agency to conduct any form of investigation authorized by law.

Section _____.17 Collateral attacks on adjudicatory proceedings.

This section precludes the use of collateral attacks to circumvent or delay the administrative process and reflects

VOL 56 ISS 116 JE 17 1991 UMI

the anti-injunction provisions of 12 U.S.C. 1818(i) and 12 U.S.C. 1786(k)(1).

Section _____.18 Commencement of proceeding and contents of notice.

This section contains the requirements relating to the initiation of adjudicatory proceedings, including the required content of a notice or order initiating a hearing.

Section _____.19 Answer.

This section sets forth the time period in which to file an answer and the requirements of the answer. Failure to file a timely answer is deemed to be a waiver of the right to appear and a consent to the entry of an order granting the relief sought by the Agency in the notice. This section makes explicit that, in case of default, the administrative law judge, without any further proceedings, shall file with the Agency Head a recommended decision containing the relief sought in the notice.

Section _____.20 Amended pleadings.

This section provides that the administrative law judge shall freely allow the parties to amend the notice or answer at any stage of the proceeding. Amendments to the notice and answer are not required when issues not raised by the notice or answer are tried at the hearing by express or implied consent of the parties.

Section _____.21 Failure to appear.

A party's failure to appear at a hearing personally or by an authorized representative is deemed a waiver of the right to appear and a consent to the relief sought in the notice. When a party fails to appear, the administrative law judge shall file with the Agency Head a recommended decision containing the findings and the relief sought in the notice, without further proceedings or notice to the respondent.

Section _____.22 Consolidation and severance of actions.

This section allows the consolidation of actions if the proceedings arise out of the same transaction, occurrence or series of transactions or if the proceedings involve at least one common respondent or a material common question of law or fact. Proceedings are not to be consolidated if to do so would unreasonably delay the proceeding or cause significant injustice.

Severance, on the other hand, may be granted by the administrative law judge only if the judge determines that undue prejudice or injustice would result from a consolidated proceeding and if such prejudice or injustice would outweigh the interests of judicial economy and speed in the adjudication of actions. This is a higher standard than is required for the consolidation of actions.

Section _____.23 Motions.

This section generally requires that all motions must be in writing, must state with particularity the relief sought, and must include a proposed order. The Uniform Rules permit supplementary materials such as briefs, written memoranda or other relevant material or documents to be filed in support of a motion. In addition, a party may make oral motions in the course of an adjudicatory proceeding, including any scheduling or prehearing conference, unless the administrative law judge requires that the motion be made in writing. Motions are to be submitted to the administrative law judge prior to the filing of the recommended decision; thereafter, motions are to be filed with the Agency Head.

Unless the administrative law judge or the Agency Head establishes another time period, a party will have ten days after service of a written motion to respond in writing to such motion. A party's failure to respond to a motion shall waive that party's right to oppose such motion and constitute consent to the entry of an order substantially in the form of the order accompanying the motion.

Frivolous or repetitive motions are not permitted and may be cause for sanctions.

Section _____.24 Scope of document discovery.

This section provides for, and sets forth procedures governing, document discovery. Deposition discovery is discussed in the Local Rules.

All discovery, including all responses to discovery requests, must be completed at least 20 days before the scheduled hearing date, unless the Local Rules provide otherwise. Parties may seek all relevant material, including those matters that are reasonably calculated to lead to the discovery of admissible evidence. The Uniform Rules provide, however, that all applicable privileges may be asserted in response to a discovery request.

Section _____.25 Request for document discovery from parties.

The Uniform Rules are modeled on the Federal Rules of Civil Procedure discovery practice in that all document discovery among parties is initiated by requests from the parties, and, except for the resolution of disputes, without the involvement of the administrative law judge. There is no continuing obligation to update responses if the response was complete when made, unless the party subsequently learns that the response was materially incorrect when made or, through intervening events, is no longer correct and a failure to amend the response would be a knowing concealment.

This section provides that, when a discovery request seeks documents covered by applicable privileges, the party asserting the privilege must file a document index of such material. This section also contains procedures governing discovery disputes. In general, such disputes are resolved through motion practice before the administrative law judge. If the administrative law judge issues a subpoena compelling production and a party fails to comply with it, a subpoenaing party, to the extent authorized by law, may seek enforcement of such subpoena in any appropriate United States district court.

Section _____.26 Document subpoenas to nonparties.

Parties may seek document discovery from nonparties through subpoenas issued by the administrative law judge upon the application of a party. Motions to quash or modify document subpoenas are governed by the same rules that apply to document requests by parties set forth in § _____.25(d).

Section _____.27 Deposition of witness unavailable for hearing.

In general, those material witnesses unavailable for hearing may have their testimony taken by deposition upon application to the administrative law judge for a deposition subpoena. The application must state that the witness is unavailable due to age, illness, infirmity or other reason and that the petitioning party was not the cause of the witness's unavailability. The witness and any party may object to the issuance of the subpoena within ten days of service of the subpoena. Unless quashed or modified by the administrative law judge, the subpoena may be enforced in United States district court.

Section _____.28 Interlocutory review.

This section provides for a review by the Agency Head of an administrative law judge's ruling prior to the time when the record is certified to the Agency Head. Review will be granted only on the basis of the specific grounds enumerated in this provision.

A request for interlocutory review must be filed with the administrative law judge within ten days of his or her ruling, and any party may file a response to such a request. The administrative law judge shall refer to the Agency Head for disposition all such requests for interlocutory review together with any responses.

The filing or granting of a request for interlocutory review does not stay the proceedings, unless the administrative law judge or the Agency Head so orders.

Section _____.29 Summary disposition.

Section _____.30 Partial summary disposition.

Any party to a proceeding may file a motion for summary disposition of a proceeding or for a partial summary disposition of a portion of a proceeding if: (1) There is no genuine issue as to any material fact; and (2) the moving party is entitled to a favorable decision as a matter of law. The motion must be accompanied by a statement of the uncontested material facts, a brief, and any documentary evidence in support of the motion. Within 20 days of service of a motion for summary or partial summary disposition, any other party may file his or her opposition to such motion. Parties opposing the motion for summary or partial summary disposition must file with their response a statement of material facts as to which a genuine dispute exists, a brief, and any documentary evidence in support of the opposition.

If the administrative law judge determines that summary disposition is warranted, a recommended decision to that effect is required to be submitted to the Agency Head. If only a portion of the proceeding warrants summary disposition, the administrative law judge will accordingly limit the issues for hearing to the remaining claims, while the issues which warranted summary disposition will be addressed in the administrative law judge's recommended decision filed at the conclusion of the hearing. Thus, the recommended decision of the administrative law judge will set forth both the issues determined by partial summary disposition and those determined after a hearing. This procedure avoids the piecemeal submission of recommended decisions to the Agency Head while encouraging judicial economy by limiting the hearing to those issues as to which there is a genuine controversy.

Section _____.31 Scheduling and prehearing conferences.

A scheduling conference is mandatory under the Uniform Rules. The conference must be held within 30 days of service of the notice or order commencing the proceeding. The purpose of the scheduling conference is to establish the course and conduct of the proceeding. Issues to be discussed at the scheduling conference include the identification of potential witnesses, the time for and the manner of discovery, and the exchange of any prehearing materials including proposed witness lists, statements of issues, stipulations, exhibits and any other documents determined to be appropriate.

Additional prehearing conferences may be held at the discretion of the administrative law judge or at the request of any party. These conferences would occur after the scheduling conference and would address issues such as: simplification and clarification of issues; stipulations, admissions of fact and the contents, authenticity or admissibility of evidence; matters requiring official notice; limitation of the number of witnesses; summary disposition of issues; resolution of discovery issues; amendments to pleadings; and other matters.

The presence of a court reporter at the scheduling conference or at any prehearing conference is within the discretion of the administrative law judge. Within a reasonable time following the conclusion of the scheduling or prehearing conference, the administrative law judge is required to serve on each party an order setting forth any procedural determinations and agreements made at the conference.

Section _____.32 Prehearing submissions.

No later than 14 days prior to the start of the hearing, each party is required to serve on every other party the following documents: A prehearing statement; a final list of witnesses to be called to testify that includes a description of the expected testimony of each witness; and a list of prehearing exhibits along with a copy of each such exhibit and stipulations of fact, if any. The failure of a party to comply with this provision will preclude that party from presenting its witnesses or exhibits at the hearing, except for good cause shown.

Section _____.33 Public hearings.

The proposed provision that hearings will be public rather than private unless otherwise determined by the Agency implements a statutory requirement established by the "Comprehensive Thrift and Bank Fraud Prosecution and Taxpayer Recovery Act of 1990" ("Fraud Prosecution Act"), Title XXV of the Crime Control Act of 1990, Public Law 101-647, 104 Stat. 4789. Within 20 days of service of the notice, any respondent may file with the Agency Head a request for a private hearing, and any party may file a response to such a request. Failure to file such a request or response will preclude the raising of further objections on the issue of whether the hearing is public or private. The proposed section also implements a provision of the Fraud Prosecution Act by specifying that the Agency through its Enforcement Counsel may file under seal any document or any portion thereof, and that the administrative law judge will take all actions necessary to protect the confidentiality of such documents.

Section _____.34 Hearing subpoenas.

A party may obtain a hearing subpoena at any time after the commencement of a proceeding, including during a hearing, so long as the testimony sought is relevant and reasonable. Once the administrative law judge has issued a subpoena pursuant to this section, only the subpoenaed person may move to quash or limit it. If a person fails to comply with a hearing subpoena, the subpoenaing party may, to the extent authorized by law, seek enforcement of the subpoena in any appropriate United States district court.

Section _____.35 Conduct of hearings.

This section provides general rules for the conduct of hearings, the admissibility of stipulations, and the order in which the parties are to present their cases.

Section _____.36 Evidence.

This section states that evidence that is relevant, material, reliable, and not unduly repetitive shall be admissible to the fullest extent authorized by the APA and other applicable law. Evidence which is admissible under the Federal Rules of Evidence is admissible in a formal proceeding governed by the Uniform Rules; however, evidence need not meet the standards of the Federal Rules to be admissible, as long as it is relevant, material, reliable and not unduly repetitive.

Official notice may be taken of any material fact which may be judicially noticed by a United States district court or which appears in the official public records of any Federal or state government agency. Unless there is a genuine material issue raised about the veracity and legibility of a document, duplicates may be used to the same extent as originals.

1991
UMI

Subject to the general standards for admissibility, any document prepared by the appropriate Agency or state regulatory agency is admissible with or without a sponsoring witness. Such documents include a report of supervisory activity, examination, inspection or visitation. In the event that a witness is unavailable to testify in a hearing, a party may offer into evidence that witness's prior deposition testimony if all parties to the proceeding had notice and an opportunity to attend such deposition. Such deposition testimony is subject to the same standard of admissibility as other evidence.

Objections to the admissibility of evidence must be timely made. All rulings on objections shall appear on the record. A failure to object to the admission of evidence shall constitute a waiver of the objection.

Section ____.37 Proposed findings and conclusions.

Section ____.38 Recommended decision and filing of record.

Section ____.39 Exceptions to recommended decision.

Section ____.40 Review by Agency Head.

Section ____.41 Stays pending judicial review.

These sections reflect no significant departures from the existing regulations of the Agencies.

Proposed findings and conclusions and any supporting briefs are to be submitted within 30 days after the transcript has been filed with the administrative law judge. Reply briefs are to be filed within 15 days thereafter.

Within 45 days of the time for filing reply briefs, the administrative law judge is to file with the Agency Head the record of the proceeding, including the recommended decision, findings of fact, conclusions of law, and proposed order.

The administrative law judge is also required to serve upon each party the recommended decision, findings, conclusions and proposed order. Any exceptions to the administrative law judge's recommendations are to be filed within 30 days after service of those recommendations.

The Agency Head will render its final decision within 90 days after it has notified the parties that the case has been submitted for final decision or after oral argument is held, whichever is later, unless the Agency Head remands the case to the administrative law judge for further proceedings.

E. Subpart-by-Subpart Summary and Discussion of Local Rules

1. OCC Local Rules

The Uniform Rules of administrative procedure in subpart A generally replace the procedures governing formal adjudications in 12 CFR part 19, subparts A–J. The OCC's Local Rules replace the procedures in subparts K–O of part 19 concerning certain formal and informal adjudications, practice before the OCC, and formal investigations. The text of subparts C, D, E, J, and K corresponds to the text of subparts K, M, L, N, and O, respectively, in the current part 19. In the event of inconsistency with the provisions of subpart A, the Local Rules will govern. The Local Rules also provide additional rules applicable to formal adjudications, discovery depositions, and other document filing with the OCC.

Subpart B—Filings With the Comptroller

This is a new provision which incorporates the procedures found in § 19.11. All materials to be filed with or referred to the Comptroller or the administrative law judge under part 19 are to be filed with the Hearing Clerk. This does not include requests for document discovery or responses to such requests because these documents are not required to be filed with the administrative law judge or the Comptroller. However, motions to limit discovery or to compel production would be filed with the Hearing Clerk because these documents are to be filed with the administrative law judge.

Subpart C—Removals, Suspensions, and Prohibitions When a Crime is Charged or a Conviction is Obtained

This subpart applies to informal hearings afforded an institution-affiliated party who has been suspended or removed from office or prohibited from further participation in bank affairs by the Comptroller. The text of this subpart corresponds to the text of the existing subpart K, which has been incorporated into this subpart with the following changes:

a. The decisional authority of the presiding officer in § 19.113 has been revised to indicate that the officer shall issue a "recommended" decision instead of an "initial" decision. The proceedings in this subpart are informal in nature and not by statute subject to the Uniform Rules or the APA; however, in this instance, the OCC's informal procedures have been set up to parallel the Uniform Rules, which require the presiding officer to issue a recommended decision.

b. The term "OCC's interested division" is replaced with "OCC's Enforcement and Compliance Division".

c. Appropriate references to the Uniform Rules are incorporated into this subpart.

Subpart D—Exemption Hearings Under Section 12(h) of the Securities Exchange Act of 1934

This subpart applies to informal hearings that may be held by the Comptroller, pursuant to the authority of the Securities Exchange Act of 1934, to grant certain exemptions from the securities laws. The text of this subpart corresponds to the text of the existing subpart M, which has been incorporated into this subpart with only minor changes. As in the preceding subpart, these include the revision of the authority of the presiding officer to issue a "recommended" decision and the incorporation of appropriate references to the Uniform Rules.

Subpart E—Disciplinary Proceedings Involving the Federal Securities Laws

This subpart governs formal adjudications pursuant to the authority of the Exchange Act to take disciplinary actions against banks acting as, associated with, or seeking to become associated with a municipal securities dealer, a government securities broker or dealer, or a transfer agent.

The text of this subpart corresponds to the text of the existing subpart L, which has been incorporated into this subpart with only minor changes. The proceedings shall be instituted on a public basis. Pursuant to § 19.33 of subpart A, a request for a private hearing may be filed within 20 days of service of the notice of assessment. Except as provided in this subpart, the Uniform Rules in subpart A will apply to these proceedings.

Subpart F—Civil Money Penalty Authority under the Securities Laws

This subpart governs formal adjudications pursuant to the authority of section 21B of the Exchange Act (15 U.S.C. 78u–2), as added by section 202 of the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 (Pub. L. 101–429). These provisions provide for the issuance of civil money penalties against banks acting as, associated with, or seeking to become associated with a municipal securities dealer, a government securities broker or dealer, or a transfer agent.

The provisions of subpart A are applicable to these proceedings. The proceedings shall be instituted on a public basis. Pursuant to § 19.33 of subpart A, a request for a private hearing may be filed within 20 days of service of the notice of assessment.

Subpart G—Cease-and-Desist Authority Under the Securities Laws

This subpart governs informal adjudications pursuant to the authority of section 21C of the Exchange Act (15 U.S.C. 78u–3), as added by section 203 of the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 (Pub. L. 101–429). These provisions provide for the issuance of cease-and-desist proceedings against a bank for violation of certain provisions of the Exchange Act.

These proceedings are not "required by statute to be determined on the record after opportunity for an agency hearing," and thus are not "formal" adjudications subject to the APA. See 5 U.S.C. 554(a). The OCC has determined, however, that these proceedings should be conducted in a manner comparable to a formal adjudication to afford affected parties with the full procedures of the APA.

The Senate report accompanying the legislation appears to contemplate that the procedures governing these proceedings would be similar to the procedures for a formal adjudication. The report calls for a hearing before an administrative law judge and compares these proceedings to the formal cease-and-desist proceedings under the banking laws (12 U.S.C. 1818(b)):

> Before the SEC may issue a permanent order, the SEC must provide a respondent with notice and opportunity for a hearing. A hearing before an administrative law judge must be set to commence no earlier than thirty days and no later than sixty days after issuance of the notice, unless the respondent consented to an earlier or later date. A respondent has the right to appeal an adverse decision by an administrative law judge to the full SEC, which considers the evidence *de novo*, the same right that respondents currently have in other SEC administrative proceedings. If the SEC affirms on appeal, the entry of a permanent cease-and-desist order may be appealed to a U.S. court of appeals in the same way as any other SEC order entered under the securities laws. This procedure is similar to that provided under the Federal Deposit Insurance Act with respect to FDIC cease-and-desist proceedings.

S. Rpt. No. 101–337, 101st Cong., 2d Sess. 19 (1990). See also H.R. Rep. No. 101–616, 101st Cong., 2d Sess. 24–25 (1990).

This subpart provides, therefore, that the provisions for formal adjudications in subpart A are applicable to these proceedings. The proceedings shall be commenced on a public basis. Pursuant to § 19.33 of subpart A, a request for a private hearing may be filed within 20 days of service of the notice of charges.

Subpart H—Change in Bank Control

This subpart governs formal adjudications under section 7(j) of the FDIA (12 U.S.C. 1817(j)) concerning the review of a determination by the Comptroller disapproving an application to acquire control of a national bank.

Upon the issuance of the OCC's written disapproval of a change-in-control application, the applicant may file a written request for a hearing within ten days after service of the notice of disapproval. To preserve the applicant's right to a hearing, an answer must also be filed within 20 days of the date of the notice, specifically denying those portions of the notice which are disputed. Failure to file a timely request for hearing or answer shall constitute a waiver of the opportunity for a hearing. In such a case, the notice of disapproval shall constitute a final and unappealable order.

As provided in § 19.16(a)(2) of subpart A, change-in-control proceedings shall commence with the issuance of an order by the Comptroller. This hearing order shall set forth the OCC's jurisdictional authority over the proceeding and shall address the applicant's request for hearing. Except as provided in this subpart, the Uniform Rules in subpart A will apply to these proceedings.

Subpart I—Discovery Depositions and Subpoenas

Discovery Depositions. This subpart provides that a party may take the deposition of an expert or of another person, including another party, who has direct knowledge of matters that are non-privileged, relevant, and material to the proceeding and where there is a need for the deposition. While permitting the depositions of experts and persons having direct knowledge of the matters at issue in a proceeding, this provision is not intended to allow unlimited deposition discovery or the taking of senior Agency officials' depositions, unless those individuals have direct knowledge about the facts of the case. Rather, it is intended to permit limited deposition discovery of experts and persons having direct knowledge of the facts who may be called on to testify at the administrative hearing.

Prior to taking a deposition, a party must give notice in writing to every other party to the proceeding. All discovery depositions must be completed within ten days of the scheduled hearing date, except with the permission of the administrative law judge for good cause shown.

During a deposition, each party shall have the right to examine the witness with respect to all non-privileged, relevant, and material matters. Failure to object to questions or exhibits shall not be deemed a waiver except where the grounds for the objection might have been avoided if the objection had been timely presented.

At any time after a party receives notice of a deposition, that party may file a motion for a protective order prohibiting, terminating, or limiting the scope or manner of the taking of a deposition. The administrative law judge shall grant such protective order upon a showing of sufficient grounds, including that the deposition: is unreasonable, oppressive, excessive in scope, or unduly burdensome; involves privileged, irrelevant, or immaterial matters; involves unwarranted attempts to pry into a party's preparation for trial; or is being conducted in bad faith or in such manner as to unreasonably annoy, embarrass, or oppress the witness.

Deposition Subpoenas. This subpart also provides that at the request of a party, the administrative law judge shall issue a subpoena requiring the attendance of a witness at a deposition. The party requesting the subpoena is responsible for serving it on the person named therein, or on that person's counsel. The person named in the subpoena may file a motion to quash or modify the subpoena within the time for compliance set forth in the subpoena, but in no case later than ten days after the date of service. If the subpoena is served within 15 days of the hearing, the person named in the subpoena must file a motion to quash or modify the subpoena within five days after the date of service.

Subpart J—Formal Investigations

This subpart and the conflict of interest provision of the Uniform Rules (§ 19.8 of subpart A) shall apply to formal investigations initiated by order of the Comptroller or the Comptroller's delegate, pursuant to the authority of the banking laws and the Exchange Act. The text of this subpart corresponds to the text of the existing subpart N, which has been incorporated into this subpart with minor modifications to reference the Uniform Rules.

Subpart K—Parties and Representational Practice Before the OCC: Standards of Conduct

This subpart sets forth rules relating to parties and representational practice before the OCC, including the imposition of disciplinary sanctions against individuals who appear before the OCC in a representational capacity in an adjudicatory proceeding under this part

VOL
56
ISS
116
JE
17
1991
UMI

or in other matters relating to a client's rights, privileges, or liabilities. The text of this subpart corresponds to the text of the existing subpart Q, which has been incorporated into this subpart with minor modifications to reference the Uniform Rules and to clarify the scope of the proceedings.

Subpart L—Equal Access to Justice Act

This subpart references the regulations governing Equal Access to Justice claims with respect to OCC formal adjudicatory proceedings.

2. Board of Governors Local Rules

In addition to the amendments to part 263 effected by the Uniform Rules, the Board of Governors (or "Board" in the Local Rules) proposes to make complementary amendments to part 263 which supplement the Uniform Rules (proposed subpart B), readopt portions of the current part 263 (proposed subparts C, D and E) and add new procedures to the Board's rules of practice (proposed subparts F and G).

Subpart B—Board of Governors Local Rules Supplementing the Uniform Rules

This subpart B adopts the Uniform Rules for all formal adjudications conducted by the Board, including the use of the Office of Financial Institution Adjudication in all formal proceedings. Proposed subpart B also supplements the Uniform Rules by providing for issues specific to the Board, such as definitions and addresses for filing papers and documents with the Board.

This subpart also includes amendments to the Board's rules for discovery by deposition in formal adjudicatory proceedings. In brief, the Board proposes that a party may depose an individual with knowledge of facts material and relevant to the underlying proceeding, who, in most cases, would be a prospective witness in a hearing. A party seeking to take a deposition must apply to the administrative law judge for the issuance of a subpoena, and any party may oppose such a request. Should a subpoena be issued, the person named in the subpoena may seek to have the subpoena quashed or modified. Any party or the deponent may also seek a protective order to guard against abusive or burdensome depositions. The Board believes that the judicious use of depositions of prospective witnesses will enhance the discovery process and will lead to the satisfactory settlement of actions before commencement of the hearing. The administrative law judge has the plenary authority to control the conduct of administrative proceedings, including discovery, and it is expected that such authority will be exercised to ensure that discovery depositions are used properly and not for harassment or delay.

Subpart C—Procedures for Assessment of Civil Money Penalties

This proposed subpart adopts certain provisions of existing subpart B relating to the opportunity for informal proceedings and the relevant considerations in assessing fines. This subpart also provides that the Board, in any final order of assessment, may set the penalty at an amount that differs from that established in a notice of assessment.

Subpart D—Rules and Procedures Applicable to Suspension or Removal of an Institution-Affiliated Party Where a Felony is Charged or Proven

Except for minor changes noted below, this subpart, which governs suspension and removals under section 8(g) of the FDIA (12 U.S.C. 1818(g)), is readopted from the current part 263. Proposed subpart D has been modified by replacing the term "bank official" with the term "institution-affiliated party."

Subpart E—Procedures for Issuance and Enforcement of Directives to Maintain Adequate Capital

Proposed subpart E implements the capital directive provisions of the International Lending Supervision Act of 1983 (12 U.S.C. 3901 *et seq.*). Subpart E is readopted from the current Part 263, except that it eliminates the now-moot requirement found in current § 263.38(e) and amends the references to the now-applicable Capital Adequacy Guidelines of the Board of Governors.

Subpart F—Practice Before the Board

This subpart contains provisions for the discipline of practitioners before the Board supplementing the proceeding-specific sanctions contained in subpart A. This subpart represents a significant expansion of the Board's existing rules regarding practice before the Board now set forth in § 263.3(b). The proposed rule defines practice broadly to include not only the representation of parties in administrative enforcement proceedings, but the representation of parties in the Board's application and licensing process.

The proposed rule authorizes the Board to censure, suspend or debar an individual from practice before the Board under specified circumstances. For example, the Board could take disciplinary actions against a practitioner if such person engaged in conduct set forth in § 263.94, refused to comply with the procedures set forth in part 263, or willfully or knowingly deceived or misled any client. The kind of conduct set forth in § 263.94 that could give rise to a disciplinary proceeding include willful violations of Federal banking laws, knowingly giving false or misleading information to the Board or any member of the Board's staff, disbarment or suspension from practice as an attorney or accountant by the appropriate authority based on a criminal conviction, or suspension or debarment of practice before the other agencies, or the Securities and Exchange Commission.

Under proposed § 263.95, the Board, at its option, may act upon information that could form the basis of a disciplinary proceeding. The Board may, without any further proceeding, censure the individual involved in the misconduct. The Board may, after giving the individual notice and an opportunity to respond, initiate a formal proceeding, which, in most cases, will be private. Under proposed § 263.96, an individual charged with misconduct may choose to forgo his or her right to a hearing and voluntarily agree to a suspension or debarment.

Proposed § 263.96 sets forth the effect of the various types of disciplinary orders that the Board may issue. A person who has been debarred cannot practice before the Board unless the individual is otherwise permitted by the Board. Suspension orders are effective for a defined term, during which the suspended person cannot practice before the Board. A censure order will not bar an individual from practice before the Board, although such practice must conform to any conditions imposed by the Board. The Board will grant a petition for reinstatement from any debarred person only when the Board finds that the petitioner will act in accordance with the appropriate standards of conduct and that reinstatement is not contrary to the public interest. Section 263.99 provides that a request for reinstatement will be limited to written submissions unless the Board orders an informal hearing.

These proposed rules, while new to the Board, resemble rules that have been adopted in varying forms by the other banking agencies and by other Federal agencies. The Board contemplates applying these disciplinary sanctions only in egregious cases of misconduct in practice before the Board, and after the practitioner has had an opportunity for a formal hearing.

Subpart C—Rules Regarding Claims Under the Equal Access to Justice Act

This subpart implements the provisions of the Equal Access to Justice Act, 5 U.S.C. 504. The proposed regulation establishes eligibility standards for an award, the required contents of an application for an award, including the required statement of net worth, standards for the reasonableness of claimed fees, and procedures for adjudicating an application for an award.

3. FDIC Local Rules

Subpart B—General Rules of Procedure

Section 308.100, "Definitions", defines the term "Board of Directors" and "designee" of the Board of Directors ("Board"). The term "designee of the Board of Directors" means officers or officials of the FDIC who have been delegated authority to act on behalf of the Board under section 303 of the FDIC's regulations, or by separate resolution of the Board. The term "Executive Secretary", pertaining to the Executive Secretary of the FDIC, is defined to include his or her designee. The definitions of these terms apply to their use in subpart A of part 308, which incorporates the Uniform Rules, and subparts B through P of part 308.

Section 308.101, "Scope of Local Rules," makes clear that the rules contained in subpart A, "Uniform Rules", and subpart B, "General Rules of Procedure", of part 308 do not apply to subparts D through P of part 308 unless specifically provided. Subpart C, "Rules of Practice Before the FDIC and Standards of Conduct" shall apply to any proceeding initiated by the FDIC under part 308.

Section 308.102, "Authority of Board of Directors and Executive Secretary", makes explicit that the Board may perform, direct the performance of, or waive the performance of any act which could be done or ordered by the Executive Secretary. This is in addition to the power to do such with regard to any act that could be performed by the administrative law judge. The rule provides that the Executive Secretary shall have the ability to act in place of the administrative law judge but may not hear a case on the merits or make a recommended decision.

Section 308.103, "Appointment of administrative law judge", contains the procedures by which the appointment of an administrative law judge will be accomplished. It provides that all hearings within the scope of part 308 shall be held before an administrative law judge of OFIA unless the Board directs otherwise, or unless the Local Rules specifically provide to the contrary. The Executive Secretary shall immediately upon the issuance of a Notice, refer a proceeding to OFIA for the appointment of the administrative law judge. OFIA shall then advise the parties when a judge has been appointed. This differs from current practice insofar as an administrative law judge is not now appointed until after a respondent requests a hearing. It also reflects the establishment of OFIA as the appointing body rather than the Executive Secretary.

Sections 308.104 and 308.105 address housekeeping matters concerning maintenance of the record and the filing of papers. Section 308.104, "Filing with the Board of Directors", makes clear that any papers required to be filed with the Board should be filed with the Executive Secretary at the stated address. Such filings include the record in the case which is to be filed with the Executive Secretary following the issuance of a recommended decision; the recommended decision filed by the administrative law judge after a motion for summary disposition; referrals by the administrative law judge to the Board for interlocutory review; motions filed by the parties after the record has been certified to the Board; exceptions and requests for oral argument; and any other papers required to be filed with the Board under part 308. This reflects the approach stated in § 308.105 that the Executive Secretary will be the official custodian of the record in a case, except when the administrative law judge has jurisdiction over the case.

Section 308.105, "Custodian of the record", makes clear that the Executive Secretary is the official custodian of the record at all times during which the administrative law judge does not have jurisdiction in the case.

Section 308.106, "Written testimony in lieu of oral hearing", preserves current practice at the FDIC, which authorizes hearings in which most, or all, of the direct testimony is presented in written form. Absent objection by a party, the administrative law judge may order that the parties present their cases in chief and rebuttal in the form of exhibits and written statements sworn to by the witness offering the evidence. Any such order shall also allow any party to call adverse witnesses or parties to testify orally, and shall provide for a right to cross examination. Written testimony on direct, exhibits, and rebuttal are to be simultaneously submitted by the parties. The failure of any party to submit written testimony pursuant to such an order is deemed to be a waiver of that party's right to present evidence, except the testimony of a previously identified hostile witness or adverse party. A party's failure to present rebuttal evidence in written form, if not so specifically ordered, is not waived by that party's failure to file written testimony. Late filings may be allowed and accepted only for good cause shown.

Section 308.107, "Document discovery", provides that unless expressly provided in specific subparts, discovery may be had only through the production of documents, and no other form of discovery shall be allowed. Questioning of persons providing documents pursuant to a subpoena shall be limited to the identification of such documents and a reasonable examination as to whether such person conducted an adequate search for and produced all subpoenaed documents. This is the current practice of the FDIC.

Subpart C—Rules of Practice Before the FDIC and Standards of Conduct

Section 308.106, "Sanctions," is included in revised subpart C to make clear that administrative law judges and the Board of Directors have authority to effectively deal with the significant problem of parties and their counsel failing to comply with the requirements of part 308 and/or with orders. Under § 308.106(a), sanctions may be imposed when any counsel or party has acted in a manner contrary to any applicable statute, regulation, or order, and the party's or counsel's conduct is contemptuous or has materially injured or prejudiced some other party.

Sanctions imposed in accordance with § 308.106(b) may include one or more of the following: (1) Issuing an order against the party; (2) striking any testimony, rejecting any documentary evidence offered, or striking papers filed by the party; (3) precluding the party from contesting specific issues; (4) precluding the party from challenging certain evidence offered by another party; (5) refusing a late filing or conditioning acceptance of a late filing on any terms that are just; and (6) assessing reasonable expenses, including attorney's fees, incurred by the other party as a result of the offending party's improper action or inaction.

Under § 308.106(c), dismissal of an action as a sanction for the failure to hold a hearing within the time period specified in part 308 or based upon the failure of an administrative law judge to render a recommended decision within the time period specified in Part 308 may only be granted if the delay is solely the result of the conduct of the FDIC enforcement counsel, that conduct is unexcused, the moving respondent took

VOL 56 ISS 116 JE 17 1991 UMI

all reasonable steps to oppose and prevent the delay, the respondent has been materially prejudiced or injured, and no lesser or different sanction is adequate.

Paragraph (d) of § 308.106 sets out the general procedure for the imposition of sanctions. The administrative law judge may impose sanctions on his or her own motion or at the request of any party. Prior to their imposition, all sanctions, except the refusal to accept late papers, require notice to the parties and opportunity for counsel or the party against whom sanctions would be imposed to be heard. The form that the opportunity to be heard shall take is largely left to the discretion of the administrative law judge. For example, the opportunity to be heard may be limited to an oral response immediately after the violative action or inaction is noted by the administrative law judge. Requests for, and the imposition of, sanctions are to be treated for interlocutory review purposes in the same manner as any other ruling by the administrative law judge, i.e., in accordance with § 308.28 of the Uniform Rules.

Section 308.109, "Suspension and Disbarment," authorizes summary suspension from practice in a particular FDIC matter based upon contemptuous conduct in that matter. Section 308.109 of the proposed regulations provides for mandatory and automatic suspension and disbarment of attorneys under certain circumstances and gives the Board of Directors discretion to suspend and disbar under other circumstances.

Under § 308.109(a), the Board of Directors has the power to suspend or revoke an attorney's privilege of practicing before the FDIC based not only on a finding by the Board of Directors that the attorney engaged in contemptuous conduct before the agency, but also upon a finding that the attorney does not possess the requisite qualifications to represent others, is seriously lacking in integrity or has engaged in material unethical or improper professional conduct, or has engaged in or aided another in engaging in a material and knowing violation of the FDIA. The Board may suspend or revoke the privilege to practice before the FDIC on these grounds only after notice of and opportunity for a hearing.

Once suspended or disbarred from practice before the FDIC by the Board pursuant to § 308.109(a), a counsel may not make an application for reinstatement for at least three years, and thereafter may make a new request for reinstatement no sooner than one year after the counsel's most recent reinstatement application. A counsel may be reinstated by the Board for good cause shown.

Under § 308.109(b) a party's counsel is automatically suspended or disbarred if he or she is suspended or disbarred by any court of the United States or by the OCC, the Board of Governors, the OTS, the Securities and Exchange Commission, or the Commodity Futures Trading Commission. A person who has within the past ten years been convicted of a felony, or of a misdemeanor involving moral turpitude, is also automatically suspended from practicing before the FDIC.

Reinstatement after a suspension or disbarment under § 308.109(b) may be made by the Executive Secretary if all grounds for suspension are subsequently removed by a reversal of the conviction or termination of the underlying suspension or disbarment. An application for reinstatement under § 308.109(b) on any other grounds may be filed at any time not less than one year after the applicant's most recent application. Until the Board has reinstated the applicant for good cause shown, the suspension shall continue.

An applicant for reinstatement under either the discretionary or mandatory suspension and disbarment provisions may, in the Board's sole discretion, be afforded a hearing. Hearings conducted pursuant to this section shall be handled in the same manner as other hearings under this subpart C, except that in proceedings to terminate an existing FDIC suspension or disbarment order, the person seeking the termination shall bear the burden of going forward with the application and with proof, and provided that the Board of Directors may limit any such hearings to written submissions.

Finally, § 308.109(d) of the proposed regulations provides that any counsel found in contempt by the administrative law judge may be summarily suspended from participation in that proceeding.

Preamble to Subparts D–P

Subparts D–P contain rules and procedures that govern specific types of formal and informal proceedings conducted by the FDIC. Generally, revisions made to these subparts are either clarifying in nature or were made to conform the subparts to, or avoid overlaps with, the Uniform Rules.

Subpart D—Rules and Procedures Applicable to Proceedings Relating to Disapproval of Acquisition of Control

Subpart D governs proceedings in connection with the disapproval of a proposed acquisition of control of an insured nonmember bank. Various changes made to subpart D were made to make this subpart consistent with the Uniform Rules. A new section, § 308.114, was added to this subpart on procedures relating to disapproval of acquisition of control. That section provides that the person proposing to acquire control of an insured depository institution shall bear the ultimate burden of persuasion and that the FDIC has the burden of going forward with a *prima facie* case. This accords with section 556(d) of the APA (5 U.S.C. 556(d)), which states "Except as otherwise provided by statute, the proponent of the rule or order has the burden of proof." Courts have interpreted this section as imposing the burden of proof in licensing or applications cases upon the applicant. *See Savage* v. *Commodities Futures Trading Commission*, 548 F.2d 102 (7th Cir. 1977). The FDIC has adopted this position in *In the Matter of Peder D. Sletteland*, 2 P–H FDIC Enf. Dec. & Ord. ¶ 5152, at p. A–1518.

Subpart E—Rules and Procedures Applicable to Proceedings Relating to Assessments of Civil Penalties for Willful Violations of the Change in Bank Control Act

Subpart E governs proceedings relating to assessments of civil penalties for willful violations of the Change in Bank Control Act. This subpart has been revised in order to comply with the changes to these provisions made by FIRREA and to make this subpart consistent with the Uniform Rules.

Subpart F—Rules and Procedures Applicable to Proceedings for Involuntary Termination of Insured Status

Subpart F governs proceedings for the involuntary termination of insured status. This type of action is to be conducted according to the Uniform Rules. Similar to the preceding subparts, this subpart has been changed to make the provisions conform with the changes to the FDIA made by FIRREA. This includes changing the time frames to correspond with those of FIRREA, substituting the term, "insured depository institution," for that of "insured bank" and describing the notification to primary regulator and the notice of intent to terminate insured status.

Subpart G—Rules and Procedures Applicable to Proceedings Relating to Cease-and-Desist Orders

Subpart G governs proceedings relating to cease-and-desist orders. The changes in subpart G were made for purposes of clarity and to make changes to the provisions as mandated by the amendments to the FDIA made by FIRREA.

Subpart H—Rules and Procedures Applicable to Proceedings Relating to Assessment and Collection of Civil Penalties for the Violation of Cease-and-Desist Orders and of Certain Federal Statutes

Subpart H governs proceedings relating to assessment and collections of civil money penalties for the violation of cease-and-desist orders and of certain Federal statutes. Several sections of old subpart H have been deleted as being redundant with provisions of the Uniform Rules and other provisions, including those concerning call report penalties, have been added to reflect the changes made by FIRREA.

Subpart I—Rules and Procedures for Imposition of Sanctions Upon Municipal Securities Dealers or Persons Associated With Them and Clearing Agencies or Transfer Agents

Subpart I governs procedures for the imposition of sanctions upon municipal securities dealers or persons associated with them and clearing agencies or transfer agents. There have been minor modifications made in this subpart in order to make the provisions herein consistent with the Uniform Rules.

Subpart J—Rules and Procedures Relating to Exemption Proceedings Under Section 12(h) of the Securities Exchange Act of 1934

Subpart J governs exemption proceedings under section 12(h) of the Exchange Act. Like subpart J, there have been minor structural changes in order to make these provisions consistent with the Uniform Rules.

Subpart K—Procedures Applicable to Investigations Pursuant to Section 10(c) of the FDIA

Subpart K governs procedures applicable to investigations pursuant to section 10(c) of the FDIA. The provisions are designed to spell out the scope of the FDIC's authority under 10(c) of the FDIA to conduct investigations of both open and failed insured banks, institutions making applications to become insured banks, and any other types of investigations. The provisions make specific certain of the procedures to be used during such investigations.

Section 308.144, "Scope," indicates that the FDIC's investigatory power under section 10(c) of the FDIA extends to both open and failed insured banks.

Section 308.145, "Order to conduct investigation," has been modified to state that persons authorized to issue orders of investigation are set forth in part 303. The order of investigation indicates the purpose of the investigation and that the persons who authorized the investigation terminate it upon completion.

Section 308.146, "Powers of Person Conducting Investigation," spells out the Board's authority to summarily suspend for contemptuous conduct any counsel representing a witness during the investigation. This section also has made explicit that the person conducting the investigation may obtain assistance from others both within and outside the FDIC.

Section 308.148, "Rights of Witnesses," spells out that a witness is to be furnished with a copy of the order of investigation if the witness so requests.

Subpart L—Procedures and Standards Applicable to a Notice of Change in Senior Executive Officer or Director Pursuant to Section 32 of the FDIA

Subpart L governs proceedings for the disapproval of candidates for senior executive officer and director. Modifications in this subpart include re-designating the appeal procedures in §§ 308.153 and 308.154 and labeling them "request for review," as well as making these provisions consistent with the Uniform Rules. Under § 308.155, an applicant is given an opportunity for an oral hearing. The hearing is conceived as an informal proceeding where a presiding officer determines whether to allow the presentation of witnesses. No discovery is permitted; however, an applicant may introduce relevant and material documents on the record. Like the provisions on change-in-control proceedings in subpart D, the ultimate burden of persuasion in § 308.155(b) is imposed upon the candidate for director or senior executive officer for the same rationale, and the FDIC has the burden of going forward with its *prima facie* case.

Subpart M—Procedures and Standards Applicable to an Application Pursuant to Section 19 of the FDIA

Subpart M governs proceedings for applications under section 19 of the FDIA. This subpart has been revised in order to comply with the changes to section 19 made by FIRREA and the Comprehensive Thrift and Bank Fraud Prosecution and Taxpayer Recovery Act of 1990, and to make this subpart consistent with the Uniform Rules. Section 308.158(b) of subpart M permits the filing of a section 19 application at any time more than one year after the issuance of a decision denying an application filed pursuant to section 19. Under § 308.160, an applicant is given an opportunity for an oral hearing. The hearing is conceived as an informal proceeding where a presiding officer determines whether to allow the presentation of witness. No discovery is permitted; however, an applicant may introduce relevant and material documents on the record. Like the provisions for the change-in-control proceedings and the procedures for section 32 of the FDIA, the burden of proof in § 308.160(b) has been shifted to the applicant, and the FDIC has the burden of going forward with its *prima facie* case.

Subpart N—Rules and Procedures Applicable to Proceeding Relating to Suspension, Removal, and Prohibition Where a Felony is Charged

Subpart N governs proceedings for suspension, removal, and prohibition pursuant to section 8(g) of the FDIA where a felony is charged. The changes in subpart N were made for purposes of clarity and to make changes to the provisions as mandated by the amendments to the FDIA made by FIRREA. Consistent with other proceedings in which a presiding officer makes recommended decisions to the Board of Directors, there is no discovery in proceedings conducted under this subpart.

Subpart O—Liability of Commonly-Controlled Depository Institutions

Subpart O is a new subpart of part 308 and governs proceedings pertaining to section 5(e) of the FDIA. The procedures set forth herein reflect those that have been used by the FDIC under current part 308 since the passage of section 5(e) of the FDIA.

Section 308.165, "Scope", states that, in addition to the procedures set forth in this subpart, the procedures in subpart B shall apply to proceedings in connection with the assessment of cross guaranty liability against commonly-controlled institutions. Section 308.166, "Grounds for assessment of liability", restates the statutory requirements for the assessment of liability.

Section 308.167, "Notice of Assessment of Liability", sets forth the matters that must be contained in the Notice of Assessment of Liability, including the basis for the FDIC's jurisdiction; a statement of the FDIC's good faith estimate of the amount of loss that it has incurred or anticipates incurring; a statement of the method used to calculate such loss; a proposed order directing the payment by the liable institution of the amount of loss and the schedule under which the payment will be due; and, in cases in which more than

VOL 56 ISS 116 JE 17 1991 UMI

one liable institution is involved, each institution's share of the liability. Furthermore, the Notice must advise the liable institution(s) that an answer and a request for a hearing must be filed within 20 days of the service of the Notice, and that failure to timely file both an answer and request a hearing will render the Notice of Assessment a final and unappealable order. Finally, the Notice must state that, if a hearing is requested, such hearing will be held 120 days after service of the Notice in the judicial district where the liable institution is located; or in cases involving more than one liable institution, the hearing will be held in the judicial district in which at least one of the institutions is found.

Section 308.100, "Effective date of and payment under an order to pay", makes clear that the payment of the assessed amount shall be due on or before the 21st day after service of the Notice of Assessment in accordance with the terms and schedule set forth therein. Where any Order to Pay has become final and unappealable by reason of default under § 308.19(d)—which provides that failure to both file an answer and request a hearing within the time limits provided by this subpart shall render the Notice of Assessment final and unappealable—payment shall automatically be deemed to have become due and payable upon service of the Order to Pay, or as otherwise stated therein. All payments collected under section 5(e) of the FDIA are to be paid to the FDIC.

Subpart P—Rules and Procedures Relating to the Recovery of Attorney Fees and Other Expenses

Subpart P governs proceedings relating to the recovery of attorney fees and other expenses under the Equal Access to Justice Act, 5 U.S.C. 504. The revisions to this subpart are minor and are made to make this subpart conform to the Uniform Rules.

Regulatory Factors

Part 308 was selected for review under FDIC's Regulation Review Program (see 50 FR 14247, April 22, 1985). This revised part 308 is a result of the review conducted.

4. OTS Local Rules

In addition to the uniform hearing rules proposed today, OTS proposes additional procedures and rules of practice for OTS adjudicatory proceedings. These include applying the uniform rules to OTS-specific proceedings (§ 509.100), allowing the use of depositions in discovery (§ 509.102), providing further clarification for the assessment and collection of civil money penalties (§ 509.103) and providing further procedural guidance (§ 509.104). OTS is also proposing several conforming amendments to modify cross references and to delete nonexistent terms.

Section 509.100 Scope

The three types of proceedings added by this provision are currently covered by part 509; however, they are not proceedings common to four of the five agencies and did not qualify for inclusion in the uniform rules. Accordingly, they are listed in the OTS scope.

Section 509.101 Appointment of OFIA.

Currently, OTS does not employ its own administrative law judges and must borrow such judges from other federal agencies pursuant to the requirements of the Office of Personnel Management. Section 916 of FIRREA also requires the five federal regulatory agencies to jointly create a pool of administrative law judges. Creation of the Office of Financial Institution Adjudication implements this portion of FIRREA. As the time frame for creation of OFIA is the same as for the promulgation of the Uniform Rules, modification of OTS procedures to reflect OFIA is appropriate.

Section 509.102 Deposition Discovery.

OTS proposes to change its procedures to permit the use of depositions in discovery in certain situations. This section provides that a party may take the deposition of an expert or another person, including another party, who has direct knowledge of matters that are non-privileged, relevant and material to the proceeding. The scope of the questioning is limited to those matters that the witness has factual, direct and personal knowledge. Depositions of experts are limited to those experts who will testify at the hearing.

These standards for depositions are intentionally narrower than those provided in Rule 26 of the Federal Rules of Civil Procedure. The use of depositions in discovery pursuant to this section is not intended to reach persons whose testimony may lead to discoverable information or material. In this manner the proposed rule is significantly more restrictive than the Federal Rules of Civil Procedure.

In addition, this limitation is intended to discourage attempts to depose Agency personnel who have no direct, factual knowledge of a proceeding. This means that those Agency employees who have not participated directly or personally in the examination process or direct supervision of savings associations would not qualify under the scope limitation unless they are substantially and materially involved. This means that the senior management officials of the Agency, including, but not limited to, the Director, the Chief Counsel, the Deputy Director for Washington Operations, the Deputy Director for Regional Operations, and Regional and District Directors of OTS or persons in equivalent or similar positions are not considered relevant or material witnesses for deposition discovery purposes. By limiting deposition discovery in this manner, OTS believes that it will serve the interests of justice without unduly handicapping its ability to conduct the business of the agency.

The procedures for deposition discovery require a party, prior to taking a deposition, to give notice in writing to the deponent and to every other party to the proceeding. All discovery depositions must be completed within ten days of the scheduled hearing date, except with the permission of the administrative law judge for good cause shown.

During a deposition, each party shall have the right to examine the witness with respect to all non-privileged, relevant, and material matters for which the witness has factual, direct and personal knowledge. Failure to object to questions or exhibits shall not be deemed a waiver except where the grounds for the objection might have been avoided if the objection had been timely presented.

At any time after a party receives notice of a deposition, that party may file a motion for a protective order prohibiting, terminating, or limiting the scope of manner of the taking of a deposition. The administrative law judge shall grant such protective order upon a showing of sufficient grounds, including that the deposition: is unreasonable, oppressive, excessive in scope, or unduly burdensome; involves privileged, investigatory, trial preparation, irrelevant or immaterial matters; or is being conducted in bad faith or in such manner as to unreasonably annoy, embarrass, or oppress the witness.

The section also provides that at the request of a party, the administrative law judge shall issue a subpoena requiring the attendance of a witness at a deposition. The party requesting the subpoena is responsible for serving it on the person named therein, or on that person's counsel. The person named in the subpoena or a party may file a motion to quash or modify the subpoena within the time for compliance set forth in the subpoena, but in no case later than ten days after the date of service. If the subpoena is served within 25 days of the scheduled date of the hearing, the motion to quash or modify the subpoena must be filed within five days after the date of service. Enforcement of the subpoena is the same as provided in subpart A at § 509.27(d).

Section 509.103 Civil Money Penalties

The proposed provision updates existing provisions in subpart B of 509 and affirmatively states the long held OTS position as to the remedial nature of civil money penalties.

Section 509.104 Additional Procedures

This proposed section adds further clarification or guidance to the uniform rules. Paragraph (a) provides for the filing of replies to written exceptions to an administrative law judge recommended decision. It is OTS's experience that replies to exceptions assist in the final determination; however, they should not be used to further prolong the proceeding. Accordingly, a 10 day period to file replies is provided.

Paragraph (b) emphasizes that all motions are to be filed with the administrative law judge; however, upon certification of the proceeding to the Agency Head, motions are filed with OTS during a limited ten-day time period. This limited period of time for filing motions coincides with the time for filing replies to written exceptions. Failure to file within this ten day time period will provide a basis for denying the motion.

Relatedly, paragraph (c) states expressly what has been an implied power of the administrative law judge to deny dispositive motions including motions to dismiss for lack of jurisdiction. Because most often such motions may be dismissed readily for lack of merit, clarifying the administrative law judge's authority in this area will prevent such motions from delaying proceedings.

Paragraph (d) proposes to set a time by which OTS will notify the parties of the submission of the proceeding for final determination. This will clarify when the 90 day period for final determination begins.

Paragraph (e) proposes to clarify the ability of the Director to extend the time for final determination in accord with *Saratoga Savings & Loan Ass'n* v. *Fed. Home Loan Bank Board*, 879 F.2d 689 (9th Cir. 1989). The Director may extend the time provided by signing the order for such extension. Notification of the extension is to be made after the order has been signed, but the notification of the extension is not required to be within the 90 day period.

Paragraph (f) clarifies existing practices at OTS to allow designated individuals or offices to receive adjudicatory filings. The proposed provision grants OTS greater flexibility to reflect its current structure and to meet changing personnel demands rather than limiting the provision to one particular office.

Paragraph (g) also clarifies the powers of the administrative law judge concerning the presence of electronic media at public hearings. It reserves for the Agency Head of OTS the decision whether to allow the presence of electronic media; however, the administrative law judge maintains the authority to conduct the hearing and set general guidelines over the time, place and manner for attendance at hearings as set forth in § 509.5(10).

The remaining proposed amendments are technical amendments to conform cross-referenced sections and to delete obsolete terms.

5. NCUA Local Rules

Subpart A sets forth Uniform Rules of practice and procedure required by FIRREA to be implemented by the five Agencies. The Uniform Rules comprehensively govern the conduct of administrative hearings required by the APA to be held on the record. The Uniform Rules replace the NCUA's own rules of practice and procedure contained in the existing subpart A.

In addition, the Uniform Rules govern the conduct of administrative hearings addressing actions by the NCUA to issue a cease-and-desist order, to assess civil penalties, and to prohibit, remove or suspend credit union officials. Because the Uniform Rules incorporate the functions of the existing subparts C, D and E pertaining to these types of actions, the new subpart A replaces these existing subparts.

Finally, the provisions of the Uniform Rules supplement the rules and procedures prescribed in the new subparts C, E, and I, which provide for formal adjudications, except when the new subpart A is inconsistent with those rules and procedures.

Subpart B—Local Rules of Practice and Procedure

This subpart is reserved for "Local Rules of Practice and Procedure" which the NCUA may develop in the future to apply to proceedings unique to the NCUA. Such Local Rules would augment the Uniform Rules prescribed in subpart A.

Subpart C—Local Rules and Procedures Applicable to Proceedings for the Involuntary Termination of Insured Status

This subpart redesignates and renumbers existing subpart B governing proceedings to terminate the insured status of a credit union. Such proceedings are formal adjudications. The text of existing subpart B is imported without revision, except that its scope now incorporates the provisions of the Uniform Rules, as set forth in subpart A, to the extent they are not inconsistent with the rules and procedures of subpart C.

Subpart D—Local Rules and Procedures Applicable to Suspensions and Prohibitions Where Felony Charged

This subpart redesignates and renumbers existing subpart F, governing proceedings to suspend or prohibit from participation in the affairs of a credit union any institution-affiliated party which is charged with a felony. Such proceedings are not formal adjudications. The text of existing subpart F is imported substantially without revision. Cross-references in existing § 747.602 to certain rules of practice in existing subpart A have, due to the elimination of that subpart, been replaced in new § 747.302 with the text of the former rules. Likewise, cross-references in existing § 747.507 to § 747.602 ["Remainder of the Board of Directors"] of existing subpart E have, due to the elimination of that subpart, been replaced in new § 747.302 with the text of former § 747.507. The text of these and other provisions of new subpart D (§§ 747.302, 747.306, and 747.307) contain technical revisions to clarify and reflect that proceedings under this subpart are not formal adjudications conducted by an administrative law judge, but rather, are limited, informal proceedings conducted by a Presiding Officer designated by the Board. New subpart D does not incorporate the Uniform Rules, as set forth in subpart A, because those rules do not apply to informal adjudications.

Subpart E—Local Rules and Procedures Applicable to Proceedings Relating to the Suspension or Revocation of Charters and to Involuntary Liquidations

This subpart redesignates and renumbers existing subpart G governing proceedings to suspend or revoke a solvent credit union's charter and to place a solvent credit union into involuntary liquidation under Title I of the FCUA. See 12 U.S.C. 1766(b)(1). Such proceedings are formal adjudications.

VOL
56
ISS
116
JE
17
1991
UMI

The text of existing subpart G is imported without revision, except that the scope of new subpart E incorporates the provisions of the Uniform Rules, as set forth in subpart A, to the extent they are not inconsistent with the rules and procedures of new subpart E. New subpart E also contains technical revisions to clarify and reflect that a hearing requested under this subpart is referred by the Board to OFIA and conducted by an administrative law judge.

Subpart F—Local Rules and Procedures Applicable to Proceedings Relating to the Termination of Membership in the Central Liquidity Facility

This subpart redesignates existing subpart H, which is reserved for rules and procedures governing proceedings to terminate a credit union's membership in the NCUA's Central Liquidity Facility.

Subpart G—Rules and Procedures Applicable to Recovery of Attorneys Fees and other Expenses Under the Equal Access to Justice Act in Board Adjudications

This subpart redesignates and renumbers existing subpart I governing claims proceedings under the Equal Access to Justice Act. Such proceedings are formal adjudications. The text of existing subpart I is imported without revision except for the following revisions to its scope and to the eligibility and application requirements for an award. First, new § 747.601 incorporates the provisions of the Uniform Rules, as set forth in subpart A, to the extent they are not inconsistent with the rules and procedures of new subpart G. Second, paragraph (b) of existing § 747.601 has been eliminated as moot, as there is no adjudication currently pending before the NCUA which was begun prior to September 30, 1984. Third, in new § 747.602(a), the maximum net worth of an individual applicant for an award has been increased to $2 million, and the maximum net worth of an applicant who is a sole proprietor of an unincorporated business or which is a partnership, corporation, association, or public or private organization, has been increased to $7 million. These increases in maximum net worth are mandated by amendments to the Equal Access to Justice Act. Finally, in new § 747.606(c), the statement that the application and documentation requirements of subpart G are exempt from the Paperwork Reduction Act has been eliminated as superfluous. The exemption clearly applies, however, because a decade of experience with the Equal Access to Justice Act has shown that fewer than ten persons or entities in a 12-month period will be subject to the application and documentation requirements of subpart G. See 5 CFR 1320.7(c) and 1320.7(e).

Subpart H—Local Rules and Procedures Applicable to Investigations

This subpart redesignates and renumbers existing subpart J governing both formal and informal investigations conducted by the NCUA. Such investigations are not adjudicative proceedings. The text of existing subpart H is imported without revision. New subpart H does not incorporate the Uniform Rules, as set forth in subpart A, because those rules do not apply to non-adjudicative proceedings.

Subpart I—Local Rules Applicable to Formal Investigative Proceedings

This subpart redesignates and renumbers existing subpart K governing formal investigations conducted by the NCUA. Such investigations are not adjudicative proceedings. The text of existing subpart K is imported without revision. New subpart I does not incorporate the Uniform Rules, as set forth in subpart A, because those rules do not apply to non-adjudicative proceedings.

Subpart J—Local Procedures and Standards Applicable to a Notice of Change in Senior Executive Officers, Directors or Committee Members Pursuant to Section 212 of the Act

This subpart redesignates and renumbers existing subpart L governing notice to the NCUA of a change in senior executive officers, directors or committee members of a credit union. The notice procedure is not a formal adjudication. The text of existing subpart L is imported without revision. New subpart J does not incorporate the Uniform Rules, as set forth in subpart A, because those rules do not apply to non-adjudicative proceedings.

F. Regulatory Flexibility Act Statement

Pursuant to section 605(b) of the Regulatory Flexibility Act, the OCC, Board of Governors, FDIC, OTS, and NCUA, hereby independently certify that this notice of proposed uniform rule is not expected to have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

This rule implements section 916 of FIRREA which requires the Federal banking agencies and the NCUA to develop a set of uniform rules and procedures for administrative hearings. The purpose of this revised regulation is to secure a just and orderly determination of administrative proceedings. Because the Agencies already have in place rules of practice and procedure, this rule should not result in an additional burden for regulated institutions. Furthermore, the rule imposes only minor burdens on all institutions, regardless of size and should not, therefore, cause a significant economic impact on a substantial number of small entities.

G. OCC and OTS Executive Order 12291 Statement

The OCC and the OTS have independently determined that this notice of proposed uniform rule does not constitute a "major rule" within the meaning of Executive Order 12291 and Treasury Department Guidelines. Accordingly, a Regulatory Impact Analysis is not required on the grounds that this notice of proposed common rule, if adopted as a final rule: (1) Would not have an annual effect on the economy of $100 million or more, (2) would not result in a major increase in the cost of financial institution operations or governmental supervision, and (3) would not have a significant adverse effect on competition (foreign and domestic), employment, investment, productivity or innovation, within the meaning of the executive order.

This rule implements section 916 of FIRREA which requires the Federal banking agencies and the NCUA to develop a set of uniform rules and procedures for administrative hearings. Because the Agencies already have in place rules of practice and procedure, these rules should not result in an additional burden for regulated institutions or in additional governmental supervision. These rules setting forth uniform standards of administrative procedure would not have a significant impact on competition or impose other significant economic burdens.

H. NCUA Executive Order 12612 Statement

This proposed rule, like the current part 747 it is replacing, will apply to all federally insured credit unions. The NCUA Board, pursuant to Executive Order 12612, has determined, however, that the proposed rule will not have a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among various levels of government. Further, the proposed rule will not preempt provisions of state law or regulations.

I. Text of Proposed Uniform Rules (All Agencies)

The text of the proposed Uniform Rules appears below. Additionally, each Agency is adopting Local Rules to supplement the Uniform Rules.

Subpart A—Uniform Rules of Practice and Procedure

_____.41 Stays pending judicial review.

Subpart A—Uniform Rules of Practice and Procedure

§ _____.1 Scope.

This subpart prescribes rules of practice and procedure applicable to adjudicatory proceedings as to which hearings on the record are provided for by the following statutory provisions:

(a) Cease-and-desist proceedings under section 8(b) of the Federal Deposit Insurance Act ("FDIA") (12 U.S.C. 1818(b)) and section 206(e) of the Federal Credit Union Act ("FCUA") (12 U.S.C. 1786(e));

(b) Removal and prohibition proceedings under section 8(e) of the FDIA (12 U.S.C. 2828(e)), and section 206(g) of the FCUA (12 U.S.C. 1786(g));

(c) Change-in-control proceedings under section 7(j)(4) of the FDIA (12 U.S.C. 1817(j)(4)) to determine whether the Federal Deposit Insurance Corporation ("FDIC"), the Board of Governors of the Federal Reserve System ("Board of Governors"), the Office of the Comptroller of the Currency ("OCC") or the Office of Thrift Supervision ("OTS") should issue an order to approve or disapprove a person's proposed acquisition of an institution and/or institution holding company;

(d) Proceedings under section 15C(c)(2) of the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78o-5), to impose sanctions upon any government securities broker or dealer or upon any person associated or seeking to become associated with a government securities broker or dealer for which the FDIC, the Board of Governors, the OCC or the OTS is the appropriate Agency.

(e) Assessment of civil money penalties:

(1) *By the FDIC* against institutions, institution-affiliated parties, and certain other persons for which it is the appropriate Agency for any violation of:

(i) Sections 22(h) and 23 of the Federal Reserve Act ("FRA"), or any regulation issued thereunder, and certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1828(j);

(ii) Section 106(b) of the Bank Holding Company Act Amendments of 1970 ("BHCA Amendments of 1970"), and certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1972(2)(F);

(iii) Any provision of the Change in Bank Control Act of 1978, as amended (the "CBCA"), or any regulation or order issued thereunder, and certain unsafe or unsound practices, or breaches of fiduciary duty, pursuant to 12 U.S.C. 1817(j)(16);

(iv) Section 7(a)(1) of the FDIA, pursuant to 12 U.S.C. 1817(a)(1);

(v) Any provision of the International Lending Supervision Act of 1983 ("ILSA"), or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3909;

(vi) Any provision of the International Banking Act of 1978 ("IBA"), or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3108;

(vii) Certain provisions of the Exchange Act, pursuant to section 21B of the Exchange Act (15 U.S.C. 78u-2);

(viii) Section 1120 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") (12 U.S.C. 3349), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 3349; and

(ix) The terms of any final or temporary order issued under section 8 of the FDIA or of any written agreement executed by the FDIC, the terms of any condition imposed in writing by the FDIC in connection with the grant of an application or request, certain unsafe or unsound practices or breaches of fiduciary duty, or any law or regulation not otherwise provided herein pursuant to 12 U.S.C. 1818(i)(2);

(2) *By the Board of Governors* against institutions, institution-affiliated parties, and certain other persons for which it is the appropriate Agency for any violation of:

(i) Any provision of the Bank Holding Company Act of 1956, as amended ("BHCA"), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 1847(b) and (d);

(ii) Sections 19, 22 and 23 of the FRA, or any regulation or order issued thereunder and certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 504 and 505;

(iii) Section 9 of the FRA pursuant to 12 U.S.C. 324;

(iv) Section 106(b) of the BHCA Amendments of 1970 and certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1972(2)(F);

(v) Any provision of the CBCA, or any regulation or order issued thereunder and certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1817(j)(16);

(vi) Any provision of ILSA, or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3909;

(vii) Any provision of the IBA, or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3108;

(viii) Certain provisions of the Exchange Act, pursuant to section 21B of the Exchange Act (15 U.S.C. 78u-2;

(ix) Section 1120 of FIRREA (12 U.S.C. 3349), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 3349; and

VOL 56 ISS 116 JE 17 1991 UMI

(x) The terms of any final or temporary order issued under section 8 of the FDIA or of any written agreement executed by the Board of Governors, the terms of any condition imposed in writing by the Board of Governors in connection with the grant of an application or request, and certain unsafe or unsound practices or breaches of fiduciary duty or law or regulation not otherwise provided herein pursuant to 12 U.S.C. 1818(i)(2);

(3) *By the NCUA* against institutions and institution-affiliated parties for which it is the appropriate Agency for any violation of:

(i) Section 202 of the FCUA, pursuant to 12 U.S.C. 1782(a);

(ii) Section 1120 of FIRREA (12 U.S.C. 3349), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 3349; and

(iii) The terms of any final or temporary order issued under section 206 of the FCUA or any written agreement executed by the NCUA, any condition imposed in writing by the NCUA in connection with the grant of an application or request, certain unsafe or unsound practices or breaches of fiduciary duty, or any law or regulation not otherwise provided herein, pursuant to 12 U.S.C. 1786(k);

(4) *By the OCC* against institutions, institution-affiliated parties, and certain other persons for which it is the appropriate Agency for any violation of:

(i) Any provision of law referenced in 12 U.S.C. 93, or any regulation issued thereunder, and certain unsafe or unsound practices and breaches of fiduciary duty, pursuant to 12 U.S.C. 93;

(ii) Sections 22 and 23 of the FRA, or any regulation issued thereunder, and certain unsafe or unsound practices and breaches of fiduciary duty, pursuant to 12 U.S.C. 504 and 505;

(iii) Section 106(b) of the BHCA Amendments of 1970, pursuant to 12 U.S.C. 1972(2)(f);

(iv) Any provision of the CBCA, or any regulation or order issued thereunder, and certain unsafe or unsound practices and breaches of fiduciary duty, pursuant to 12 U.S.C. 1817(j)(16);

(v) Any provision of ILSA, or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3906;

(vi) Any provision of the IBA, or any rule, regulation or order issued thereunder, pursuant to 12 U.S.C. 3108;

(vii) Section 5211 of the Revised Statutes (12 U.S.C. 161), pursuant to 12 U.S.C. 164;

(viii) Certain provisions of the Exchange Act, pursuant to section 21B of the Exchange Act (15 U.S.C. 78u-2);

(ix) Section 1120 of FIRREA (12 U.S.C. 3349), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 3349; and

(x) The terms of any final or temporary order issued under section 8 of the FDIA or any written agreement executed by the OCC, the terms of any condition imposed in writing by the OCC in connection with the grant of an application or request, certain unsafe or unsound practices, breaches of fiduciary duty, or any law or regulation not otherwise provided herein, pursuant to 12 U.S.C. 1818(i)(2); and

(5) *By the OTS* against institutions, institution-affiliated parties, and certain other persons for which it is the appropriate Agency for any violation of:

(i) Section 5 of the Home Owners' Loan Act ("HOLA") or any regulation or order issued thereunder, pursuant to 12 U.S.C. 1464 (d), (s) and (v);

(ii) Section 9 of the HOLA or any regulation or order issued thereunder, pursuant to 12 U.S.C. 1467(d);

(iii) Section 10 of the HOLA, pursuant to 12 U.S.C. 1467a(i) and (r);

(iv) Any provisions of the CBCA any regulation or order issued thereunder or certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1817(j)(16);

(v) Sections 22(h) and 23 of the FRA, or any regulation issued thereunder or certain unsafe or unsound practices or breaches of fiduciary duty, pursuant to 12 U.S.C. 1468;

(vi) Certain provisions of the Exchange Act, pursuant to section 21B of the Exchange Act (15 U.S.C. 78u-2);

(vii) Section 1120 of FIRREA (12 U.S.C. 3349), or any order or regulation issued thereunder, pursuant to 12 U.S.C. 3349; and

(viii) The terms of any final or temporary order issued or enforceable pursuant to section 8 of the FDIA or of any written agreement executed by the OTS, the terms of any conditions imposed in writing by the OTS in connection with the grant of an application or request, certain unsafe or unsound practices or breaches of fiduciary duty, or any law or regulation not otherwise provided herein pursuant to 12 U.S.C. 1818(i)(2).

(f) This subpart also applies to all other adjudications required by statute to be determined on the record after opportunity for an agency hearing, unless otherwise specifically provided for in each Agency's Local Rules.

§ ____.2 Rules of construction.

For purposes of this subpart:

(a) Any term in the singular includes the plural, and the plural includes the singular, if such use would be appropriate;

(b) Any use of a masculine, feminine, or neuter gender encompasses all three, if such use would be appropriate;

(c) The term *counsel* includes a non-attorney representative; and

(d) Unless the context requires otherwise, a party's counsel of record, if any, may, on behalf of that party, take any action required to be taken by the party.

§ ____.3 Definitions.

For purposes of this subpart, unless explicitly stated to the contrary:

(a) *Administrative law judge* means one who presides at an administrative hearing under authority set forth at 5 U.S.C. 556.

(b) *Adjudicatory proceeding* means a proceeding conducted pursuant to these rules and leading to the formulation of a final order other than a regulation.

(c) *Agency* means:

(1) The FDIC in the case of a State nonmember bank (except a District bank), or a foreign bank having an insured branch;

(2) The Board of Governors in the case of any State member insured bank (except a District bank), any branch or agency of a foreign bank with respect to any provision of the FRA (12 U.S.C. 221 *et seq.*), which is made applicable under the IBA (12 U.S.C 3101 *et seq.*), any foreign bank which does not operate as an insured branch, any agency or commercial lending company other than a Federal agency, supervisory or regulatory proceedings arising from the authority given to the Board of Governors under section 7(c)(1) of the IBA (12 U.S.C. 3105(b)(1)), including such proceedings under the Depository Institutions Supervisory Act, and any bank holding company and any subsidiary of a bank holding company (other than a bank) as those terms are defined by the BHCA (12 U.S.C. 1841 *et seq.*);

(3) The NCUA in the case of any Federal credit union as defined in section 101(1) of the FCUA (12 U.S.C. 1752(1)), and any insured credit union (as defined in section 101(7) of the FCUA (12 U.S.C. 1752(7));

(4) The OCC in the case of any national banking association, any District bank, or any Federal branch or agency of a foreign bank;

(5) The OTS in the case of any savings association or any savings and loan holding company, any subsidiary (other than a bank or subsidiary of that bank) of a savings and loan holding company, any service corporation of a savings association, and any subsidiary of such service corporation, whether wholly or partly owned.

(d) *Agency Head* means:

(1) In the case of the FDIC, the Board of Directors of the FDIC, or its designee;

(2) In the case of the Board of Governors, the Board of Governors of the Federal Reserve System or its designee;

(3) In the case of the NCUA, the National Credit Union Administration Board, or its designee;

(4) In the case of the OCC, the Comptroller of the Currency or his or her designee; and

(5) In the case of the OTS, the Director of OTS or his or her designee.

(e) *Decisional employee* means any member of the Agency's or administrative law judge's staff who has not engaged in an investigative or prosecutorial role in a proceeding and who may assist the Agency or the administrative law judge, respectively, in preparing orders, recommended decisions, decisions, and other documents under the Uniform Rules.

(f) *Enforcement Counsel* means any individual who files a notice of appearance as counsel on behalf of the Agency in an adjudicatory proceeding.

(g) *Final order* means an order issued by the Agency with or without the consent of the affected institution or the institution-affiliated party, that has become final, without regard to the pendency of any petition for reconsideration or review.

(h) *Institution* includes:

(1) Any bank as that term is defined in section 3(a) of the FDIA (12 U.S.C. 1813(a));

(2) Any bank holding company or any subsidiary (other than a bank) of a bank holding company as those terms are defined in the BHCA (12 U.S.C. 1841 *et seq*);

(3) Any Federal credit union as that term is defined in section 101(1) of the FCUA (12 U.S.C. 1752(1));

(4) Any insured state credit union as that term is defined in section 101(7) of the FCUA (12 U.S.C 1752(7));

(5) Any savings association as that term is defined in section 3(b) of the FDIA (12 U.S.C. 1813(b)), any savings and loan holding company or any subsidiary thereof (other than a bank) as those terms are defined in section 10(a) of the HOLA (12 U.S.C. 1467(a));

(6) Any organization operating under section 25 of the FRA (12 U.S.C. 601 *et seq.*);

(7) Any foreign bank or company to which section 8 of the IBA (12 U.S.C. 3106), applies or any subsidiary (other than a bank) thereof; and

(8) Any Federal agency as that term is defined in section 1(b) of the IBA (12 U.S.C. 3101(5)).

(i) *Institution-affiliated party* means:

(1) Any institution-affiliated party as that term is defined in section 3(u) of the FDIA (12 U.S.C. 1813(u)); and

(2) Any institution-affiliated party as that term is defined in section 206(r) of the FCUA (12 U.S.C. 1786(r)).

(j) *Local Rules* means those rules which are promulgated by an Agency in the subparts of this part excluding subpart A and which may contain some or all of the following:

(1) Procedures for formal enforcement actions that fewer than four of the five Agencies may have the authority to issue;

(2) Procedures for informal proceedings which are not required to be conducted in accordance with the Administrative Procedure Act ("APA");

(3) Procedures which supplement the Uniform Rules in subpart A of this part; and

(4) Internal procedures for processing administrative enforcement actions and sanctions particular to each Agency.

(k) *Office of Financial Institution Adjudication* ("OFIA") means the executive body charged with overseeing the administration of administrative enforcement proceedings for the Agencies.

(l) *Party* means the Agency and any person named as a party in any notice.

(m) *Person* means an individual, sole proprietor, partnership, corporation, unincorporated association, trust, joint venture, pool, syndicate, agency or other entity or organization, including an institution as defined in paragraph (h) of this section.

(n) *Respondent* means any party other than the Agency.

(o) *Uniform Rules* means those rules in subpart A of this part that pertain to the types of formal administrative enforcement actions common to at least four of the five Agencies.

(p) *Violation* includes any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

§ ____.4 Authority of Agency Head.

The Agency Head may, at any time during the pendency of a proceeding perform, direct the performance of, or waive performance of, any act which could be done or ordered by the administrative law judge.

§ ____.5 Authority of the administrative law judge.

(a) *General rule.* All proceedings governed by this part shall be conducted in accordance with the provisions of Chapter 5 of Title 5 of the United States Code. The administrative law judge shall have all powers necessary to conduct a proceeding in a fair and impartial manner and to avoid unnecessary delay.

(b) *Powers.* The administrative law judge shall have all powers necessary to conduct the proceeding in accordance with paragraph (a) of this section, including the following powers:

(1) To administer oaths and affirmations;

(2) To issue subpoenas, subpoenas duces tecum, and protective orders, as authorized by this part, and to quash or modify any such subpoenas and orders;

(3) To receive relevant evidence and to rule upon the admission of evidence and offers of proof;

(4) To take or cause depositions to be taken as authorized by this subpart;

(5) To regulate the course of the hearing and the conduct of the parties and their counsel;

(6) To hold scheduling and/or pre-hearing conferences as set forth in § ____.31;

(7) To consider and rule upon all procedural and other motions appropriate in an adjudicatory proceeding, provided that only the Agency Head shall have the power to grant any motion to dismiss the proceeding or to decide any other motion that results in a final determination of the merits of the proceeding;

(8) To prepare and present to the Agency Head a recommended decision as provided herein;

(9) To recuse himself or herself by motion made by a party or on his or her own motion;

(10) To establish time, place and manner limitations on the attendance of the public and the media for any public hearing; and

(11) To do all other things necessary and appropriate to discharge the duties of a presiding officer.

§ ____.6 Appearance and practice in adjudicatory proceedings.

(a) *Appearance before an Agency or an administrative law judge*—(1) *By attorneys.* Any member in good standing of the bar of the highest court of any state, commonwealth, possession, territory of the United States, or the District of Columbia may represent others before the Agency if such attorney is not currently suspended or debarred from practice before the Agency.

(2) *By non-attorneys.* An individual may appear on his or her own behalf; a

VOL
56

116
JE
17
1991
UMI

member of a partnership may represent the partnership; a duly authorized officer, director, or employee of any government unit, agency, institution, corporation or authority may represent that unit, agency, institution, corporation or authority if such officer, director, or employee is not currently suspended or debarred from practice before the Agency.

(3) *Notice of appearance.* Any individual acting as counsel on behalf of a party, including the Agency, shall file a notice of appearance with the OFIA at or before the time that individual submits papers or otherwise appears on behalf of a party in the adjudicatory proceeding. Such notice of appearance shall include a written declaration that the individual is currently qualified as provided in paragraph (a)(1) or (a)(2) of this section and is authorized to represent the particular party. By filing a notice of appearance on behalf of a party in an adjudicatory proceeding, the counsel thereby agrees, and represents that he or she is authorized, to accept service on behalf of the represented party.

(b) *Sanctions.* Dilatory, obstructionist, egregious, contemptuous or contumacious conduct at any phase of any adjudicatory proceeding may be grounds for exclusion or suspension of counsel from the proceeding.

§ _____.7 Good faith certification.

(a) *General requirement.* Every filing or submission of record following the issuance of a notice shall be signed by at least one counsel of record in his or her individual name and shall state that counsel's address and telephone number. A party who acts as his or her own counsel shall sign his or her individual name and state his or her address and telephone number on every filing or submission of record.

(b) *Effect of signature.* (1) The signature of counsel or a party shall constitute a certification that: The counsel or party has read the filing or submission of record; to the best of his or her knowledge, information, and belief formed after reasonable inquiry, the filing or submission of record is well-grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law; and the filing or submission of record is not made for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation.

(2) If a filing or submission of record is not signed, the administrative law judge shall strike the filing or submission of record, unless it is signed promptly after the omission is called to the attention of the pleader or movant.

(c) *Effect of making oral motion or argument.* The act of making any oral motion or oral argument by any counsel or party constitutes a certification that to the best of his or her knowledge, information, and belief formed after reasonable inquiry, his or her statements are well-grounded in fact and are warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law, and are not made for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation.

§ _____.8 Conflicts of interest.

(a) *Conflict of interest in representation.* No person shall appear as counsel for another person in an adjudicatory proceeding if it reasonably appears that such representation may be materially limited by that counsel's responsibilities to a third person or by the counsel's own interests. The administrative law judge may take corrective measures at any stage of a proceeding to cure a conflict of interest in representation, including the issuance of an order limiting the scope of representation or disqualifying an individual from appearing in a representative capacity for the duration of the proceeding.

(b) *Certification and waiver.* If any person appearing as counsel represents two or more parties to an adjudicatory proceeding or a party and an institution to which notice of the proceeding must be given, counsel must certify in writing at the time of filing the notice of appearance required by § _____.6(a):

(1) That the counsel has personally and fully discussed the possibility of conflicts of interest with each such party or institution;

(2) That each such party or institution has advised its counsel that to its knowledge there is no existing or anticipated material conflict between its interests and the interests of others represented by the same counsel or his or her firm; and

(3) That each such party or institution waives any right it might otherwise have had to assert any known conflicts of interest or to assert any non-material conflicts of interest during the course of the proceeding.

§ _____.9 Ex parte Communications.

(a) *Definition*—(1) *Ex parte communication* means any material oral or written communication concerning the merits of an adjudicatory proceeding that was neither on the record nor on reasonable prior notice to all parties that takes place between:

(i) A party, his or her counsel, or another person interested in the proceeding; and

(ii) The administrative law judge handling that proceeding, the Agency Head or a decisional employee.

(2) *Exception.* A request for status of the proceeding does not constitute an ex parte communication.

(b) *Prohibition of ex parte communications.* From the time the notice is issued by the Agency Head until the date that the Agency Head issues its final decision pursuant to § _____.40(c), no party, interested person or counsel therefor shall knowingly make or cause to be made an ex parte communication concerning the merits of the proceeding to the Agency Head, the administrative law judge, or a decisional employee. The Agency Head, administrative law judge, or decisional employee shall not knowingly make or cause to be made to a party, or any interested person or counsel therefor, an ex parte communication relevant to the merits of a proceeding.

(c) *Procedure upon occurrence of ex parte communication.* If an ex parte communication is received by the administrative law judge, the Agency Head or other person identified in paragraph (a) of this section, that person shall cause all such written communications (or, if the communication is oral, a memorandum stating the substance of the communication) to be placed on the record of the proceeding and served on all parties. All other parties to the proceeding shall have an opportunity, within ten days of receipt of service of the ex parte communication to file responses thereto and to recommend any sanctions, in accordance with paragraph (d) of this section, that they believe to be appropriate under the circumstances.

(d) *Sanctions.* Any party or his or her counsel who makes a prohibited ex parte communication, or who encourages or solicits another to make any such communication, may be subject to any appropriate sanction or sanctions imposed by the Agency Head or the administrative law judge including, but not limited to, exclusion from the proceedings and an adverse ruling on the issue which is the subject of the prohibited communication.

§ _____.10 Filing of papers.

(a) *Filing.* Any papers required to be filed, excluding documents produced in response to a discovery request pursuant to §§ _____.25 and .26 shall

be filed with the OFIA, except as otherwise provided.

(b) *Manner of filing.* Unless otherwise specified by the Agency Head or the administrative law judge, filing may be accomplished by: (1) Personal service;

(2) Delivering the papers to a reliable commercial courier service, overnight delivery service, or to the U.S. Post Office for Express Mail delivery;

(3) Mailing the papers by first class, registered, or certified mail; or

(4) Transmission by electronic media, only if expressly authorized, and upon any conditions specified, by the Agency Head or the administrative law judge. All papers filed by electronic media shall also concurrently be filed in accordance with paragraph (c) of this section as to form.

(c) *Formal requirements as to papers filed*—(1) *Form.* All papers filed must set forth the name, address, and telephone number of the counsel or party making the filing and must be accompanied by a certification setting forth when and how service has been made on all other parties. All papers filed must be double-spaced and printed or typewritten on 8½ x 11 inch paper, and must be clear and legible.

(2) *Signature.* All papers must be dated and signed as provided in § _____.7.

(3) *Caption.* All papers filed must include at the head thereof, or on a title page, the name of the Agency and of the filing party, the title and docket number of the proceeding, and the subject of the particular paper.

(4) *Number of copies.* Unless otherwise specified by the Agency Head, or the administrative law judge, an original and one copy of all documents and papers shall be filed, except that only one copy of transcripts of testimony and exhibits shall be filed.

§ _____.11 Service of papers.

(a) *By the parties.* Except as otherwise provided, a party filing papers shall serve a copy upon the counsel of record for all other parties to the proceeding so represented, and upon any party not so represented.

(b) *Method of service.* Except as provided in paragraphs (c)(2) and (d) of this section, a serving party shall use one or more of the following methods of service:

(1) Personal service;

(2) Delivering the papers to a reliable commercial courier service, overnight delivery service, or to the U.S. Post Office for Express Mail delivery;

(3) Mailing the papers by first class, registered, or certified mail; or

(4) Transmission by electronic media, only if the parties mutually agree. Any papers served by electronic media shall also concurrently be served in accordance with the requirements of § _____.10(c) as to form.

(c) *By the Agency Head or the administrative law judge.* (1) All papers required to be served by the Agency Head or the administrative law judge upon a party who has appeared in the proceeding through a counsel of record, shall be served by any means specified in paragraph (b) of this section.

(2) If a party has not appeared in the proceeding through counsel, the Agency Head or the administrative law judge shall make service by any of the following methods:

(i) By personal service;

(ii) By delivery to a person of suitable age and discretion at the party's residence;

(iii) By registered or certified mail addressed to the party's last known address; or

(iv) By any other method reasonably calculated to give actual notice.

(d) *Subpoenas.* Service of a subpoena may be made by personal service, by delivery to an agent, by delivery to a person of suitable age and discretion at the subpoenaed person's residence, by registered or certified mail addressed to the person's last known address, or in such other manner as is reasonably calculated to give actual notice.

(e) *Area of service.* Service in any state, territory, possession of the United States, or the District of Columbia, on any person or company doing business in any state, territory, possession of the United States, or the District of Columbia, or on any person as otherwise provided by law, is effective without regard to the place where the hearing is held, provided that if service is made on a foreign bank in connection with an action or proceeding involving one or more of its branches or agencies located in any state, territory, possession of the United States, or the District of Columbia, service shall be made on at least one branch or agency so involved.

§ _____.12 Construction of time limits.

(a) *General rule.* In computing any period of time prescribed by this subpart, the date of the act or event from which the designated period of time begins to run is not included. The last day so computed is included unless it is a Saturday, Sunday, or Federal holiday. When the last day is a Saturday, Sunday, or Federal holiday, the period runs until the end of the next day that is not a Saturday, Sunday, or Federal holiday. Intermediate Saturdays, Sundays, and Federal holidays are included in the computation of time, except that, when the time period within which an act is to be performed is ten days or less, intermediate Saturdays, Sundays, and Federal holidays are not included.

(b) *When papers are deemed to be filed or served.* (1) Filing and service are deemed to be effective:

(i) In the case of personal service or same day commercial courier delivery, upon actual service;

(ii) In the case of overnight commercial delivery service, U.S. Express Mail delivery, or first class, registered, or certified mail, upon deposit in or delivery to an appropriate point of collection;

(iii) In the case of transmission by electronic media, as specified by the authority receiving the filing, in the case of filing, and as agreed among the parties, in the case of service.

(2) The effective filing and service dates specified in paragraph (b)(1) of this section may be modified by the Agency Head or administrative law judge in the case of filing or by agreement of the parties in the case of service.

(c) *Calculation of time for service and filing of responsive papers.* Whenever a time limit is measured by a prescribed period from the service of any notice or paper, the applicable time limits are calculated as follows:

(1) If service is made by first class, registered or certified mail, add three days to the prescribed period;

(2) If service is made by express mail or overnight delivery service, add one day to the prescribed period;

(3) If service is made by electronic media transmission, add one day to the prescribed period, unless otherwise determined by the Agency Head or the administrative law judge in the case of filing, or by agreement among the parties in the case of service.

§ _____.13 Change of time limits.

Except as otherwise provided by law, the administrative law judge may, for good cause shown, extend the time limits prescribed by these uniform Rules or by any notice or order issued in the proceedings. After the referral of the case to the Agency Head pursuant to § _____.38, the Agency Head may grant extensions of the time limits for good cause shown. Extensions may be granted at the motion of a party or on the Agency Head's or the administrative law judge's own motion after notice and opportunity to respond is afforded all nonmoving parties.

VOL 56 ISS 116 JE 17 1991 UMI

§ _____.14 Witness fees and expenses.

Witnesses subpoenaed for testimony or depositions shall be paid the same fees for attendance and mileage as are paid in the United States district courts in proceedings in which the United States is a party, provided that, in the case of a discovery subpoena addressed to a party, no witness fees or mileage need be paid. Fees for witnesses shall be tendered in advance by the party requesting the subpoena, except that fees and mileage need not be tendered in advance where the Agency is the party requesting the subpoena. The Agency shall not be required to pay any fees to, or expenses of, any witness not subpoenaed by the Agency.

§ _____.15 Opportunity for informal settlement.

Any respondent may, at any time in the proceeding, unilaterally submit to Enforcement Counsel written offers or proposals for settlement of a proceeding, without prejudice to the rights of any of the parties. No such offer or proposal shall be made to any Agency representative other than Enforcement Counsel. Submission of a written settlement offer does not provide a basis for adjourning or otherwise delaying all or any portion of a proceeding under this part. No settlement offer or proposal, or any subsequent negotiation or resolution, is admissible as evidence in any proceeding.

§ _____.16 Agency's right to conduct examination.

Nothing contained in this subpart limits in any manner the right of the Agency to conduct any examination, inspection, or visitation of any institution or institution-affiliated party, or the right of the Agency to conduct or continue any form of investigation authorized by law.

§ _____.17 Collateral attacks on adjudicatory proceeding.

If an interlocutory appeal or collateral attack is brought in any court concerning all or any part of an adjudicatory proceeding, the challenged adjudicatory proceeding shall continue without regard to the pendency of that court proceeding. No default or other failure to act as directed in the adjudicatory proceeding within the times prescribed in this subpart shall be excused based on the pendency before any court of any interlocutory appeal or collateral attack.

§ _____.18 Commencement of proceeding and contents of notice.

(a) *Commencement of proceeding.* (1) (i) Except for change-in-control proceedings under section 7(j)(4) of the FDIA, 12 U.S.C. 1817(j)(4), a proceeding governed by this subpart is commenced by issuance of a notice by the Agency Head.

(ii) The notice must be served by the Agency Head upon the respondent and given to any other appropriate financial institution supervisory authority where required by law.

(iii) The notice must be filed with the OFIA.

(2) Change-in control proceedings under section 7(j)(4) of the FDIA (12 U.S.C. 1817(j)(4)) commence with the issuance of an order by the Agency Head.

(b) *Contents of notice.* The notice must set forth:

(1) The legal authority for the proceeding and for the Agency's jurisdiction over the proceeding;

(2) A statement of the matters of fact or law showing that the Agency is entitled to relief;

(3) A proposed order or prayer for an order granting the requested relief;

(4) The time, place, and nature of the hearing as required by law or regulation;

(5) The time within which to file an answer as required by law or regulation;

(6) The time within which to request a hearing as required by law or regulation; and

(7) The answer and/or request for a hearing shall be filed with OFIA.

§ _____.19 Answer.

(a) *When.* Within 20 days of service of the notice, respondent shall file an answer as designated in the notice. In a civil money penalty proceeding, respondent shall also file a request for a hearing within 20 days of service of the notice.

(b) *Content of answer.* An answer must specifically respond to each paragraph or allegation of fact contained in the notice and must admit, deny, or state that the party lacks sufficient information to admit or deny each allegation of fact. A statement of lack of information has the effect of a denial. Denials must fairly meet the substance of each allegation of fact denied; general denials are not permitted. When a respondent denies part of an allegation, that part must be denied and the remainder specifically admitted. Any allegation of fact in the notice which is not denied in the answer must be deemed admitted for purposes of the proceeding. A respondent is not required to respond to the portion of a notice that constitutes the prayer for relief or proposed order. The answer must set forth affirmative defenses, if any, asserted by the respondent.

(c) *Default.*—(1) *Effect of failure to answer.* Failure of a respondent to file an answer required by this section within the time provided constitutes a waiver of his or her right to appear and contest the allegations in the notice. If no timely answer is filed, the administrative law judge, upon motion of the Enforcement Counsel and, without further proceedings or notice to the respondent, shall file with the Agency Head a recommended decision containing the findings and the relief sought in the notice. Any final order issued by the Agency Head based upon a respondent's failure to answer is deemed to be an order issued upon consent.

(2) *Effect of failure to request a hearing in civil money penalty proceedings.* If respondent fails to request a hearing as required by law within the time provided, the notice of assessment constitutes a final and unappealable order.

§ _____.20 Amended pleadings.

(a) *Amendments.* The notice or answer may be amended or supplemented at any stage of the proceeding by leave of the administrative law judge. Such leave will be freely given. The respondent shall answer an amended notice within the time remaining for the respondent's answer to the original notice, or within ten days after service of the amended notice, whichever period is longer, unless the Agency Head or administrative law judge orders otherwise for good cause shown.

(b) *Amendments to conform to the evidence.* When issues not raised in the notice or answer are tried at the hearing by express or implied consent of the parties, they will be treated in all respects as if they had been raised in the notice or answer, and no formal amendments are required. If evidence is objected to at the hearing on the ground that it is not within the issues raised by the notice or answer, the administrative law judge may allow the notice or answer to be amended and will do so freely when the determination of the merits of the action is served thereby and the objecting party fails to satisfy the administrative law judge that the admission of such evidence would unfairly prejudice that party's action or defense upon the merits. The administrative law judge may grant a continuance to enable the objecting party to meet such evidence.

§ _____.21 Failure to appear.

Failure of a respondent to appear in person at the hearing or by a duly authorized counsel constitutes a waiver of respondent's right to a hearing and is deemed an admission of the facts as alleged and consent to the relief sought in the notice. Without further proceedings or notice to the respondent, the administrative law judge shall file with the Agency Head a recommended decision containing the findings and the relief sought in the notice.

§ _____.22 Consolidation and severance of actions.

(a) *Consolidation.* (1) On the motion of any party, or on the administrative law judge's own motion, the administrative law judge may consolidate, for some or all purposes, any two or more proceedings, if each such proceeding involves or arises out of the same transaction, occurrence or series of transactions or occurrences, or involves at least one common respondent or a material common question of law or fact, unless such consolidation would cause unreasonable delay or injustice.

(2) In the event of consolidation under paragraph (a)(1) of this section, appropriate adjustment to the prehearing schedule must be made to avoid unnecessary expense, inconvenience, or delay.

(b) *Severance.* The administrative law judge may, upon the motion of any party, sever the proceeding for separate resolution of the matter as to any respondent only if the administrative law judge finds that:

(1) Undue prejudice or injustice to the moving party would result from not severing the proceeding; and

(2) Such undue prejudice or injustice would outweigh the interests of judicial economy and expedition in the complete and final resolution of the proceeding.

§ _____.23 Motions.

(a) *In writing.* (1) Except as otherwise provided herein, an application or request for an order or ruling must be made by written motion.

(2) All written motions must state with particularity the relief sought and must be accompanied by a proposed order.

(3) No oral argument may be held on written motions except as otherwise directed by the administrative law judge. Written memoranda, briefs, affidavits or other relevant material or documents may be filed in support of or in opposition to a motion.

(b) *Oral motions.* A motion may be made orally on the record unless the administrative law judge directs that such motion be reduced to writing.

(c) *Filing of motions.* Motions must be filed with the administrative law judge, but upon the filing of the recommended decision, motions must be filed with the Agency Head.

(d) *Responses.* (1) Except as otherwise provided herein, within ten days after service of any written motion, or within such other period of time as may be established by the administrative law judge or the Agency Head, any party may file a written response to a motion. The administrative law judge shall not rule on any oral or written motion before each party has had an opportunity to file a response.

(2) The failure of a party to oppose a written motion or an oral motion made on the record is deemed a consent by that party to the entry of an order substantially in the form of the order accompanying the motion.

(e) *Dilatory motions.* Frivolous, dilatory or repetitive motions are prohibited. The filing of such motions may form the basis for sanctions.

(f) *Dispositive motions.* Dispositive motions are governed by §§ _____.29 and _____.30.

§ _____.24 Scope of document discovery.

(a) *Limits on discovery.* (1) Parties to proceedings under this subpart may obtain document discovery through the production of documents, including writings, drawings, graphs, charts, photographs, recordings, and other data compilations from which information can be obtained, or translated, if necessary, by the parties through detection devices into reasonably usable form.

(2) Discovery by use of deposition is governed by the Local Rules of each Agency.

(b) *Relevance.* Parties may obtain document discovery regarding any matter, not privileged, which has material relevance to the merits of the pending action. It is not a ground for objection that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to discovery of admissible evidence. The request may not be unreasonable, oppressive, excessive in scope or unduly burdensome.

(c) *Privileged matter.* Privileged documents are not discoverable. Privileges include the attorney-client privilege, work-product privilege, any government's or government agency's deliberative-process privilege, and any other privileges the Constitution, any applicable act of Congress, or the principles of common law provide.

(d) *Time limits.* All discovery, including all responses to discovery requests, shall be completed at least 20 days prior to the date scheduled for the commencement of the hearing, except as provided in the Local Rules. No exceptions to this time limit shall be permitted, unless the administrative law judge finds on the record that good cause exists for waiving the requirements of this paragraph.

§ _____.25 Request for document discovery from parties.

(a) *General rule.* Any party may serve on any other party a request to produce for inspection any discoverable documents which are in the possession, custody, or control of the party upon whom the request is served. The request must identify the documents to be produced either by individual item or by category, and must describe each item and category with reasonable particularity. Documents must be produced as they are kept in the usual course of business and shall be organized to correspond with the categories in the request.

(b) *Production or copying.* The request must specify a reasonable time, place, and manner for production and performing any related acts. In lieu of inspecting the documents the requesting party may specify that all or some of the responsive documents are to be copied and the copies delivered to the requesting party. If copying of fewer than 250 pages is requested, the party to whom the request is addressed shall bear the cost of copying and shipping charges. If more than 250 pages of copying is requested, the requesting party shall pay for copying, unless the parties agree otherwise, at the current per-page copying rate imposed by each agency's rules implementing the Freedom of Information Act (5 U.S.C. 552a) plus the cost of shipping.

(c) *Obligation to update responses.* A party who has responded to a discovery request with a response that was complete when made is not required to supplement the response to include documents thereafter acquired, unless the responding party learns that:

(1) The response was materially incorrect when made; or

(2) The response, though correct when made, is no longer true and a failure to amend the response is, in substance, a knowing concealment.

(d) *Motions to limit discovery.* (1) Any party that objects to a discovery request may, within ten days of being served with such request, file a motion in accordance with the provisions of § _____.23 to revoke or otherwise limit the request. If an objection is made to only a portion of an item or category in a request, the portion objected to shall be specified. Any objections not made in accordance with this paragraph and § _____.23 are waived.

VOL 56 ISS 116 JE 17 1991 UMI

(2) The party who served the request that is the subject of a motion to revoke or limit may file a written response within five days of service of the motion. No other party may file a response.

(e) *Privilege.* At the time other documents are produced, all documents withheld on the grounds of privilege must be reasonably identified, together with a statement of the basis for the assertion of privilege.

(f) *Motions to compel production.* (1) If a party withholds any documents as privileged or fails to comply fully with a discovery request, the requesting party may, within ten days of the assertion of privilege or of the time the failure to comply becomes known to the requesting party, file a motion in accordance with the provisions of § _____.23 for the issuance of a subpoena compelling production.

(2) The party who asserted the privilege or failed to comply with the request may file a written response to a motion to compel within five days of service of the motion. No other party may file a response.

(g) *Ruling on motions.* After the time for filing responses pursuant to this section has expired, the administrative law judge shall rule promptly on all motions filed pursuant to this section. If the administrative law judge determines that a discovery request, or any of its terms, is unreasonable, unduly burdensome, excessive in scope, repetitive of previous requests or seeks to obtain privileged documents, he or she may modify the request, and may issue appropriate protective orders, upon such conditions as justice may require. The pendency of a motion to revoke or limit discovery or to compel production shall not be a basis for staying or continuing the proceeding, unless otherwise ordered by the administrative law judge.

(h) *Enforcing discovery subpoenas.* If the administrative law judge issues a subpoena compelling production of documents by a party, the subpoenaing party may, in the event of noncompliance and to the extent authorized by applicable law, apply to any appropriate United States district court for an order requiring compliance with the subpoena. A party's right to seek court enforcement of a subpoena shall not in any manner limit the sanctions that may be imposed by the administrative law judge against a party who fails to produce subpoenaed documents.

§ _____.26 Document subpoenas to nonparties.

(a) *General rules.* (1) Any party may apply to the administrative law judge for the issuance of a document discovery subpoena addressed to any person who is not a party to the proceeding. The application must contain a proposed document subpoena and a brief statement showing the general relevance and reasonableness of the scope of documents sought. The subpoenaing party shall specify a reasonable time, place, and manner for making production in response to the document subpoena.

(2) A party shall only apply for a document subpoena under this section within the time period during which such party could serve a discovery request under § _____.24(d). The party obtaining the document subpoena is responsible for serving it on the subpoenaed person and for serving copies on all parties. Document subpoenas may be served in any state, territory, or possession of the United States, the District of Columbia, or as otherwise provided by law.

(3) The administrative law judge shall promptly issue any document subpoena requested pursuant to this section. If the administrative law judge determines that the application does not set forth a valid basis for the issuance of the subpoena, or that any of its terms are unreasonable, oppressive, excessive in scope, or unduly burdensome, he or she may refuse to issue the subpoena or may issue it in a modified form upon such conditions as may be consistent with the Uniform Rules.

(b) *Motion to quash or modify.* (1) Any person to whom a document subpoena is directed may file a motion to quash or modify such subpoena, accompanied by a statement of the basis for quashing or modifying the subpoena. The movant shall serve the motion on all parties, and any party may respond to such motion within ten days of service of the motion.

(2) Any motion to quash or modify a document subpoena must be filed on the same basis, including the assertion of privilege, upon which a party could object to a discovery request under § _____.25(d), and during the same time limits during which such an objection could be filed.

(c) *Enforcing document subpoenas.* If a subpoenaed person fails to comply with any subpoena issued pursuant to this section or any order of the administrative law judge which directs compliance with all or any portion of a document subpoena, the subpoenaing party or any other aggrieved party may, to the extent authorized by applicable law, apply to an appropriate United States district court for an order requiring compliance with so much of the document subpoena as the administrative law judge has not quashed or modified. A party's right to seek court enforcement of a document subpoena shall in no way limit the sanctions that may be imposed by the administrative law judge on a party who induces a failure to comply with subpoenas issued under this section.

§ _____.27 Deposition of witness unavailable for hearing.

(a) *General rules.* (1) If a witness will not be available for the hearing, a party may apply in accordance with the procedures set forth in paragraph (a)(2) of this section, to the administrative law judge for the issuance of a subpoena, including a subpoena duces tecum, requiring the attendance of the witness at a deposition. The administrative law judge may issue a deposition subpoena under this section upon showing that:

(i) The witness will be unable to attend or may be prevented from attending the hearing because of age, sickness or infirmity, or will otherwise be unavailable;

(ii) The witness' unavailability was not procured or caused by the subpoenaing party;

(iii) The testimony is reasonably expected to be material; and

(iv) Taking the deposition will not result in any undue burden to any other party and will not cause undue delay of the proceeding.

(2) The application must contain a proposed deposition subpoena and a brief statement of the reasons for the issuance of the subpoena. The subpoena must name the witness whose deposition is to be taken and specify the time and place for taking the deposition. A deposition subpoena may require the witness to be deposed at any place within the country in which that witness resides or has a regular place of employment or such other convenient place as the administrative law judge shall fix.

(3) Any requested subpoena that sets forth a valid basis for its issuance must be promptly issued, unless the administrative law judge on his or her own motion, requires a written response or requires attendance at a conference concerning whether the requested subpoena should be issued.

(4) The party obtaining a deposition subpoena is responsible for serving it on the witness and for serving copies on all parties. Unless the administrative law judge orders otherwise, no deposition under this section shall be taken on fewer than ten days' notice to the witness and all parties. Deposition subpoenas may be served in any state, territory, possession of the United States, or the District of Columbia, on any person or company doing business in any state, territory, possession of the United States, or the District of Columbia, or as otherwise permitted by law.

(b) *Objections to deposition subpoenas.* (1) The witness and any party who has not had an opportunity to oppose a deposition subpoena issued under this section may file a motion with the administrative law judge to quash or modify the subpoena prior to the time for compliance specified in the subpoena, but not more than ten days after service of the subpoena.

(2) A statement of the basis for the motion to quash or modify a subpoena issued under this section must accompany the motion. The motion must be served on all parties.

(c) *Procedure upon deposition.* (1) Each witness testifying pursuant to a deposition subpoena must be duly sworn, and each party shall have the right to examine the witness. Objections to questions or documents must be in short form, stating the grounds for the objection. Failure to object to questions or documents is not deemed a waiver except where the ground for the objection might have been avoided if the objection had been timely presented. All questions, answers, and objections must be recorded.

(2) Any party may move before the administrative law judge for an order compelling the witness to answer any questions the witness has refused to answer or submit any evidence the witness has refused to submit during the deposition.

(3) The deposition must be subscribed by the witness, unless the parties and the witness, by stipulation, have waived the signing, or the witness is ill, cannot be found, or has refused to sign. If the deposition is not subscribed by the witness, the court reporter taking the deposition shall certify that the transcript is a true and complete transcript of the deposition.

(d) *Enforcing subpoenas.* If a subpoenaed person fails to comply with any order of the administrative law judge which directs compliance with all or any portion of a deposition subpoena under paragraph (b) or (c)(3) of this section, the subpoenaing party or other aggrieved party may, to the extent authorized by applicable law, apply to an appropriate United States district court for an order requiring compliance with the portions of the subpoena that the administrative law judge has ordered enforced. A party's right to seek court enforcement of a deposition subpoena in no way limits the sanctions that may be imposed by the administrative law judge on a party who fails to comply with or procures a failure to comply with, a subpoena issued under this section.

§ _____.28 Interlocutory review.

(a) *General rule.* The Agency Head may review a ruling of the administrative law judge prior to the certification of the record to the Agency Head only in accordance with the procedures set forth in this section and § _____.23.

(b) *Scope of review.* The Agency Head may exercise interlocutory review of a ruling of the administrative law judge if the Agency Head finds that:

(1) The ruling involves a controlling question of law or policy as to which substantial grounds exist for a difference of opinion;

(2) Immediate review of the ruling may materially advance the ultimate termination of the proceeding;

(3) Subsequent modification of the ruling at the conclusion of the proceeding would be an inadequate remedy; or

(4) Subsequent modification of the ruling would cause unusual delay or expense.

(c) *Procedure.* Any request for interlocutory review shall be filed by a party with the administrative law judge within ten days of his or her ruling and shall otherwise comply with § _____.23. Any party may file a response to a request for interlocutory review in accordance with § _____.23(d). Upon the expiration of the time for filing all responses, the administrative law judge shall refer the matter to the Agency Head for final disposition.

(d) *Suspension of proceeding.* Neither a request for interlocutory review nor any disposition of such a request by the Agency Head under this section suspends or stays the proceeding unless otherwise ordered by the administrative law judge or the Agency Head.

§ _____.29 Summary disposition.

(a) *In general.* The administrative law judge shall recommend that the Agency Head issue a final order granting a motion for summary disposition if the undisputed pleaded facts, admissions, affidavits, stipulations, documentary evidence, matters as to which official notice may be taken, and any other evidentiary materials properly submitted in connection with a motion for summary disposition show that:

(1) There is no genuine issue as to any material fact; and

(2) The moving party is entitled to a decision in its favor as a matter of law.

(b) *Filing of motions and responses.* (1) Any party who believes that there is no genuine issue of material fact to be determined and that he or she is entitled to a decision as a matter of law may move at any time for summary disposition in its favor of all or any part of the proceeding. Any party, within 20 days after service of such a motion, or within such time period as allowed by the administrative law judge, may file a response to such motion.

(2) A motion for summary disposition must be accompanied by a statement of the material facts as to which the moving party contends there is no genuine issue. Such motion must be supported by documentary evidence, which may take the form of admissions in pleadings, stipulations, depositions, investigatory depositions, transcripts, affidavits and any other evidentiary materials that the moving party contends support his or her position. The motion must also be accompanied by a brief containing the points and authorities in support of the contention of the moving party. Any party opposing a motion for summary disposition must file a statement setting forth those material facts as to which he or she contends a genuine dispute exists. Such opposition must be supported by evidence of the same type as that submitted with the motion for summary disposition and a brief containing the points and authorities in support of the contention that summary disposition would be inappropriate.

(c) *Hearing on motion.* At the request of any party or on his or her own motion, the administrative law judge may hear oral argument on the motion for summary disposition.

(d) *Decision on motion.* Following receipt of a motion for summary disposition and all responses thereto, the administrative law judge shall determine whether the moving party is entitled to summary disposition. If the administrative law judge determines that summary disposition is warranted, the administrative law judge shall submit a recommended decision to that effect to the Agency Head. If the administrative law judge finds that no party is entitled to summary disposition, he or she shall make a ruling denying the motion.

§ _____.30 Partial summary disposition.

If the administrative law judge determines that a party is entitled to summary disposition as to certain claims only, he or she shall defer submitting a recommended decision as to those claims. A hearing on the remaining issues must be ordered. Those claims for which the administrative law judge has determined that summary disposition is warranted will be

VOL 56 ISS 116 JE 17 1991 UMI

addressed in the recommended decision filed at the conclusion of the hearing.

§ _____.31 Scheduling and prehearing conferences.

(a) *Scheduling conference.* Within 30 days of service of the notice or order commencing a proceeding or such other time as parties may agree, the administrative law judge shall direct counsel for all parties to meet with him or her in person at a specified time and place prior to the hearing or to confer by telephone for the purpose of scheduling the course and conduct of the proceeding. This meeting or telephone conference is called a "scheduling conference." The identification of potential witnesses, the time for and manner of discovery, and the exchange of any prehearing materials including witness lists, statements of issues, stipulations, exhibits and any other materials may also be determined at the scheduling conference.

(b) *Prehearing conferences.* The administrative law judge may, in addition to the scheduling conference, on his or her own motion or at the request of any party, direct counsel for the parties to meet with him or her (in person or by telephone) at a prehearing conference to address any or all of the following:

(1) Simplification and clarification of the issues;

(2) Stipulations, admissions of fact, and the contents, authenticity and admissibility into evidence of documents;

(3) Matters of which official notice may be taken;

(4) Limitation of the number of witnesses;

(5) Summary disposition of any or all issues;

(6) Resolution of discovery issues or disputes;

(7) Amendments to pleadings; and

(8) Such other matters as may aid in the orderly disposition of the proceeding.

(c) *Transcript.* The administrative law judge, in his or her discretion, may require that a scheduling or prehearing conference be recorded by a court reporter. A transcript of the conference and any materials filed, including orders, becomes part of the record of the proceeding. A party may obtain a copy of the transcript at its expense.

(d) *Scheduling or prehearing orders.* At or within a reasonable time following the conclusion of the scheduling conference or any prehearing conference, the administrative law judge shall serve on each party an order setting forth any agreements reached and any procedural determinations made.

§ _____.32 Prehearing submissions.

(a) Within the time set by the administrative law judge, but in no case later than 14 days before the start of the hearing, each party shall serve on every other party, his or her:

(1) Prehearing statement;

(2) Final list of witnesses to be called to testify at the hearing, including name and address of each witness and a short summary of the expected testimony of each witness;

(3) List of the exhibits to be introduced at the hearing along with a copy of each exhibit; and

(4) Stipulation of fact, if any.

(b) *Effect of failure to comply.* No witness may testify and no exhibits may be introduced at the hearing if such witness or exhibit is not listed in the prehearing submissions pursuant to paragraph (a) of this section, except for good cause shown.

§ _____.33 Public hearings.

(a) *General rule.* All hearings shall be open to the public, unless the Agency, in its discretion, determines that holding an open hearing would be contrary to the public interest. Within 20 days of service of the notice or, in the case of change-in-control proceedings under section 7(j)(4) of the FDIA (12 U.S.C. 1817(j)(4)), within 20 days from service of the hearing order, any respondent may file with the Agency Head a request for a private hearing, and any party may file a pleading in reply to such a request. Such requests and replies are governed by § _____.23. Failure to file a request or a reply is deemed a waiver of any objections regarding whether the hearing will be public or private.

(b) *Filing document under seal.* Enforcement Counsel, in his or her discretion, may file any document or part of a document under seal if disclosure of the document would be contrary to the public interest. The administrative law judge shall take all appropriate steps to preserve the confidentiality of such documents or parts thereof, including closing portions of the hearing to the public.

§ _____.34 Hearing subpoenas.

(a) *Issuance.* (1) Upon application of a party showing general relevance and reasonableness of scope of the testimony or other evidence sought, the administrative law judge may issue a subpoena or a subpoena duces tecum requiring the attendance of a witness at the hearing or the production of documentary or physical evidence at such hearing. The application for a hearing subpoena must also contain a proposed subpoena specifying the attendance of a witness or the production of evidence from any state, territory, or possession of the United States, the District of Columbia or as otherwise provided by law at any designated place where the hearing is being conducted.

(2) A party may apply for a hearing subpoena at any time before the commencement of a hearing. During a hearing, such applications may be made orally on the record before the administrative law judge. The party making the application shall serve a copy of the application and the proposed subpoena on every other party to the proceeding.

(3) The administrative law judge shall promptly issue any hearing subpoena requested pursuant to this section. If the administrative law judge determines that the application does not set forth a valid basis for the issuance of the subpoena, or that any of its terms are unreasonable, oppressive, excessive in scope, or unduly burdensome, he or she may refuse to issue the subpoena or may issue it in a modified form upon any conditions consistent with these rules.

(b) *Motion to quash or modify.* (1) Any person to whom a hearing subpoena is directed may file a motion to quash or modify such subpoena, accompanied by a statement of the basis for quashing or modifying the subpoena. The movant shall serve the motion on all parties, and any party may respond to such motion within ten days of service of the motion.

(2) Any motion to quash or modify a hearing subpoena must be filed prior to the time specified in the subpoena for compliance, but not more than ten days after the date of service of the subpoena upon the movant.

(c) *Enforcing subpoenas.* If a subpoenaed person fails to comply with any subpoena issued pursuant to this section or any order of the administrative law judge which directs compliance with all or any portion of a document subpoena, the subpoenaing party or any other aggrieved party may seek enforcement of the subpoena pursuant to § _____.39(c).

§ _____.35 Conduct of hearings.

(a) *General rules.* (1) Hearings shall be conducted so as to provide a fair and expeditious presentation of the relevant disputed issues. Each party has the right to present its case or defense by oral and documentary evidence and to conduct such cross examination as may be required for full disclosure of the facts.

(2) *Order of hearing.* Enforcement Counsel shall present its case-in-chief first, unless otherwise ordered by the administrative law judge, or unless otherwise expressly specified by law or regulation. Enforcement Counsel shall be the first party to present an opening statement and a closing statement, and may make a rebuttal statement after the respondent's closing statement. If there are multiple respondents, respondents may agree among themselves as to their order of presentation of their cases, but if they do not agree the administrative law judge shall fix the order.

(3) *Stipulations.* Unless the administrative law judge directs otherwise, all stipulations of fact and law previously agreed upon by the parties, and all documents, the admissibility of which have been previously stipulated, will be admitted into evidence upon commencement of the hearing.

(b) *Transcript.* The hearing must be recorded and transcribed. The transcript shall be made available to any party upon payment of the cost thereof. The administrative law judge shall have authority to order the record corrected, either upon motion to correct, upon stipulation of the parties, or following notice to the parties upon the administrative law judge's own motion. The administrative law judge shall serve notice upon all parties that the certified transcript, together with all hearing exhibits and exhibits introduced but not admitted into evidence at the hearing, has been filed.

§ _____.36 Evidence.

(a) *Admissibility.* (1) Except as is otherwise set forth in this section, relevant, material, and reliable evidence that is not unduly repetitive is admissible to the fullest extent authorized by the APA and other applicable law.

(2) Evidence that would be admissible under the Federal Rules of Evidence is admissible in a proceeding conducted pursuant to this subpart.

(3) Evidence that would be inadmissible under the Federal Rules of Evidence may not be deemed or ruled to be inadmissible in a proceeding conducted pursuant to this subpart if such evidence is relevant, material, reliable and not unduly repetitive.

(b) *Official notice.* (1) Official notice may be taken of any material fact which may be judicially noticed by a United States district court and any material information in the official public records of any Federal or state government agency.

(2) All matters officially noticed by the administrative law judge or Agency Head shall appear on the record.

(3) If official notice is requested or taken of any material fact, the parties, upon timely request, shall be afforded an opportunity to object.

(c) *Documents.* (1) A duplicate copy of a document is admissible to the same extent as the original, unless a genuine issue is raised as to whether the copy is in some material respect not a true and legible copy of the original.

(2) Subject to the requirements of paragraph (a) of this section, any document, including a report of examination, supervisory activity, inspection or visitation, prepared by the appropriate Agency or state regulatory agency, is admissible either with or without a sponsoring witness.

(3) Witnesses may use existing or newly created charts, exhibits, calendars, calculations, outlines or other graphic material to summarize, illustrate, or simplify the presentation of testimony. Such materials may, subject to the administrative law judge's discretion, be used with or without being admitted into evidence.

(d) *Objections.* (1) Objections to the admissibility of evidence must be timely made and rulings on all objections must appear on the record.

(2) When an objection to a question or line of questioning propounded to a witness is sustained, the examining counsel may make a specific proffer on the record of what he or she expected to prove by the expected testimony of the witness, either by representation of counsel or by direct interrogation of the witness.

(3) The administrative law judge shall retain rejected exhibits, adequately marked for identification, for the record, and transmit such exhibits to the Agency Head.

(4) Failure to object to admission of evidence or to any ruling constitutes a waiver of the objection.

(e) *Stipulations.* The parties may stipulate as to any relevant matters of fact or the authentication of any relevant documents. Such stipulations must be received in evidence at a hearing, and are binding on the parties with respect to the matters therein stipulated.

(f) *Depositions of unavailable witnesses.* (1) If a witness is unavailable to testify at a hearing, and that witness has testified in a deposition to which all parties in a proceeding had notice and an opportunity to participate, a party may offer as evidence all or any part of the transcript of the deposition, including deposition exhibits, if any.

(2) Such deposition transcript is admissible to the same extent that testimony would have been admissible had that person testified at the hearing, provided that if a witness refused to answer proper questions during the depositions, the administrative law judge may, on that basis, limit the admissibility of the deposition in any manner that justice requires.

(3) Only those portions of a deposition received in evidence at the hearing constitute a part of the record.

§ _____.37 Proposed findings and conclusions.

(a) *Proposed findings and conclusions and supporting briefs.* (1) Any party may file with the administrative law judge proposed findings of fact, proposed conclusions of law, and a proposed order within 30 days after the parties have received notice that the transcript has been filed with the administrative law judge, unless otherwise ordered by the administrative law judge.

(2) Proposed findings and conclusions must be supported by citation to any relevant authorities and by page references to any relevant portions of the record. A post-hearing brief may be filed in support of proposed findings and conclusions, either as part of the same document or in a separate document. Any party who fails to file timely with the administrative law judge any proposed finding or conclusion is deemed to have waived the right to raise in any subsequent filing or submission any issue not addressed in such party's proposed finding or conclusion.

(b) *Reply briefs.* Reply briefs may be filed within 15 days after the date on which the parties' proposed findings, conclusions, and order are due. Reply briefs must be strictly limited to responding to new matters, issues, or arguments raised in another party's papers. A party who has not filed proposed findings of fact and conclusions of law or a post-hearing brief may not file a reply brief.

(c) *Simultaneous filing required.* The administrative law judge shall not order the filing by any party of any brief or reply brief in advance of the other party's filing of its brief.

§ _____.38 Recommended decision and filing of record.

Within 45 days after expiration of the time allowed for filing reply briefs under § _____.37(b), the administrative law judge shall file with and certify to the Agency Head for decision the record of the proceeding. The record must include the administrative law judge's recommended decision, recommended

VOL 56 ISS 116 JE 17 1991 UMI

findings of fact, recommended conclusions of law and proposed order; all prehearing and hearing transcripts, exhibits, and rulings; and the motions, briefs, memoranda, and other supporting papers filed in connection with the hearing. The administrative law judge shall serve upon each party the recommended decision, findings, conclusions and proposed order.

§ ____.39 Exceptions to recommended decision.

(a) *Filing exceptions.* Within 30 days after service of the recommended decision, findings, conclusions, and proposed order under § ____.38, a party may file with the Agency Head written exceptions to the administrative law judge's recommended decision, findings, conclusions or proposed order, to the admission or exclusion of evidence, or to the failure of the administrative law judge to make a ruling proposed by a party. A supporting brief may be filed at the time the exceptions are filed, either as part of the same document or in a separate document.

(b) *Effect of failure to file or raise exceptions.* (1) Failure of a party to file exceptions to those matters specified in paragraph (a) of this section within the time prescribed is deemed a waiver of objection thereto.

(2) No exception may be considered by the Agency Head if the party taking exception had an opportunity to raise the same objection, issue, or argument before the administrative law judge and failed to do so.

(c) *Contents.* (1) All exceptions and briefs in support of such exceptions must be confined to the particular matters in, or omissions from, the administrative law judge's recommendations to which that party takes exception.

(2) All exceptions and briefs in support of exceptions or replies must set forth page or paragraph references to the specific parts of the administrative law judge's recommendations to which exception is taken, the page or paragraph references to those portions of the record relied upon to support each exception, and the legal authority relied upon to support each exception.

§ ____.40 Review by Agency Head.

(a) *Notice of submission to Agency Head.* When the Agency Head determines that the record in the proceeding is complete, the Agency Head shall serve notice upon the parties that the proceeding has been submitted to the Agency Head for final decision.

(b) *Oral argument before the Agency Head.* Upon the initiative of the Agency Head or on the written request of any party filed with the Agency Head within the time for filing exceptions, the Agency Head may order and hear oral argument on the recommended findings, conclusions, decision, and order of the administrative law judge. A written request by a party must show good cause for oral argument and state reasons why arguments cannot be presented adequately in writing. A denial of a request for oral argument may be set forth in the Agency Head's final decision. Oral argument before the Agency Head must be on the record.

(c) *Agency final decision.* (1) Decisional employees may advise and assist the Agency Head in the consideration and disposition of the case. The final decision of the Agency Head will be based upon review of the entire record of the proceeding, except that the Agency Head may limit the issues to be reviewed to those findings and conclusions to which opposing arguments or exceptions have been filed by the parties.

(2) The Agency Head shall render a final decision within 90 days after notification of the parties that the case has been submitted for final decision, or 90 days after oral argument, whichever is later, unless the Agency Head orders that the action or any aspect thereof be remanded to the administrative law judge for further proceedings. Copies of the final decision and order of the Agency Head shall be served upon each party to the proceeding, upon other persons required by statute, and, if directed by the Agency Head or required by statute, upon any appropriate state or Federal supervisory authority.

§ ____.41 Stays pending judicial review.

The commencement of proceedings for judicial review of a final decision and order of the Agency may not, unless specifically ordered by the Agency Head or a reviewing court, operate as a stay of any order issued by the Agency Head. The Agency Head may, in its discretion, and on such terms as it finds just, stay the effectiveness of all or any part of its order pending a final decision on a petition for review of that order.

Adoption of Proposed Uniform Rules

The Agency-specific proposals of the Uniform Rules, which appear at the end of the common preamble, appear below. Further, each Agency is proposing Local Rules to supplement the Uniform Rules.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 19

List of Subjects in 12 CFR Part 19

Administrative practice and procedure, Crime, Ex parte communications, Hearing procedure, Investigations, National banks, Penalties, Securities.

Authority and Issuance

For the reasons set out in the common preamble, part 19 of chapter I of title 12 of the Code of Federal Regulations, is proposed to be amended as set forth below:

PART 19—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 19 is revised to read as follows:

Authority: 12 U.S.C. 1817, 1818, 1820 (secs. 7(j), 8 and 10 of the FDIA; 15 U.S.C. 78/ (h) and (i), 78o–4(c), 78o–5, 78q–1, 78u, 78u–2, 78u–3, 78w (secs. 12 (h) and (i), 15B(c), 15C, 17A, 21, 21B, 21C and 23 of the Securities Exchange Act of 1934); 5 U.S.C. 504, 554–557; 12 U.S.C. 504 and 505 (secs. 29 and 19(/) of the Federal Reserve Act); 12 U.S.C. 93(b) and 164 (secs. 5239 and 5213, respectively, of the Revised Statutes); 12 U.S.C. 1972 (sec. 106(b) of the Bank Holding Company Act Amendments of 1970); 12 U.S.C. 3102, 3108(a) (secs. 4 and 22(a) of he International Banking Act of 1978); 12 U.S.C. 3909 (sec. 910 of the International Lending Supervision Act of 1983); 31 U.S.C. 330.

2. Subpart A is revised to read as set forth at the end of the common preamble.

Subpart A—Uniform Rules of Practice and Procedure

Sec.
19.1 Scope.
19.2 Rules of construction.
19.3 Definitions.
19.4 Authority of Agency Head.

19.194 Eligibility to practice.
19.195 Incompetence.
19.196 Disreputable conduct.
19.197 Initiation of disciplinary proceeding.
19.198 Conferences.
19.199 Proceedings under this subpart.
19.200 Effect of suspension, debarment or censure.
19.201 Petition for reinstatement.

Subpart L—Equal Access to Justice Act

19.210 Scope.

Subpart B—Procedural Rules for OCC Adjudications

19.100 Scope.

All materials required to be filed with or referred to the Comptroller or the administrative law judge in any proceedings under this part must be filed with the Hearing Clerk, Office of the Comptroller of the Currency, Washington, DC 20219. Filings to be made with the Hearing Clerk include the notice and answer; motions and responses to motions; briefs; the record filed by the administrative law judge after the issuance of a recommended decision; the recommended decision filed by the administrative law judge following a motion for summary disposition; referrals by the administrative law judge of motions for interlocutory review; exceptions and requests for oral argument; and any other papers required to be filed with the Comptroller or the administrative law judge under this part.

§ 19.101 Delegation to the Office of Financial Institution Adjudication.

Unless otherwise ordered by the Comptroller, administrative adjudications subject to subpart A of this part shall be conducted by an administrative law judge of the Office of Financial Institution Adjudication (OFIA).

Subpart C—Removals, Suspensions, and Prohibitions When a Crime is Charged or a Conviction is Obtained

§ 19.110 Scope.

This subpart applies to informal hearings afforded to any institution-affiliated party who has been suspended or removed from office or prohibited from further participation in bank affairs by a notice or order issued by the Comptroller.

§ 19.111 Suspension or removal.

The Comptroller may serve a notice of suspension or order of removal or prohibition on an institution-affiliated party. A copy of such notice or order will be served on the bank, whereupon the institution-affiliated party involved must immediately cease service to the bank or participation in the affairs of the bank. The notice or order will indicate the basis for suspension, removal or prohibition and will inform the institution-affiliated party of the right to request in writing, to be received by the OCC within 30 days from the date that the institution-affiliated party was served with such notice or order, an opportunity to show at an informal hearing that continued service to or participation in the conduct of the affairs of the bank does not, or is not likely to, pose a threat to the interest of the bank's depositors or threaten to impair public confidence in the bank. The written request must be sent by certified mail to, or served personally with a signed receipt on, the District Administrator in the OCC district in which the bank in question is located, or to the Deputy Comptroller for Multinational Banking, Washington, DC, if the bank is supervised by the Multinational Banking Department. The request must state specifically the relief desired and the grounds on which that relief is based.

§ 19.112 Informal hearing.

(a) *Issuance of hearing order.* After receipt of a request for hearing, the District Administrator or the Deputy Comptroller for Multinational Banking, whichever is appropriate, shall notify the petitioner requesting the hearing and the OCC's Enforcement and Compliance Division of the date, time and place fixed for the hearing. The hearing will be scheduled to be held not later than 30 days from the date when a request for hearing is received, unless the time is extended at the written request of the petitioner. The District Administrator or the Deputy Comptroller for Multinational Banking, whichever is appropriate, shall extend the hearing

VOL 56 ISS 116 JE 17 1991 UMI

date only for a specific period of time and shall take appropriate action to ensure that the hearing is not unduly delayed.

(b) *Appointment of presiding officer.* The Comptroller or the Comptroller's delegate shall appoint one or more OCC employees to preside over the hearing. The presiding official(s) shall not have been involved in the proceeding, a factually related proceeding or the underlying enforcement action in a prosecutorial or investigative role. The OCC's Enforcement and Compliance Division shall appoint an attorney to represent the OCC at the hearing.

(c) *Waiver of oral hearing.* The petitioner may elect to have the matter determined by the presiding officer solely on the basis of written submissions. The petitioner must present the submissions to the presiding officer not later than ten days prior to the hearing, or within such shorter time period as the presiding officer permits, along with a signed document waiving the statutory right to appear and make oral argument.

(d) *Hearing procedures*—(1) *Conduct of hearing.* Hearings under this subpart are not subject to the provisions of subpart A of this part or the adjudicative provisions of the APA (5 U.S.C. 554–557).

(2) *Powers of the presiding officer.* The presiding officer shall determine all procedural issues that are governed by this subpart may permit or limit the number of witnesses and impose time limitations as he or she deems reasonable. The informal hearing will not be governed by the formal rules of evidence. All oral presentations, when permitted, and documents deemed by the presiding officer to be relevant and material to the proceeding and not unduly repetitious will be considered. The presiding officer may ask questions of any person participating in the hearing, and may make any rulings reasonably necessary to facilitate the effective and efficient operation of the hearing.

(3) *Presentation.* (i) The petitioner may appear personally or through counsel at the hearing to present relevant written materials and oral argument. Copies of affidavits, memoranda or other written material to be presented at the hearing must be provided to the presiding officer and to the other parties in the oral argument not later than ten days prior to the hearing, or within such shorter time period as permitted by the presiding officer.

(ii) If the petitioner or the appointed OCC attorney desires to present oral testimony or witnesses at the hearing, they must file a written request with the presiding officer not later than ten days prior to the hearing, or within a shorter time period as permitted by the presiding officer. The names of proposed witnesses should be included, along with the general nature of the expected testimony, and the reasons why oral testimony is necessary. The presiding officer generally will not admit oral testimony or witnesses unless a specific and compelling need is demonstrated. Witnesses, if admitted, shall be sworn.

(iii) In deciding on any suspension, the presiding officer shall not consider the ultimate question of the guilt or innocence of the individual with respect to the criminal charges which are outstanding. In deciding on any removal, the presiding officer shall not consider challenges to or efforts to impeach the validity of the conviction. The presiding officer may consider facts in either situation, however, which show the nature of the events on which the indictment or conviction was based.

(4) *Record.* A verbatim transcript of the proceedings may be taken if the petitioner requests a transcript and agrees to pay all expenses, or if the presiding officer determines that the nature of the case warrants a transcript. The presiding officer may order the record to be kept open for a reasonable period following the hearing, not to exceed five business days, to permit the petitioner or the appointed OCC attorney to submit additional documents for the record. Thereafter, no further submissions may be accepted except for good cause shown.

§ 19.113 Recommended and final decisions.

(a) The presiding officer shall issue a recommended decision to the Comptroller and shall serve promptly a copy of the decision on the parties to the proceeding. The decision shall include a summary of the facts and arguments of the parties. Within ten days of service, parties may submit to the Comptroller comments on the presiding officer's recommended decision.

(b) Within 60 days following the hearing or receipt of the petitioner's written submission, the Comptroller shall notify the petitioner by registered mail as to whether the suspension or removal from office, and prohibition from participation in any manner in the affairs of the bank, will be affirmed, terminated or modified. The Comptroller's decision must include a statement of reasons supporting the decision. The Comptroller's decision is a final and unappealable order.

(c) A finding of not guilty or other disposition of the charge on which a notice of suspension was based does not preclude the Comptroller from thereafter instituting removal proceedings pursuant to section 8(e) of the Federal Deposit Insurance Act (12 U.S.C. 1818(e)) and subpart A of this part.

(d) A removal or prohibition by order remains in effect until terminated by the Comptroller. A suspension or prohibition by notice remains in effect until the criminal charge is disposed of or until terminated by the Comptroller.

(e) A suspended or removed individual may petition the Comptroller to reconsider the decision any time after the expiration of a 12-month period from the date of the decision, but no petition for reconsideration may be made within 12 months of a previous petition. The petition must state specifically the relief sought and the grounds therefor, and may be accompanied by a supporting memorandum and any other documentation the petitioner wishes to have considered. No hearing need be granted on the petition for reconsideration.

Subpart D—Exemption Hearings Under Section 12(h) of the Securities Exchange Act of 1934

§ 19.120 Scope.

The rules in this subpart apply to informal hearings that may be held by the Comptroller to determine whether, pursuant to authority in sections 12 (h) and (i) of the Exchange Act (15 U.S.C. 78*l* (h) and (i)), to exempt in whole or in part an issuer or a class of issuers from the provisions of section 12(g), or from section 13 or 14 of the Exchange Act (15 U.S.C. 78*l*(g), 78m or 78n), or whether to exempt from section 16 of the Exchange Act (15 U.S.C. 78p) any officer, director, or beneficial owner of securities of an issuer. The only issuers covered by this subpart are banks whose securities are registered pursuant to section 12(g) of the Exchange Act (15 U.S.C. 78*l*(g)). The Comptroller may deny an application for exemption without a hearing.

§ 19.121 Application for exemption.

An issuer or an individual (officer, director or shareholder) may submit a written application for an exemption order to the Securities and Corporate Practices Division, Office of the Comptroller of the Currency, Washington, DC 20219. The application must specify the type of exemption sought and the reasons therefor, including an explanation of why an exemption would not be inconsistent with the public interest or the protection of investors. The Securities and Corporate Practices Division shall inform the applicant in writing whether a hearing will be held to consider the matter.

§ 19.122 Newspaper notice.

Upon being informed that an application will be considered at a hearing, the applicant shall publish a notice one time in a newspaper of general circulation in the community where the issuer's main office is located. The notice must state: The name and title of any individual applicants; the type of exemption sought; the fact that a hearing will be held; and a statement that interested persons may submit to the Securities and Corporate Practices Division, Office of the Comptroller of the Currency, Washington, DC 20219, within 30 days from the date of the newspaper notice, written comments concerning the application and a written request for an opportunity to be heard. The applicant shall promptly furnish a copy of the notice to the Securities and Corporate Practices Division, and to bank shareholders.

§ 19.123 Informal hearing.

(a) *Conduct of proceeding.* The adjudicative provisions of the APA (5 U.S.C. 554–557), formal rules of evidence and subpart A of this part do not apply to hearings conducted under this subpart.

(b) *Notice of hearing.* Following the comment period, the Comptroller shall send a notice which fixes a date, time and place for hearing to each applicant and to any person who has requested an opportunity to be heard.

(c) *Presiding officer.* The Comptroller shall designate a presiding officer to conduct the hearing. The presiding officer shall determine all procedural questions not governed by this subpart, and may limit the number of witnesses and impose time and presentation limitations as are deemed reasonable. At the conclusion of the informal hearing, the presiding officer shall issue a recommended decision to the Comptroller as to whether the exemption should issue. The decision shall include a summary of the facts and arguments of the parties.

(d) *Attendance.* The applicant and any person who has requested an opportunity to be heard may attend the hearing, with or without counsel. The hearing shall be open to the public. In addition, the applicant and any other hearing participant may introduce oral testimony through such witnesses as the presiding officer shall permit.

(e) *Order of presentation.* (1) The applicant may present an opening statement of a length decided by the presiding officer. Then each of the hearing participants, or one among them selected with the approval of the presiding officer, may present an opening statement. The opening statement should summarize concisely what the applicant and each participant intends to show.

(2) The applicant shall have an opportunity to make an oral presentation of facts and materials or submit written materials for the record. One or more of the hearing participants may make an oral presentation or a written submission.

(3) After the above presentations, the applicant, followed by one or more of the hearing participants, may make concise summary statements reviewing their position.

(f) *Witnesses.* The obtaining and use of witnesses is the responsibility of the parties afforded the hearing. All witnesses shall be present on their own volition, but any person appearing as a witness may be questioned by each applicant, any hearing participant, and the presiding officer. Witnesses shall be sworn unless otherwise directed by the presiding officer.

(g) *Evidence.* The presiding officer may exclude data or materials deemed to be improper or irrelevant. Formal rules of evidence do not apply. Documentary material must be of a size consistent with ease of handling and filing. The presiding officer may determine the number of copies that must be furnished for purposes of the hearing.

(h) *Transcript.* A transcript of each proceeding will be arranged by the OCC, with all expenses, including the furnishing of a copy to the presiding officer, being borne by the applicant.

§ 19.124 Decision of the Comptroller.

Following the conclusion of the hearing and the submission of the record and the presiding officer's recommended decision to the Comptroller for decision, the Comptroller or the Comptroller's delegate shall notify the applicant and all persons who have so requested in writing of the final disposition of the application. Exemptions granted must be in the form of an order which specifies the type of exemption granted and its terms and conditions.

Subpart E—Disciplinary Proceedings Involving the Federal Securities Laws

§ 19.130 Scope.

(a) Except as provided in this subpart, subpart A of this part applies to proceedings by the Comptroller to determine whether, pursuant to authority contained in sections 15B(c)(5), 15C(c)(2)(A), 17A(c)(3), and 17A(c)(4)(C) of the Exchange Act (15 U.S.C. 78o-4(c)(5), 78o-5(c)(2)(A), 78q-1(c)(3)(A), and 78q-1(c)(4)(C)), to take disciplinary action against the following:

(1) A bank which is a municipal securities dealer, or any person associated or seeking to become associated with such a municipal securities dealer;

(2) A bank which is a government securities broker or dealer, or any person associated with such government securities broker or dealer; or

(3) A bank which is a transfer agent, or any person associated or seeking to become associated with such transfer agent.

(b) In addition to the issuance of disciplinary orders after opportunity for hearing, the Comptroller or the Comptroller's delegate may issue and serve any notices and temporary or permanent cease-and-desist orders and take any actions that are authorized by section 8 of the FDIA (12 U.S.C. 1818), sections 15B(c)(5), 15C(c)(2)(B), and 17A(d)(2) of the Exchange Act, and other subparts of this part against the following:

(1) The parties listed in paragraph (a) of this section; and

(2) A bank which is a clearing agency.

(c) Nothing in this part impairs the powers conferred on the Comptroller by other provisions of law.

§ 19.131 Notice of charges and answer.

(a) Proceedings are commenced when the Comptroller serves a notice of charges on a bank or associated person. The notice must indicate the type of disciplinary action being contemplated and the grounds therefor, and fix a date, time and place for hearing. The hearing must be set for a date at least 30 days after service of the notice. A party served with a notice of charges may file an answer as prescribed in § 19.19. Any party who fails to appear at a hearing personally or by a duly authorized representative shall be deemed to have consented to the issuance of a disciplinary order.

(b) All proceedings under this subpart must be commenced, and the notice of charges must be filed, on a public basis, unless otherwise ordered by the Comptroller. Pursuant to § 19.33(b), a request for a private hearing may be filed within 20 days of service of the notice.

§ 19.132 Disciplinary orders.

(a) In the event of consent, or if on the record filed by the presiding officer, the Comptroller finds that any act or omission or violation specified in the notice of charges has been established,

VOL 56 ISS 116 JE 17 1991 UMI

the Comptroller or the Comptroller's delegate may serve on the bank or persons concerned a disciplinary order, as provided in the Exchange Act. The order may:

(1) Censure, limit the activities, functions or operations, or suspend or revoke the registration of a bank which is a municipal securities dealer;

(2) Censure, suspend or bar any person associated or seeking to become associated with a municipal securities dealer;

(3) Censure, limit the activities, functions or operations, or suspend or bar a bank which is a government securities broker or dealer;

(4) Censure, limit the activities, functions or operations, or suspend or bar any person associated with a government securities broker or dealer;

(5) Deny registration to, limit the activities functions, or operations or suspend or revoke the registration of a bank which is a transfer agent; or

(6) Censure or limit the activities or functions, or suspend or bar, any person associated or seeking to become associated with a transfer agent.

(b) A disciplinary order is effective when served on the party or parties involved and remains effective and enforceable until it is stayed, modified, terminated, or set aside by action of the Comptroller or a reviewing court.

Subpart F—Civil Money Penalty Authority Under the Securities Laws

§ 19.140 Scope.

(a) Except as provided in this subpart, subpart A of this part applies to proceedings by the Comptroller to determine whether, pursuant to authority contained in section 21B of the Exchange Act (15 U.S.C. 78u–2), in proceedings commenced pursuant to sections 15B, 15C, and 17A of the Exchange Act (15 U.S.C. 78o–4, 78o–5, or 78q–1) for which the OCC is the appropriate regulatory agency under section 3(a)(34) of the Exchange Act (15 U.S.C. 78c(a)(34)), the Comptroller may impose a civil money penalty against the following:

(1) A bank which is a municipal securities dealer, or any person associated or seeking to become associated with such a municipal securities dealer;

(2) A bank which is a government securities broker or dealer, or any person associated with such government securities broker or dealer; or

(3) A bank which is a transfer agent, or any person associated or seeking to become associated with such transfer agent.

(b) All proceedings under this subpart must be commenced, and the notice of assessment must be filed, on a public basis, unless otherwise ordered by the Comptroller. Pursuant to § 19.33(b), a request for a private hearing may be filed within 20 days of service of the notice.

Subpart G—Cease-and-Desist Authority Under the Securities Laws

§ 19.150 Scope.

(a) Except as provided in this subpart, subpart A of this part applies to proceedings by the Comptroller to determine whether, pursuant to authority contained in sections 12(i) and 21C of the Exchange Act (15 U.S.C. 78*l*(i) and 78u–3), the Comptroller may initiate cease-and-desist proceedings against a national bank for violations of sections 12, 13, 14(a), 14(c), 14(d), 14(f), and 16 of the Exchange Act or regulations or rules issued thereunder (15 U.S.C. 78*l*, 78m, 78n(a), 78n(c), 78n(d), 78n(f), and 78p).

(b) All proceedings under this subpart must be commenced, and the notice of charges must be filed, on a public basis, unless otherwise ordered by the Comptroller. Pursuant to § 19.33(b), a request for a private hearing may be filed within 20 days of service of the notice.

Subpart H—Change in Bank Control

§ 19.160 Scope.

(a) Section 7(j) of the FDIA (12 U.S.C. 1817(j)) provides that no person may acquire control of an insured depository institution unless the appropriate Federal bank regulatory agency has been given prior written notice of the proposed acquisition. If, after investigating and soliciting comment on the proposed acquisition, the agency decides that the acquisition should be disapproved, the agency shall notify the acquiring party in writing within three days of the decision. The party can then request an agency hearing on the proposed acquisition. The OCC's procedures for reviewing notices of proposed acquisitions in change-in-control proceedings are set forth at 12 CFR 5.50.

(b) Unless otherwise provided in this subpart, the rules in subpart A of this part set forth the procedures applicable to requests for OCC hearings.

§ 19.161 Hearing request and answer.

(a) *Hearing request.* (1) The OCC's written disapproval of a proposed acquisition of control of a national bank, must—

(i) Contain a statement of the basis for the disapproval; and

(ii) Indicate that—

(A) A hearing may be requested by filing a written request with the Comptroller within ten days after service of the notice of disapproval; and

(B) If a hearing is requested, that an answer to the notice of disapproval must be filed within 20 days after service of the notice of disapproval.

(b) *Answer.* An answer to the notice of disapproval must specifically deny those portions of the notice of disapproval which are disputed. Those portions of the notice which are not specifically denied are deemed admitted by the applicant. Any hearing under this subpart shall be limited to those parts of the notice that are specifically denied.

(c) *Waiver of hearing.* Failure to request a hearing pursuant to this section or to file an answer constitutes a waiver of the opportunity for a hearing, and the notice of disapproval constitutes a final and unappealable order.

§ 19.162 Hearing order.

Upon receipt of a request for hearing and an answer pursuant to § 19.161, the Comptroller or the Comptroller's designee shall issue an order setting forth the legal authority for the OCC's jurisdiction over the proceeding and shall address the request for hearing.

Subpart I—Discovery Depositions and Subpoenas

§ 19.170 Discovery depositions.

(a) *General rule.* A party may take the deposition of an expert, or of a person, including another party, who has direct knowledge of matters that are non-privileged, relevant, and material to the proceeding, and where there is need for the deposition. The deposition of experts shall be limited to those experts who are expected to testify at the hearing.

(b) *Notice.* A party desiring to take a deposition shall give reasonable notice in writing to the deponent and to every other party to the proceeding. The notice must state the time and place for taking the deposition, and the name and address of the person to be deposed.

(c) *Time limits.* A party may take depositions at any time after the commencement of the proceeding, but no later than ten days before the scheduled hearing date, except with permission of the administrative law judge for good cause shown.

(d) *Conduct of the deposition.* The witness shall be duly sworn, and each party shall have the right to examine the witness with respect to all non-privileged, relevant, and material matters of which the witness has factual, direct, and personal knowledge. Objections to questions or exhibits shall be in short form, stating the grounds for the objection. Failure to object to questions or exhibits is not a waiver except where the grounds for the objection might have been avoided if the objection had been timely presented. The court reporter shall transcribe or otherwise record the witness's testimony, as agreed among the parties.

(e) *Protective orders.* At any time after notice of a deposition has been given, a party may file a motion for the issuance of a protective order. Such protective order may prohibit, terminate, or limit the scope or manner of the taking of a deposition. The administrative law judge shall grant such protective order upon a showing of sufficient grounds, including that the deposition:

(1) Is unreasonable, oppressive, excessive in scope, or unduly burdensome;

(2) Involves privileged, irrelevant, or immaterial matters;

(3) Involves unwarranted attempts to pry into a party's preparation for trial; or

(4) Is being conducted in bad faith or in such manner as to unreasonably annoy, embarrass, or oppress the witness.

(f) *Fees.* Deposition witnesses, including expert witnesses, shall be paid the same expenses in the same manner as are paid witnesses in the district courts of the United States in proceedings in which the United States is a party. Expenses in accordance with this paragraph shall be paid by the party seeking to take the deposition.

§ 19.171 Deposition subpoenas.

(a) *Issuance.* At the request of a party, the administrative law judge shall issue a subpoena requiring the attendance of a witness at a deposition. The attendance of a witness may be required from any place in any state or territory that is subject to the jurisdiction of the United States or as otherwise permitted by law.

(b) *Service.* The party requesting the subpoena shall serve it on the person named therein, or on that person's counsel, by personal service, certified mail, or overnight delivery service. The party serving the subpoena shall file proof of service with the administrative law judge.

(c) *Motion to quash.* A person named in a subpoena may file a motion to quash or modify the subpoena. A statement of the reasons for the motion must accompany it and a copy of the motion must be served on the party which requested the subpoena. The motion must be made prior to the time for compliance specified in the subpoena and not more than ten days after the date of service of the subpoena, or if the subpoena is served within 15 days of the hearing, within five days after the date of service.

(d) *Enforcement of deposition subpoena.* Enforcement of a deposition subpoena shall be in accordance with the procedures of § 19.27(d).

Subpart J—Formal Investigations

§ 19.180 Scope.

This subpart and § 19.8 apply to formal investigations initiated by order of the Comptroller or the Comptroller's delegate and pertain to the exercise of powers specified in 12 U.S.C. 481, 1818(n) and 1820(c), and section 21 of the Exchange Act (15 U.S.C. 78u). This subpart does not restrict or in any way affect the authority of the Comptroller to conduct examinations into the affairs or ownership of banks and their affiliates.

§ 19.181 Confidentiality of formal investigations.

Information or documents obtained in the course of a formal investigation are confidential and may be disclosed only in accordance with the provisions of part 4 of this chapter.

§ 19.182 Order to conduct a formal investigation.

A formal investigation begins with the issuance of an order signed by the Comptroller or the Comptroller's delegate. The order must designate the person or persons who will conduct the investigation. Such persons are authorized, among other things, to issue subpoenas duces tecum, to administer oaths, and receive affirmations as to any matter under investigation by the Comptroller. Upon application and for good cause shown, the Comptroller may limit, modify, or withdraw the order at any stage of the proceedings.

§ 19.183 Rights of witnesses.

(a) Any person who is compelled or requested to furnish testimony, documentary evidence, or other information with respect to any matter under formal investigation shall, on request, be shown the order initiating the investigation.

(b) Any person who, in a formal investigation, is compelled to appear and testify, or who appears and testifies by request or permission of the Comptroller, may be accompanied, represented, and advised by counsel. The right to be accompanied, represented, and advised by counsel means the right of a person testifying to have an attorney present at all times while testifying and to have the attorney—

(1) Advise the person before, during and after the conclusion of testimony;

(2) Question the person briefly at the conclusion of testimony to clarify any of the answers given; and

(3) Make summary notes during the testimony solely for the use of the person.

(c) Any person who has given or will give testimony and counsel representing the person may be excluded from the proceedings during the taking of testimony of any other witness.

(d) Any person who is compelled to give testimony is entitled to inspect any transcript that has been made of the testimony but may not obtain a copy if the Comptroller's representatives conducting the proceedings have cause to believe that the contents should not be disclosed pending completion of the investigation.

(e) Any designated representative conducting an investigative proceeding shall report to the Comptroller any instances where a person has been guilty of dilatory, obstructionist or insubordinate conduct during the course of the proceeding or any other instance involving a violation of this part. The Comptroller may take such action as the circumstances warrant, including exclusion of the offending individual or individuals from participation in the proceedings.

§ 19.184 Service of subpoena and payment of witness fees.

A subpoena may be served on the person named therein, or such person's attorney, by personal service or certified mail. A witness who is subpoenaed will be paid the same expenses in the same manner as witnesses in the district courts of the United States. The expenses need not be tendered at the time a subpoena is served.

Subpart K—Parties and Representational Practice Before the OCC; Standards of Conduct

§ 19.190 Scope.

This subpart contains rules relating to parties and representational practice before the OCC. These rules include the imposition of sanctions by the administrative law judge, any other presiding officer, or the Comptroller against parties or their counsel in an adjudicatory proceeding under this part. They also cover other disciplinary sanctions—censure, suspension or debarment—against individuals who appear before the OCC in a representational capacity either in an adjudicatory proceeding under this part or in any other matters connected with

VOL 56 ISS 116 JE 17 1991 UMI

presentations to the OCC relating to a client's rights, privileges, or liabilities. This representation includes, but is not limited to, the practice of attorneys and accountants. Employees of the OCC are not subject to disciplinary proceedings under this subpart.

§ 19.191 Sanctions relating to conduct in an adjudicatory proceeding.

(a) *General rule.* Appropriate sanctions may be imposed when any party or person representing a party in an adjudicatory proceeding under this part has failed to comply with an applicable statute, regulation, or order, and that failure to comply:

(1) Constitutes contemptuous conduct;

(2) Materially injures or prejudices another party in terms of substantive injury, incurring additional expenses including attorney's fees, prejudicial delay, or otherwise;

(3) Is a clear and unexcused violation of an applicable statute, regulation, or order; or

(4) Unduly delays the proceeding.

(b) *Sanctions.* Sanctions which may be imposed include any one or more of the following:

(1) Issuing an order against the party;

(2) Rejecting or striking any testimony or documentary evidence offered, or other papers filed, by the party;

(3) Precluding the party from contesting specific issues or findings;

(4) Precluding the party from offering certain evidence or from challenging or contesting certain evidence offered by another party;

(5) Precluding the party from making a late filing or conditioning a late filing on any terms that are just; and

(6) Assessing reasonable expenses, including attorney's fees, incurred by any other party as a result of the improper action or failure to act.

(c) *Procedure for imposition of sanctions.* (1) Upon the motion of any party, or on his or her own motion, the administrative law judge or other presiding officer may impose sanctions in accordance with this section. The administrative law judge or other presiding officer shall submit to the Comptroller for final ruling any sanction entering a final order that determines the case on the merits.

(2) No sanction authorized by this section, other than refusal to accept late filings, shall be imposed without prior notice to all parties and an opportunity for any party against whom sanctions would be imposed to be heard. Such opportunity to be heard may be on such notice, and the response may be in such form as the administrative law judge or other presiding officer directs. The administrative law judge or other presiding officer may limit the opportunity to be heard to an opportunity of a party or a party's representative to respond orally immediately after the act or inaction covered by this section is noted by the administrative law judge or other presiding officer.

(3) Requests for the imposition of sanctions by any party, and the imposition of sanctions, are subject to interlocutory review pursuant to § 19.25 in the same manner as any other ruling.

(d) *Section not exclusive.* Nothing in this section shall be read as precluding the administrative law judge or other presiding officer or the Comptroller from taking any other action, or imposing any restriction or sanction, authorized by applicable statute or regulation.

§ 19.192 Censure, suspension or debarment.

The Comptroller may censure an individual or suspend or debar such individual from practice before the OCC if he or she is incompetent in representing a client's rights or interest in a significant matter before the OCC; or engages, or has engaged, in disreputable conduct; or refuses to comply with the rules and regulations in this part; or with intent to defraud in any manner, willfully and knowingly deceives, misleads, or threatens any client or prospective client. The suspension or debarment of an individual may be initiated only upon a finding by the Comptroller that the basis for the disciplinary action is sufficiently egregious.

§ 19.193 Definitions.

As used in §§ 19.190 through 19.201, the following terms shall have the meaning given in this section unless the context otherwise requires:

(a)(1) *Practice before the OCC* includes any matters connected with presentations to the OCC or any of its officers or employees relating to a client's rights, privileges or liabilities under laws or regulations administered by the OCC. Such matters include, but are not limited to, representation of a client in an adjudicatory proceeding under this part; the preparation of any statement, opinion or other paper or document by an attorney, accountant, or other licensed professional which is filed with, or submitted to, the OCC, on behalf of another person in, or in connection with, any application, notification, report or document; the representation of a person at conferences, hearings and meetings; and the transaction of other business before the OCC on behalf of another person.

(2) *Practice before the OCC* does not include work prepared for a bank solely at its request for use in the ordinary course of its business.

(b) *Attorney* means any individual who is a member in good standing of the bar of the highest court of any state, possession, territory, commonwealth, of the United States or the District of Columbia.

(c) *Accountant* means any individual who is duly qualified to practice as a certified public accountant or a public accountant in any state, possession, territory, commonwealth of the United States, or the District of Columbia.

§ 19.194 Eligibility to practice.

(a) *Attorneys.* Any attorney who is qualified to practice as an attorney and is not currently under suspension or debarment pursuant to this subpart may practice before the OCC.

(b) *Accountants.* Any accountant who is qualified to practice as a certified public accountant or public accountant and is not currently under suspension or debarment by the OCC may practice before the OCC.

§ 19.195 Incompetence.

Incompetence in the representation of a client's rights and interests in a significant matter before the OCC is grounds for suspension or debarment. The term "incompetence" encompasses conduct that reflects a lack of the knowledge, judgment and skill that a professional would ordinarily and reasonably be expected to exercise in adequately representing the rights and interests of a client. Such conduct includes, but is not limited to:

(a) Handling a matter which the individual knows or should know that he or she is not competent to handle, without associating with a professional who is competent to handle such matter.

(b) Handling a matter without adequate preparation under the circumstances.

(c) Neglect in a matter entrusted to him or her.

§ 19.196 Disreputable conduct.

Disreputable conduct for which an individual may be censured, debarred or suspended from practice before the OCC includes, but is not limited to:

(a) Willfully violating or willfully aiding and abetting the violation of any provision of the Federal banking or applicable securities laws or the rules and regulations thereunder or conviction of any offense involving dishonesty or breach of trust.

(b) Knowingly giving false or misleading information, or participating in any way in the giving of false information to the OCC or any officer or employee thereof, or to any tribunal authorized to pass upon matters administered by the OCC in connection with any matter pending or likely to be pending before it. The term "information" includes facts or other statements contained in testimony, financial statements, applications for enrollment, affidavits, declarations, or any other document or written or oral statement.

(c) Directly or indirectly attempting to influence, or offering or agreeing to attempt to influence, the official action of any officer or employee of the OCC by the use of threats, false accusations, duress or coercion, by the offer of any special inducement or promise of advantage or by the bestowing of any gift, favor, or thing of value.

(d) Disbarment or suspension from practice as an attorney, or debarment or suspension from practice as a certified public accountant or public accountant, by any duly constituted authority of any state, possession, or commonwealth of the United States, or the District of Columbia for the conviction of a felony or misdemeanor involving moral turpitude in matters relating to the supervisory responsibilities of the OCC, where the conviction has not been reversed on appeal.

(e) Knowingly aiding or abetting another individual to practice before the OCC during that individual's period of suspension, debarment, or ineligibility.

(f) Contemptuous conduct in connection with practice before the OCC, and knowingly making false accusations and statements, or circulating or publishing malicious or libelous matter.

(g) Suspension or debarment from practice before the Board of Governors, the FDIC, the OTS, the Securities and Exchange Commission, the Commodity Futures Trading Commission, or any other Federal agency based on matters relating to the supervisory responsibilities of the OCC.

(h) Willful violation of any of the regulations contained in this part.

§ 19.197 Initiation of disciplinary proceeding.

(a) *Receipt of information.* An individual, including any employee of the OCC, who has reason to believe that an individual practicing before the OCC in a representative capacity has engaged in any conduct that would serve as a basis for censure, suspension or debarment under § 19.192, may make a report thereof and forward it to the OCC or to such person as may be delegated responsibility for such matters by the Comptroller.

(b) *Censure without formal proceeding.* Upon receipt of information regarding an individual's qualification to practice before the OCC, the Comptroller or the Comptroller's delegate may, after giving the individual notice and opportunity to respond, censure such individual.

(c) *Institution of formal disciplinary proceeding.* When the Comptroller or the Comptroller's delegate has reason to believe that any individual who practices before the OCC in a representative capacity has engaged in conduct that would serve as a basis for censure, suspension or debarment under § 19.192, the Comptroller or the Comptroller's delegate may, after giving the individual notice and opportunity to respond, institute a formal disciplinary proceeding against such individual. The proceeding will be conducted pursuant to § 19.199 and initiated by a complaint which names the individual as a respondent and is signed by the Comptroller or the Comptroller's delegate. Except in cases of willfulness, or when time, the nature of the proceeding, or the public interest do not permit, a proceeding under this section may not be commenced until the respondent has been informed, in writing, of the facts or conduct which warrant institution of a proceeding and the respondent has been accorded the opportunity to comply with all lawful requirements or take whatever action may be necessary to remedy the conduct that is the basis for the commencement of the proceeding.

§ 19.198 Conferences.

(a) *General.* The Comptroller or the Comptroller's delegate may confer with a proposed respondent concerning allegations of misconduct or other grounds for censure, debarment or suspension, regardless of whether a proceeding for debarment or suspension has been commenced. If a conference results in a stipulation in connection with a proceeding in which the individual is the respondent, the stipulation may be entered in the record at the request of either party to the proceeding.

(b) *Resignation or voluntary suspension.* In order to avoid the institution of, or a decision in, a debarment or suspension proceeding, a person who practices before the OCC may consent to suspension from practice. At the discretion of the Comptroller or the Comptroller's delegate, the individual may be suspended or debarred in accordance with the consent offered.

§ 19.199 Proceedings under this subpart.

Any hearing held under this subpart are held before a presiding officer who is an administrative law judge pursuant to procedures set forth in subpart A of this part. The Comptroller or the Comptroller's delegate shall appoint a person to represent the OCC in the hearing. Any person having prior involvement in the matter which is the basis for the suspension or debarment proceeding is disqualified from representing the OCC in the hearing. The hearing will be closed to the public unless the Comptroller on his or her own initiative, or on the request of a party, otherwise directs. The presiding officer shall issue a recommended decision to the Comptroller who shall issue the final decision and order. The Comptroller may censure, debar or suspend an individual, or take such other disciplinary action as the Comptroller deems appropriate.

§ 19.200 Effect of suspension, debarment or censure.

(a) *Debarment.* If the final order against the respondent is for debarment, the individual may not practice before the OCC unless otherwise permitted to do so by the Comptroller.

(b) *Suspension.* If the final order against the respondent is for suspension, the individual may not practice before the OCC during the period of suspension.

(c) *Censure.* If the final order against the respondent is for censure, the individual may be permitted to practice before the OCC, but such individual's future representations may be subject to conditions designed to promote high standards of conduct. If a written letter of censure is issued, a copy will be maintained in the OCC's files.

(d) *Notice of debarment or suspension.* Upon the issuance of a final order for suspension or debarment, the Comptroller or the Comptroller's delegate shall give notice of the order to appropriate officers and employees of the OCC and to interested departments and agencies of the Federal Government. The Comptroller or the Comptroller's delegate shall also give notice to the appropriate authorities of the state in which any debarred or suspended individual is or was licensed to practice.

§ 19.201 Petition for reinstatement.

At the expiration of the period of time designated in the order of debarment, the Comptroller may entertain a petition for reinstatement from any person debarred from practice before the OCC. The Comptroller may grant

VOL 56 ISS 116 JE 17 1991 UMI

reinstatement only if satisfied that the petitioner is likely to act in accordance with the regulations in this part, and that granting reinstatement would not be contrary to the public interest. Any request for reinstatement shall be limited to written submissions unless the Comptroller, in his or her discretion, affords the petitioner a hearing.

Subpart L—Equal Access to Justice Act

§ 19.210 Scope.

The Equal Access to Justice Act regulations applicable to formal OCC adjudicatory proceedings under this part are set forth at 31 CFR part 6.

4. Subparts M through O are removed.

Dated: June 5, 1991.

Robert B. Serino,

Deputy Chief Counsel (Policy).

FEDERAL RESERVE SYSTEM

12 CFR Part 263

List of Subjects in 12 CFR Part 263

Administrative practice and procedure; Banks, banking; Equal access to justice; Federal Reserve System; Hearing and appeal procedures; Penalties.

Authority and Issuance

For the reasons set out in the common preamble, part 263 of chapter II of title 12 of the Code of Federal Regulations is proposed to be amended as set forth below:

PART 263—RULES OF PRACTICE FOR HEARINGS

1. The authority citation for part 263 is revised to read as follows:

Authority: Sections 9, 11(i), 19 and 29 of the Federal Reserve Act (12 U.S.C. 324, 248, 504, and 505); sections 5(b), 8(b) and 8(d) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(b), 1847(b) and 1847(d)); section 106(b)(2)(F) of the Bank Holding Company Act Amendments of 1970, as amended (12 U.S.C. 1972(2)(F)); sections 7(j), 8 and 18(c) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1817(j), 1818 and 2828(c)); section 13 of the International Banking Act of 1978 (12 U.S.C. 3108); sections 15B(c)(5), 15C(c)(2), and 21B of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78o–4, 78o–5, and 78u–2); section 11 of the Clayton Act, as amended (15 U.S.C. 21); section 203(c) of the Equal Access to Justice Act, as amended (5 U.S.C. 504); and sections 908 and 910 of the International Lending Supervision Act of 1983 (12 U.S.C. 3907 and 3909).

2. Subpart A is revised to read as set forth at the end of the common preamble.

Subpart A—Uniform Rules of Practice and Procedure

Sec.
263.1 Scope.
263.2 Rules of construction.
263.3 Definitions.
263.4 Authority of Agency Head.
263.5 Authority of the administrative law judge.
263.6 Appearance and practice in adjudicatory proceedings.
263.7 Good faith certification.
263.8 Conflicts of interest.
263.9 Ex parte communications.
263.10 Filing of papers.
263.11 Service of papers.
263.12 Construction of time limits.
263.13 Change of time limits.
263.14 Witness fees and expenses.
263.15 Opportunity for informal settlement.
263.16 Agency's right to conduct examination.
263.17 Collateral attacks on adjudicatory proceeding.
263.18 Commencement of proceeding and contents of notice.
263.19 Answer.
263.20 Amended pleadings.
263.21 Failure to appear.
263.22 Consolidation and severance of actions.
263.23 Motions.
263.24 Scope of document discovery.
263.25 Request for document discovery from parties.
263.26 Document subpoenas to nonparties.
263.27 Deposition of witness unavailable for hearing.
263.28 Interlocutory review.
263.29 Summary disposition.
263.30 Partial summary disposition.
263.31 Scheduling and prehearing conferences.
263.32 Prehearing submissions.
263.33 Public hearings.
263.34 Hearing subpoenas.
263.35 Conduct of hearings.
263.36 Evidence.
263.37 Proposed findings and conclusions.
263.38 Recommended decision and filing of record.
263.39 Exceptions to recommended decision.
263.40 Review by Agency Head.
263.41 Stays pending judicial review.

3. Subparts B through D are revised and new subparts E through G are added to read as follows:

Subpart B—Board of Governors Local Rules Supplementing the Uniform Rules

263.50 Purpose and scope.
263.51 Definitions.
263.52 Address for filing.
263.53 Discovery depositions.
263.54 Delegation to the Office of Financial Institution Adjudication.

Subpart C—Procedures for Assessment of Civil Money Penalties

263.60 Scope.
263.61 Opportunity for informal proceeding.
263.62 Relevant considerations for assessment of civil penalty.
263.63 Assessment order.
263.64 Payment of civil penalty

Subpart D—Rules and Procedures Applicable to Suspension of Removal of an Institution-Affiliated Party Where a Felony Is Charged or Proven

263.70 Purpose and scope.
263.71 Notice of order of suspension, removal, or prohibition.
263.72 Request for informal hearing.
263.73 Order for informal hearing.
263.74 Decision of the Board.

Subpart E—Procedures for Issuance and Enforcement of Directives To Maintain Adequate Capital

263.80 Purpose and scope.
263.81 Definitions.
263.82 Establishment of minimum capital levels.
263.83 Issuance of capital directives.
263.84 Enforcement of directive.
263.85 Establishment of increased capital level for specific institutions.

Subpart F—Practice Before the Board

263.90 Scope.
263.91 Censure, suspension or debarment.
263.92 Definitions.
263.93 Eligibility to practice.
263.94 Conduct warranting sanctions.
263.95 Initiation of disciplinary proceeding.
263.96 Conferences.
263.97 Proceedings under this subpart.
263.98 Effect of suspension, debarment or censure.
263.99 Petition for reinstatement.

Subpart G—Rules Regarding Claims Under the Equal Access to Justice Act

263.100 Authority and scope.
263.101 Standards for awards.
263.102 Prevailing party.
263.103 Eligibility of applicants.
263.104 Application for awards.
263.105 Statement of net worth.
263.106 Measure of awards.
263.107 Statement of fees and expenses.
263.108 Responses to application.
263.109 Further proceedings.
263.110 Recommended decision.
263.111 Action by the Board.

Subpart B—Board of Governors Local Rules Supplementing the Uniform Rules

§ 263.50 Purpose and scope.

(a) This subpart prescribes the rules of practice and procedure governing formal adjudications set forth in § 263.50(b) of this subpart, and supplements the rules of practice and procedure contained in subpart A of this part.

(b) The rules and procedures of this subpart and subpart A of this part shall apply to the formal adjudications set forth in § 263.1 of subpart A and to the following adjudications:

(1) Suspension of a member bank from use of credit facilities of the Federal Reserve System under section 4 of the FRA (12 U.S.C. 301);

(2) Termination of a bank's membership in the Federal Reserve System under section 9 of the FRA (12 U.S.C. 327);

(3) Issuance of a cease-and-desist order under section 11 of the Clayton Act (15 U.S.C. 21);

(4) Formal adjudications on bank merger applications under section 18(c) of the FDIA (12 U.S.C. 1828(c));

(5) Issuance of a divestiture order under section 5(e) of the BHCA (12 U.S.C. 1844(e));

(6) Imposition of sanctions upon any municipal securities dealer for which the Board is the appropriate regulatory agency, or upon any person associated or seeking to become associated with such a municipal securities dealer, under section 15B(c)(5) of the Exchange Act (15 U.S.C. 78o–4); and

(7) Proceedings where the Board otherwise orders that a formal hearing be held.

§ 263.51 Definitions.

As used in subparts B through G of this part:

(a) *Board* means the Board of Governors of the Federal Reserve System;

(b) *Secretary* means the Secretary of the Board of Governors of the Federal Reserve System.

§ 263.52 Address for filing.

All papers to be filed with the Board shall be filed with the Secretary of the Board of Governors of the Federal Reserve System, Washington, DC 20551.

§ 263.53 Discovery depositions.

(a) *In general.* In addition to the discovery permitted in subpart A of this part, limited discovery by means of depositions shall be allowed for certain individuals with knowledge of facts material to the proceeding that are not protected from discovery by any applicable privilege. In the ordinary case, accordingly, depositions will not be taken of individuals other than those identified as hearing witnesses or experts. All discovery depositions must be completed within the time set forth in § 263.24(d).

(b) *Application.* A party who desires to take a deposition of any other party's proposed witnesses or any expert, shall apply to the administrative law judge for the issuance of a discovery subpoena or subpoena duces tecum. The application shall state: The name and address of the proposed deponent, the subject matter of the testimony expected from the deponent and its relevancy to the proceeding, and the address of the place and the time, no sooner than ten days after the service of the subpoena, for the taking of the deposition. Any such application shall be treated as a motion subject to the rules governing motions practice set forth in § 263.23.

(c) *Issuance of subpoena.* The administrative law judge shall issue the requested deposition subpoena or subpoena duces tecum upon a finding that the application satisfies the requirements of this section and § 263.24. If the administrative law judge determines that the taking of the deposition or its proposed location is, in whole or in part, unnecessary, unreasonable, oppressive, excessive in scope or unduly burdensome, he or she may deny the application or may grant it upon such conditions as justice may require. The party obtaining the deposition subpoena or subpoena duces tecum shall be responsible for serving it on the deponent and all parties to the proceeding in accordance with § 263.11.

(d) *Motion to quash or modify.* A person named in a deposition subpoena or subpoena duces tecum may file a motion to quash or modify the subpoena, including the issuance of a protective order, within at least ten days after service of the subpoena, but in all cases at least five days prior to the commencement of the scheduled deposition. A statement of the reasons for granting the motion must accompany it and a copy of the motion and the statement must be served on party which requested the subpoena. Only the party requesting the subpoena may file a response to a motion to quash or modify, and such response shall be filed within five days of service of the motion.

(e) *Enforcement of a deposition subpoena.* Enforcement of a deposition subpoena shall be in accordance with the procedures set forth in § 263.27(d).

(f) *Conduct of the deposition.* The deponent shall be duly sworn, and each party shall have the right to examine the witness with respect to all non-privileged, relevant and material matters. Objections to questions or evidence shall be in the short form, stating the ground for the objection. Failure to object to questions or evidence shall not be deemed a waiver except where the grounds for the objection might have been avoided if the objection had been timely presented. The discovery deposition shall be transcribed or otherwise recorded as agreed among the parties.

(g) *Protective orders.* At any time during the taking of a discovery deposition, on the motion of any party or of the deponent, the administrative law judge may terminate or limit the scope and manner of the deposition upon a finding of sufficient ground. Grounds for terminating or limiting the taking of a discovery deposition include a finding that the discovery deposition is being conducted in bad faith or in such a manner as to:

(1) Unreasonably annoy, embarrass, or oppress the deponent;

(2) Unreasonably probe into privilege, irrelevant or immaterial matters; or

(3) Unreasonably attempt to pry into a party's preparation for trial.

§ 263.54 Delegation to the Office of Financial Institution Adjudication.

Unless otherwise ordered by the Board, administrative adjudications subject to subpart A of this part shall be conducted by an administrative law judge of the OFIA.

Subpart C—Procedures for Assessment of Civil Money Penalties

§ 263.60 Scope.

The Uniform Rules set forth in subpart A of this part shall govern the procedures for assessment of civil money penalties, except as otherwise provided in this subpart.

§ 263.61 Opportunity for informal proceeding.

In the sole discretion of the Board's General Counsel, the General Counsel may, prior to the issuance by the Board of a notice of assessment of civil penalty, advise the affected person that the issuance of a notice of assessment of civil penalty is being considered and the reasons and authority for the proposed assessment. The General Counsel may provide the person an opportunity to present written materials or request a conference with members of the Board's staff to show that the penalty should not be assessed or, if assessed, should be reduced in amount.

§ 263.62 Relevant considerations for assessment of civil penalty.

In determining the amount of the penalty to be assessed, the Board shall take into account the appropriateness of the penalty with respect to the financial resources and good faith of the person charged, the gravity of the misconduct, the history of previous misconduct, the economic benefit derived by the person from the misconduct, and such other matters as justice may require.

§ 263.63 Assessment order.

(a) In the event of consent to an assessment by the person concerned, or if, upon the record made at an administrative hearing, the Board finds that the grounds for having assessed the penalty have been established, the Board may issue a final order of assessment of civil penalty. In its final

VOL 56 ISS 116 JE 17 1991 UMI

order, the Board may modify the amount of the penalty specified in the notice of assessment.

(b) An assessment order is effective immediately upon issuance, or upon such other date as may be specified therein, and shall remain effective and enforceable until it is stayed, modified, terminated, or set aside by action of the Board or a reviewing court.

§ 263.64 Payment of civil penalty.

(a) The date designated in the notice of assessment for payment of the civil penalty will normally be 60 days from the issuance of the notice. If, however, the Board finds in a specific case that the purposes of the authorizing statute would be better served if the 60-day period is changed, the Board may shorten or lengthen the period or make the civil penalty payable immediately upon receipt of the notice of assessment. If a timely request for a formal hearing to challenge an assessment of civil penalty is filed, payment of the penalty shall not be required unless and until the Board issues a final order of assessment following the hearing. If an assessment order is issued, it will specify the date by which the civil penalty should be paid or collected.

(b) Checks in payment of civil penalties should be made payable to the "Board of Governors of the Federal Reserve System." Upon collection, the Board shall forward the amount of the penalty to the Treasury of the United States.

Subpart D— Rules and Procedures Applicable to Suspension or Removal of an Institution-Affiliated Party Where a Felony Is Charged or Proven

§ 263.70 Purpose and scope.

The rules and procedures set forth in this subpart apply to informal hearings afforded to any institution-affiliated party for whom the Board is the appropriate regulatory agency, who has been suspended from office or prohibited from further participation in any manner in the conduct of the institution's affairs by a notice or order issued by the Board upon the grounds set forth in section 8(g) of the FDIA (12 U.S.C. 1818(g)).

§ 263.71 Notice or order of suspension, removal, or prohibition.

(a) *Grounds.* The Board may suspend an institution-affiliated party from office or prohibit an institution-affiliated party from further participation in any manner in the conduct of an institution's affairs when the person is charged in any information, indictment, or complaint authorized by a United States attorney with the commission of, or participation in, a crime involving dishonesty or breach of trust that is punishable by imprisonment for a term exceeding one year under State or Federal law. The Board may remove an institution-affiliated party from office or prohibit an institution-affiliated party from further participation in any manner in the conduct of an institution's affairs when the person is convicted of such an offense and the conviction is not subject to further direct appellate review. The Board may suspend or remove an institution-affiliated party or prohibit an institution-affiliated party from participation in an institution's affairs in these circumstances if the Board finds that continued service to the financial institution or participation in its affairs by the institution-affiliated party may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the financial institution.

(b) *Contents.* The Board commences a suspension, removal, or prohibition action under this subpart with the issuance, and service upon a institution-affiliated party, of a notice of suspension from office, or order of removal from office, or notice or order of prohibition from participation in the financial institution's affairs. Such a notice or order shall indicate the basis for the suspension, removal, or prohibition and shall inform the institution-affiliated party of the right to request in writing, within 30 days of service of the notice or order, an opportunity to show at an informal hearing that continued service to, or participation in the conduct of the affairs of, the financial institution does not and is not likely to pose a threat to the interests of the financial institution's depositors or threaten to impair public confidence in the financial institution. Failure to file a timely request for an informal hearing shall be deemed to be a waiver of the right to request such a hearing. A notice of suspension or prohibition shall remain in effect until the criminal charge upon which the notice is based is finally disposed of or until the notice is terminated by the Board.

(c) *Service.* The notice or order shall be served upon the financial institution concerned, whereupon the institution-affiliated party shall immediately cease service to the financial institution or further participation in any manner in the conduct of the affairs of the financial institution. A notice or order of suspension, removal, or prohibition may be served by any of the means authorized for service under § 263.11(c)(2) of subpart A.

§ 263.72 Request for informal hearing.

An institution-affiliated party who is suspended or removed from office or prohibited from participation in the institution's affairs may request an informal hearing within 30 days of service of the notice or order. The request shall be filed in writing with the Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551. The request shall state with particularity the relief desired and the grounds therefor and shall include, when available, supporting evidence in the form of affidavits. If the institution-affiliated party desires to present oral testimony or witnesses at the hearing, the institution-affiliated party must include a request to do so with the request for informal hearing. The request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony.

§ 263.73 Order for informal hearing.

(a) *Issuance of hearing order.* Upon receipt of a timely request for an informal hearing, the Secretary shall promptly issue an order directing an informal hearing to commence within 30 days of the receipt of the request. At the request of the institution-affiliated party, the Secretary may order the hearing to commence at a time more than 30 days after the receipt of the request for hearing. The hearing shall be held in Washington, DC, or at such other place as may be designated by the Secretary, before presiding officers designated by the Secretary to conduct the hearing. The presiding officers normally will include representatives from the Board's Legal Division and the Division of Banking Supervision and Regulation and from the appropriate Federal Reserve Bank.

(b) *Waiver of oral hearing.* A institution-affiliated party may waive in writing his or her right to an oral hearing and instead elect to have the matter determined by the Board solely on the basis of written submissions.

(c) *Hearing procedures.* (1) The institution-affiliated party may appear at the hearing personally, through counsel, or personally with counsel. The institution-affiliated party shall have the right to introduce relevant written materials and to present an oral argument. The institution-affiliated party may introduce oral testimony and present witnesses only if expressly authorized by the Board or the Secretary. Except as provided in § 263.11, the adjudicative procedures of the Administrative Procedure Act (5 U.S.C. 554–557) and of subpart A of this part shall not apply to the informal hearing ordered under this subpart unless the Board orders that subpart A of this part applies.

(2) The informal hearing shall be recorded and a transcript shall be furnished to the institution-affiliated party upon request and after the payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officers. The presiding officers may ask questions of any witness.

(3) The presiding officers may order the record to be kept open for a reasonable period following the hearing (normally five business days), during which time additional submissions to the record may be made. Thereafter, the record shall be closed.

(d) *Authority of presiding officers.* In the course of or in connection with any proceeding under this subpart, the Board or the presiding officers are authorized to administer oaths and affirmations, to take or cause to be taken depositions, to issue, quash or modify subpoenas and subpoenas duces tecum, and, for the enforcement thereof, to apply to an appropriate United States district court. All action relating to depositions and subpoenas shall be in accordance with the rules provided in §§ 263.34 and 263.53.

(e) *Recommendation of presiding officers.* The presiding officers shall make a recommendation to the Board concerning the notice or order of suspension, removal, or prohibition within 20 calendar days following the close of the record on the hearing.

§ 263.74 Decision of the Board.

(a) Within 60 days following the close of the record on the hearing, or receipt of written submissions where a hearing has been waived, the Board shall notify the institution-affiliated party whether the notice of suspension or prohibition will be continued, terminated, or otherwise modified, or whether the order of removal or prohibition will be rescinded or otherwise modified. The notification shall contain a statement of the basis for any adverse decision by the Board. In the case of a decision favorable to the institution-affiliated party, the Board shall take prompt action to rescind or otherwise modify the order of suspension, removal or prohibition.

(b) In deciding the question of suspension, removal, or prohibition under this subpart, the Board shall not rule on the question of the guilt or innocence of the individual with respect to the crime with which the individual has been charged.

Subpart E—Procedures for Issuance and Enforcement of Directives To Maintain Adequate Capital

§ 263.80 Purpose and scope.

This subpart establishes procedures under which the Board may issue a directive or take other action to require a state member bank or a bank holding company to achieve and maintain adequate capital.

§ 263.81 Definitions.

(a) *Bank holding company* means any company that controls a bank as defined in section 2 of the BHCA, 12 U.S.C. 1841, and in the Board's Regulation Y (12 CFR 225.2(b)) or any direct or indirect subsidiary thereof other than a bank subsidiary as defined in section 2(c) of the BHCA, 12 U.S.C. 1841(c), and in the Board's Regulation Y (12 CFR 225.2(a)).

(b) *Capital Adequacy Guidelines* means those guidelines for bank holding companies and state member banks contained in appendix A and D to the Board's Regulation Y (12 CFR part 225), and in appendix A to the Board's Regulation H (12 CFR part 208), or any succeeding capital guidelines promulgated by the Board.

(c) *Directive* means a final order issued by the Board pursuant to ILSA (12 U.S.C. 3907(b)(2)) requiring a state member bank or bank holding company to increase capital to or maintain capital at the minimum level set forth in the Board's Capital Adequacy Guidelines or as otherwise established under procedures described in § 263.85 of this subpart.

(d) *State member bank* means any state-chartered bank that is a member of the Federal Reserve System.

§ 263.82 Establishment of minimum capital levels.

The Board has established minimum capital levels for state member banks and bank holding companies in its Capital Adequacy Guidelines. The Board may set higher capital levels as necessary and appropriate for a particular state member bank or bank holding company based upon its financial condition, managerial resources, prospects, or similar factors, pursuant to the procedures set forth in § 263.85 of this subpart.

§ 263.83 Issuance of capital directives.
